CRP is a two-semester program (SOCY2254 and SOCY2255) offering leadership, research, and public policy training for students interested in working with Latino, Asian American, and/or African Diaspora communities. In fall, students in SOCY2254 learn the process of community- based research and its methodologies, and begin to design a proposal for an independent study for spring. In spring, students sign up for SOCY2255 in conjunction with a Readings and Research to conduct their projects. The spring seminar complements the R&R serving as a forum for students to discuss their research and continue to develop their oral presentation skills.

Intro to African Arts and Visual Culture DANIELS, KYRAH M
Spring 2021
This course introduces students to the diversity of the African continent's art, architecture, and visual culture, spanning from ancient history to contemporary eras. Complementary themes such as the arts of nature and royalty, divination and masquerade, architecture and the body, and initiation and funerary rites will serve as guiding frameworks. Examining various artistic mediums (e.g., metal, wood, clay, beads, textiles, and the body), students will investigate how the arts have been used to build African empires, invent polyrhythmic music, resist colonialism and slavery, and open portals to the divine world. Ultimately, this class will encourage students to redefine their definitions of "art" and cultivate greater appreciation for Africa's vibrant aesthetics and dynamic visual cultures.

Black Church Black Protest ADKINS, AMEY
Spring 2021
"This ain't yo mama's civil rights movement." Then whose is it, what fuels it, and why? Taking the urgency of the #blacklivesmatter movement as a point of departure, this course considers the theological premise and political role of the "Black Church" in U.S. social movements for liberation. From the slave rebellions of the antebellum South to the religious icons of the Civil Rights Movement, this course focuses on reading and writing that centers African American religious experience--as well as understandings of morality, power, intersectional identity, and leadership--to contextualize the moral investments along the continuum of movements for black lives.

Blackness and the Senses: Nonsense, Common Sense, and the Sensible in the Black Tradition
CURSEEN, ALLISON S
Spring 2021
Epitomized in the common interrogative, "you feel?", the Black cultural tradition calls for embodied and relational ways of knowing. From Harriet Jacobs's sonic epistemologies in the garret and Du Bois's conception of double-conscious looking to Curtis Mayfield and Kendrick Lamar's meditations on darkness as the condition for beauty, growth, and "poetic justice," this course examines how black cultural production both enacts and calls for embodied and ecologically aware modes of perceiving--modes of perception that trouble, by troublingly perceiving underneath and beyond, the narrow parameters of looking, reading, and knowing that authorize U.S. constructions of freedom, progress, and personhood.

Capstone: Growing Up Ethnic in America SARR, AKUA
Spring 2021
In this seminar students will read writing that depicts a variety of experiences but suggest that what constitutes an American identity is far from settled. Ethnic difference has a profound effect on personal and social understandings of what it means to be an American. As we discuss the literature, students will be expected to share their own personal narratives of growing up-- stories of race, ethnicity, class, gender, faith, and nationality--and what it means to be American. Some of the writers we will read include: Jhumpa Lahiri, Amy Tan, Louise Erdrich, Chang Rae- Lee, Sherman Alexie, Sandra Cisneros, Junot Diaz, Edwidge Danticat, Mat Johnson, and Ta-Nehisi Coates.

African Refugees and the Politics of Belonging DUALE, MOHAMED
Spring 2021
This interdisciplinary course explores contemporary refugee and forced migration issues affecting people on and from the African continent. We look at the historical causes of displacement in Africa and focus on the politics of humanitarianism and belonging at the local, regional, and global levels. We examine displacement at three key sites: borders, refugee camps, and cities, and consider the lives of the displaced at these locales as well as the legacies of war and exile. We scrutinize the durable solutions of local integration, resettlement, and return, and trace the experiences of African refugees at different geographic scales and policy contexts.

Senior Seminar: Theorizing the Diaspora VATS, ANJALI S
Spring 2021
This course explores the discourses of diaspora by taking into account the origins, various meanings, multiple dimensions, cultural iterations, and restrictive limitations of the term. How does "the practice of diaspora" translate in different forms of cultural work such as music, film, and literature? How has diaspora shifted in the age of globalization? How can we use diaspora as an analytical tool for reading from a critical perspective? We will consider closely how diaspora is theorized, practiced, and represented in various forms of cultural production.
Therefore we will be taking an interdisciplinary approach reading across genre, medium, and disciplines.

Spanish Art History: From Al-Andalus to Picasso PELAEZ
Summer 2020
This course offers students a visual journey through the history of Spanish art, through the study and analysis of some of the most important works and artists, from the Islamic Art in Al- Andalus during the Middle Ages to present-day works. In each of the major eras, focus will be placed on the most outstanding artistic movements, especially on the painters that have played an essential role in bringing universal recognition to Spanish art. The course will be divided into two components--a theoretical and a practical part. The latter will be taught in the form of lectures offered at the classroom, and the former will consist of virtual cultural study activities, which will include virtual visits to some of the main monuments of the city of Toledo (Gothic Cathedral, Mosque of Bab-al Mardum, and the Toledo Synagogue) and Malaga (Picasso and Pompidou Museums); study of specific works of art at the National Archeological, Prado, Reina Sofia, Sorolla, and the Thyseen museum.

Living on the Water: Venetian Art, Architecture, and the Environment LEONE, STEPHANIE
Fall 2020
Why do humans build cities on the water? How does the environment affect the creation and development of cities? How do humans shape cities in intentional and inadvertent ways? The long and illustrious history of Venice provides a case study for probing these enduring questions. Students use methods of art and architectural history to examine how Venetians constructed the city in space and over time, how its coastal position influenced art and architecture, how Venetians expressed individual and collective identity through the built and natural environment, and what issues threaten the city today.

Mysteries and Visions: Early Medieval Art BERGER, PAMELA
Fall 2020
This course will illuminate the art of the so-called Dark Ages, from about 200 A.D. to around the year 1000 A.D. We will begin with the art of the waning classical world where, in addition to the burgeoning imagery of early Christianity, one finds the magico-religious art of the mystery cults of Cybele, Mithras, and Isis. We will look at the art of Byzantium, as well as that of Celtic-Early Christian Ireland, and go on to a study of the Carolingian renaissance. The last part of the course will be devoted to the apocalyptic millennial art of tenth century Spain.

ARTH225801
Modernism and the Avant-Garde, 1900-1945 LOTERY, KEVIN
Fall 2020
In this introductory course we will unpack some of the crucial episodes in art of the first half of the twentieth century, including Italian Futurism and manifesto writing, Dada and the invention of the readymade, the "marvelous" in Surrealist painting and photography, De Stijl and the pursuit of abstraction, the Harlem Renaissance and cross-disciplinarity, and revolutionary Mexican Muralism. We will explore how these avant-gardes sought to break down the barrier between the making of art and the making of life itself, inventing ways of sliding art into the everyday lives of people on the street, at home, and in the factory. Why, these artists ask again and again, must art be siloed in privileged gallery spaces that uphold repressive models of gender, class, and race? What new utopian futures are opened up when these spaces are negated or left behind?

ARTH334201
Age of Rembrandt CRAIG, KENNETH M
Fall 2020

In the seventeenth century the prosperous Dutch middle class became passionate art collectors. Wealthy merchants and tradesmen, and even butchers and bakers, bought art of the highest quality and displayed it proudly in their homes and shops. The artists living in the Netherlands responded by producing wonderful genre pictures, landscapes, still lifes and portraits as well as religious and mythological pictures for this, the first free market in the history of art. Among the artists we will study are Rembrandt, Jan Vermeer, Frans Hals.

ARTH431401
The Materials of Art and their Conservation NEWMAN, RICHARD
Fall 2020
Preservation of a (traditional) work of art requires understanding the materials of which it is made up, their condition, determining a course of treatment, then carrying out a treatment. In this seminar, means by which the materials of art can be understood (historical documents and examination in a conservation lab) will be explored. A major focus will be on how conservators determine the 'state of preservation' that is the desired outcome of a particular treatment (which is rarely how the work of art looked when it was newly created). Other topics are conservation controversies (including cleaning of the Sistine Chapel), 'authenticity' (and authentication) of works of art, and preservation of art that may include highly perishable materials, digital media, or performance. Although some of the subjects are technical, no background in college science is required.

ARTH431501
Gender and the Material World in China CAMPBELL, AURELIA
Fall 2020
This research seminar investigates the ways in which traditional gender roles were defined, shaped, represented, and challenged in Chinese art and architecture from about 1500 to the present. We will begin by examining male and female spaces, both actual and imagined, during the Ming and Qing dynasties. We will then turn our attention to how gender was performed with regard to work and labor, faith and piety, and love and sexuality during this time. Finally, we will explore how gender took on new meaning in the visual and material culture of the early twentieth century, the Maoist era, and now within contemporary art. Students will be introduced to critical scholarship in the field and will deepen their knowledge on one aspect of gender and art through an in-depth research project.

ARTH440701
Artists Design Exhibitions: Installation Art and Exhibit Making in Modern and Contemporary Art
LOTERY, KEVIN
Fall 2020
Our goal in this course will be to explore the history of exhibition design and installation in modern and contemporary art. We will investigate what happens when artists forego the production of discrete art objects in order to investigate the conditions of display, curation, or participation. A major problem will be formulating ways of analyzing works that make the experience of the viewer--immersed in sometimes bewildering, disorienting environments--the subject of art making. What sensory experiences are opened up once the privileged sense of sight is negated and we must feel our way through space by means of touch, hearing, or smell? And most importantly: Why and to what ends have artists, such as Marcel Duchamp, Louise Bourgeois, Yayoi Kusama, and David Hammons found it necessary to decenter, disorient, or unground spectators, making the experience of art uncomfortable, agitating, or unsettling?

ARTH441001
Photography's Hidden Histories ANDERSON, ASHER
Fall 2020
This seminar will examine photography beyond the Western canon. We will learn about histories that don't fit into typical surveys of the field, like the story of Hercules Florence, the little-known inventor of photography in Brasil; Miroslav Tichy, the reclusive dissident Czech artist who built his own cameras from scratch; and Zaida Ben-Yusuf, the fashionable genre-shifting former milliner in nineteenth-century New York. We will also consider attempts by American museums to collect and exhibit vernacular material coherently and, among others, movements based in China, West Africa, and South Asia. Through these topics, we will study the process by which canons are formed and read the work of scholars who have sought to revise the standard historical narrative for photography, including those who actively expand the canon and those who dismantle movement-based chronologies with their work.

Art History Courses: Spring 2021

ARTH110101
Art: Prehistoric to Middle Ages HARA, MARI Y
Spring 2021
A fundamental course for understanding the visual arts in the Western World: painting, sculpture, and architecture. Major monuments in the history of art will be discussed in historical and cultural context beginning with Paleolithic cave art through the art of the medieval period. This course will examine some of the ancient material from an archaeological perspective, but its main emphasis will be on style and meaning in art. Assignments will include museum visits and the study of significant works of art in Greater Boston.

Art: Renaissance to Modern Times CRAIG, KENNETH M; WUNSCH, OLIVER M
Spring 2021
This is the fundamental course for understanding the visual arts: painting, sculpture, and architecture. The major monuments in the history of art will be discussed in their historical and cultural context beginning with the Renaissance in Europe down to the art of our own time. The emphasis will be on style, materiality, and meaning in art. The class meets for two slide lectures per week. Assignments will include museum visits and study of significant works of art in Greater Boston.

ARTH172001
Animals in the Moral Imagination: Art and Empathy BURNS, JENNIFER L
Spring 2021
In this course, we will examine the presence of non-human animals in the history of art, starting with the early modern period in Western Europe and continuing into the present. We consider a series of cases, each of which represents a different "use" of animals by human artists. Yet, as strong visual presences with their own weight and substance, these fully-realized animal figures can draw us into new perspectives, as we ask: what are these animals experiencing? how do they see us? what do they want, call for, and demand? Our goal is to interpret these presences as an opening, from which we can articulate a counter discourse to modern Western philosophical narratives of human separation from, and superiority to, the other animals who inhabit the earth with us.

ARTH220601
Art and Myth in Ancient Greece HOFFMAN, GAIL L
Spring 2021
An introduction to the visual representation of the Greek gods and goddesses and to the artistic depiction of the primary cycles of Greek legends (e.g., the Trojan War and heroes such as Herakles, Perseus, and Theseus). This course focuses on how specific visual attributes serve to identify mythological characters and how the development of narrative in Greek art helped to relate their stories. Inquiring into the use of

mythological imagery to decorate temples, cult statues, and vases used primarily for the symposium (male drinking parties), we will consider the functions of mythological imagery within Greek society.

ARTH221001
We Wear the Mask DANIELS, KYRAH M
Spring 2021
In acts of mourning and in times of celebration, in solemn rites of passage and in elaborate performance, we decorate our faces and adorn our bodies. This course introduces students to the diversity of African and African Diaspora ritual arts traditions. We take a comparative approach to study traditions of masquerade in initiation ceremonies, street festivals, carnivals, and funerary rites of the Black Atlantic. Employing a material culture approach, we explore particularly "festive" sites such as the sacred city of Ile-Ife, Nigeria, which hosts festivals nearly 360 days of the year, a Caribbean carnival-capital in Jacmel, Haiti, and New Orleans traditions of Mardi Gras Indians and jazz funerals. Students will gain concrete skills in visual art analysis, research, and writing, becoming versed in the fields of art history, religion, anthropology, and museum studies. By the end of this course, students will gain familiarity with various definitions of parade, masquerade, funeral, and carnival, and analyze the role of masks and art implements in private ritual ceremony as well as public festival. In this way, students will develop a deeper understanding of the intricate relationship between sacred arts and religious ceremony.

ARTH223201
Northern Renaissance Art CRAIG, KENNETH M
Spring 2021
Painting in the Netherlands and in Germany in the fifteenth and sixteenth centuries. Emphasis will be on the style and the meaning of the great works of the masters of Northern Renaissance art such as Jan van Eyck, Hieronymus Bosch, Pieter Bruegel, and Albrecht Durer. We will discuss how the Renaissance in Northern Europe is different from the Italian Renaissance and what influences it absorbed from the Italians. We will consider the importance of printed pictures in this era when books and broadsheets assumed such a crucial role.

ARTH224101
Modern and Contemporary Chinese Art, 1911 to present CAMPBELL, AURELIA
Spring 2021
After the fall of the Qing dynasty in 1911 Chinese artists were confronted with the great challenge of expressing radically new concepts of modernity, national identity, and selfhood in visual terms. By the mid-twentieth century their attention had shifted to the problem of how best to represent the ideologies of the Communist party. Today, contemporary artists and architects respond to new social issues, such as political censorship, environmental destruction, and urban displacement. By covering a wide range of topics--including advertisements of the modern Shanghai woman, Socialist realist sculpture, Mao-era propaganda posters, and the politically-charged works of Ai Weiwei--this course introduces students to this extremely dynamic period in Chinese art history.

ARTH225001
Intro to African Arts and Visual Culture DANIELS, KYRAH M
Spring 2021
This course introduces students to the diversity of the African continent's art, architecture, and visual culture, spanning from ancient history to contemporary eras. Complementary themes such as the arts of nature and royalty, divination and masquerade, architecture and the body, and initiation and funerary rites will serve as guiding frameworks. Examining various artistic mediums (e.g., metal, wood, clay, beads, textiles, and the body), students will investigate how the arts have been used to build African empires, invent polyrhythmic music, resist colonialism and slavery, and open portals to the divine world. Ultimately, this class will encourage students to redefine their definitions of "art" and cultivate greater appreciation for Africa's vibrant aesthetics and dynamic visual cultures.

ARTH301001
Introduction to Contemporary Art LOTERY, KEVIN
Spring 2021
This course traces art since roughly 1975, focusing primarily on Europe and the Americas in a global context. Rather than a strict survey, it looks closely at the key techniques, ideas, and debates conditioning contemporary art. We begin with postmodernist takes on the "politics of representation" in appropriation-based photographic and video works of the 1980s, situating them in larger discourses of feminist and queer theory, postcolonial thought, and critical race theory. We end with the challenges of our present and near future: ecological crisis, perpetual war, neo-fascist formations, questions of privilege, and the technologization of everyday life. What strategies have artists invented to research, articulate, and intervene in these ongoing emergencies?

ARTH335601
Postwar: Art After 1945 LOTERY, KEVIN
Spring 2021
This course examines developments in the art of Europe and the Americas from 1945 to roughly 1975. We will focus on the major paradigms of this period: Abstract Expressionism, Neo-Dada and New Realism, Neo-concretism, Happenings, Pop, Minimalism and Post-minimalism, Arte povera, Fluxus, Conceptual Art, Feminist strategies, and Institutional Critique. Key questions include the following: How did artists of the postwar period participate in strategies of mourning and working through? How were notions of artistic skill--and of the artist's social function--reimagined in the postwar period? How did artists intervene in the construction of identity, whether along the lines of race, class, gender, or sexuality? And finally, what new roles did artists imagine for the spectator during this period?

ARTH336201
Photography and Modernism ANDERSON, ASHER
Spring 2021
After decades of constant change in photography's use and technology, at the turn of the twentieth century photographers began exploring the defining conditions of their quintessentially modern medium. Photography came into its own in the years that followed, as it became a primary medium of mass-communication and solidified its place among the fine arts. This course will trace the intertwined iterations of modernism in photography, focusing on European and American art movements. We will look at photographers including Alexander Rodchenko, Laszlo Moholy-Nagy, Alfred Stieglitz, Imogen Cunningham, Edward Weston, and Ansel Adams, and read both theoretical texts and artists' own writing about photography.

ARTH399901
Politics of Modern Middle Eastern Art ALQASIMI, SULTAN S
Spring 2021
In this course, we shall survey the political underpinnings of Arab art in the twentieth century, and the socio-political conditions that shaped cultural production in the region. Whether it is under the Ba'athist regimes of Syria and Iraq or under Egypt' Pan-Arabism championed by Gamal Abdel Nasser, painting and sculpture in addition to film and performance have been employed by various governments as a tool of soft power to propagate their policies to the public not only in their respective states but throughout the region and beyond. Despite this widespread government patronage of the arts, many artists have chosen to challenge their authorities through subversive movements and practices, which we will address at different moments in the semester. This course, through its focus on creative practices and strategic use of the arts, will attempt to shed light on an often neglected dimension of the modern history of the Arab World and other parts of the Middle East.

ARTH423301
Renaissance Women
ROSS, SARAH; LEONE, STEPHANIE
Spring 2021
This course examines the myriad forms of excellence women achieved during the Italian Renaissance (1400-1600). Even as Renaissance women labored as wives, mothers, nuns, and servants, they also created notable works of literature and art; patronized major projects; held jobs in the urban trades; shaped religious belief and practice; and even governed states. We will examine the work that Renaissance women did beyond "women's work," and analyze the conditions that shaped their professional no less than their personal lives. Our evidence encompasses both textual and material artifacts, including extraordinary objects housed at the MFA and other local repositories.

Art and Architecture of the Forbidden City CAMPBELL, AURELIA
Spring 2021
The Forbidden City palace in Beijing constituted the center of Chinese imperial power from the year 1420, when it was constructed, until the early twentieth century. Now

home to the Palace Museum, the Forbidden City attracts millions of tourists annually. In addition to examining the Forbidden City's magnificent halls, temples, gardens, and art objects, produced exclusively for the members of the Ming and Qing imperial courts, students in this course will discuss the shifting roles of the Forbidden City--as a monument, a symbolic form, a social space, a political entity, and a center of cultural production--over a period of approximately six centuries, including the Mao and post-Mao eras.

ARTH444401
Contested Monuments from the French Revolution to the Present WUNSCH, OLIVER M
Spring 2021
Is it possible to separate the political message of a monument from its artistic or historic value? What should be done with statues that glorify racism and injustice? Recent debates over Confederate monuments across the United States have made these questions impossible to ignore. This seminar approaches these debates from a historical perspective, examining case studies from the late eighteenth century to the present. The course begins with the French Revolution, when the term "vandalism" acquired its modern meaning, and when new notions of "cultural heritage" were developed in response. We then move on to the American Civil War, examining how its memorialization in sculpture varied across time and place. Subsequent case studies will include settler monuments in the American West, fascist monuments in Europe, and post-apartheid monuments in South Africa. For final projects, each student will write a position paper on a monument of their choice, using historical and visual evidence to justify a plan for the monument's future.

ARTH449807
Independent Study II DANIELS, KYRAH M
Spring 2021
This course may be given on an as-needed basis to allow students to study a particular topic that is not included in the courses offered.
Credits: 03
Room and Schedule: BY ARRANGEMENT;
Satisfies Core Requirement: None
Prerequisites: With permission of the Instructor. With permission of the Department.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD ELECT
Comments: None
Status: OPEN

ARTH449808
Independent Study II WUNSCH, OLIVER M
Spring 2021
This course may be given on an as-needed basis to allow students to study a particular topic that is not included in the courses offered.
Credits: 03
Room and Schedule: BY ARRANGEMENT;

Satisfies Core Requirement: None
Prerequisites: With permission of the Instructor. With permission of the Department.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD ELECT
Comments: None

ARTH449901
Advanced Independent Research None
Spring 2021
Morrissey College of Arts and Sciences students who want the challenge of working intensively on a scholarly or creative project of their own design during their senior year should consider applying for this program. The application deadline is usually in the late fall of a student's junior year. See the Morrissey College of Arts and Sciences section of this Catalog or contact the Dean's Office for a full description of the requirements.
Credits: 03
Room and Schedule: BY ARRANGEMENT; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: None **Cross-listed with:** None **Frequency:** Annually

Biology Courses: Summer 2020

BIOL130001
Anatomy and Physiology 1 NELSON, LISA M
Summer 2020
This course lays the foundation for the understanding of human anatomy and physiology. The first portion of the course covers cellular and molecular aspects of eukaryotic cell function: basic chemistry, macromolecules, cell structure, membrane transport, metabolism, gene expression, cell cycle control, and genetics. The course continues with the study of several organ systems.
Beginning with the Integument, which is followed by the Skeletal and Muscular Systems, and ending this first semester with the Nervous System. The cellular and molecular basis for the functions of these systems is an integral element of this portion of the course.
Credits: 03
Room and Schedule: ONLINE COURSE;;ASYNCHRONOUS;MAY 13 - JUN 26;
Satisfies Core Requirement: None
Prerequisites: None **Corequisites:** None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD ELECT
Comments: Does not satisfy the Natural Sciences Core requirement. This course is restricted to School of Nursing students. Other students may be admitted only during the course drop/add period on a seat-available basis.
Status: OPEN

BIOL131001
Anatomy and Physiology Lab 1 EBERHARD, JEREMY J
Summer 2020
Laboratory exercises intended to familiarize students with the various structures and principles discussed in BIOL1300 through the use of anatomical models, physiological experiments, and limited dissection.
Credits: 01
Room and Schedule: MAY 13 - MAY 28;
Satisfies Core Requirement: None
Prerequisites: None **Corequisites:** BIOL1300. **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD ELECT
Comments: Lab fee required. This course is restricted to School of Nursing students. Other students may be admitted only during the course drop/add period on a seat-available basis. **Status:** CANCELLED

BIOL131002
Anatomy and Physiology Lab 1 EBERHARD, JEREMY J
Summer 2020
Laboratory exercises intended to familiarize students with the various structures and principles discussed in BIOL1300 through the use of anatomical models, physiological experiments, and limited dissection.
Credits: 01
Room and Schedule: MAY 13 - MAY 28; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: BIOL1300. **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD ELECT
Comments: Lab fee required. This course is restricted to School of Nursing students. Other students may be admitted only during the course drop/add period on a seat-available basis. **Status:** CANCELLED

BIOL132001
Anatomy and Physiology 2 NELSON, LISA M
Summer 2020
This course is a continuation of BIOL1300/1310, with a primary emphasis on the physiology of the major body systems. Systems studied in this course include the sensory, endocrine, cardiovascular, lymphatic, immune, respiratory, digestive, urinary, and reproductive systems. While the physiological functions under normal conditions are emphasized, relevant disease or dysfunctional conditions are also discussed.
Credits: 03
Room and Schedule: ONLINE COURSE;;ASYNCHRONOUS;JUN 29 - AUG 14;
Satisfies Core Requirement: None
Prerequisites: None **Corequisites:** BIOL1330. **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD ELECT
Comments: None

BIOL133001
Anatomy and Physiology Lab 2 EBERHARD, JEREMY J
Summer 2020
A continuation of Anatomy and Physiology Lab 1.
Credits: 01
Room and Schedule: JUN 01 - JUN 18; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: BIOL1320. **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD ELECT
Comments: None
Status: CANCELLED

BIOL133002
Anatomy and Physiology Lab 2 EBERHARD, JEREMY J
Summer 2020
A continuation of Anatomy and Physiology Lab 1.
Credits: 01
Room and Schedule: JUN 01 - JUN 18; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: BIOL1320. **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD ELECT
Comments: None
Status: CANCELLED

BIOL148001
Pathogens and Plagues DUNN, MARY K
Summer 2020
Much of biological discovery has been centered around human disease and our quest for health and longevity. From the earliest observations regarding the human body, to the discovery of germs and the eventual technology guiding current treatments, human beings have sought to understand the physiological and cellular parameters associated with health. This course will examine human disease and epidemics through

the lens of pathogens, society and environmental influence. Students will learn basic concepts of cell structure, genetics, and evolution in the context of infectious diseases such as The Black Death, Tuberculosis, Influenza and AIDS. Not open to students who have completed BIOL1702
Credits: 03
Room and Schedule: MAY 13 - JUN 26; **Satisfies Core Requirement:** Natural Science **Prerequisites:** None
Corequisites: None **Cross-listed with:** None **Frequency:** Annually **Student Level:** CORE **Comments:** None **Status:** CANCELLED

BIOL220001
Microbiology for Health Professionals KIRMAIER, ANDREA
Summer 2020
This course is a study of the basic physiological and biochemical activities of bacteria and viruses. Emphasis will be placed on virulence factors and the mechanism by which a variety of microorganisms and viruses establish an infection. The use of anti-viral drugs and antibiotics, the host immune response to microbial infection, and the effectiveness of various vaccination strategies will also be discussed.
Credits: 03
Room and Schedule: ONLINE COURSE;;ASYNCHRONOUS;MAY 13 - JUN 26;
Satisfies Core Requirement: None **Prerequisites:** BIOL1300. BIOL1300-1320. **Corequisites:** None
Cross-listed with: None
Frequency: Annually
Student Level: UNDERGRAD ELECT
Comments: Does not satisfy the Natural Sciences Core Requirement. Intended only for School of Nursing students.
Status: OPEN

Student Level: UNDERGRAD ELECT
Comments: One two-hour laboratory period per week. Lab fee required.
Status: CANCELLED

BIOL230001
Biostatistics DACOSTA, JEFFREY M
Summer 2020
This course will introduce biology students to the basic statistical techniques that are used in conducting biological and medical research. The course is divided into four parts: (1) descriptive statistics (averages, variability); (2) probability and probability distributions (basic probability theory and the binomial, poison, and normal distributions); (3) statistical inference (parametric and non-parametric tests); and (4) relationships between variables (simple and multiple regression). Students will become familiar with a standard statistical analysis software package and will critique actual research papers.
Credits: 03
Room and Schedule: ONLINE COURSE;;ASYNCHRONOUS;MAY 13 - JUN 26;
Satisfies Core Requirement: None
Prerequisites: None **Corequisites:** None **Cross-listed with:** None **Frequency:** Annually

BIOL303001
Introduction to Physiology KENALEY, CHRISTOPHER P
Summer 2020
This course will offer a comprehensive exploration of fundamental life systems with a primary emphasis on human physiology. The chemical and physical processes common to all living organisms, including hemodynamics, respiration, circulation, acid/base regulation, synaptic transmission, kidney and muscle function will be discussed. Also included are related topics on development of the organism and functional aspects of the immune system in host defense strategies.
Credits: 03
Room and Schedule: ONLINE COURSE;;ASYNCHRONOUS;MAY 13 - JUN 26;
Satisfies Core Requirement: None
Prerequisites: BIOL2000. **Corequisites:** None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: This course is intended for Biology, Psychology, and Biochemistry majors and students in the pre-medical program seeking a broad overview of human physiology.

BIOL710101
Readings and Research HOFFMAN, CHARLES
Summer 2020
Intended for M.S. students who are acquiring a knowledge of the literature and experimental methods associated with their research projects under the guidance of a faculty research advisor. Participation in research group meetings, journal clubs, data clubs, etc., may be required. A maximum of six credits may be earned from this course.
Credits: 03
Room and Schedule: BY ARRANGEMENT;MAY 13 - AUG 20;
Satisfies Core Requirement: None
Prerequisites: None **Corequisites:** None **Cross-listed with:** None **Frequency:** Annually
Student Level: GRADUATE
Comments: None
Status: OPEN

BIOL806001
Departmental Seminar JOHNSON, WELKIN E
Summer 2020
This is a series of research seminars conducted by leading scientists, both from within the department and from other institutions, that are presented on a regular (usually weekly) basis.
Credits: 00
Room and Schedule: TH 3-5;MAY 14 - AUG 20; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: GRADUATE
Comments: None
Status: OPEN

BIOL888001
Interim Study None
Summer 2020
Required for Master's candidates who have completed all course requirements but have not taken comprehensive examinations. Also for Master's students (only) who have taken up to six credits of Thesis Seminar, but have not yet finished writing their thesis.
Credits: 00
Room and Schedule: BY ARRANGEMENT;MAY 13 - AUG 20;
Satisfies Core Requirement: None
Prerequisites: None **Corequisites:** None **Cross-listed with:** None **Frequency:** Annually
Student Level: GRADUATE
Comments: None
Status: OPEN

BIOL991101
Doctoral Continuation None
Summer 2020
All students who have been admitted to candidacy for the Ph.D. degree are required to register and to pay the fee for doctoral continuation during each semester of their candidacy. Doctoral Continuation requires a commitment of at least 20 hours per week working on the dissertation.
Credits: 00
Room and Schedule: BY ARRANGEMENT;MAY 13 - AUG 20;
Satisfies Core Requirement: None
Prerequisites: None **Corequisites:** None **Cross-listed with:** None **Frequency:** Annually
Student Level: GRADUATE
Comments: None

Biology Courses: Fall 2020

BIOL110001
General Biology
ANNUNZIATO, ANTHONY T; SEYFRIED, THOMAS N
Fall 2020
Designed for non-science majors who desire an introduction to cell and molecular biology, this course is also suggested for students who may be interested in the Biology major but lack sufficient preparation to enroll directly into BIOL 2000. Topics include the chemistry of life; biological membranes; cellular metabolism; cell structure; cell division; DNA replication/RNA transcription; protein synthesis; genetics/evolution. Lectures include discussions of the scientific method and current applications of biological investigations. Note: this course does not fulfill any requirement for the biology major, biochemistry major, or the pre-medical program.
Credits: 03
Room and Schedule: M W F 11;ONLINE;SYNCHRONOUS; **Satisfies Core Requirement:** Natural Science **Prerequisites:** None
Corequisites: None **Cross-listed with:** None **Frequency:** Annually **Student Level:** CORE
Comments: This course does not fulfill any requirement for the biology major, biochemistry major, or the pre-medical program.
Status: CLOSED

BIOL121001
Teaching the Biosphere HAKE, LAURA E
Fall 2020
TBD
Credits: 03
Room and Schedule: HIGGINS HALL 275,M W F 10; **Satisfies Core Requirement:** None **Prerequisites:** None

BIOL200001

Molecules and Cells
TAGHIAN, DANIELLE; CHILES, THOMAS
Fall 2020
Foundational course required for Biology majors that introduces students to living systems at the molecular and cellular level of organization. Topics introduced in this course include basic cellular biochemistry, gene regulation, cellular organization and metabolism, and cell signaling and genetics.
Credits: 03
Room and Schedule: M W F 10;ONLINE;SYNCHRONOUS;
Satisfies Core Requirement: Natural Science
Prerequisites: CHEM1109. May be taken concurrently or equivalent or permission of the department.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually **Student Level:** CORE **Comments:** None **Status:** OPEN

BIOL201002
Ecology and Evolution OLINS, HEATHER C
Fall 2020
Foundational course required for Biology majors with a focus on the ecology and resilience of living systems across all levels of spatial scales. Topics introduced in this course include evolution, population dynamics, behavioral ecology, ecosystems, co-evolution, and human ecology.
Credits: 03
Room and Schedule: ONLINE;ASYNCHRONOUS; **Satisfies Core Requirement:** Natural Science **Prerequisites:** None
Corequisites: None **Cross-listed with:** None **Frequency:** Annually **Student Level:** CORE **Comments:** None **Status:** OPEN

BIOL204001
Investigations in Molecular Cell Biology Lab WARNER, DOUGLAS M; JENSEN, KARI
Fall 2020
A 3-credit laboratory course designed to introduce students to the core techniques and experimental strategies of modern molecular cell biology within the context of an original research investigation. Students will learn to construct testable hypotheses, design experiments, and critically analyze experimental results. During the course of their investigations, students will gain proficiency in microbial cell culture, molecular cloning, genetic analysis, and molecular characterization. Students will also gain proficiency in scientific communication and the use of biological databases.
Credits: 03
Room and Schedule: HIGGINS HALL 370,M W 12-2 50;HYBRID;
Satisfies Core Requirement: None **Prerequisites:** BIOL2000 AND CHEM1111. **Corequisites:** None
Cross-listed with: None
Frequency: Annually
Student Level: UNDERGRAD ELECT
Comments: Lab fee required.
Status: CLOSED

BIOL204002
Investigations in Molecular Cell Biology Lab WARNER, DOUGLAS M; JENSEN, KARI
Fall 2020
A 3-credit laboratory course designed to introduce students to the core techniques and experimental strategies of modern molecular cell biology within the context of an original research investigation. Students will learn to construct testable hypotheses, design experiments, and critically analyze experimental results. During the course of their investigations, students will gain proficiency in microbial cell culture, molecular cloning, genetic analysis, and molecular characterization. Students will also gain proficiency in scientific communication and the use of biological databases.
Credits: 03
Room and Schedule: HIGGINS HALL 380,M W 12-2 50;HYBRID;
Satisfies Core Requirement: None **Prerequisites:** BIOL2000 AND CHEM1111. **Corequisites:** None

BIOL204004
Investigations in Molecular Cell Biology Lab WARNER, DOUGLAS M; JENSEN, KARI
Fall 2020
A 3-credit laboratory course designed to introduce students to the core techniques and experimental strategies of modern molecular cell biology within the context of an original research investigation. Students will learn to construct testable hypotheses, design experiments, and critically analyze experimental results. During the course of their investigations, students will gain proficiency in microbial cell culture, molecular cloning, genetic analysis, and molecular characterization. Students will also gain proficiency in scientific communication and the use of biological databases.
Credits: 03
Room and Schedule: HIGGINS HALL 370,M W 4 30-7 30;HYBRID;
Satisfies Core Requirement: None **Prerequisites:** BIOL2000 AND CHEM1111. **Corequisites:** None
Cross-listed with: None
Frequency: Annually
Student Level: UNDERGRAD ELECT
Comments: Lab fee required.
Status: CLOSED

BIOL204005
Investigations in Molecular Cell Biology Lab WARNER, DOUGLAS M; JENSEN, KARI
Fall 2020
A 3-credit laboratory course designed to introduce students to the core techniques and experimental strategies of modern molecular cell biology within the context of an original research investigation. Students will learn to construct testable hypotheses, design experiments, and critically analyze experimental results. During the course of their investigations, students will gain proficiency in microbial cell culture, molecular cloning, genetic analysis, and molecular characterization. Students will also gain proficiency in scientific communication and the use of biological databases.

BIOL220001
Microbiology for Health Professionals DUNN, MARY K
Fall 2020
This course is a study of the basic physiological and biochemical activities of bacteria and viruses. Emphasis will be placed on virulence factors and the mechanism by which a variety of microorganisms and viruses establish an infection. The use of anti-viral drugs and antibiotics, the host immune response to microbial infection, and the effectiveness of various vaccination strategies will also be discussed.
Credits: 03
Room and Schedule: M W F 1;ONLINE;SYNCHRONOUS;
Satisfies Core Requirement: None **Prerequisites:** BIOL1300. BIOL1300-1320. **Corequisites:** None
Cross-listed with: None
Frequency: Annually
Student Level: UNDERGRAD ELECT
Comments: Does not satisfy the Natural Sciences Core Requirement. Intended only for School of Nursing students.
Status: OPEN

BIOL221001
Microbiology for Health Professionals Laboratory SCHEINTAUB, HILARY
Fall 2020
Exercises in this laboratory course deal with aseptic techniques, microbial cultivation and growth characteristics, staining and bacterial isolation techniques, differential biochemical tests, identification of unknown bacterial species, and testing effectiveness of antimicrobial agents.
Credits: 01
Room and Schedule: HIGGINS HALL 380,F 11-12 50;HYBRID;

BIOL230001
Biostatistics DACOSTA, JEFFREY M
Fall 2020
This course will introduce biology students to the basic statistical techniques that are used in conducting biological and medical research. The course is divided into four parts: (1) descriptive statistics (averages, variability); (2) probability and probability distributions (basic probability theory and the binomial, poison, and normal distributions); (3) statistical inference (parametric and non-parametric tests); and (4) relationships between variables (simple and multiple regression). Students will become familiar with a standard statistical analysis software package and will critique actual research papers.

BIOL303001
Introduction to Physiology KENALEY, CHRISTOPHER P
Fall 2020
This course will offer a comprehensive exploration of fundamental life systems with a primary emphasis on human physiology. The chemical and physical processes common to all living organisms, including hemodynamics, respiration, circulation, acid/base regulation, synaptic transmission, kidney and muscle function will be discussed. Also included are related topics on development of the organism and functional aspects of the immune system in host defense strategies.
Credits: 03
Room and Schedule: ONLINE;ASYNCHRONOUS; **Satisfies Core Requirement:** None **Prerequisites:** BIOL2000.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: This course is intended for Biology, Psychology, and Biochemistry majors and students in the pre-medical program seeking a broad overview of human physiology.
Status: OPEN

BIOL304001
Cell Biology BURGESS, DAVID R
Fall 2020
This course is designed to provide students with a strong foundation in the molecular biology of the cell. Topics covered in the course include cellular biochemistry, regulation of gene expression, subcellular organization, regulation of the cell cycle, membrane trafficking, cell- substrate interactions, cytoskeleton, cancer, and cell signaling. It serves as excellent preparation for more advanced courses in cell biology, molecular biology, developmental biology, and genetics.
Credits: 03

BIOL314001
Experimental Methods in Organismal Biology KENALEY, CHRISTOPHER P
Fall 2020
Organismal biology is the study of living systems of all scales that shape the structure, function, ecology, and evolution of individual organisms. Experiments that elucidate how organisms respond to biotic and abiotic environmental stimulus over broad time scales--from changes in behavior to adaptation--are crucial to understanding biological diversity. In this course we'll explore the concepts and analytical tools that frame experimental research in organismal biology. Through group projects and active learning exercises, students will first make hypotheses concerning how organisms respond in time, space, and behavior to changes in environment and then design experiments and instruments that produce data to evaluate these hypotheses. Topics covered will include reconstructing phylogenetic history and the evolution of organismal form and function, evaluating form-function relationships, and the correlates of spatial and temporal distribution of organisms. In addition, the development of an analytical toolbox--specifically, learning the principles of data science and statistical analysis--is a central theme of this course.
Credits: 03

BIOL403001
Deep Sea Biology OLINS, HEATHER C
Fall 2020
Roughly 80% of habitable space on this planet is in the ocean below 1000 meters where sunlight never reaches. In this course we will dive into this rarely visited habitat that occupies the majority of our biosphere. We will take an interdisciplinary approach, as studying the deep requires the integration of geology, chemistry, ecology, physiology, and engineering. We will investigate fundamental aspects of biology such as how organisms adapt to challenges posed by their environment. Students will also gain an appreciation for how much of the planet remains unexplored and learn how scientists study the inaccessible ecosystems of the deep.

Virology
EBERHARD, JEREMY J

Fall 2020
This course will consider eukaryotic DNA and RNA viruses that are important in human disease. Basic principles of virus structure, host cell entry and the molecular biology of virus life cycles will be considered in the context of infectious disease. Viruses to be examined include Influenza, cancer-related viruses such as the Human Papilloma Virus, HIV, and emerging viruses such as Ebola and the hantaviruses. The host immune response to viral infection and the effectiveness of various vaccination strategies will also be discussed.

BIOL420001
Introduction to Bioinformatics CLOTE, PETER G
Fall 2020
Bioinformatics is an emerging field at the intersection of biology, mathematics, and computer science. It harnesses the power and speed of computers to analyze the molecules essential for life. This introductory course requires that students have a basic understanding of molecular biology, genetics, and the Internet, but it does not require extensive background in mathematics or programming. Students will learn bioinformatic tools from the public domain, public databases, and simple programming tasks in PYTHON.

BIOL422001
Research in Molecular Cell Biology DUNN, REBECCA K
Fall 2020
An advanced project laboratory course for hands-on training in the experimental techniques of molecular biology under faculty supervision. In addition to formal lab training and discussions, students will have access to the lab outside class hours to work on projects intended to produce publication quality data. The research project will focus on the phenotypes and branched proteins that results from induced expression of ubiquitin-like proteins in budding yeast.
Methods taught may include: DNA cloning techniques, DNA sequencing, polymerase chain reaction, metal chelate chromatography, SDS-PAGE, and Western blotting. This course is ideal for students who desire a solid introduction to research in molecular/cellular biology through practical training.

BIOL426001
Human Anatomy DIBENEDETTO, LYNN M
Fall 2020
In this course, students will explore and compare the form and function of representative members of the five vertebrate classes. Evolutionary similarities and differences in form and function will be investigated, as will both the selective pressures, and non-selective constraints that have contributed to vertebrate structure. The course will conceptually integrate vertebrate anatomy with developmental biology, evolutionary biology, and ecology, and will provide skills valuable to careers in a range of biological disciplines, including molecular cell biology, medicine, evolutionary biology, and ecology.

Prerequisites: BIOL2000. **Corequisites:** BIOL4260. **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: Lab fee required.
Status: OPEN

BIOL432001
Developmental Biology HAKE, LAURA E
Fall 2020
Developmental biology is in the midst of a far-reaching revolution that profoundly affects many related disciplines, including evolutionary biology, morphology, and genetics. The new tools and strategies of molecular biology have begun to link genetics and embryology and to reveal an incredible picture of how cells, tissues, and organisms differentiate and develop. This course describes both organismal and molecular approaches, which lead to a detailed understanding of (1) how it is that cells containing the same genetic complement can reproducibly develop into drastically different tissues and organs, and (2) the basis and role of pattern information in this process.
Credits: 03
Room and Schedule: HIGGINS HALL 225,T TH 1 30*;
Satisfies Core Requirement: None
Prerequisites: BIOL2040. And additional coursework in molecular cell biology (such as BIOL3040, BIOL4140, BIOL4400).
Corequisites: None
Cross-listed with: None
Frequency: Annually
Student Level: UNDERGRAD-MAJORS
Comments: None
Status: OPEN

BIOL435001
Biological Chemistry FOLKER, ERIC S
Fall 2020
This course is designed to introduce biology and biochemistry majors to the subject with an emphasis on understanding the biochemical principals that are crucial to biological function at the molecular, cellular, and organismal levels. The material includes: (1) the structure and chemistry of biomolecules, including amino acids, proteins, lipids, carbohydrates, and nucleic acids; (2) the key metabolic pathways and enzymology involved in the synthesis/degradation of carbohydrates; and (3) the cycling of energy through biological systems. Reference will be made to alterations in biochemical structures, processes, and pathways that relate to specific diseases.
Credits: 03
Room and Schedule: MERKERT CENTER 127,M W F 10;
Satisfies Core Requirement: None **Prerequisites:** CHEM2231 AND BIOL2000. **Corequisites:** None
Cross-listed with: None
Frequency: Annually
Student Level: UNDERGRAD-MAJORS
Comments: Students cannot get credit for BIOL4350 if they have already completed CHEM4461 Biochemistry 1. This course, together with BIOL4400, satisfies the one year requirement of basic biochemistry for the biochemistry major.
Status: OPEN

BIOL446001
Molecular Basis of Disease DUNN, REBECCA K
Fall 2020
This is an upper-level elective in which students will use the primary literature to study the cellular and molecular bases of diverse diseases. Topics will include aberrations in cellular structures, protein misfolding, protein glycation, oxidative damage, immune activation, and autoimmunity. Students will gain an understanding of the interconnections between basic biology and human disease and experience in reading scientific research articles and in presenting scientific work.
Credits: 03
Room and Schedule: FULTON HALL 415,M W F 12;
Satisfies Core Requirement: None
Prerequisites: BIOL2000. Additional course work in molecular cell biology or biochemistry required.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: None
Status: OPEN

BIOL457001
Principles of Immunology NYSTUEN, ARNE M
Fall 2020
An introductory survey of the immune system, this course will examine the development and deployment of immunity from a molecular and cellular perspective. Topics will include innate versus adaptive immunity, B and T cell activation, antibodies and antigens, and immunological memory. Modern experimental techniques and the immune system's roles in infectious disease, cancer and autoimmune disease will also be discussed.
Credits: 03
Room and Schedule: ONLINE;ASYNCHRONOUS;
Satisfies Core Requirement: None
Prerequisites: BIOL2040. And additional coursework in molecular cell biology (such as BIOL3040, BIOL4140, BIOL4400).
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: None
Status: CLOSED

BIOL480201
Research in Evolutionary Genomics DACOSTA, JEFFREY M
Fall 2020
This course will provide hands-on training in the collection and analysis of genome-scale data from non-model organisms. Students will learn good laboratory practices while preparing samples for next-generation DNA sequencing, which will be run in the department's core sequencing facility. Students will also learn basic Linux/Unix computational skills and several bioinformatics tools that will be applied in managing and analyzing the massive amounts of data generated by this sequencing technology. Through data analyses and reviews of the primary literature, students will gain exposure to modern methods in phylogenetics and population genetics. This course is recommended for students interested in advanced topics in genomics, bioinformatics, and evolution. BIOL3150 and BIOL4200 recommended.
Credits: 03
Room and Schedule: HIGGINS HALL 470,T TH 12-2 50;HYBRID;
Satisfies Core Requirement: None **Prerequisites:** BIOL2010 AND BIOL2040. **Corequisites:** None
Cross-listed with: None
Frequency: Annually
Student Level: UNDERGRAD-MAJORS
Comments: None
Status: CLOSED

BIOL481001
Research in Molecular Microbiology Lab WARNER, DOUGLAS M
Fall 2020
An advanced project laboratory course for hands-on training in the experimental techniques of molecular microbiology under faculty supervision. The course will focus on the extraction of genetic material and cloning of genes from a variety of different organisms in order to analyze functional homology of the methionine pathway. Methods taught include: DNA extraction, DNA sequencing, polymerase chain reaction, and the use databases for research and analysis.
Credits: 03
Room and Schedule: HIGGINS HALL 475,M W 1-3 50;HYBRID;
Satisfies Core Requirement: None
Prerequisites: BIOL2040. **Corequisites:** None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: Satisfies the advanced experience requirement for the Biology Major.
Status: CLOSED

BIOL483001
Research in Molecular Biology Lab FOFANA, ISMAEL B
Fall 2020
An advanced project laboratory course for hands-on training in the experimental techniques of molecular biology under faculty supervision. In addition to formal lab

training and discussions, students will have access to the lab outside class hours to work on projects intended to produce publication quality data. The research project will focus on environmentally-mediated gene expression in the organism Pseudomonas fluorescens. Methods taught include: DNA cloning techniques, DNA sequencing, polymerase chain reaction, and the use of national databases for research and analysis. It is ideal for students who desire a solid introduction to hypothesis- driven research in molecular biology through practical training.
Credits: 03
Room and Schedule: HIGGINS HALL 570,T TH 2-4 50;HYBRID;
Satisfies Core Requirement: None
Prerequisites: BIOL2040. **Corequisites:** None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: Satisfies the advanced experience requirement for the Biology major. Lab Fee required.
Status: CLOSED

BIOL489001
Investigations in Cellular Re-Programming CONNOLLY, TIMOTHY J
Fall 2020
Induced pluripotent stem cells, iPSCs, are cells that can be generated from adult cells such as skin fibroblasts. Once generated, iPSCs can be directed to differentiate into any cell and offer exciting models for disease research. This laboratory course will teach students the techniques used to reprogram adult murine fibroblasts into pluripotent stem cells and their subsequent differentiation into cardiac and neuronal lineages. Resulting cell lines will be characterized using molecular and cell biology techniques and students will work to create novel cellular disease models to progress particular disease research.
Credits: 03
Room and Schedule: HIGGINS HALL 575,T TH 1 30-4 25;
Satisfies Core Requirement: None
Prerequisites: BIOL2040. **Corequisites:** None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: This will be an advanced lab course for Biology and Biochemistry students. The course will be graded.
Status: CLOSED

BIOL490101
Tutorial in Biology ANNUNZIATO, ANTHONY T
Fall 2020
This course is a directed study that includes assigned readings and discussions of various areas of the biological sciences.

BIOL501001
Nobel Prize Winning Research in Medicine or Physiology BURGESS, DAVID R
Fall 2020
In this course we will discuss primary research literature in the fields of cell and developmental biology that have led to the award of the Nobel Prize. Each student will select a primary paper cited by the Nobel Foundation as justification for the award together with a supportive current review on the topic and present the background information to the class. The primary paper will be discussed at the following class period, with all students having defined responsibilities for discussion of the figures and data.
Credits: 02
Room and Schedule: M 3-4 50;ONLINE;SYNCHRONOUS;
Satisfies Core Requirement: None
Prerequisites: BIOL3040. With permission of the Instructor.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD & GRAD

Status: OPEN

BIOL507501
Emerging Therapeutics NYSTUEN, ARNE M
Fall 2020
This course will focus on novel therapeutic technologies. The first gene therapy has been approved in the U.S. following decades of development. Furthermore, many more gene and cell therapies are in development. The process of therapeutic development will be covered. New technologies will be discussed as well as the results of preclinical and clinical trials. Topics will be presented by the instructor and students and discussions will follow. Students will select their topics for presentation with direction and final approval from the instructor. We will develop presentation skills throughout the course.
Credits: 02
Room and Schedule: HIGGINS HALL 265,M 4 30-6 30;HYBRID;
Satisfies Core Requirement: None
Prerequisites: BIOL2000. Additional course work in molecular cell biology. Biochemistry and Physiology recommended.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually

Comments: None
Status: CLOSED

BIOL513001
Environmental Disruptors of Development HAKE, LAURA E
Fall 2020
More than 100,000 chemicals are manufactured and may end up as environmental pollutants. Some have toxic effects at high concentrations and protection plans are already in place.
However, embryonic, fetal, or neonatal exposure to low "safe" levels of numerous pollutants can
(1) induce subtle changes in developmental programs regulated by steroid hormones; (2) increase the reproductive, immune, metabolic, or cognitive disorders; and (3) increase the risk of adult-onset disorders (breast cancer, prostate cancer, diabetes, reduced fertility). This course will examine experiments regarding Environmental Endocrine Disruptors and consider how this work is important in the development of regulatory policy.
Credits: 03
Room and Schedule: HIGGINS HALL 225,T TH 10 30*;
Satisfies Core Requirement: None
Prerequisites: At least two of the following courses: BIOL3040, BIOL5060, BIOL4170, BIOL4510, BIOL4140, BIOL4350, BIOL4400 or instructor permission.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: Satisfies the advanced experience requirement for the Biology major.
Status: CLOSED

BIOL515001
Vaccine Development and Public Health FOFANA, ISMAEL B
Fall 2020
Despite more than three decades of research, the development of an efficacious HIV/AIDS vaccine remains elusive. Nonetheless, the quality of knowledge generated by HIV researchers is impressive. It is no surprise that potent Ebola virus and Zika virus vaccine candidates have been developed in a short time span. This class will discuss the difficulties and successes encountered with vaccine development (AIDS, tuberculosis, malaria, small-pox, measles, poliomyelitis, tetanus, Ebola, and Zika). At a time when questions have been raised about the link between childhood vaccination regimens and autism, we will discuss the ethics, economics, problems, and benefits of modern day vaccination.
Credits: 03
Room and Schedule: CARNEY HALL 202,T TH 10 30*;
Satisfies Core Requirement: None
Prerequisites: BIOL2000. And additional course work in molecular cell biology or biochemistry. BIOL4570 is recommended.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD & GRAD
Comments: None
Status: CLOSED

BIOL542001
Cancer As A Metabolic Disease
SEYFRIED, THOMAS N
Fall 2020
This seminar will review evidence showing that impaired cellular energy metabolism is the defining characteristic of nearly all cancers regardless of cellular or tissue origin. In contrast to normal cells, which derive most of their usable energy from oxidative phosphorylation, nearly all cancer cells become dependent on non-oxidative substrate level phosphorylations to meet energy demands. Evidence will be discussed supporting a general hypothesis that all hallmarks of cancer including genomic instability and metastasis can be linked to impaired mitochondrial function. A view of cancer as a metabolic disease will impact approaches to cancer management and prevention.
Credits: 03
Room and Schedule: T TH 9*;ONLINE;SYNCHRONOUS;
Satisfies Core Requirement: None
Prerequisites: BIOL2040 AND (BIOL3040 OR BIOL4400 OR BIOL4350 OR BIOL4140 OR

Biology Courses: Spring 2021

BIOL132001
Anatomy and Physiology 2 NELSON, LISA M
Spring 2021
This course is a continuation of BIOL1300/1310, with a primary emphasis on the physiology of the major body systems. Systems studied in this course include the sensory, endocrine, cardiovascular, lymphatic, immune, respiratory, digestive, urinary, and reproductive systems. While the physiological functions under normal conditions are emphasized, relevant disease or dysfunctional conditions are also discussed.
Credits: 03
Room and Schedule: T TH 12*;ONLINE;SYNCHRONOUS;
Satisfies Core Requirement: None
Prerequisites: None **Corequisites:** BIOL1330. **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD ELECT
Comments: None

BIOL144001
Sustaining the Biosphere HAKE, LAURA E
Spring 2021
Environmental problems and their solutions occur at the intersection of natural systems and the human systems that manipulate the natural world. The course will provide students with an integrated understanding of human systems that affect nature. Topics will include climate, air and water pollution, economics and urbanization, food and agriculture, population growth, biodiversity, waste management, and health and toxicology. Sustainability, personal responsibility, and a proactive approach to involvement in solutions to current environmental crises will be emphasized. This course is designed for students who are not majoring in biology or biochemistry.
Credits: 03
Room and Schedule: M W 1;ONLINE;SYNCHRONOUS; **Satisfies Core Requirement:** Natural Science **Prerequisites:** None
Corequisites: BIOL1501. **Cross-listed with:** None **Frequency:** Annually **Student Level:** CORE
Comments: Students must also register for the Sustaining the Biosphere Discussion Section (BIOL 1501).
Status: CLOSED

BIOL150101

BIOL170601
Understanding and Protecting Our Oceans in the Wake of Climate Change OLINS, HEATHER C; BIJANI, YASMIN
Spring 2021
The ocean, which covers more than 70 percent of the Earth's surface, is vital to human societies. Yet, we have better maps of Mars than our own sea floor. This course introduces students to what we know and don't know about marine biodiversity and ecosystem services. It then describes the effects of climate change on the ocean--including rising temperatures, acidification, and sea level rise--and the resulting impact on life within and outside of the ocean. We end discussing the importance of effective governance and explore innovative ways in which people are working to repair and protect the ocean.
Credits: 03
Room and Schedule: DEVLIN HALL 008,T TH 10 30*;T 6-7:25;REFLECTION ONLINE;SYNCHRONOUS;

BIOL200001
Molecules and Cells
WARNER, DOUGLAS M; DUNN, REBECCA K
Spring 2021
Foundational course required for Biology majors that introduces students to living systems at the molecular and cellular level of organization. Topics introduced in this course include basic cellular biochemistry, gene regulation, cellular organization and metabolism, and cell signaling and genetics.
Credits: 03
Room and Schedule: M W F 11;ONLINE;SYNCHRONOUS;
Satisfies Core Requirement: Natural Science
Prerequisites: CHEM1109. May be taken concurrently or equivalent or permission of the department. **Corequisites:** None **Cross-listed with:** None **Frequency:** Annually **Student Level:** CORE **Comments:** None **Status:** OPEN

BIOL200002
Molecules and Cells HAKE, LAURA E
Spring 2021
Foundational course required for Biology majors that introduces students to living systems at the molecular and cellular level of organization. Topics introduced in this course include basic cellular biochemistry, gene regulation, cellular organization and metabolism, and cell signaling and genetics.
Credits: 03

BIOL204001
Investigations in Molecular Cell Biology Lab WARNER, DOUGLAS M; JENSEN, KARI
Spring 2021
A 3-credit laboratory course designed to introduce students to the core techniques and experimental strategies of modern molecular cell biology within the context of an original research investigation. Students will learn to construct testable hypotheses, design experiments, and critically analyze experimental results. During the course of their investigations, students will gain proficiency in microbial cell culture, molecular cloning, genetic analysis, and molecular characterization. Students will also gain proficiency in scientific communication and the use of biological databases.
Credits: 03
Room and Schedule: HIGGINS 375,M W 12-2 50;HYBRID;
Satisfies Core Requirement: None **Prerequisites:** BIOL2000 AND CHEM1111. **Corequisites:** None

BIOL220001
Microbiology for Health Professionals DUNN, MARY K
Spring 2021
This course is a study of the basic physiological and biochemical activities of bacteria and viruses. Emphasis will be placed on virulence factors and the mechanism by which a variety of microorganisms and viruses establish an infection. The use of anti-viral drugs and antibiotics, the host immune response to microbial infection, and the effectiveness of various vaccination strategies will also be discussed.

BIOL304001
Cell Biology LASLO, MARA L
Spring 2021
This course is designed to provide students with a strong foundation in the molecular biology of the cell. Topics covered in the course include cellular biochemistry,

regulation of gene expression, subcellular organization, regulation of the cell cycle, membrane trafficking, cell- substrate interactions, cytoskeleton, cancer, and cell signaling. It serves as excellent preparation for more advanced courses in cell biology, molecular biology, developmental biology, and genetics.

BIOL405001
Evolution and Development MCMENAMIN, SARAH K
Spring 2021
We see incredible biodiversity on earth, and biologists are now learning how some of this diversity emerges. The field of Evolutionary Development (Evo Devo) asks how development can be modified during evolution to produce the incredible variation observed in Nature. How are animal body plans formed, and how can those plans be changed? How do developmental processes constrain adaptive changes in multicellular organisms? What genetic pathways has evolution targeted to modify phenotypes? The course will address these and other fundamental questions through readings, discussion, and case studies. Students will be introduced to the diversity of multicellular organisms and their evolutionary history, and some of the methods and interpretations of modern developmental, molecular, and evolutionary biology.
Credits: 03
Room and Schedule: FULTON HALL 511,T TH 10 30*;
Satisfies Core Requirement: None
Prerequisites: None **Corequisites:** None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS

BIOL409001
Virology
EBERHARD, JEREMY J
Spring 2021
This course will consider eukaryotic DNA and RNA viruses that are important in human disease. Basic principles of virus structure, host cell entry and the molecular biology of virus life cycles will be considered in the context of infectious disease. Viruses to be examined include Influenza, cancer-related viruses such as the Human Papilloma Virus, HIV, and emerging viruses such as Ebola and the hantaviruses. The host immune response to viral infection and the effectiveness of various vaccination strategies will also be discussed.
Credits: 03
Room and Schedule: MERKERT CENTER 127,T TH 9*;
Satisfies Core Requirement: None
Prerequisites: None

BIOL414001
Microbiology MOMENI, BABAK
Spring 2021
This course provides a foundation in molecular cell biology for biology majors, focusing on bacteria, viruses, immunology, and host/microbe relationships. Bacterial structure and function are addressed in terms of physiology, genetics, and biochemistry. Gene expression, replication, and transmission are examined in a variety of eukaryotic viruses. A review of the innate and adaptive phases of the immune response is presented with an emphasis on pathogen recognition, cellular communication, and lymphocyte development. The course concludes with selected topics on pathogenesis, epidemiology, and microbial ecology.
Credits: 03
Room and Schedule: T TH 12*;ONLINE;SYNCHRONOUS;
Satisfies Core Requirement: None
Prerequisites: BIOL2000. BIOL2040 is recommended and can be taken concurrently.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually

BIOL429001
Medical Biochemistry and Metabolism ALTINDIS, EMRAH
Spring 2021
Living organisms require constant input of energy and raw materials, acquired from their surroundings and harnessed by numerous metabolic pathways. An ever-increasing knowledge of the integration and regulation of these pathways has deepened our understanding of both health and disease. Using studies from recent research and articles in the popular press, and based on fundamental biochemistry, we will investigate various topics: the increase in obesity and diabetes, the metabolism of cholesterol, inborn errors of metabolism, the connection between how we eat and the global carbon cycle, the sense onsense of nutritional supplementation, and the evolution of metabolic pathways.
Credits: 03
Room and Schedule: HIGGINS HALL 225,T TH 9*; **Satisfies Core Requirement:** None **Prerequisites:** None

BIOL433001
Human Physiology DIBENEDETTO, LYNN M
Spring 2021
This course will examine the normal functions of a living human organism including its physical and chemical processes. An integrative approach will be used to explore the physiological processes of the nervous, respiratory, cardiovascular, renal, gastrointestinal, and endocrine systems and the relationships between them. In the computer based laboratory, which is a corequisite, students will investigate the functions of intact, living human organisms through real-time, hands-on data acquisition and analysis of the neuromuscular, cardiovascular, and respiratory systems using clinical measurements including EMG, EEG, cardiac electrophysiology, and spirometry.
Credits: 04

BIOL435001
Biological Chemistry MEYER, MICHELLE M
Spring 2021
This course is designed to introduce biology and biochemistry majors to the subject with an emphasis on understanding the biochemical principals that are crucial to biological function at the molecular, cellular, and organismal levels. The material includes: (1) the structure and chemistry of biomolecules, including amino acids, proteins, lipids, carbohydrates, and nucleic acids; (2) the key metabolic pathways and enzymology involved in the synthesis/degradation of carbohydrates; and (3) the cycling of energy through biological systems. Reference will be made to alterations in biochemical structures, processes, and pathways that relate to specific diseases.
Credits: 03
Room and Schedule: T TH 9*;ONLINE;SYNCHRONOUS;
Satisfies Core Requirement: None **Prerequisites:** CHEM2231 AND BIOL2000. **Corequisites:** None
Cross-listed with: None
Frequency: Annually
Student Level: UNDERGRAD-MAJORS
Comments: Students cannot get credit for BIOL4350 if they have already completed CHEM4461 Biochemistry 1. This course, together with BIOL4400, satisfies the one year requirement of basic biochemistry for the biochemistry major.
Status: OPEN

BIOL440001
Molecular Biology ANNUNZIATO, ANTHONY T
Spring 2021
This course will explore the structure, function, synthesis, and interaction of nucleic acids and proteins. The mechanisms involved in maintaining cellular genetic and epigenetic information, and in reading this "code" to generate specific patterns of gene expression, will be studied in detail. Topics include classic and newly-developed techniques for studying macromolecules; biotechnology; the functional organization of chromosomes; protein folding and modifications; DNA replication, repair, and supercoiling; RNA synthesis and processing; translation and the levels of gene regulation. Literature from the foundational investigations that led to our understanding of these processes and the current research in these areas will be presented.

BIOL444001
Vaccination and Immunity FOFANA, ISMAEL B
Spring 2021
TBD
Credits: 03
Room and Schedule: MCGUINN HALL 121,M W F 10;
Satisfies Core Requirement: None
Prerequisites: BIOL2000. Required: Additional course work in molecular cell biology. Recommended: Microbiology or related course work.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: None
Status: CLOSED

BIOL445001
Behavioral Ecology DACOSTA, JEFFREY M
Spring 2021
This course will examine the adaptive significance of behavior in an ecological context. Lectures and readings from the primary literature will review basic concepts and theory as well as model- based and experimental approaches to exploring questions in the field. Topics covered includes social behavior, reproductive behavior, life history strategies, optimal foraging, territoriality, co- evolution, and communication.
Credits: 03
Room and Schedule: HIGGINS HALL 225,M W F 2;HYBRID;
Satisfies Core Requirement: None
Prerequisites: BIOL2010 AND (BIOL3150 OR BIOL3190).

BIOL451001
Cancer Biology TAGHIAN, DANIELLE
Spring 2021
The onset of cancer occurs through a multi-step process that is accompanied by the deregulation of fundamental cellular processes, including cell cycle control, apoptosis, and angiogenesis. This course will provide an overview of the molecular and cellular changes associated with these processes and with the initiation, progression, and metastasis of tumors. Topics covered will include tumorigenesis, tumor viruses, oncogenes, tumor suppressor genes, genomic instability, and the current treatments for cancer. The class will draw on textbook and primary literature readings to enrich the current view of this complex disease.
Credits: 03
Room and Schedule: M W F 12;ONLINE;SYNCHRONOUS;

Satisfies Core Requirement: None
Prerequisites: BIOL2040. And additional coursework in molecular cell biology (such as BIOL3040, BIOL4140, or BIOL4400).
Corequisites: None **Cross-listed with:** None **Frequency:** Annually

Status: OPEN

BIOL454001
Neuroscience
NYSTUEN, ARNE M
Spring 2021
This class will cover molecular neuroscience and neuroanatomy in a clinical and pharmaceutical context. Anatomy topics will include the structure, function, and pathology for the brain and associated nerves and vasculature. Sensory and motor systems will be discussed with special attention to the visual system, where genetic disease and current therapeutic strategies will be discussed in depth. We will cover pathology associated with neurodegenerative disease and the current clinical trials within this disease group.
Credits: 03
Room and Schedule: ONLINE;ASYNCHRONOUS;
Satisfies Core Requirement: None
Prerequisites: BIOL2000. Additional coursework in molecular cell biology or biochemistry. Not open to students who have completed BIOL4590.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: None
Status: CLOSED

BIOL483001
Research in Molecular Biology Lab FOFANA, ISMAEL B
Spring 2021
An advanced project laboratory course for hands-on training in the experimental techniques of molecular biology under faculty supervision. In addition to formal lab training and discussions, students will have access to the lab outside class hours to work on projects intended to produce publication quality data. The research project will focus on environmentally-mediated gene expression in the organism Pseudomonas fluorescens. Methods taught include: DNA cloning techniques, DNA sequencing, polymerase chain reaction, and the use of national databases for research and analysis. It is ideal for students who desire a solid introduction to hypothesis- driven research in molecular biology through practical training.
Credits: 03
Room and Schedule: HIGGINS HALL 570,M W 1-3 50;HYBRID;
Satisfies Core Requirement: None
Prerequisites: BIOL2040.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: Satisfies the advanced experience requirement for the Biology major. Lab Fee required.
Status: CLOSED

BIOL487002
Research in Molecular Genetics Lab HOFFMAN, CHARLES
Spring 2021
The fission yeast Schizosaccharomyces pombe is an important model organism for the study of intracellular processes such as cell cycle control, transcription, DNA replication, chromosome maintenance, and signal transduction. This laboratory will involve original molecular genetic research using S. pombe that involves concepts related to forward genetics and gene manipulation. This course is recommended for students interested in pursuing graduate studies or careers in biomedical research.
Credits: 03
Room and Schedule: HIGGINS HALL 475,M W 1-3 50;HYBRID;
Satisfies Core Requirement: None
Prerequisites: BIOL2040 AND (BIOL3150 OR BIOL3190 OR BIOL4170). Or instructor permission.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: Satisfies the advanced experience requirement for the Biology major. Lab fee required.
Status: CLOSED

BIOL490101
Tutorial in Biology FOFANA, ISMAEL B
Spring 2021
This course is a directed study that includes assigned readings and discussions of various areas of the biological sciences.
Credits: 03

BIOL501001
Nobel Prize Winning Research in Medicine or Physiology BURGESS, DAVID R
Spring 2021
In this course we will discuss primary research literature in the fields of cell and developmental biology that have led to the award of the Nobel Prize. Each student will select a primary paper cited by the Nobel Foundation as justification for the award together with a supportive current review on the topic and present the background information to the class. The primary paper will be discussed at the following class period, with all students having defined responsibilities for discussion of the figures and data.
Credits: 02
Room and Schedule: M 3-5;ONLINE;SYNCHRONOUS;
Satisfies Core Requirement: None
Prerequisites: BIOL3040. With permission of the Instructor.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD & GRAD

Status: CLOSED

BIOL504001
Topics in Developmental Biology MCMENAMIN, SARAH K
Spring 2021
The field of molecular developmental biology asks: How do molecules and cells coordinate and function to produce organisms? How can these processes be modified in the context of disease and evolutionary change? With the goal of better understanding current research in the field of developmental biology, we will read primary literature focusing on a variety of techniques (molecular, cellular, genetic, biochemical) and numerous systems (tissue culture, mouse, fly, frog, zebrafish, and others). The course will focus on developing students' ability to comprehend and critically evaluate recent primarily literature, present scientific perspectives, and actively participate in scientific dialogue.
Credits: 02
Room and Schedule: HIGGINS HALL 275,TH 1-2 50;
Satisfies Core Requirement: None
Prerequisites: BIOL2040. Additional coursework in molecular cells biology required.

BIOL506001
Recombinant DNA Technology HOFFMAN, CHARLES
Spring 2021
This course will describe the theory and practice of recombinant DNA technology and its application within molecular biology research. Topics will include the cloning of genes from various organisms, plasmid construction, transcriptional and translational gene fusions, nucleic acid probes, site-directed mutagenesis, polymerase chain reaction, and transgenic animals. The goal of the course is to make the research-oriented student aware of the wealth of experimental approaches available through this technology.
Credits: 03
Room and Schedule: HIGGINS HALL 263,T TH 1 30*;
Satisfies Core Requirement: None
Prerequisites: BIOL2040. And additional coursework in molecular cell biology (such as BIOL3040, BIOL4140, or BIOL4400) or genetics (BIOL3150, BIOL3190, or BIOL4170) or instructor permission.

BIOL507101
Microbial Community Ecology MOMENI, BABAK
Spring 2021
Polymicrobial communities can cause harmful infections as pathogens or facilitate food digestion as resident microbiota. They also have industrial applications for waste remediation or biofuel production. We will examine examples of microbial communities with implications in health, environment, or industry. The course surveys relevant ecological theories and covers current tools and methodologies used for characterization and analysis of microbial communities.
Credits: 02
Room and Schedule: W 1-2 50;ONLINE;SYNCHRONOUS;
Satisfies Core Requirement: None
Prerequisites: BIOL2010. BIOL 2010 and 2014; BIOL 414 and a statistics course recommended.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD & GRAD
Comments: None

BIOL507501
Emerging Therapeutics NYSTUEN, ARNE M
Spring 2021
This course will focus on novel therapeutic technologies. The first gene therapy has been approved in the U.S. following decades of development. Furthermore, many more gene and cell therapies are in development. The process of therapeutic development will be covered. New technologies will be discussed as well as the results of preclinical and clinical trials. Topics will be presented by the instructor and students and discussions will follow. Students will select their topics for presentation with direction and final approval from the instructor. We will develop presentation skills throughout the course.
Credits: 02
Room and Schedule: HIGGINS HALL 275,M 4 30-6 30;
Satisfies Core Requirement: None
Prerequisites: BIOL2000. Additional course work in molecular cell biology. Biochemistry and Physiology recommended.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD & GRAD

BIOL510001

Microbiome and Human Disease ALTINDIS, EMRAH
Spring 2021
For thousands of years, humans have thought of themselves as single autonomous organisms. With new sequencing technologies and experiments, we are learning that the human microbiome and commensal organisms are an important aspect of host biology, and change the idea of who we really are. Recent data suggest that we are more than Homo sapiens, but a symbiotic-organism that is surrounded with trillions of microorganisms in all surfaces. Recent studies suggest that the human microbiome and commensal microbes have important roles in human health and disease. Indeed, the gut microbiota aid in normal digestion, metabolism of nutrients and drugs, and development of the gut and immune system. Reduced bacterial diversity, as well as alterations in the microbiota composition, have been associated not only with gastrointestinal disease, but also obesity, diabetes, and metabolic syndrome. Direct evidence now suggests that transfer of the microbiome can play a role in host phenotypes, homeostasis, behavior, and disease pathogenesis. Using current scientific literature and reviews, we will investigate the role of the microbiome in human health and disease. Students will make short presentations of the papers, and the class will discuss the methodology and findings of the papers.
Credits: 02
Room and Schedule: HIGGINS HALL 310,T 10 30-12 30;
Satisfies Core Requirement: None
Prerequisites: BIOL2000. BIOL2000 Molecules and Cells and additional course work in molecular cell biology. Microbiology and/or Immunology strongly recommended.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually

Comments: None
Status: CLOSED

BIOL523001
Immunity and Infectious Disease WILLIAMS, KENNETH C
Spring 2021
This course will focus on immune cells, the immune system's response to viral and bacterial infection and the pathogenesis resulting from these responses. Topics will include questions of self and non-self in immune responses, the role of mucosal immunity and gut flora in immune responses and pathogenesis, AIDS pathogenesis, vaccines, and cutting edge technological approaches to immune therapy. Reading materials will consist of a basic immunology text, classical primary papers, and research reports.
Credits: 03
Room and Schedule: HIGGINS HALL 265,T TH 10 30*;

BIOL538001
Topics in Biomechanics KENALEY, CHRISTOPHER P
Spring 2021
This course will explore the physical principles underlying biological processes and mechanisms including movement, feeding, architecture, and transport. Drawing on physics and mechanical engineering, the course will explore how organisms swim, fly, walk, and consume resources, how they respond to moving fluids, and the relationship between their size and design of mechanical systems. Underlying all these topics will be hands-on investigations of how biological materials (e.g., wood, muscle, bone, skin, etc.) influence the mechanical behavior of complex life forms. The course will prepare students for more in-depth explorations of other related disciplines including ergonomics, orthopedics, kinesiology, and sports medicine.
Credits: 03
Room and Schedule: CARNEY HALL 308,M W 1;
Satisfies Core Requirement: None
Prerequisites: BIOL3030. Familiarity with basic Newtonian physics and mechanics is recommended. **Corequisites:** None **Cross-listed with:** None **Frequency:** Annually

BIOL542001
Cancer As A Metabolic Disease SEYFRIED, THOMAS N
Spring 2021
This seminar will review evidence showing that impaired cellular energy metabolism is the defining characteristic of nearly all cancers regardless of cellular or tissue origin. In contrast to normal cells, which derive most of their usable energy from oxidative phosphorylation, nearly all cancer cells become dependent on non-oxidative substrate level phosphorylations to meet energy demands. Evidence will be discussed supporting a general hypothesis that all hallmarks of cancer including genomic instability and metastasis can be linked to impaired mitochondrial function. A view of cancer as a metabolic disease will impact approaches to cancer management and prevention.
Credits: 03
Room and Schedule: T TH 9*;ONLINE;SYNCHRONOUS;

BIOL543001
Genomics and Personalized Medicine CONNOLLY, TIMOTHY J
Spring 2021
Personalized medicine is based on the idea that each person's unique genome sequence can be used to predict risk of acquiring specific diseases, allowing for more informed choices about health. The students will be exposed to the scientific concepts and technologies empowering personalized medicine. Through lecture, research paper reading and discussion, students will understand how human genomic information has impacted current topics in biomedical research. Students will write a research paper focused on how genomic information has advanced understanding of a human disease and how translation of genomic information will impact treatment or disease detection in the future.
Credits: 03
Room and Schedule: STOKES HALL 101N,M W 3*;
Satisfies Core Requirement: None
Prerequisites: BIOL2040. And a genetics or genomics course. Additional coursework in biochemistry and molecular biology is strongly recommended.

Capstone Courses: Fall 2020

UNCP550001
Capstone: One Life, Many Lives WEISS, JAMES
Fall 2020
This course gives you the chance to review what you have made of your education and preview your long-term life commitments to work, relationships, community, and spirituality. We read fiction, psychology, sociology, and wisdom figures to find the deeper continuity underlying our many experiences. Students lead discussions, conduct interviews of working people, and cap off their Capstone by writing their own autobiography.
Credits: 03
Room and Schedule: TH 4 30-6 50;ONLINE;SYNCHRONOUS;
Satisfies Core Requirement: None

UNCP550101
Capstone: Authenticity and Human Development BRACHER, ELIZABETH R; DACEY, JOHN S
Fall 2020
The path to becoming a more authentic person is twofold: coming to know who you are and who you are not as well as sharing this information with others. As you progress along this path, you become more authentic and are rewarded for doing so. Why should you want to be more authentic? Misrepresenting yourself costs energy. More importantly, people just seem to know intuitively who is authentic and who is not. If you are, you will be seen as more trustworthy, more deserving of love, more skilled as a leader, and more likable. This course will help you to better recognize and improve on the areas of personal development called for in every Capstone course: your education up to now and in the future; your relationships; your role in society; your vocational callings and choice of career; and your spirituality. Assignments include group projects, personal projects, and lots of small and large group discussions.

Capstone: Life and Career Planning CAPALBO, ROBERT F
Fall 2020
This course provides an overview of life and career planning in the context of (1) career, (2) personal relationships, (3) spirituality, and (4) ethical decision making. Students are asked to develop autobiographical responses to a series of questions about their lives to find themes related to possible careers and relationship issues. Readings, cases, exercises, and guest lecturers will amplify those personal themes and common issues in life as we enter the twenty- first century. The integration of spirituality and ethical decision making into one's life will be addressed by readings on ethical perspectives and the students' written reflections.

Capstone: The Balancing Act OLIVIERI, SCOTT D
Fall 2020

College students have many competing demands: academics, friends, family, faith, service, and work all need attention. This just in--after college, it gets worse! This course begins with students reflecting on their commitments and choices up to now. Students will then establish personal priorities and learn strategies to become engaged in their future long-term commitments to career and community, while attending to family, friends, faith, personal well-being, and leisure. Readings will explore the changes ahead for young professionals balancing family, graduate school, and/or careers. The final assignment will be developing a personal road map to a full, meaningful, and balanced life.

Capstone: A Life Well Lived DECHIARA-QUENZER, DEBORAH
Fall 2020
This course engages students in serious reflection on what it means to have "a life well lived." It is advantageous to do this reflection at this time in your life, as it affords you time and opportunity to shape your life going forward. What kind of life do you hope to live? What will bring you peace and satisfaction--dare we say, even happiness? Students will be asked to examine themselves by looking both backwards and forwards in many dimensions of their lives (education, ethics, relationships, career, etc.) while learning what others have said about having a meaningful life.

Capstone: Desire and Discernment MULDOON, TIMOTHY P
Fall 2020
This course aims to help students review the process of their education and preview the process of making long-term commitments by taking a long, loving look at how we experience desire and how we act upon those desires to construct a life well lived. The course will first expose students to spiritual practices of discernment, rooted in the Ignatian and Benedictine spiritual traditions. Second, it will involve careful thinking about stories of discernment which involve the sorting and pruning of desire. Discussions will reflect on these stories, in order to help each other consider what they mean for our own lives.

UNCP554401
Capstone: Vision Quest: A Multicultural Approach MILLER, DOROTHY
Fall 2020
This course will use the Vision Quest, a Native American ritual for finding oneself, as a metaphor for students' four years at Boston College. Relating their own lives to the lives of the characters in the books, who have all gone on some variation of a quest, students will explore the ways their education and experiences at college have influenced their ideas of community, work, spirituality, and relationships, and have prepared them to face the great mystery of life ahead.
The main texts include *The Grass Dancer, The Life of Pi,* Song of Solomon, *The Bonesetter's*
Daughter, and *The House on Mango Street.* Films include *Thunderheart, The Hunting Ground,* and *The Whale Rider.* Personal reflection papers and class participation are a main component of this course.

Capstone: Leadership and Mindfulness WADDOCK, SANDRA A
Fall 2020
No matter what your major, you will participate in groups and organizations that will consistently ask or expect you to lead. The best leader is authentic, has integrity, is self- and other-aware, and acts with this awareness firmly in mind. Good leaders, that is, act mindfully with respect for the people and world around them. This course explores your development as a mindful focusing inward and outward, reflecting on where you have come from and where you are going, what type of world you want to live in, your relationships with others, and how you can be an effective leader.

UNCP555701
Capstone: Life, A Tightrope: Attaining Balance None
Fall 2020
Given that each of us is part nahr (fool) and part mensch (one worthy of respect), how do we achieve balance between the two? How do we answer Hillel's challenge: "If I am not for myself, who will be? If I am only for myself, what am I? If not now, when?" To carry on with BC's objective to Light the World, how do we develop/maintain our "inner light" as it pertains to family, relationships, vocation, community, faith, and avocation? We will confront these questions and consider the inputs that feed who we are and help to inform our lives.

Capstone: Adulting ARNOLD, KAREN
Fall 2020
Most college students in their early 20s feel neither fully adult nor fully competent in the tasks, responsibilities, and behaviors that are traditionally associated with grown-up life. In this class, students will take stock of their journey to adulthood so far and look ahead to what relationships, work, citizenship, and spirituality might look like in post-college life. Readings on the developmental psychology of young adulthood will be paired with popular media, exercises, and reflective writing to help students progress in their own "adulting" as they prepare to negotiate the transition out of college. Students may sign-up for this cross-listed course under UNCP Capstone or through the Lynch School ELHE department.

This course provides an overview of life and career planning in the context of (1) career, (2) personal relationships, (3) spirituality, and (4) ethical decision making. Students are asked to develop autobiographical responses to a series of questions about their lives to find themes related to possible careers and relationship issues. Readings, cases, exercises, and guest lecturers will amplify those personal themes and common issues in life as we enter the twenty- first century. The integration of spirituality and ethical decision making into one's life will be addressed by readings on ethical perspectives and the students' written reflections.

UNCP551101
Capstone: The Balancing Act OLIVIERI, SCOTT D
Spring 2021
College students have many competing demands: academics, friends, family, faith, service, and work all need attention. This just in--after college, it gets worse! This course begins with students reflecting on their commitments and choices up to now. Students will then establish personal priorities and learn strategies to become engaged in their future long-term commitments to career and community, while attending to family, friends, faith, personal well-being, and leisure. Readings will explore the changes ahead for young professionals balancing family, graduate school, and/or careers. The final assignment will be developing a personal road map to a full, meaningful, and balanced life.

Capstone: First Gen Success
GENTILELLA, DACIA J
Spring 2021
Where are we really living day to day? Are we holding onto our past? Are we planning for and overwhelmed by the future? What happened to the present? We will explore the particular challenges of first gen students including the trailblazing necessary to enter and thrive in college and the way in which their past can be seen as an accomplishment that informs their lives but doesn't hold them back from exploring the world in a fearless and unfolding way.

UNCP551401
Capstone: Growing Up Ethnic in America SARR, AKUA
Spring 2021
In this seminar students will read writing that depicts a variety of experiences but suggest that what constitutes an American identity is far from settled. Ethnic difference has a profound effect on personal and social understandings of what it means to be an American. As we discuss the literature, students will be expected to share their own personal narratives of growing up-- stories of race, ethnicity, class, gender, faith, and nationality--and what it means to be American. Some of the writers we will read include: Jhumpa Lahiri, Amy Tan, Louise Erdrich, Chang Rae- Lee, Sherman Alexie, Sandra Cisneros, Junot Diaz, Edwidge Danticat, Mat Johnson, and Ta-Nehisi Coates.

Capstone: Exploring Art, Exploring Self RUTLEDGE, DUSTIN L
Spring 2021
This course presents art as a means of personal development, encouraging students to appreciate not only art but also the capacities and self-knowledge art can stimulate. We will explore art by experiencing it, sharing it, discussing it, and writing about it. Artworks will represent various levels and periods (e.g., fine art, popular art, contemporary art, past art) and forms (e.g., photography, music, dance, writing, sculpture, painting, theatre). How can exploring art show us who we are? Artistic engagement will help us understand our experiences and goals, in education, relationships, spirituality, career, and society, preparing us to flourish.

UNCP551701
Capstone: Love and Indoctrination: A Foundation for the Rest of Your Life KAPLAN-MAXFIELD, THOMAS
Spring 2021
In our world of political spin and fake news, the surveillance state and social media, the pressure to separate what's real and valuable from what's fake and mere propaganda (another way of saying "lies") is paramount, and critical for figuring out how to live, practically, spiritually, intellectually, and psychologically.
In George Orwell's *1984,* the affair of Winston Smith and Julia threatens the entire structure of Big Brother. Why? What is it about love that threatens large systems based on indoctrination? In this course we will explore and develop working definitions of both *love* and *indoctrination* in order to differentiate them.

UNCP551801
Capstone: Working, Playing, Being STOREY, DAVID E
Spring 2021
The conventional wisdom is that BC student culture is "work hard, play hard." But what do we mean by "work" and "play" here? How do these implicit meanings reflect broader cultural forces? And do these meanings serve us well? Senior year is an exciting but anxious time, and this seminar is a chance for you to: (a) reflect on how your education has shaped you, and how you have shaped your education and (b) explore your goals, fears, hopes, and expectations around life post-graduation with a small group of peers. We will examine: (1) the meaning of, and relationship between, work and leisure in your own life; (2) how they have developed since your freshman year in light of your education at BC and; (3) how they figure into your vision of a fulfilling life.

Capstone: Boston College/Your Life BURNS, JOHN J
Spring 2021
This seminar will focus on the historical development of Boston College and the continually evolving interaction between its traditions and its students. Students will do archival research on some aspect of Boston College in which they have a personal interest and will record oral histories with faculty, administrators, and alumni who can describe the ambiance and personalities of different periods that have shaped the modern university. All students will write a series of reflective essays on their experience with Boston College traditions and the impact it has had on their own personal views of themselves, their pasts, and their futures.

UNCP553301
Capstone: Desire and Discernment MULDOON, TIMOTHY F
Spring 2021
This course aims to help students review the process of their education and preview the process of making long-term commitments by taking a long, loving look at how we experience desire and how we act upon those desires to construct a life well lived. The course will first expose students to spiritual practices of discernment, rooted in the Ignatian and Benedictine spiritual traditions. Second, it will involve careful thinking about stories of discernment which involve the sorting and pruning of desire. Discussions will reflect on these stories, in order to help each other consider what they mean for our own lives.

Capstone: Poets, Philosophers, and Mapmakers MCNELLIS, PAUL W
Spring 2021
We go through life with mental maps of reality in various degrees, implicit or explicit. A liberal arts education presupposes such a map of the intelligible world. Is it accurate? What does your map of reality look like? How has it changed since freshman year? The goal of the seminar is to help you see what kind of map you implicitly have now and to begin to ask what you want the map to look like ten years after graduation. How do you develop an open rather than closed map?

UNCP556501
Capstone: Moral of Story SULLIVAN, ETHAN A

Spring 2021
Hanging in Boston's Museum of Fine Arts is the magna opus of Paul Gauguin, "Where Do We Come From? What Are We? Where Are We Going?". Gauguin left family, friends, and a career in banking to flee to Tahiti, in search of life's meaning. "Where Do We Come From? What Are We? Where Are We Going?" is his ultimate representation of these philosophical questions. We will move through a different artistic medium--that of the short story--as we ask those same questions. We will examine complex plots and characters in the hopes of exploring our own stories.

Capstone: How We Decide LAMOUREUX, JEFFREY A
Spring 2021
Why did I eat at "White Mountain" at 11 p.m. last night? And how can my friends convince me to go to Cityside when I know I should be studying? In this seminar, we will focus on how the mind and brain function to produce the decisions we ourselves make. The class is open to students from all majors, and there is no science prerequisite. Throughout the semester, we will reflect on our own past decisions, and consider alternative decision making strategies for the future.

Chemistry Courses: Fall 2020

CHEM110501
Chemistry and Society I MORABITO, JOSEPH V
Fall 2020
This is a two-semester sequence with the emphasis during the first semester placed on basic chemical principles and their application to environmental issues. Topics covered include air and water pollution, global warming, ozone depletion, hazardous waste, and energy use and alternative energy sources. The goal of the course is to develop a knowledge base from which one can make intelligent decisions about local global environmental issues as well as formulate solutions to the ever-increasingly complex problems of today's technological society.

CHEM111105
General Chemistry Laboratory I WEERAPANA, ERANTHIE
Fall 2020
Laboratory required of all students enrolled in CHEM1109. One three-hour period per week. Experiments reflect and apply the principles learned in the lecture course. Computers are used to both acquire and analyze data. The semester concludes with a group project where students are required to design their own experiments to solve a problem.
Credits: 01
Room and Schedule: MERKERT CENTER 116,F 10-12 50;
Satisfies Core Requirement: None
Prerequisites: None
Corequisites: CHEM1109. CHEM1109.
Cross-listed with: None **Frequency:** Annually **Student Level:** CORE **Comments:** Lab fee required **Status:** OPEN

CHEM111106
General Chemistry Laboratory I LIU, SHIH-YUAN
Fall 2020
Laboratory required of all students enrolled in CHEM1109. One three-hour period per week. Experiments reflect and apply the principles learned in the lecture course. Computers are used to both acquire and analyze data. The semester concludes with a group project where students are required to design their own experiments to solve a problem.

CHEM111701
Honors Modern Chemistry I
TSUNG, CHIA-KUANG; YOUNG, ALLISON P
Fall 2020
This course is intended for students from any major (including undecided) with a strong foundation and interest in chemistry. CHEM1117 begins with the theoretical description of atomic and molecular structure and with examples of modern experimental techniques for visualizing and manipulating individual atoms and molecules. The laws of thermodynamics and kinetics are studied to understand why chemical reactions occur at all, why it is that once reactions start they can't go all the way to completion, and how molecules act as catalysts to speed up reactions without being consumed themselves.
Credits: 03
Room and Schedule: DEVLIN HALL 008,T TH 9*;
Satisfies Core Requirement: Natural Science
Prerequisites: With permission of the Instructor. CHEM1117 is a prerequisite for CHEM1118.
Corequisites: CHEM1119 AND CHEM1121.
Cross-listed with: None **Frequency:** Annually **Student Level:** CORE
Comments: Department permission required.
Status: OPEN

CHEM111901
Honors Modern Chemistry Laboratory I YOUNG, ALLISON P
Fall 2020
Laboratory required for all students enrolled in CHEM1117. This laboratory course stresses discovery-based experiments. It uses state-of-the-art instrumentation to illustrate the principles discussed in CHEM1117-1118 and introduces students to techniques used in modern chemical research. One three-hour period per week.
Credits: 01
Room and Schedule: MERKERT CENTER 120,M 1-4;HYBRID;
Satisfies Core Requirement: None
Prerequisites: None **Corequisites:** CHEM1117. **Cross-listed with:** None **Frequency:** Annually **Student Level:** CORE **Comments:** Lab fee required **Status:** OPEN

CHEM111902
Honors Modern Chemistry Laboratory I YOUNG, ALLISON P
Fall 2020
Laboratory required for all students enrolled in CHEM1117. This laboratory course stresses discovery-based experiments. It uses state-of-the-art instrumentation to illustrate the principles discussed in CHEM1117-1118 and introduces students to techniques used in modern chemical research. One three-hour period per week.
Credits: 01
Room and Schedule: MERKERT CENTER 120,M 5 30-8 30;HYBRID;
Satisfies Core Requirement: None
Prerequisites: None **Corequisites:** CHEM1117. **Cross-listed with:** None **Frequency:** Annually **Student Level:** CORE **Comments:** Lab fee required **Status:** OPEN

CHEM112101
Honors Modern Chemistry Discussion I LI, YANG
Fall 2020
Required of all students in CHEM1117. Discussion of lecture topics and problem-solving methods in small groups.
Credits: 00
Room and Schedule: MERKERT CENTER 129,T 6; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: CHEM1117. **Cross-listed with:** None **Frequency:** Annually **Student Level:** CORE **Comments:** None **Status:** OPEN

CHEM112102
Honors Modern Chemistry Discussion I LI, YANG
Fall 2020
Required of all students in CHEM1117. Discussion of lecture topics and problem-solving methods in small groups.
Credits: 00
Room and Schedule: MERKERT CENTER 129,W 6; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: CHEM1117. **Cross-listed with:** None **Frequency:** Annually **Student Level:** CORE **Comments:** None **Status:** OPEN

CHEM112701
Gateway: General Chemistry Discussion I GALLACHER, CONNOR E
Fall 2020
Required of all students in Gateway General Chemistry. Discussion will offer a comprehensive review of the material presented in lecture, with a focus on the key mathematical and chemical concepts needed for problem-solving, in a small group setting.
Credits: 01
Room and Schedule: HIGGINS HALL 265,TH 4 30; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: CHEM1109. **Cross-listed with:** None **Frequency:** Annually **Student Level:** CORE **Comments:** None **Status:** OPEN

CHEM112702
Gateway: General Chemistry Discussion I GALLACHER, CONNOR E
Fall 2020
Required of all students in Gateway General Chemistry. Discussion will offer a comprehensive review of the material presented in lecture, with a focus on the key mathematical and chemical concepts needed for problem-solving, in a small group setting.
Credits: 01
Room and Schedule: HIGGINS HALL 265,TH 5 30; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: CHEM1109. **Cross-listed with:** None **Frequency:** Annually **Student Level:** CORE **Comments:** None **Status:** OPEN

CHEM116101
Life Science Chemistry HARTMANN, NATHANIEL J
Fall 2020
This course first introduces basic chemical principles in preparation for a discussion of the chemistry of living systems that forms the major part of the course. Organic chemical concepts will be introduced as necessary, and applications will be made wherever possible to physiological processes and disease states that can be understood in terms of their underlying chemistry.
Credits: 03
Room and Schedule: ONLINE;ASYNCHRONOUS; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: CHEM1165 AND CHEM1163.
Cross-listed with: None
Frequency: Annually
Student Level: UNDERGRAD ELECT
Comments: None
Status: OPEN

CHEM116302
Life Science Chemistry Laboratory MC FADDEN, DAVID L
Fall 2020
A laboratory course that includes experiments illustrating chemical principles and the properties of compounds consistent with CHEM1161.
Credits: 01
Room and Schedule: MERKERT CENTER 018,W 9-11 45;HYBRID;
Satisfies Core Requirement: None
Prerequisites: None **Corequisites:** CHEM1161. **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD ELECT
Comments: Lab fee required.
Status: OPEN

CHEM116303
Life Science Chemistry Laboratory MC FADDEN, DAVID L
Fall 2020
A laboratory course that includes experiments illustrating chemical principles and the properties of compounds consistent with CHEM1161.
Credits: 01
Room and Schedule: MERKERT CENTER 018,F 9-11 45;
Satisfies Core Requirement: None
Prerequisites: None **Corequisites:** CHEM1161. **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD ELECT
Comments: Lab fee required.
Status: CLOSED

CHEM116501
Life Science Chemistry Discussion XIONG, BINGCONG
Fall 2020
Required of all students in CHEM1161. Discussion of lecture topics and problem-solving methods in small groups.
Credits: 00
Room and Schedule: MERKERT CENTER 129,T 2;HYBRID;
Satisfies Core Requirement: None
Prerequisites: None **Corequisites:** CHEM1161. **Cross-listed with:** None **Frequency:** Annually

CHEM223101
Organic Chemistry I MORKEN, JAMES P
Fall 2020
An introduction to the chemistry, properties, and uses of organic compounds. The correlation of structure with properties, reaction mechanisms, and the modern approach to structural and synthetic problems are stressed throughout. In the laboratory, the aim is acquisition of sound experimental techniques through the synthesis of selected compounds.
Credits: 03
Room and Schedule: M W F 9;ONLINE;SYNCHRONOUS;
Satisfies Core Requirement: None
Prerequisites: CHEM1110. CHEM2231 is a prerequisite for CHEM2232.
Corequisites: CHEM2233 AND CHEM2235.
Cross-listed with: None
Frequency: Annually
Student Level: UNDERGRAD-MAJORS
Comments: None
Status: OPEN

CHEM223102
Organic Chemistry I DEAK, HOLLY L
Fall 2020
An introduction to the chemistry, properties, and uses of organic compounds. The correlation of structure with properties, reaction mechanisms, and the modern approach to structural and synthetic problems are stressed throughout. In the laboratory, the aim is acquisition of sound experimental techniques through the synthesis of selected compounds.
Credits: 03
Room and Schedule: M W F 10;ONLINE;SYNCHRONOUS;
Satisfies Core Requirement: None
Prerequisites: CHEM1110. CHEM2231 is a prerequisite for CHEM2232.
Corequisites: CHEM2233 AND CHEM2235.
Cross-listed with: None
Frequency: Annually
Student Level: UNDERGRAD-MAJORS
Comments: None
Status: OPEN

CHEM223103
Organic Chemistry I SNAPPER, MARC
Fall 2020
An introduction to the chemistry, properties, and uses of organic compounds. The correlation of structure with properties, reaction mechanisms, and the modern approach to structural and synthetic problems are stressed throughout. In the laboratory, the aim is acquisition of sound experimental techniques through the synthesis of selected compounds.
Credits: 03
Room and Schedule: M W F 11;ONLINE;SYNCHRONOUS;
Satisfies Core Requirement: None
Prerequisites: CHEM1110. CHEM2231 is a prerequisite for CHEM2232.
Corequisites: CHEM2233 AND CHEM2235.
Cross-listed with: None
Frequency: Annually
Student Level: UNDERGRAD-MAJORS
Comments: None
Status: OPEN

CHEM223301
Organic Chemistry Laboratory I SNAPPER, MARC
Fall 2020
Laboratory required of all students enrolled in CHEM2231. One four-hour period per week. Students acquire fundamental organic lab techniques in the context of principles learned in the lecture course. The semester concludes with a group project where students are required to design their own experiments to solve ▪ problem.
Credits: 01
Room and Schedule: MERKERT CENTER 018,M 12-3 50;HYBRID;
Satisfies Core Requirement: None
Prerequisites: None **Corequisites:** CHEM2231. **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: Lab fee required
Status: OPEN

CHEM223302
Organic Chemistry Laboratory I BYERS, JEFFERY
Fall 2020
Laboratory required of all students enrolled in CHEM2231. One four-hour period per week. Students acquire fundamental organic lab techniques in the context of principles learned in the lecture course. The semester concludes with a group project where students are required to design their own experiments to solve a problem.
Credits: 01
Room and Schedule: MERKERT CENTER 018,T 12-3 50;HYBRID;
Satisfies Core Requirement: None
Prerequisites: None **Corequisites:** CHEM2231. **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: Lab fee required
Status: OPEN

CHEM223303
Organic Chemistry Laboratory I WASA, MASAYUKI
Fall 2020
Laboratory required of all students enrolled in CHEM2231. One four-hour period per week. Students acquire fundamental organic lab techniques in the context of principles learned in the lecture course. The semester concludes with a group project where students are required to design their own experiments to solve a problem.
Credits: 01
Room and Schedule: MERKERT CENTER 018,W 12 15-4 05;HYBRID;
Satisfies Core Requirement: None
Prerequisites: None **Corequisites:** CHEM2231. **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: Lab fee required
Status: OPEN

CHEM223304
Organic Chemistry Laboratory I MORKEN, JAMES P
Fall 2020
Laboratory required of all students enrolled in CHEM2231. One four-hour period per week. Students acquire fundamental organic lab techniques in the context of principles learned in the lecture course. The semester concludes with a group project where students are required to design their own experiments to solve a problem.
Credits: 01
Room and Schedule: MERKERT CENTER 018,TH 12-3 50;HYBRID;
Satisfies Core Requirement: None

Prerequisites: None **Corequisites:** CHEM2231. **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: Lab fee required
Status: OPEN

CHEM223305
Organic Chemistry Laboratory I ZHANG, XIAO-XIANG
Fall 2020
Laboratory required of all students enrolled in CHEM2231. One four-hour period per week. Students acquire fundamental organic lab techniques in the context of principles learned in the lecture course. The semester concludes with a group project where students are required to design their own experiments to solve a problem.
Credits: 01
Room and Schedule: MERKERT CENTER 018,F 1-4 50;HYBRID;
Satisfies Core Requirement: None
Prerequisites: None
Corequisites: CHEM2231.
Cross-listed with: None
Frequency: Annually
Student Level: UNDERGRAD-MAJORS
Comments: Lab fee required
Status: CLOSED

CHEM223306
Organic Chemistry Laboratory I YOUNG, ALLISON P
Fall 2020
Laboratory required of all students enrolled in CHEM2231. One four-hour period per week. Students acquire fundamental organic lab techniques in the context of principles learned in the lecture course. The semester concludes with a group project where students are required to design their own experiments to solve a problem.
Credits: 01
Room and Schedule: MERKERT CENTER 018,M 5-8 50;HYBRID;
Satisfies Core Requirement: None
Prerequisites: None **Corequisites:** CHEM2231. **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: Lab fee required
Status: OPEN

CHEM223307
Organic Chemistry Laboratory I NIJJAR, AMARJIT K
Fall 2020
Laboratory required of all students enrolled in CHEM2231. One four-hour period per week. Students acquire fundamental organic lab techniques in the context of principles learned in the lecture course. The semester concludes with a group project where students are required to design their own experiments to solve a problem.
Credits: 01
Room and Schedule: MERKERT CENTER 018,T 5-8 50;HYBRID;
Satisfies Core Requirement: None
Prerequisites: None **Corequisites:** CHEM2231. **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: Lab fee required
Status: OPEN

CHEM223308
Organic Chemistry Laboratory I JAYASUNDERA, THUSITHA
Fall 2020
Laboratory required of all students enrolled in CHEM2231. One four-hour period per week. Students acquire fundamental organic lab techniques in the context of principles learned in the lecture course. The semester concludes with a group project where students are required to design their own experiments to solve a problem.
Credits: 01
Room and Schedule: MERKERT CENTER 018,W 5-8 50;HYBRID;
Satisfies Core Requirement: None
Prerequisites: None **Corequisites:** CHEM2231. **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: Lab fee required
Status: OPEN

CHEM223309
Organic Chemistry Laboratory I NIJJAR, AMARJIT K
Fall 2020
Laboratory required of all students enrolled in CHEM2231. One four-hour period per week. Students acquire fundamental organic lab techniques in the context of principles learned in the lecture course. The semester concludes with a group project where students are required to design their own experiments to solve a problem.
Credits: 01
Room and Schedule: MERKERT CENTER 018,TH 5-8 50;HYBRID;

CHEM223501
Organic Chemistry Discussion I VENDOLA, ALEX J
Fall 2020
Required of all students in CHEM2231. Discussion of organic synthesis design, spectroscopic analysis, reaction mechanisms, and other lecture topics in small groups.
Credits: 00
Room and Schedule: MERKERT CENTER 127,M 3; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: CHEM2231. **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: None
Status: OPEN

CHEM223502
Organic Chemistry Discussion I WONG, ALEXANDER
Fall 2020
Required of all students in CHEM2231. Discussion of organic synthesis design, spectroscopic analysis, reaction mechanisms, and other lecture topics in small groups.
Credits: 00
Room and Schedule: MERKERT CENTER 127,M 4; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: CHEM2231. **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: None
Status: OPEN

CHEM223503
Organic Chemistry Discussion I WONG, ALEXANDER
Fall 2020
Required of all students in CHEM2231. Discussion of organic synthesis design, spectroscopic analysis, reaction mechanisms, and other lecture topics in small groups.
Credits: 00
Room and Schedule: MERKERT CENTER 127,M 5; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: CHEM2231. **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: None
Status: OPEN

CHEM223504
Organic Chemistry Discussion I None
Fall 2020
Required of all students in CHEM2231. Discussion of organic synthesis design, spectroscopic analysis, reaction mechanisms, and other lecture topics in small groups.
Credits: 00
Room and Schedule: MERKERT CENTER 127,M 6; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: CHEM2231. **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: None
Status: CLOSED

CHEM223505
Organic Chemistry Discussion I DEAK, HOLLY L
Fall 2020
Required of all students in CHEM2231. Discussion of organic synthesis design, spectroscopic analysis, reaction mechanisms, and other lecture topics in small groups.
Credits: 00
Room and Schedule: MERKERT CENTER 127,T 5; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: CHEM2231. **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: None
Status: OPEN

CHEM223506
Organic Chemistry Discussion I None
Fall 2020
Required of all students in CHEM2231. Discussion of organic synthesis design, spectroscopic analysis, reaction mechanisms, and other lecture topics in small groups.

Credits: 00
Room and Schedule: MERKERT CENTER 127,T 6; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: CHEM2231. **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: None
Status: CLOSED

CHEM223507
Organic Chemistry Discussion I DEAK, HOLLY L
Fall 2020
Required of all students in CHEM2231. Discussion of organic synthesis design, spectroscopic analysis, reaction mechanisms, and other lecture topics in small groups.
Credits: 00
Room and Schedule: MERKERT CENTER 127,W 3; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: CHEM2231. **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: None
Status: OPEN

CHEM223508
Organic Chemistry Discussion I XU, NINGXIN
Fall 2020
Required of all students in CHEM2231. Discussion of organic synthesis design, spectroscopic analysis, reaction mechanisms, and other lecture topics in small groups.
Credits: 00
Room and Schedule: MERKERT CENTER 127,W 4; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: CHEM2231. **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: None
Status: OPEN

CHEM223509
Organic Chemistry Discussion I XU, NINGXIN
Fall 2020
Required of all students in CHEM2231. Discussion of organic synthesis design, spectroscopic analysis, reaction mechanisms, and other lecture topics in small groups.
Credits: 00
Room and Schedule: MERKERT CENTER 127,W 5; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: CHEM2231. **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: None
Status: OPEN

CHEM223510
Organic Chemistry Discussion I None
Fall 2020
Required of all students in CHEM2231. Discussion of organic synthesis design, spectroscopic analysis, reaction mechanisms, and other lecture topics in small groups.
Credits: 00
Room and Schedule: MERKERT CENTER 127,W 6; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: CHEM2231. **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: None
Status: CLOSED

CHEM223511
Organic Chemistry Discussion I ZHANG, XUNTONG
Fall 2020
Required of all students in CHEM2231. Discussion of organic synthesis design, spectroscopic analysis, reaction mechanisms, and other lecture topics in small groups.
Credits: 00
Room and Schedule: CAMPION HALL 204,TH 3; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: CHEM2231. **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: None
Status: CLOSED

CHEM223512
Organic Chemistry Discussion I ZHANG, XUNTONG
Fall 2020
Required of all students in CHEM2231. Discussion of organic synthesis design, spectroscopic analysis, reaction mechanisms, and other lecture topics in small groups.

Credits: 00
Room and Schedule: CAMPION HALL 204,TH 4; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: CHEM2231. **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: None
Status: OPEN

CHEM223513
Organic Chemistry Discussion I DEAK, HOLLY L
Fall 2020
Required of all students in CHEM2231. Discussion of organic synthesis design, spectroscopic analysis, reaction mechanisms, and other lecture topics in small groups.
Credits: 00
Room and Schedule: CAMPION HALL 204,F 1; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: CHEM2231. **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: None
Status: OPEN

CHEM223514
Organic Chemistry Discussion I DEAK, HOLLY L
Fall 2020
Required of all students in CHEM2231. Discussion of organic synthesis design, spectroscopic analysis, reaction mechanisms, and other lecture topics in small groups.
Credits: 00
Room and Schedule: MERKERT CENTER 130,F 2; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: CHEM2231. **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: None
Status: OPEN

CHEM223515
Organic Chemistry Discussion I VENDOLA, ALEX J
Fall 2020
Required of all students in CHEM2231. Discussion of organic synthesis design, spectroscopic analysis, reaction mechanisms, and other lecture topics in small groups.
Credits: 00
Room and Schedule: MERKERT CENTER 130,M 2; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: CHEM2231. **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: None
Status: OPEN

CHEM223516
Organic Chemistry Discussion I DEAK, HOLLY L
Fall 2020
Required of all students in CHEM2231. Discussion of organic synthesis design, spectroscopic analysis, reaction mechanisms, and other lecture topics in small groups.
Credits: 00
Room and Schedule: CAMPION HALL 231,W 2; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: CHEM2231. **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: None
Status: CLOSED

CHEM223701
Gateway: Organic Chemistry Discussion I DEAK, HOLLY L
Fall 2020
Required of all students in Gateway Organic Chemistry. Discussion will offer a fairly comprehensive review of the material presented in lecture, with a focus on the key concepts needed for problem-solving in a small group setting.
Credits: 01
Room and Schedule: CARNEY HALL 305,W 2; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: CHEM2231. **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS **Comments:** Department Permission required. **Status:** CLOSED

CHEM224101
Honors Organic Chemistry I SNAPPER, MARC; LIU, SHIH-YUAN
Fall 2020
This course is a continuation of the CHEM1117-1118 honors sequence and will concentrate on the structure, bonding, and reactivity of organic compounds. Particular

emphasis will be placed on stereochemistry, conformational analysis, reaction mechanisms, principles of organic synthesis, and modern spectroscopic methods.
Credits: 03
Room and Schedule: MERKERT CENTER 129,T TH 9*;HYBRID;
Satisfies Core Requirement: None
Prerequisites: CHEM1117 AND CHEM1120 AND CHEM1118 AND CHEM1119. With permission of the Instructor.
Corequisites: CHEM2243 AND CHEM2245.
Cross-listed with: None
Frequency: Annually
Student Level: UNDERGRAD-MAJORS
Comments: None
Status: OPEN

CHEM224301
Honors Organic Chemistry I Laboratory YOUNG, ALLISON P
Fall 2020
Laboratory course required for students enrolled in Honors Organic Chemistry (CHEM2241). Students will be instructed in experimental techniques relevant to research in contemporary organic chemistry. It will solidify concepts that are taught in lecture and provide a forum for discovery-based learning in organic chemistry.
Credits: 01
Room and Schedule: MERKERT CENTER 021,W 12 15-4 15;HYBRID;
Satisfies Core Requirement: None
Prerequisites: None **Corequisites:** CHEM2241. **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: Lab fee required.
Status: CLOSED

CHEM224302
Honors Organic Chemistry I Laboratory YOUNG, ALLISON P
Fall 2020
Laboratory course required for students enrolled in Honors Organic Chemistry (CHEM2241). Students will be instructed in experimental techniques relevant to research in contemporary organic chemistry. It will solidify concepts that are taught in lecture and provide a forum for discovery-based learning in organic chemistry.
Credits: 01
Room and Schedule: MERKERT CENTER 021,TH 12-4;HYBRID;
Satisfies Core Requirement: None
Prerequisites: None **Corequisites:** CHEM2241. **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: Lab fee required.
Status: CLOSED

CHEM224501
Honors Organic Chemistry Discussion I BYRNE, KEVIN T
Fall 2020
Required of all students in CHEM2241. Discussion of organic synthesis design, spectroscopic analysis, reaction mechanisms, and other lecture topics in small groups.
Credits: 00
Room and Schedule: MERKERT CENTER 129,M 6;HYBRID;
Satisfies Core Requirement: None
Prerequisites: None **Corequisites:** CHEM2241. **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: None
Status: OPEN

CHEM224502
Honors Organic Chemistry Discussion I BYRNE, KEVIN T
Fall 2020
Required of all students in CHEM2241. Discussion of organic synthesis design, spectroscopic analysis, reaction mechanisms, and other lecture topics in small groups.
Credits: 00
Room and Schedule: MERKERT CENTER 129,T 7;HYBRID;
Satisfies Core Requirement: None
Prerequisites: None **Corequisites:** CHEM2241. **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: None
Status: OPEN

CHEM224701
Honors Organic Pre-Lab
MORKEN, JAMES P; BYERS, JEFFERY
Fall 2020
This 50 minute lecture will discuss the principles and theories behind the experiments performed in the laboratory course.
Credits: 00
Room and Schedule: CAMPION HALL 204,M 3;HYBRID;
Satisfies Core Requirement: None
Prerequisites: None **Corequisites:** CHEM2243. **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: None
Status: OPEN

CHEM335101
Analytical Chemistry METZ, KENNETH R
Fall 2020
Designed primarily for sophomore and junior students, this course is an introduction to the principles and practice of analytical chemistry, including the statistical analysis of data and widely-used chemical methods and instrumental approaches such as chromatography, spectrophotometry, and electrochemistry. In the laboratory, the aims are for students to develop good analytical technique and to acquire accurate, precise data.
Credits: 04
Room and Schedule: ONLINE;ASYNCHRONOUS; **Satisfies Core Requirement:** None **Prerequisites:** CHEM1110 AND CHEM1109.
Corequisites: CHEM3355 AND CHEM3353.
Cross-listed with: None
Frequency: Annually
Student Level: UNDERGRAD-MAJORS
Comments: None
Status: OPEN

CHEM335301
Analytical Chemistry Laboratory METZ, KENNETH R
Fall 2020
Laboratory required of all students enrolled in CHEM3351. One four-hour period per week.
Credits: 00
Room and Schedule: MERKERT CENTER 120,W 1-5;HYBRID;
Satisfies Core Requirement: None
Prerequisites: None **Corequisites:** CHEM3351. **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: Lab fee required
Status: OPEN

CHEM335302
Analytical Chemistry Laboratory METZ, KENNETH R
Fall 2020
Laboratory required of all students enrolled in CHEM3351. One four-hour period per week.
Credits: 00
Room and Schedule: MERKERT CENTER 120,W 5-9;HYBRID;
Satisfies Core Requirement: None
Prerequisites: None **Corequisites:** CHEM3351. **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: Lab fee required
Status: CLOSED

CHEM335303
Analytical Chemistry Laboratory METZ, KENNETH R
Fall 2020
Laboratory required of all students enrolled in CHEM3351. One four-hour period per week.
Credits: 00
Room and Schedule: MERKERT CENTER 120,TH 1-5;HYBRID;
Satisfies Core Requirement: None
Prerequisites: None **Corequisites:** CHEM3351. **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: Lab fee required

CHEM445001
Modern Laboratory Techniques of Photocontrolled Radical Polymerization NIU, JIA
Fall 2020
Polymer science is indispensable in providing materials to support our current lifestyle and may provide important solutions to a sustainable and eco-friendly society in the future. This course will survey and analyze the contemporary laboratory techniques of photocontrolled radical polymerization. Participants will have hands-on experience of developing methods to control reactivities in polymerization and gain valuable experience in the concept and practice of reaction optimization and product analysis in the modern polymer science.
Credits: 01
Room and Schedule: MERKERT CENTER 120,TH 5 30-8 30;
Satisfies Core Requirement: None
Prerequisites: CHEM2232.
Corequisites: None **Cross-listed with:** None **Frequency:** Periodically
Student Level: UNDERGRAD ELECT
Comments: None
Status: OPEN

CHEM446101
Biochemistry I CHATTERJEE, ABHISHEK
Fall 2020
This course is a two-semester introductory-level course in biochemistry. Topics in the first semester concentrate on protein structure and function, bioenergetics, kinetics and mechanisms of enzyme reactions, intermediary metabolism, control of metabolic pathways, and photosynthesis. Topics in the second semester concentrate on the structure of nucleic acids, recombinant DNA technology, mechanisms of gene rearrangements, DNA replication, RNA synthesis and splicing, protein synthesis, control of gene expression, membrane transport, and hormone action. Experimental methods will also be discussed as they relate to course topics.
Credits: 03
Room and Schedule: T TH 9*;ONLINE;SYNCHRONOUS;
Satisfies Core Requirement: None
Prerequisites: CHEM2232 AND CHEM2231 AND BIOL2000. OR equivalent.
Corequisites: CHEM4463. **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: None
Status: CLOSED

CHEM446301
Biochemistry Discussion I HUANG, RACHEL L
Fall 2020
Required of all students in CHEM4461. Discussion of lecture topics and problem-solving methods in small groups.
Credits: 00
Room and Schedule: MERKERT CENTER 130,W 6;HYBRID;
Satisfies Core Requirement: None
Prerequisites: None
Corequisites: CHEM4461. CHEM4461.
Cross-listed with: None
Frequency: Annually
Student Level: UNDERGRAD & GRAD
Comments: None
Status: CLOSED

CHEM446302
Biochemistry Discussion I HUANG, RACHEL L
Fall 2020
Required of all students in CHEM4461. Discussion of lecture topics and problem-solving methods in small groups.
Credits: 00
Room and Schedule: HIGGINS HALL 225,T 6;HYBRID;
Satisfies Core Requirement: None
Prerequisites: None
Corequisites: CHEM4461. CHEM4461.
Cross-listed with: None
Frequency: Annually

Status: OPEN

CHEM446501
Biochemistry (Chemistry Majors) GAO, JIANMIN
Fall 2020
This course is an accelerated one-semester survey of the basic principles of biochemistry emphasizing a broad understanding of the chemical events in living systems. Although the course is an introduction to biochemistry, prior proficiency in general and organic chemistry is required. Topics will include structure and function of biological molecules, including proteins, enzymes, nucleic acids and biological membranes. Also covered in the course will be bioenergetics, metabolism and photosynthesis. Experimental methods will also be discussed as they relate to course topics. This course fulfills the biochemistry requirement for the Chemistry major. Non-chemistry majors are requested to consult with the instructor before registering for this course.
Credits: 03
Room and Schedule: CAMPION HALL 302,T TH 9*;
Satisfies Core Requirement: None
Prerequisites: CHEM2232 AND CHEM2231. Non-chemistry majors are requested to consult with the instructor before registering for this course.
Corequisites: CHEM4466. **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: None
Status: OPEN

CHEM446601
Introduction to Biochemistry Discussion NOBILE, VINCENT R
Fall 2020
Required of all students in CHEM4465. Discussion of lecture topics and problem-solving methods in small groups.
Credits: 00
Room and Schedule: CAMPION HALL 231,M 2;HYBRID;
Satisfies Core Requirement: None
Prerequisites: None **Corequisites:** CHEM4465. **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: None
Status: OPEN

CHEM446602
Introduction to Biochemistry Discussion NOBILE, VINCENT R
Fall 2020
Required of all students in CHEM4465. Discussion of lecture topics and problem-solving methods in small groups.
Credits: 00
Room and Schedule: CAMPION HALL 231,F 2; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: CHEM4465. **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: None
Status: OPEN

CHEM447301
Physical Chemistry (Biochemistry Majors) HAEFFNER, JAN F
Fall 2020
This course is an introduction to physical chemistry. The following topics are covered: thermodynamics, transport properties, chemical kinetics, quantum mechanics, and spectroscopy. Applications to biochemical systems are emphasized.
Credits: 03
Room and Schedule: MERKERT CENTER 130,M W F 10;
Satisfies Core Requirement: None
Prerequisites: CHEM2232 AND MATH1101.
Corequisites: CHEM4474. PHYS2100-2101 (or equivalent) are pre- or co-requisites.
Cross-listed with: None
Frequency: Annually
Student Level: UNDERGRAD-MAJORS
Comments: None
Status: OPEN

CHEM447501
Physical Chemistry I MC FADDEN, DAVID L
Fall 2020
This course deals with the foundations and applications of thermodynamics and reaction kinetics. Topics include: (1) classical thermodynamics, including the Laws of Thermodynamics, Helmholtz and Gibbs energies, chemical potential, and thermodynamic descriptions of phase equilibria and chemical equilibrium; (2) kinetic theory of gases; (3) chemical reaction rate laws and mechanisms.
Credits: 03
Room and Schedule: MERKERT CENTER 129,T TH 10 30*;HYBRID;
Satisfies Core Requirement: None
Prerequisites: None
Corequisites: CHEM4477. MATH2202 and PHYS2100-2101/2200-2201 are pre- or co-requisites.
Cross-listed with: None
Frequency: Annually
Student Level: UNDERGRAD-MAJORS
Comments: None
Status: CLOSED

CHEM447701
Physical Chemistry Discussion I None
Fall 2020
Required of all students in CHEM4475. Discussion of lecture topics and problem-solving methods, in small groups.
Credits: 00
Room and Schedule: CAMPION HALL 204,M 6; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: CHEM4475. **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: None
Status: OPEN

CHEM449101
Introduction to Undergraduate Research I DAVIDOVITS, PAUL
Fall 2020
Sophomores or juniors who show exceptional ability may engage in an independent research project under the supervision of a faculty member. The experimental work will be preceded by library research on the project and training in essential laboratory techniques.
Credits: 03
Room and Schedule: BY ARRANGEMENT;
Satisfies Core Requirement: None

Prerequisites: CHEM1110 AND CHEM1109. With permission of the Instructor. With permission of the Department.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: CHEM5591-5592 or CHEM5593-5594 cannot be taken concurrently. Continuation to CHEM4492 requires permission of the adviser.
Status: OPEN

CHEM449102
Introduction to Undergraduate Research I
MC LAUGHLIN, LARRY
Fall 2020
Sophomores or juniors who show exceptional ability may engage in an independent research project under the supervision of a faculty member. The experimental work will be preceded by library research on the project and training in essential laboratory techniques.
Credits: 03
Room and Schedule: BY ARRANGEMENT;
Satisfies Core Requirement: None
Prerequisites: CHEM1110 AND CHEM1109. With permission of the Instructor. With permission of the Department.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: CHEM5591-5592 or CHEM5593-5594 cannot be taken concurrently. Continuation to CHEM4492 requires permission of the adviser.
Status: OPEN

CHEM449103
Introduction to Undergraduate Research I LIU, SHIH-YUAN
Fall 2020
Sophomores or juniors who show exceptional ability may engage in an independent research project under the supervision of a faculty member. The experimental work will be preceded by library research on the project and training in essential laboratory techniques.
Credits: 03
Room and Schedule: BY ARRANGEMENT;
Satisfies Core Requirement: None
Prerequisites: CHEM1110 AND CHEM1109. With permission of the Instructor. With permission of the Department.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: CHEM5591-5592 or CHEM5593-5594 cannot be taken concurrently. Continuation to
CHEM4492 requires permission of the adviser.
Status: OPEN

CHEM449104
Introduction to Undergraduate Research I MORKEN, JAMES P
Fall 2020
Sophomores or juniors who show exceptional ability may engage in an independent research project under the supervision of a faculty member. The experimental work will be preceded by library research on the project and training in essential laboratory techniques.
Credits: 03
Room and Schedule: BY ARRANGEMENT;
Satisfies Core Requirement: None
Prerequisites: CHEM1110 AND CHEM1109. With permission of the Instructor. With permission of the Department.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: CHEM5591-5592 or CHEM5593-5594 cannot be taken concurrently. Continuation to CHEM4492 requires permission of the adviser.
Status: OPEN

CHEM449105
Introduction to Undergraduate Research I CHATTERJEE, ABHISHEK
Fall 2020
Sophomores or juniors who show exceptional ability may engage in an independent research project under the supervision of a faculty member. The experimental work will be preceded by library research on the project and training in essential laboratory techniques.
Credits: 03
Room and Schedule: BY ARRANGEMENT;
Satisfies Core Requirement: None
Prerequisites: CHEM1110 AND CHEM1109. With permission of the Instructor. With permission of the Department.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: CHEM5591-5592 or CHEM5593-5594 cannot be taken concurrently. Continuation to CHEM4492 requires permission of the adviser.
Status: OPEN

CHEM449106
Introduction to Undergraduate Research I HOVEYDA, AMIR H
Fall 2020
Sophomores or juniors who show exceptional ability may engage in an independent research project under the supervision of a faculty member. The experimental work will be preceded by library research on the project and training in essential laboratory techniques.
Credits: 03
Room and Schedule: BY ARRANGEMENT;
Satisfies Core Requirement: None
Prerequisites: CHEM1110 AND CHEM1109. With permission of the Instructor. With permission of the Department.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually

CHEM553101
Modern Methods in Organic Synthesis I WASA, MASAYUKI; HOVEYDA, AMIR H
Fall 2020
Survey and analysis of reactions employed in the synthesis of medicinally significant compounds. An in-depth understanding of the mechanistic details for each transformation will be emphasized. Topics will relate fundamental structural and electronic properties to issues of chemical reactivity. An emphasis will be placed on carbon-carbon bond and ring forming reactions.
Credits: 03
Room and Schedule: MERKERT CENTER 130,T TH 10 30*;HYBRID;
Satisfies Core Requirement: None **Prerequisites:** CHEM2232 or equivalent. **Corequisites:** None
Cross-listed with: None
Frequency: Annually
Student Level: UNDERGRAD & GRAD

CHEM553701
Mechanistic Organic Chemistry LIU, SHIH-YUAN
Fall 2020
This course will explore factors influencing organic reaction mechanisms and methods for their determination. A partial list of the topics to be covered includes chemical bonding and consequences for structure and reactivity; steric, electronic, and stereoelectronic effects; conformational analysis; thermodynamic and kinetic principles; applications of molecular orbital theory; and reactive intermediates.
Credits: 03
Room and Schedule: MERKERT CENTER 130,M W F 12;HYBRID;
Satisfies Core Requirement: None **Prerequisites:** CHEM2232 or equivalent. **Corequisites:** None
Cross-listed with: None
Frequency: Annually
Student Level: UNDERGRAD & GRAD

CHEM553901
Principles and Applications of NMR Spectroscopy JAYASUNDERA, THUSITHA
Fall 2020
Nuclear Magnetic Resonance (NMR) is the bread and butter for all organic chemists. This course will introduce the theory of NMR spectroscopy, with concurrent, hands-on experiments that illustrate these concepts firsthand, and make the subject matter more interactive. Applications of NMR in biochemistry will also be discussed, with a guided hands-on project that exemplifies how NMR is utilized to study large macromolecules (such as proteins and nucleic acids), providing valuable practical experience. Material covered in this class will prepare students for graduate studies or a chemistry/biochemistry-related career in industry.
Credits: 03
Room and Schedule: MERKERT CENTER 130,T 6-8 30;
Satisfies Core Requirement: None
Prerequisites: Organic Chemistry is recommended as a prerequisite.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD & GRAD
Comments: None
Status: OPEN

CHEM555301
Advanced Methods in Chemistry II METZ, KENNETH R
Fall 2020
Designed for senior-level students, this course includes discussions of the principles, methods, and applications of sophisticated techniques in modern chemistry, such as magnetic resonance, mass spectrometry, x-ray diffraction, computer interfacing, and molecular modeling. The accompanying laboratory includes experiments with these methods.
Credits: 03
Room and Schedule: MERKERT CENTER 001,W 7-9; **Satisfies Core Requirement:** None **Prerequisites:** CHEM3351.
Corequisites: CHEM5555. **Cross-listed with:** None **Frequency:** Periodically
Student Level: UNDERGRAD ELECT
Comments: None
Status: OPEN

CHEM555501
Advanced Methods in Chemistry Laboratory II METZ, KENNETH R
Fall 2020
Laboratory required of all students enrolled in CHEM5553. One four-hour period per week.
Credits: 00
Room and Schedule: MERKERT CENTER 001,T 12-4; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: CHEM5553. **Cross-listed with:** None **Frequency:** Periodically
Student Level: UNDERGRAD ELECT
Comments: None
Status: OPEN

CHEM556001
Principles of Chemical Biology ZHOU, HUIQING
Fall 2020
An introduction to the chemistry of biological macromolecules, including proteins, nucleic acids, and carbohydrates. Students will learn the structure and nomenclature of the monomer building blocks as well as the macromolecules. Chemical principles that define secondary and tertiary biomolecular structure as well as state-of-the-art chemical (or chemical-biological) synthetic procedures will be presented. Examples of specific types of binding interactions, catalysis, or recognition processes as viewed from a chemical perspective will be discussed.
Credits: 03
Room and Schedule: CARNEY HALL 202,T TH 9*;HYBRID;
Satisfies Core Requirement: None **Prerequisites:** CHEM2232 or equivalent. **Corequisites:** None
Cross-listed with: None
Frequency: Annually
Student Level: UNDERGRAD & GRAD
Comments: None
Status: OPEN

CHEM556701
Chemical Biology: Structure and Function WEERAPANA, ERANTHIE
Fall 2020
A major component of chemical biology is the application of chemical tools to the study of biological systems. This course will provide an overview of techniques such as genome sequencing, mass spectrometry-based proteomics, fluorescence imaging and unnatural amino- acid incorporation into proteins, with emphasis on examples drawn from the current literature. There will also be a focus on the mechanism of action of drugs, incorporating aspects of both the chemistry and biology of drug design.
Credits: 03
Room and Schedule: MERKERT CENTER 129,T TH 12*;
Satisfies Core Requirement: None
Prerequisites: CHEM2231-2232, and CHEM4465 or CHEM4461 or CHEM4462, or with permission of the instructor.
Corequisites: None **Cross-listed with:** None **Frequency:** Periodically
Student Level: UNDERGRAD & GRAD
Comments: None

Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: Course is intended for seniors. Continuation to CHEM5592 requires permission of
the adviser.
Status: OPEN

CHEM559111
Undergraduate Chemical Research I DAVIDOVITS, PAUL
Fall 2020
The essential feature of this course is an independent research project performed under the supervision of a faculty member. The individual work will be preceded by a series of lectures and demonstrations on the use of the library and several essential laboratory techniques.
Credits: 03
Room and Schedule: BY ARRANGEMENT;
Satisfies Core Requirement: None
Prerequisites: With permission of the Instructor. With permission of the Department.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: Course is intended for seniors. Continuation to CHEM5592 requires permission of the adviser.
Status: OPEN

CHEM559112
Undergraduate Chemical Research I BYERS, JEFFERY
Fall 2020
The essential feature of this course is an independent research project performed under the supervision of a faculty member. The individual work will be preceded by a series of lectures and demonstrations on the use of the library and several essential laboratory techniques.
Credits: 03
Room and Schedule: BY ARRANGEMENT;
Satisfies Core Requirement: None
Prerequisites: With permission of the Instructor. With permission of the Department.

CHEM661101
Scientific Communication in Chemistry I BYERS, JEFFERY
Fall 2020
This course seeks to best facilitate the transition of incoming graduate students to successful researchers in chemistry. Specifically, students in this course will practice and improve on various communication skills including scientific presentations, as well as writing articles and proposals. Ethics and social responsibilities of performing chemical research will also be discussed.
Credits: 02
Room and Schedule: MERKERT CENTER 129,M 9-10 50;HYBRID;
Satisfies Core Requirement: None
Prerequisites: Undergraduates may enroll with permission of the instructors.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: GRADUATE
Comments: None
Status: CLOSED

CHEM664001
Computational Chemistry: Model, Method, and Mechanism HAEFFNER, JAN F
Fall 2020
The goal of the course is to develop skills in using computational chemistry software in the Linux operating system environment and to get a basic understanding of the underlying theory and algorithms which these computer programs are built upon. Topics covered include Linux commands and shell script programming, as well as Python script programming, basic understanding of statistical thermodynamics, potential energy surface, stationary points, conformational space, molecular mechanics, quantum chemistry (Schrodinger equation, Huckel method, LCAO-concept, Hartree-Fock and post Hartree-Fock methods, density functional theory). Computer programs such as Gaussian, Jaguar, Gamess, MacroModel and Tinker will be used during the course.
Credits: 03
Room and Schedule: MERKERT CENTER 129,M W F 2;
Satisfies Core Requirement: None
Prerequisites: CHEM4475 AND CHEM4476 AND CHEM2232 AND CHEM2231 AND MATH2202.
Or equivalent. . **Corequisites:** None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD & GRAD
Comments: This course is intended for graduate students and will be graded pass/fail.
Status: OPEN

CHEM667101
Physical Chemistry III MOHANTY, UDAYAN
Fall 2020
Building upon the foundations of Physical Chemistry I and II, this course introduces phenomena at the interface between a solid and an electrolyte. It starts with a discussion on the Debye- Huckle theory of electrolytes, followed by studies on ions near charged surface and then moves on to applications to capacitance near the surface/electrolyte interface. The Marcus electron transfer reaction theory is discussed next. With the background information introduced, the course examines applications to the semiconductor/liquid interfaces, with a focus on the potential applications of such systems for energy conversion and storage. Modern characterization techniques such as transient open-circuit-decay, diffusion equation, and titration methods will be studied, in combination with linear potential sweep and cyclic voltammetry as well as electrochemical impedance spectroscopy. The general concepts of photoelectrochemistry and batteries will be introduced within the context of solar energy harvesting and storage.
Credits: 03
Room and Schedule: CAMPION HALL 009,T TH 10 30*;
Satisfies Core Requirement: None
Prerequisites: CHEM4475 AND MATH2202 AND CHEM4476.
Corequisites: None **Cross-listed with:** None **Frequency:** Periodically
Student Level: UNDERGRAD & GRAD
Comments: None
Status: OPEN

CHEM667601
Physical Chemistry: Principles and Applications BAO, JUNWEI L
Fall 2020
This course intends to build a solid foundation for physical-chemistry graduate students to understand chemistry and materials at the microscopic level and to study the physical nature of bonding and chemical reaction dynamics quantitatively. We focus on fundamental principles of quantum mechanics, and their connections to chemistry and chemical physics. Topics covered in this course include principles of quantum mechanics, the connections between classical and quantum dynamics, exactly solvable systems, variational principle, perturbation theory, quantitative molecular orbital theory, electron correlation, introductory Kohn-Sham density-functional theory, and the electronic structures under periodic potential.
Credits: 03
Room and Schedule: MERKERT CENTER 130,M W F 8;HYBRID;
Satisfies Core Requirement: None
Prerequisites: CHEM4475 and CHEM4476 or equivalent.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: GRADUATE
Comments: One year undergraduate physical chemistry course that has covered the fundamentals of thermodynamics, quantum mechanics, and statistical mechanics is strongly recommended. At least one and half years of a college level calculus sequence is recommended. Undergraduate students must seek permission to enroll.
Status: OPEN

CHEM777201
Advanced Physical Chemistry/Electronics and Optics WAEGELE, MATTHIAS
Fall 2020
In experimental physical chemistry, we use an assortment of instruments to perform various measurements. In this course, we will explore the basic principles of electronic circuits and optics. The aim of this course is to equip the participants with the necessary knowledge to solve practical problems that are often encountered in experimental physical chemistry research. The participants will develop a fundamental understanding of the operating principles of the most commonly used instruments in physical chemistry laboratories (potentiostat, chromatograph, mass spectrometer, FTIR spectrometer, laser, etc.). Further, the participants will develop a solid foundation of electronics, optics, and signal processing (theory and practice). An emphasis is placed on practical problem solving skills. To this end, the course is partitioned into theoretical and practical sessions. During the practical sessions, the students will experiment with electronic filters and oscilloscopes.
Credits: 03
Room and Schedule: BY ARRANGEMENT; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: None **Cross-listed with:** None **Frequency:** Periodically
Student Level: GRADUATE
Comments: Students must contact the instructor for information about when and where the course will meet.
Status: OPEN

Student Level: GRADUATE **Comments:** Lab fee required. **Status:** OPEN

CHEM779905
Readings and Research I TSUNG, CHIA-KUANG
Fall 2020
A course required of Ph.D. matriculants for each semester of research.
Credits: 03
Room and Schedule: BY ARRANGEMENT; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: GRADUATE **Comments:** Lab fee required. **Status:** OPEN

CHEM779906
Readings and Research I CHATTERJEE, ABHISHEK
Fall 2020
A course required of Ph.D. matriculants for each semester of research.
Credits: 03
Room and Schedule: BY ARRANGEMENT; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: GRADUATE **Comments:** Lab fee required. **Status:** OPEN

CHEM779908
Readings and Research I DEPARTMENT
Fall 2020
A course required of Ph.D. matriculants for each semester of research.
Credits: 03
Room and Schedule: BY ARRANGEMENT; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: GRADUATE **Comments:** Lab fee required. **Status:** OPEN

CHEM779909
Readings and Research I MC LAUGHLIN, LARRY
Fall 2020
A course required of Ph.D. matriculants for each semester of research.
Credits: 03
Room and Schedule: BY ARRANGEMENT; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: GRADUATE **Comments:** Lab fee required. **Status:** OPEN

CHEM779910
Readings and Research I GAO, JIANMIN
Fall 2020
A course required of Ph.D. matriculants for each semester of research.
Credits: 03
Room and Schedule: BY ARRANGEMENT; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: GRADUATE **Comments:** Lab fee required. **Status:** OPEN

CHEM880003
Readings and Research II HOVEYDA, AMIR H
Fall 2020
A course required of Ph.D. matriculants for each semester of research.
Credits: 03
Room and Schedule: BY ARRANGEMENT; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: GRADUATE **Comments:** Lab fee required. **Status:** OPEN

CHEM880004
Readings and Research II MC LAUGHLIN, LARRY
Fall 2020
A course required of Ph.D. matriculants for each semester of research.
Credits: 03
Room and Schedule: BY ARRANGEMENT;
Satisfies Core Requirement: None
Prerequisites: None **Corequisites:** None **Cross-listed with:** None **Frequency:** Annually
Student Level: GRADUATE **Comments:** Lab fee required. **Status:** OPEN

CHEM880005
Readings and Research II ROBERTS, MARY F
Fall 2020
A course required of Ph.D. matriculants for each semester of research.
Credits: 03
Room and Schedule: BY ARRANGEMENT; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: GRADUATE **Comments:** Lab fee required. **Status:** OPEN

CHEM880006
Readings and Research II DEPARTMENT
Fall 2020
A course required of Ph.D. matriculants for each semester of research.
Credits: 03
Room and Schedule: BY ARRANGEMENT; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: None
Cross-listed with: None
Frequency: Annually **Student Level:** GRADUATE **Comments:** Lab fee required. **Status:** OPEN

CHEM880007
Readings and Research II SNAPPER, MARC
Fall 2020
A course required of Ph.D. matriculants for each semester of research.
Credits: 03
Room and Schedule: BY ARRANGEMENT; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: GRADUATE **Comments:** Lab fee required. **Status:** OPEN

CHEM880008
Readings and Research II DEPARTMENT
Fall 2020
A course required of Ph.D. matriculants for each semester of research.
Credits: 03
Room and Schedule: BY ARRANGEMENT; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: GRADUATE
Comments: Lab fee required.
Status: OPEN

CHEM880101
Thesis Seminar HOVEYDA, AMIR H
Fall 2020
This course is designed for M.S. candidates and includes a research problem requiring a thorough literature search and an original investigation under the guidance of a faculty member.
Credits: 03
Room and Schedule: BY ARRANGEMENT; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: GRADUATE **Comments:** Lab fee required. **Status:** OPEN

CHEM880103
Thesis Seminar ROBERTS, MARY F
Fall 2020
This course is designed for M.S. candidates and includes a research problem requiring a thorough literature search and an original investigation under the guidance of a faculty member.
Credits: 03
Room and Schedule: BY ARRANGEMENT; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: GRADUATE **Comments:** Lab fee required. **Status:** OPEN

CHEM880201
Thesis Direction ROBERTS, MARY F
Fall 2020
A non-credit course for those who have received six credits for Thesis Seminar but who have not finished their thesis. This course must be registered for and the continuation fee paid each semester until the thesis is completed.
Credits: 01
Room and Schedule: BY ARRANGEMENT; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: GRADUATE
Comments: None
Status: OPEN

CHEM880501
Departmental Seminar I DEPT
Fall 2020
This is a series of research seminars by leading scientists, both from within the department and from other institutions, that are presented on a regular (usually weekly) basis.
Credits: 01
Room and Schedule: MERKERT CENTER 127,TH 3-6;
Satisfies Core Requirement: None
Prerequisites: None **Corequisites:** None **Cross-listed with:** None **Frequency:** Annually
Student Level: GRADUATE
Comments: None
Status: OPEN

CHEM880502
Departmental Seminar I None
Fall 2020
This is a series of research seminars by leading scientists, both from within the department and from other institutions, that are presented on a regular (usually weekly) basis.

Credits: 01
Room and Schedule: MERKERT CENTER 127,F 3-6; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: GRADUATE
Comments: None
Status: OPEN

CHEM880503
Departmental Seminar I None
Fall 2020
This is a series of research seminars by leading scientists, both from within the department and from other institutions, that are presented on a regular (usually weekly) basis.
Credits: 01
Room and Schedule: MERKERT CENTER 129,F 3-6;HYBRID;
Satisfies Core Requirement: None
Prerequisites: None **Corequisites:** None **Cross-listed with:** None **Frequency:** Annually
Student Level: GRADUATE
Comments: None
Status: OPEN

CHEM882101
Inorganic Chemistry Seminar I None
Fall 2020
This is a series of research seminars by leading scientists, both from within the department and from other institutions, that are presented on a regular (usually weekly) basis.
Credits: 03
Room and Schedule: MERKERT CENTER 130,M 3-6; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: GRADUATE
Comments: None
Status: OPEN

CHEM883101
Organic Chemistry Seminar I DEPT
Fall 2020
This is a series of research seminars by leading scientists, both from within the department and from other institutions, that are presented on a regular (usually weekly) basis.
Credits: 03
Room and Schedule: MERKERT CENTER 130,T 3-6; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: GRADUATE
Comments: None
Status: OPEN

CHEM886101
Biochemistry Seminar I DEPT
Fall 2020
This is a series of research seminars by leading scientists, both from within the department and from other institutions, that are presented on a regular (usually weekly) basis.
Credits: 03
Room and Schedule: MERKERT CENTER 130,W 3-6; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: GRADUATE
Comments: None
Status: OPEN

CHEM887101
Physical Chemistry Seminar I DEPT
Fall 2020
This is a series of research seminars by leading scientists, both from within the department and from other institutions, that are presented on a regular (usually weekly) basis.
Credits: 03
Room and Schedule: MERKERT CENTER 130,F 3-6; **Satisfies Core Requirement:** None **Prerequisites:** None

CHEM888801
Interim Study None
Fall 2020
TBD
Credits: 00
Room and Schedule: BY ARRANGEMENT; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: GRADUATE
Comments: None
Status: OPEN

CHEM999801
Doctoral Cumulative Examinations None
Fall 2020
This course consists of a series of cumulative written examinations that test the student's development in his or her major field of interest (organic, inorganic, analytical, physical, biochemistry) and critical awareness and understanding of the current literature. Six of sixteen exams must be passed over a two-year period.
Credits: 01
Room and Schedule: MERKERT CENTER 130,W 7-10;
Satisfies Core Requirement: None
Prerequisites: None **Corequisites:** None **Cross-listed with:** None **Frequency:** Annually
Student Level: GRADUATE
Comments: None
Status: OPEN

CHEM999901
Doctoral Continuation None
Fall 2020
All students who have been admitted to candidacy for the Ph.D. degree are required to register and pay the fee for doctoral continuation during each semester of their candidacy. Doctoral Continuation requires a commitment of at least 20 hours per week working on the dissertation.
Credits: 01
Room and Schedule: BY ARRANGEMENT; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: GRADUATE
Comments: None
Status: OPEN

Chemistry Courses: Spring 2021

CHEM110201
Intersection of Science and Painting MC FADDEN, DAVID L
Spring 2021
In this course, material is drawn from physics, chemistry, and mineralogy to give the non-science student a scientific understanding of light, color, and colorants used in painting, as well as an introduction to the methods of scientific analysis that can be brought to bear on conservation and restoration of paintings, on investigating hypotheses in art history, and on establishing authenticity of artwork.
Credits: 03
Room and Schedule: None
Satisfies Core Requirement: Natural Science
Prerequisites: None
Corequisites: None
Cross-listed with: ARTH1130 **Frequency:** Annually **Student Level:** CORE **Comments:** None
Status: CANCELLED

CHEM110601
Chemistry and Society II MORABITO, JOSEPH V

Spring 2021
This is a two-semester sequence. The second semester focuses on the basic principles of organic chemistry and topics covered include the chemistry of life, nutrition, medicine, and agriculture. The goal of the course is to develop a knowledge base from which one can make intelligent decisions about local global environmental issues as well as formulate solutions to the ever-increasingly complex problems of today's technological society.
Credits: 03
Room and Schedule: T TH 3*;ONLINE;SYNCHRONOUS;
Satisfies Core Requirement: Natural Science
Prerequisites: CHEM1105.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually **Student Level:** CORE
Comments: For non-science majors or for those who do not require a lab science course.
Status: OPEN

CHEM111001
General Chemistry II MORABITO, JOSEPH V
Spring 2021
This course is intended for students whose major interest is science or medicine. It offers a rigorous introduction to the principles of chemistry with special emphasis on quantitative relationships, chemical equilibrium, and the structures of atoms, molecules, and crystals. The properties of the more common elements and compounds are considered against a background of these principles and the periodic table.
Credits: 03
Room and Schedule: M W F 9;ONLINE;SYNCHRONOUS; **Satisfies Core Requirement:** Natural Science **Prerequisites:** CHEM1109.
Corequisites: CHEM1111 AND CHEM1112 AND CHEM1113 AND CHEM1114.
Cross-listed with: None **Frequency:** Annually **Student Level:** CORE **Comments:** None **Status:** OPEN

CHEM111002
General Chemistry II HARTMANN, NATHANIEL J
Spring 2021
This course is intended for students whose major interest is science or medicine. It offers a rigorous introduction to the principles of chemistry with special emphasis on quantitative relationships, chemical equilibrium, and the structures of atoms, molecules, and crystals. The properties of the more common elements and compounds are considered against a background of these principles and the periodic table.
Credits: 03
Room and Schedule: M W F 1;ONLINE;SYNCHRONOUS; **Satisfies Core Requirement:** Natural Science **Prerequisites:** CHEM1109.
Corequisites: CHEM1111 AND CHEM1112 AND CHEM1113 AND CHEM1114.
Cross-listed with: None **Frequency:** Annually **Student Level:** CORE **Comments:** None **Status:** CLOSED

CHEM111003
General Chemistry II WAEGELE, MATTHIAS
Spring 2021
This course is intended for students whose major interest is science or medicine. It offers a rigorous introduction to the principles of chemistry with special emphasis on quantitative relationships, chemical equilibrium, and the structures of atoms, molecules, and crystals. The properties of the more common elements and compounds are considered against a background of these principles and the periodic table.
Credits: 03
Room and Schedule: M W F 2;ONLINE;SYNCHRONOUS; **Satisfies Core Requirement:** Natural Science **Prerequisites:** CHEM1109.
Corequisites: CHEM1111 AND CHEM1112 AND CHEM1113 AND CHEM1114.
Cross-listed with: None **Frequency:** Annually **Student Level:** CORE **Comments:** None **Status:** OPEN

CHEM111004
General Chemistry II YOUNG, ALLISON P
Spring 2021
This course is intended for students whose major interest is science or medicine. It offers a rigorous introduction to the principles of chemistry with special emphasis on quantitative relationships, chemical equilibrium, and the structures of atoms, molecules, and crystals. The properties of the more common elements and compounds are considered against a background of these principles and the periodic table.
Credits: 03
Room and Schedule: T TH 12*;ONLINE;SYNCHRONOUS; **Satisfies Core Requirement:** Natural Science **Prerequisites:** CHEM1109.
Corequisites: CHEM1111 AND CHEM1112 AND CHEM1113 AND CHEM1114.
Cross-listed with: None **Frequency:** Annually **Student Level:** CORE **Comments:** None **Status:** CLOSED

CHEM111005
General Chemistry II HARTMANN, NATHANIEL J
Spring 2021
This course is intended for students whose major interest is science or medicine. It offers a rigorous introduction to the principles of chemistry with special emphasis on quantitative relationships, chemical equilibrium, and the structures of atoms, molecules, and crystals. The properties of the more common elements and compounds are considered against a background of these principles and the periodic table.

CHEM111201
General Chemistry Laboratory II GAO, JIANMIN
Spring 2021
Laboratory required of all students enrolled in CHEM1110. One three-hour period per week. Experiments reflect and apply the principles learned in the lecture course. Computers are used to both acquire and analyze data. The semester concludes with a group project where students are required to design their own experiments to solve a problem.
Credits: 01
Room and Schedule: MERKERT CENTER 116,M 10-12 50;HYBRID;
Satisfies Core Requirement: Natural Science
Prerequisites: CHEM1111. **Corequisites:** CHEM1110. **Cross-listed with:** None **Frequency:** Annually **Student Level:** CORE **Comments:** Lab fee required **Status:** CLOSED

CHEM111202
General Chemistry Laboratory II WANG, DUNWEI
Spring 2021
Laboratory required of all students enrolled in CHEM1110. One three-hour period per week. Experiments reflect and apply the principles learned in the lecture course. Computers are used to both acquire and analyze data. The semester concludes with a group project where students are required to design their own experiments to solve a problem.
Credits: 01
Room and Schedule: MERKERT CENTER 116,T 9-11 50;HYBRID;
Satisfies Core Requirement: Natural Science
Prerequisites: CHEM1111.

Cross-listed with: None **Frequency:** Annually **Student Level:** CORE **Comments:** None **Status:** OPEN

CHEM111410
General Chemistry Discussion II None
Spring 2021
Required of all students in CHEM1110. Discussion of lecture topics and problem-solving methods in small groups.
Credits: 00
Room and Schedule: MERKERT CENTER 129,W 3;HYBRID;
Satisfies Core Requirement: None
Prerequisites: None
Corequisites: CHEM1110. CHEM1110.
Cross-listed with: None **Frequency:** Annually **Student Level:** CORE
Comments: None
Status: CLOSED

CHEM111411
General Chemistry Discussion II HARTMANN, NATHANIEL J
Spring 2021
Required of all students in CHEM1110. Discussion of lecture topics and problem-solving methods in small groups.
Credits: 00
Room and Schedule: MERKERT CENTER 129,TH 3;HYBRID;
Satisfies Core Requirement: None
Prerequisites: None
Corequisites: CHEM1110. CHEM1110.
Cross-listed with: None **Frequency:** Annually **Student Level:** CORE **Comments:** None **Status:** OPEN

CHEM111412
General Chemistry Discussion II HARTMANN, NATHANIEL J
Spring 2021
Required of all students in CHEM1110. Discussion of lecture topics and problem-solving methods in small groups.
Credits: 00
Room and Schedule: MERKERT CENTER 129,F 12;HYBRID;
Satisfies Core Requirement: None
Prerequisites: None
Corequisites: CHEM1110. CHEM1110.

CHEM111501
Fundamentals of Chemistry FOX, DANIEL J
Spring 2021
This course is designed to prepare students for the first semester of General Chemistry. The course will consist of two major parts, the first of which will focus on mathematical skills that are fundamental to the deeper understanding of chemical concepts, including but not limited to: ratios, percentages, algebra, exponentials, base 10, and natural logarithms. The second part of the course will focus on basic chemical concepts such as atomic structure and isotopes, balancing chemical equations, and stoichiometry. Once they have mastered these proficiencies, students will have a strong foundation in the skills necessary to succeed in higher level chemistry courses.
Credits: 03
Room and Schedule: MERKERT CENTER 130,M W F 1;
Satisfies Core Requirement: None
Prerequisites: None **Corequisites:** None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD ELECT
Comments: None
Status: OPEN

CHEM111801
Honors Modern Chemistry II WASA, MASAYUKI
Spring 2021
This is the second part of a one-year course that serves as the Honors alternative to the two- semester General Chemistry CHEM1109-1110. This course will build upon the chemical fundamentals that were covered in the first semester to introduce organic chemistry as well as its physical basis. Topics to be covered include the structure and reactivity of organic compounds.
Credits: 03
Room and Schedule: MERKERT CENTER 130,T TH 9*;HYBRID; **Satisfies Core Requirement:** Natural Science **Prerequisites:** CHEM1117.
Corequisites: CHEM1122 AND CHEM1120.
Cross-listed with: None **Frequency:** Annually **Student Level:** CORE
Comments: Department permission required.
Status: OPEN

CHEM112001
Honors Modern Chemistry Laboratory II YOUNG, ALLISON P
Spring 2021
Laboratory required for all students enrolled in CHEM1118. This laboratory course stresses discovery-based experiments. It uses state-of-the-art instrumentation to illustrate the principles discussed in CHEM1117-1118 and introduces students to techniques used in modern chemical research. One three-hour period per week.
Credits: 01
Room and Schedule: MERKERT CENTER 120,M 1-4;HYBRID;
Satisfies Core Requirement: None
Prerequisites: None **Corequisites:** CHEM1118. **Cross-listed with:** None **Frequency:** Annually **Student Level:** CORE **Comments:** Lab fee required **Status:** OPEN

CHEM112002
Honors Modern Chemistry Laboratory II YOUNG, ALLISON P
Spring 2021
Laboratory required for all students enrolled in CHEM1118. This laboratory course stresses discovery-based experiments. It uses state-of-the-art instrumentation to illustrate the principles discussed in CHEM1117-1118 and introduces students to techniques used in modern chemical research. One three-hour period per week.
Credits: 01
Room and Schedule: MERKERT CENTER 120,M 5 30-8 30;HYBRID;
Satisfies Core Requirement: None
Prerequisites: None **Corequisites:** CHEM1118. **Cross-listed with:** None **Frequency:** Annually **Student Level:** CORE **Comments:** Lab fee required **Status:** CLOSED

CHEM112201
Honors Modern Chemistry Discussion II None
Spring 2021
Required of all students in CHEM1118. Discussion of lecture topics and problem-solving methods in small groups.
Credits: 00
Room and Schedule: MERKERT CENTER 129,T 6; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: CHEM1118. **Cross-listed with:** None **Frequency:** Annually **Student Level:** CORE **Comments:** None **Status:** OPEN

CHEM112202
Honors Modern Chemistry Discussion II None
Spring 2021
Required of all students in CHEM1118. Discussion of lecture topics and problem-solving methods in small groups.
Credits: 00
Room and Schedule: MERKERT CENTER 129,W 6; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: CHEM1118. **Cross-listed with:** None **Frequency:** Annually **Student Level:** CORE **Comments:** None **Status:** CLOSED

CHEM112801
Gateway: General Chemistry Discussion II HARTMANN, NATHANIEL J
Spring 2021
Required of all students in Gateway General Chemistry. Discussion will offer a comprehensive review of the material presented in lecture, with a focus on the key mathematical and chemical concepts needed for problem-solving, in a small group setting.
Credits: 01
Room and Schedule: HIGGINS HALL 265,TH 4 30; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: CHEM1110. **Cross-listed with:** None **Frequency:** Annually **Student Level:** CORE
Comments: Department permission required.
Status: OPEN

CHEM112802
Gateway: General Chemistry Discussion II HARTMANN, NATHANIEL J
Spring 2021
Required of all students in Gateway General Chemistry. Discussion will offer a comprehensive review of the material presented in lecture, with a focus on the key mathematical and chemical concepts needed for problem-solving, in a small group setting.
Credits: 01
Room and Schedule: HIGGINS HALL 265,TH 5 30; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: CHEM1110. **Cross-listed with:** None **Frequency:** Annually **Student Level:** CORE
Comments: Department permission required.

CHEM115001
History of the Greatest Discoveries of Science in Modern Times HAEFFNER, JAN F
Spring 2021
This course will provide a better understanding of how modern society has benefited from discoveries made in science. It will explain the roles physics and alchemy have played in developing chemistry as a science. Furthermore, it will discuss how chemistry has driven the development of biology. The course will focus on the discoveries made in science during the last century up to present time, where several of the science pioneers were awarded the Nobel Prize. Examples of how certain molecules found in nature and made by man have proven to be of great benefit to humanity, such as: NaCl, Penicillin, Phenol, Indigo, Procaine, AZT, TNT, to name a few, will be discussed.
Credits: 03
Room and Schedule: None **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: None **Cross-listed with:** None **Frequency:** Periodically
Student Level: UNDERGRAD ELECT
Comments: None
Status: CANCELLED

CHEM223201
Organic Chemistry II BYERS, JEFFERY
Spring 2021
An introduction to the chemistry, properties, and uses of organic compounds. The correlation of structure with properties and reaction mechanisms and the modern approach to structural and synthetic problems are stressed throughout. In the laboratory, the aim is acquisition of sound experimental techniques through the synthesis of selected compounds.
Credits: 03
Room and Schedule: M W F 9;ONLINE;SYNCHRONOUS;
Satisfies Core Requirement: None
Prerequisites: CHEM2231. **Corequisites:** CHEM2234. CHEM2236. **Cross-listed with:** None
Frequency: Annually
Student Level: UNDERGRAD-MAJORS
Comments: None
Status: OPEN

CHEM223202
Organic Chemistry II DEAK, HOLLY L
Spring 2021
An introduction to the chemistry, properties, and uses of organic compounds. The correlation of structure with properties and reaction mechanisms and the modern approach to structural and synthetic problems are stressed throughout. In the laboratory, the aim is acquisition of sound experimental techniques through the synthesis of selected compounds.
Credits: 03
Room and Schedule: M W F 10;ONLINE;SYNCHRONOUS;
Satisfies Core Requirement: None

CHEM223401
Organic Chemistry Laboratory II SNAPPER, MARC
Spring 2021
Laboratory required of all students enrolled in CHEM2232. One four-hour period per week. Having acquired the necessary lab skills in Organic Chem Lab I, students now can carry out reaction chemistry in the laboratory that is being taught in the lecture course.
Credits: 01
Room and Schedule: MERKERT 018,M 12-3 50;HYBRID;
Satisfies Core Requirement: None
Prerequisites: CHEM2233. **Corequisites:** CHEM2232. **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: Lab fee required
Status: CLOSED

CHEM223402
Organic Chemistry Laboratory II BYERS, JEFFERY
Spring 2021
Laboratory required of all students enrolled in CHEM2232. One four-hour period per week. Having acquired the necessary lab skills in Organic Chem Lab I, students now can carry out reaction chemistry in the laboratory that is being taught in the lecture course.
Credits: 01
Room and Schedule: MERKERT 018,T 12-3 50;HYBRID;

Status: OPEN

CHEM223615
Organic Chemistry Discussion II BYERS, JEFFERY
Spring 2021
Required of all students in CHEM2232. Discussion of organic synthesis design, spectroscopic analysis, reaction mechanisms, and other lecture topics in small groups.
Credits: 00
Room and Schedule: MERKERT CENTER 127,M 2; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: CHEM2232. **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: None
Status: OPEN

CHEM223616
Organic Chemistry Discussion II DEAK, HOLLY L
Spring 2021
Required of all students in CHEM2232. Discussion of organic synthesis design, spectroscopic analysis, reaction mechanisms, and other lecture topics in small groups.
Credits: 00
Room and Schedule: CAMPION HALL 231,W 2; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: CHEM2232. **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: None
Status: OPEN

CHEM223801
Gateway: Organic Chemistry Discussion II DEAK, HOLLY L
Spring 2021
Required of all students in Gateway Organic Chemistry. Discussion will offer a fairly comprehensive review of the material presented in lecture, with a focus on the key concepts needed for problem-solving in a small group setting.
Credits: 01
Room and Schedule: MERKERT CENTER 130,W 2; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: CHEM1110. **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS **Comments:** Department permission required. **Status:** OPEN

CHEM224201
Honors Organic Chemistry II CHATTERJEE, ABHISHEK
Spring 2021
This course is a continuation of the CHEM1117-1118 honors sequence and will concentrate on the structure, bonding, and reactivity of organic compounds. Particular emphasis will be placed on stereochemistry, conformational analysis, reaction mechanisms, principles of organic synthesis, and modern spectroscopic methods.
Credits: 03
Room and Schedule: MERKERT CENTER 129,T TH 9*;HYBRID;
Satisfies Core Requirement: None
Prerequisites: CHEM2241.
Corequisites: CHEM2234 AND CHEM2246.
Cross-listed with: None
Frequency: Annually
Student Level: UNDERGRAD-MAJORS
Comments: Registration with instructor's approval only.
Status: CLOSED

CHEM224601
Honors Organic Chemistry Discussion II None
Spring 2021
Required of all students in CHEM2242. Discussion of organic synthesis design, spectroscopic analysis, reaction mechanisms, and other lecture topics in small groups.
Credits: 00
Room and Schedule: MERKERT CENTER 129,M 6; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: CHEM2242. **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: None
Status: OPEN

CHEM224602
Honors Organic Chemistry Discussion II None
Spring 2021
Required of all students in CHEM2242. Discussion of organic synthesis design, spectroscopic analysis, reaction mechanisms, and other lecture topics in small groups.
Credits: 00
Room and Schedule: MERKERT CENTER 129,T 7; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: CHEM2242. **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: None
Status: OPEN

CHEM332201
Introduction to Inorganic Chemistry FOX, DANIEL J
Spring 2021
This course offers an introduction to inorganic chemistry. Topics include: applications of group theory to describe structure and bonding, coordination chemistry, organometallic chemistry, bioinorganic chemistry, crystal packing, and semiconducting and superconducting materials.
Credits: 03
Room and Schedule: MERKERT CENTER 130,M W F 11;
Satisfies Core Requirement: None **Prerequisites:** CHEM1110 AND CHEM1109. **Corequisites:** CHEM3324.
Cross-listed with: None
Frequency: Annually
Student Level: UNDERGRAD-MAJORS
Comments: Though not required, one year of Organic Chemistry (CHEM2231-2232 or CHEM1118 and CHEM2241) is recommended as a prerequisite for this course.
Status: OPEN

CHEM332301
Inorganic Chemistry Discussion
None Spring 2021
Required of all students in CHEM3322. Discussion of lecture topics in small groups.
Credits: 00
Room and Schedule: MERKERT CENTER 129,M 5; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: None
Status: OPEN

CHEM332302
Inorganic Chemistry Discussion None
Spring 2021

Required of all students in CHEM3322. Discussion of lecture topics in small groups.
Credits: 00
Room and Schedule: CARNEY HALL 007,W 5; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: None
Status: OPEN

CHEM332401
Inorganic Chemistry Laboratory FOX, DANIEL J
Spring 2021
Laboratory required of all students enrolled in CHEM3322. One four-hour period per week.
Credits: 01
Room and Schedule: MERKERT CENTER 120,W 12-4;
Satisfies Core Requirement: None
Prerequisites: None **Corequisites:** CHEM3322. **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: Lab fee required.
Status: OPEN

CHEM332402
Inorganic Chemistry Laboratory FOX, DANIEL J
Spring 2021
Laboratory required of all students enrolled in CHEM3322. One four-hour period per week.
Credits: 01
Room and Schedule: MERKERT CENTER 120,TH 12-4;
Satisfies Core Requirement: None
Prerequisites: None **Corequisites:** CHEM3322. **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: Lab fee required.
Status: CLOSED

CHEM339702
Research Module DEPARTMENT
Spring 2021
Students may engage in a research project that is limited in scope under the supervision of a faculty member.
Credits: 01
Room and Schedule: BY ARRANGEMENT;
Satisfies Core Requirement: None **Prerequisites:** With permission of the Department. **Corequisites:** None
Cross-listed with: None
Frequency: Annually
Student Level: UNDERGRAD-MAJORS
Comments: None
Status: OPEN

CHEM339703
Research Module WEERAPANA, ERANTHIE
Spring 2021
Students may engage in a research project that is limited in scope under the supervision of a faculty member.
Credits: 01
Room and Schedule: BY ARRANGEMENT; **Satisfies Core Requirement:** None **Prerequisites:** With permission of the Department. **Corequisites:** None
Cross-listed with: None
Frequency: Annually
Student Level: UNDERGRAD-MAJORS
Comments: None
Status: OPEN

CHEM339705
Research Module LIU, SHIH-YUAN
Spring 2021
Students may engage in a research project that is limited in scope under the supervision of a faculty member.
Credits: 01
Room and Schedule: BY ARRANGEMENT;
Satisfies Core Requirement: None
Prerequisites: With permission of the Department.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: None
Status: OPEN

CHEM339708
Research Module CHATTERJEE, ABHISHEK
Spring 2021
Students may engage in a research project that is limited in scope under the supervision of a faculty member.
Credits: 01
Room and Schedule: BY ARRANGEMENT; **Satisfies Core Requirement:** None **Prerequisites:** With permission of the Department. **Corequisites:** None
Cross-listed with: None
Frequency: Annually
Student Level: UNDERGRAD-MAJORS
Comments: None
Status: OPEN

CHEM446201
Biochemistry II NIU, JIA
Spring 2021
This course is a two-semester introductory-level course in biochemistry. Topics in the first semester concentrate on protein structure and function, bioenergetics, kinetics and mechanisms of enzyme reactions, intermediary metabolism, control of metabolic pathways, and photosynthesis. Topics in the second semester concentrate on the structure of nucleic acids, recombinant DNA technology, mechanisms of gene rearrangements, DNA replication, RNA synthesis and splicing, protein synthesis, control of gene expression, membrane transport, and hormone action. Experimental methods will also be discussed as they relate to course topics.
Credits: 03
Room and Schedule: T TH 9*;ONLINE;SYNCHRONOUS;
Satisfies Core Requirement: None
Prerequisites: CHEM2232 AND CHEM4461. OR equivalent.
Corequisites: CHEM4464. **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD & GRAD
Comments: None
Status: OPEN

CHEM446401
Biochemistry Discussion II None
Spring 2021
Required of all students in CHEM4462. Discussion of lecture topics and problem-solving methods, in small groups.
Credits: 00
Room and Schedule: MERKERT CENTER 130,W 6;HYBRID;
Satisfies Core Requirement: None
Prerequisites: None **Corequisites:** CHEM4462. **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD & GRAD
Comments: None
Status: OPEN

CHEM446402
Biochemistry Discussion II None
Spring 2021
Required of all students in CHEM4462. Discussion of lecture topics and problem-solving methods, in small groups.
Credits: 00
Room and Schedule: HIGGINS HALL 225,T 6;HYBRID;
Satisfies Core Requirement: None
Prerequisites: None **Corequisites:** CHEM4462. **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD & GRAD
Comments: None
Status: OPEN

CHEM446403
Biochemistry Discussion II None
Spring 2021
Required of all students in CHEM4462. Discussion of lecture topics and problem-solving methods, in small groups.
Credits: 00
Room and Schedule: MERKERT CENTER 129,W 7;HYBRID;
Satisfies Core Requirement: None
Prerequisites: None **Corequisites:** CHEM4462. **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD & GRAD
Comments: None
Status: CLOSED

CHEM447301
Physical Chemistry (Biochemistry Majors) MOHANTY, UDAYAN
Spring 2021
This course is an introduction to physical chemistry. The following topics are covered: thermodynamics, transport properties, chemical kinetics, quantum mechanics, and spectroscopy. Applications to biochemical systems are emphasized.
Credits: 03
Room and Schedule: MERKERT CENTER 127,M W F 11;
Satisfies Core Requirement: None
Prerequisites: CHEM2232 AND MATH1101.
Corequisites: CHEM4474. PHYS2100-2101 (or equivalent) are pre- or co-requisites.
Cross-listed with: None
Frequency: Annually
Student Level: UNDERGRAD-MAJORS
Comments: None
Status: OPEN

CHEM447401
Phys Chem/Biochem Maj Discussion None
Spring 2021
Required of all students in CHEM4473. Discussion of lecture topics and problem-solving methods in small groups.
Credits: 00
Room and Schedule: MERKERT CENTER 130,M 6;HYBRID;
Satisfies Core Requirement: None
Prerequisites: None **Corequisites:** CHEM4473. **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: None
Status: OPEN

CHEM447601
Physical Chemistry II MOHANTY, UDAYAN
Spring 2021
This course is an introduction to the principles of reaction kinetics, kinetic molecular theory, and quantum mechanics of atoms and molecules. Chemistry graduate students may register for this course only if they are advised to do so by the department.
Credits: 03
Room and Schedule: MERKERT CENTER 130,T TH 10 30*;
Satisfies Core Requirement: None
Prerequisites: None
Corequisites: CHEM4478. MATH2202 and PHYS2100-2101/2200-2201 are pre- or co-requisites. .
Cross-listed with: None
Frequency: Annually
Student Level: UNDERGRAD-MAJORS
Comments: CHEM4475 is not a prerequisite for CHEM4476.
Status: OPEN

CHEM447801
Physical Chemistry Discussion II None
Spring 2021
Required of all students in CHEM4476. Discussion of lecture topics and problem-solving methods, in small groups.
Credits: 00
Room and Schedule: CAMPION HALL 204,M 6;HYBRID;
Satisfies Core Requirement: None
Prerequisites: None **Corequisites:** CHEM4476. **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: None
Status: OPEN

CHEM449201
Introduction to Undergraduate Research II DAVIDOVITS, PAUL
Spring 2021
Sophomores or juniors who show exceptional ability may engage in an independent research project under the supervision of a faculty member. The experimental work will be preceded by library research on the project and training in essential laboratory techniques.
Credits: 03
Room and Schedule: BY ARRANGEMENT;
Satisfies Core Requirement: None
Prerequisites: CHEM1109 AND CHEM1110. With permission of the Instructor. With permission of the Department.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: CHEM5591-5592 or CHEM5593-5594 cannot be taken concurrently.
Status: OPEN

CHEM449202
Introduction to Undergraduate Research II MC LAUGHLIN, LARRY
Spring 2021
Sophomores or juniors who show exceptional ability may engage in an independent research project under the supervision of a faculty member. The experimental work will be preceded by library research on the project and training in essential laboratory techniques.
Credits: 03
Room and Schedule: BY ARRANGEMENT;
Satisfies Core Requirement: None
Prerequisites: CHEM1109 AND CHEM1110. With permission of the Instructor. With permission of the Department.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: CHEM5591-5592 or CHEM5593-5594 cannot be taken concurrently.
Status: OPEN

CHEM449203
Introduction to Undergraduate Research II LIU, SHIH-YUAN
Spring 2021
Sophomores or juniors who show exceptional ability may engage in an independent research project under the supervision of a faculty member. The experimental work will be preceded by library research on the project and training in essential laboratory techniques.
Credits: 03
Room and Schedule: BY ARRANGEMENT;
Satisfies Core Requirement: None
Prerequisites: CHEM1109 AND CHEM1110. With permission of the Instructor. With permission of the Department.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: CHEM5591-5592 or CHEM5593-5594 cannot be taken concurrently.
Status: OPEN

CHEM449204
Introduction to Undergraduate Research II MORKEN, JAMES P
Spring 2021
Sophomores or juniors who show exceptional ability may engage in an independent research project under the supervision of a faculty member. The experimental work will be preceded by library research on the project and training in essential laboratory techniques.
Credits: 03
Room and Schedule: BY ARRANGEMENT;
Satisfies Core Requirement: None
Prerequisites: CHEM1109 AND CHEM1110. With permission of the Instructor. With permission of the Department.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: CHEM5591-5592 or CHEM5593-5594 cannot be taken concurrently.
Status: OPEN

CHEM449205
Introduction to Undergraduate Research II CHATTERJEE, ABHISHEK
Spring 2021
Sophomores or juniors who show exceptional ability may engage in an independent research project under the supervision of a faculty member. The experimental work will be preceded by library research on the project and training in essential laboratory techniques.
Credits: 03
Room and Schedule: BY ARRANGEMENT;
Satisfies Core Requirement: None
Prerequisites: CHEM1109 AND CHEM1110. With permission of the Instructor. With permission of the Department.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: CHEM5591-5592 or CHEM5593-5594 cannot be taken concurrently.
Status: OPEN

CHEM449206
Introduction to Undergraduate Research II HOVEYDA, AMIR H
Spring 2021
Sophomores or juniors who show exceptional ability may engage in an independent research project under the supervision of a faculty member. The experimental work will be preceded by library research on the project and training in essential laboratory techniques.
Credits: 03
Room and Schedule: BY ARRANGEMENT;
Satisfies Core Requirement: None

Prerequisites: CHEM1109 AND CHEM1110. With permission of the Instructor. With permission of the Department.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: CHEM5591-5592 or CHEM5593-5594 cannot be taken concurrently.
Status: OPEN

CHEM449207
Introduction to Undergraduate Research II MOHANTY, UDAYAN
Spring 2021
Sophomores or juniors who show exceptional ability may engage in an independent research project under the supervision of a faculty member. The experimental work will be preceded by library research on the project and training in essential laboratory techniques.
Credits: 03
Room and Schedule: BY ARRANGEMENT;
Satisfies Core Requirement: None
Prerequisites: CHEM1109 AND CHEM1110. With permission of the Instructor. With permission of the Department.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: CHEM5591-5592 or CHEM5593-5594 cannot be taken concurrently.
Status: OPEN

CHEM449208
Introduction to Undergraduate Research II NIU, JIA
Spring 2021
Sophomores or juniors who show exceptional ability may engage in an independent research project under the supervision of a faculty member. The experimental work will be preceded by library research on the project and training in essential laboratory techniques.
Credits: 03
Room and Schedule: BY ARRANGEMENT;
Satisfies Core Requirement: None
Prerequisites: CHEM1109 AND CHEM1110. With permission of the Instructor. With permission of the Department.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: CHEM5591-5592 or CHEM5593-5594 cannot be taken concurrently.
Status: OPEN

CHEM449209
Introduction to Undergraduate Research II WASA, MASAYUKI
Spring 2021
Sophomores or juniors who show exceptional ability may engage in an independent research project under the supervision of a faculty member. The experimental work will be preceded by library research on the project and training in essential laboratory techniques.
Credits: 03
Room and Schedule: BY ARRANGEMENT;
Satisfies Core Requirement: None
Prerequisites: CHEM1109 AND CHEM1110. With permission of the Instructor. With permission of the Department.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: CHEM5591-5592 or CHEM5593-5594 cannot be taken concurrently.
Status: OPEN

CHEM449210
Introduction to Undergraduate Research II SNAPPER, MARC
Spring 2021
Sophomores or juniors who show exceptional ability may engage in an independent research project under the supervision of a faculty member. The experimental work will be preceded by library research on the project and training in essential laboratory techniques.
Credits: 03
Room and Schedule: BY ARRANGEMENT;
Satisfies Core Requirement: None
Prerequisites: CHEM1109 AND CHEM1110. With permission of the Instructor. With permission of the Department.
Corequisites: None
Cross-listed with: None
Frequency: Annually
Student Level: UNDERGRAD-MAJORS
Comments: CHEM5591-5592 or CHEM5593-5594 cannot be taken concurrently.
Status: OPEN

CHEM449211
Introduction to Undergraduate Research II ARMSTRONG, WILLIAM
Spring 2021
Sophomores or juniors who show exceptional ability may engage in an independent research project under the supervision of a faculty member. The experimental work will be preceded by library research on the project and training in essential laboratory techniques.
Credits: 03
Room and Schedule: BY ARRANGEMENT;
Satisfies Core Requirement: None
Prerequisites: CHEM1109 AND CHEM1110. With permission of the Instructor. With permission of the Department.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: CHEM5591-5592 or CHEM5593-5594 cannot be taken concurrently.
Status: OPEN

CHEM449212
Introduction to Undergraduate Research II TSUNG, CHIA-KUANG
Spring 2021
Sophomores or juniors who show exceptional ability may engage in an independent research project under the supervision of a faculty member. The experimental work will be preceded by library research on the project and training in essential laboratory techniques.
Credits: 03
Room and Schedule: BY ARRANGEMENT;
Satisfies Core Requirement: None
Prerequisites: CHEM1109 AND CHEM1110. With permission of the Instructor. With permission of the Department.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: CHEM5591-5592 or CHEM5593-5594 cannot be taken concurrently.
Status: OPEN

CHEM449213
Introduction to Undergraduate Research II WAEGELE, MATTHIAS
Spring 2021
Sophomores or juniors who show exceptional ability may engage in an independent research project under the supervision of a faculty member. The experimental work will be preceded by library research on the project and training in essential laboratory techniques.
Credits: 03
Room and Schedule: BY ARRANGEMENT;
Satisfies Core Requirement: None
Prerequisites: CHEM1109 AND CHEM1110. With permission of the Instructor. With permission of the Department.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: CHEM5591-5592 or CHEM5593-5594 cannot be taken concurrently.

CHEM449214
Introduction to Undergraduate Research II BYERS, JEFFERY
Spring 2021
Sophomores or juniors who show exceptional ability may engage in an independent research project under the supervision of a faculty member. The experimental work will be preceded by library research on the project and training in essential laboratory techniques.
Credits: 03
Room and Schedule: BY ARRANGEMENT;
Satisfies Core Requirement: None
Prerequisites: CHEM1109 AND CHEM1110. With permission of the Instructor. With permission of the Department.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: CHEM5591-5592 or CHEM5593-5594 cannot be taken concurrently.
Status: OPEN

CHEM449215
Introduction to Undergraduate Research II KELLY, T ROSS
Spring 2021
Sophomores or juniors who show exceptional ability may engage in an independent research project under the supervision of a faculty member. The experimental work will be preceded by library research on the project and training in essential laboratory techniques.
Credits: 03
Room and Schedule: BY ARRANGEMENT;
Satisfies Core Requirement: None
Prerequisites: CHEM1109 AND CHEM1110. With permission of the Instructor. With permission of the Department.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: CHEM5591-5592 or CHEM5593-5594 cannot be taken concurrently.
Status: OPEN

CHEM449216
Introduction to Undergraduate Research II GAO, JIANMIN
Spring 2021
Sophomores or juniors who show exceptional ability may engage in an independent research project under the supervision of a faculty member. The experimental work will be preceded by library research on the project and training in essential laboratory techniques.
Credits: 03
Room and Schedule: BY ARRANGEMENT;
Satisfies Core Requirement: None
Prerequisites: CHEM1109 AND CHEM1110. With permission of the Instructor. With permission of the Department.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: CHEM5591-5592 or CHEM5593-5594 cannot be taken concurrently.
Status: OPEN

CHEM449217
Introduction to Undergraduate Research II WANG, DUNWEI
Spring 2021
Sophomores or juniors who show exceptional ability may engage in an independent research project under the supervision of a faculty member. The experimental work will be preceded by library research on the project and training in essential laboratory techniques.
Credits: 03
Room and Schedule: BY ARRANGEMENT;
Satisfies Core Requirement: None
Prerequisites: CHEM1109 AND CHEM1110. With permission of the Instructor. With permission of the Department.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: CHEM5591-5592 or CHEM5593-5594 cannot be taken concurrently.
Status: OPEN

CHEM449218
Introduction to Undergraduate Research II WEERAPANA, ERANTHIE
Spring 2021
Sophomores or juniors who show exceptional ability may engage in an independent research project under the supervision of a faculty member. The experimental work will be preceded by library research on the project and training in essential laboratory techniques.
Credits: 03
Room and Schedule: BY ARRANGEMENT;
Satisfies Core Requirement: None
Prerequisites: CHEM1109 AND CHEM1110. With permission of the Instructor. With permission of the Department.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: CHEM5591-5592 or CHEM5593-5594 cannot be taken concurrently.
Status: OPEN

CHEM449219
Introduction to Undergraduate Research II ZHANG, XIAO-XIANG
Spring 2021
Sophomores or juniors who show exceptional ability may engage in an independent research project under the supervision of a faculty member. The experimental work will be preceded by library research on the project and training in essential laboratory techniques.
Credits: 03
Room and Schedule: BY ARRANGEMENT;
Satisfies Core Requirement: None
Prerequisites: CHEM1109 AND CHEM1110. With permission of the Instructor. With permission of the Department.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: CHEM5591-5592 or CHEM5593-5594 cannot be taken concurrently.
Status: OPEN

CHEM449220
Introduction to Undergraduate Research II DEPARTMENT
Spring 2021
Sophomores or juniors who show exceptional ability may engage in an independent research project under the supervision of a faculty member. The experimental work will be preceded by library research on the project and training in essential laboratory techniques.
Credits: 03
Room and Schedule: BY ARRANGEMENT;
Satisfies Core Requirement: None
Prerequisites: CHEM1109 AND CHEM1110. With permission of the Instructor. With permission of the Department.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS

Status: OPEN

CHEM552301
Organometallic Chemistry ZHANG, XIAO-XIANG
Spring 2021
This course will present concepts of organometallic chemistry, e.g., the chemistry of compounds that have bonds between metals and carbon. Organotransition metal chemistry will be emphasized. Among the areas to be covered will be structure and bonding in organotransition metal complexes, ligand systems, catalysis, polymerizations, common reactions, and applications in organic synthesis.
Credits: 03
Room and Schedule: CARNEY HALL 308,T TH 9*; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: None **Cross-listed with:** None **Frequency:** Periodically
Student Level: UNDERGRAD & GRAD
Comments: The course is intended for graduate students and advanced undergraduates who have completed or are currently enrolled in organic and inorganic chemistry courses.
Status: OPEN

CHEM552701
Metallobiochemistry BAK, DANIEL W
Spring 2021
The purpose of this course is to expose students to the wide scope of metal-dependent enzymes and proteins in biology and the mechanism by which these metallocofactors promote unique and complex biochemical transformations. By the end of the course, students will have:
(1) a detailed appreciation for the history, direction, and future of the field of metallobiochemistry, and (2) a set of skills that allows them to critically interpret biochemical and spectroscopic data from the primary literature and infer the structure, function, and mechanisms of unknown metalloproteins.
Credits: 03
Room and Schedule: None
Satisfies Core Requirement: None
Prerequisites: One year of Organic Chemistry (CHEM2231-2232 or equivalent) and Biochemistry (CHEM4461-4462 or CHEM4465 or BIOL4350 and BIOL4400).
Corequisites: None **Cross-listed with:** None **Frequency:** Periodically
Student Level: UNDERGRAD & GRAD
Comments: None
Status: CANCELLED

CHEM554001
Magnetic Resonance in Biology JAYASUNDERA, THUSITHA
Spring 2021
Innovations in the fields of biology and medicine over the last three decades have been rapid and immense. This course will focus on studying the applications of magnetic resonance to solve problems in chemistry, chemical biology, biochemistry, and biophysics. Hands-on experience with the complete NMR chemical shift assignments (backbone, side chain, distance) for the structure determination of proteins, and using NMR to probe the dynamics of protein- ligand binding interactions, will be the two central projects of the course. Time permitting, the role of electron paramagnetic resonance in biology will also be discussed.
Credits: 03
Room and Schedule: MERKERT CENTER 130,T 6-8 30;
Satisfies Core Requirement: None
Prerequisites: Organic Chemistry and Biochemistry are recommended prerequisites.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD & GRAD
Comments: None
Status: OPEN

CHEM554401
Modern Methods in Organic Synthesis II SNAPPER, MARC; MORKEN, JAMES P
Spring 2021
Survey and analysis of contemporary strategies employed in the synthesis of medicinally significant natural and unnatural products. Examines the creativity and logic of approaches toward medicinally important compounds. Topics will include novel strategies toward synthetic problems and landmark total syntheses as well as issues in the current chemical literature.
Credits: 03
Room and Schedule: MERKERT CENTER 129,T TH 10 30*;
Satisfies Core Requirement: None
Prerequisites: CHEM5531.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD & GRAD
Comments: None
Status: OPEN

CHEM555201
Advanced Methods in Chemistry I METZ, KENNETH R
Spring 2021
This course discusses the principles, methods, and applications of instrumental techniques such as calorimetry, chromatography, lasers, and optical spectroscopy in modern chemistry, along with techniques for the analysis and interpretation of experimental data. It is intended mainly for third year students. The accompanying laboratory includes experiments with these methods and emphasizes experimental design, data interpretation, and the presentation of results in written and oral formats.
Credits: 04
Room and Schedule: MERKERT CENTER 130,TH 6-8;
Satisfies Core Requirement: None **Prerequisites:** CHEM4475 AND CHEM3351. **Corequisites:** CHEM5554.
Cross-listed with: None
Frequency: Annually
Student Level: UNDERGRAD-MAJORS
Comments: None
Status: CLOSED

CHEM555401
Advanced Methods in Chemistry Laboratory I METZ, KENNETH R
Spring 2021
Laboratory required of all students enrolled in CHEM5552. Two four-hour periods per week.
Credits: 00
Room and Schedule: MERKERT CENTER 001,T TH 12-4;HYBRID;
Satisfies Core Requirement: None
Prerequisites: None **Corequisites:** CHEM5552. **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: None
Status: CLOSED

CHEM555402
Advanced Methods in Chemistry Laboratory I METZ, KENNETH R
Spring 2021
Laboratory required of all students enrolled in CHEM5552. Two four-hour periods per week.
Credits: 00
Room and Schedule: MERKERT CENTER 001,W F 12-4;HYBRID;
Satisfies Core Requirement: None
Prerequisites: None **Corequisites:** CHEM5552. **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: None
Status: CLOSED

CHEM559201
Undergraduate Chemical Research II ARMSTRONG, WILLIAM
Spring 2021
The essential feature of this course is an independent research project performed under the supervision of a faculty member. The individual work will be preceded by a series of lectures and demonstrations on the use of the library and several essential laboratory techniques.
Credits: 03
Room and Schedule: BY ARRANGEMENT;
Satisfies Core Requirement: None
Prerequisites: With permission of the Instructor. With permission of the Department.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: Course is intended for seniors.
Status: OPEN

CHEM559202
Undergraduate Chemical Research II MORKEN, JAMES P
Spring 2021
The essential feature of this course is an independent research project performed under the supervision of a faculty member. The individual work will be preceded by a series of lectures and demonstrations on the use of the library and several essential laboratory techniques.
Credits: 03
Room and Schedule: BY ARRANGEMENT;
Satisfies Core Requirement: None
Prerequisites: With permission of the Instructor. With permission of the Department.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS **Comments:** Course is intended for seniors. **Status:** OPEN

CHEM559203
Undergraduate Chemical Research II LIU, SHIH-YUAN
Spring 2021
The essential feature of this course is an independent research project performed under the supervision of a faculty member. The individual work will be preceded by a series of lectures and demonstrations on the use of the library and several essential laboratory techniques.
Credits: 03
Room and Schedule: BY ARRANGEMENT;
Satisfies Core Requirement: None
Prerequisites: With permission of the Instructor. With permission of the Department.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS **Comments:** Course is intended for seniors. **Status:** OPEN

CHEM559204
Undergraduate Chemical Research II HOVEYDA, AMIR H
Spring 2021
The essential feature of this course is an independent research project performed under the supervision of a faculty member. The individual work will be preceded by a series of lectures and demonstrations on the use of the library and several essential laboratory techniques.
Credits: 03
Room and Schedule: BY ARRANGEMENT;
Satisfies Core Requirement: None
Prerequisites: With permission of the Instructor. With permission of the Department.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS **Comments:** Course is intended for seniors. **Status:** OPEN

CHEM559205
Undergraduate Chemical Research II KELLY, T ROSS
Spring 2021
The essential feature of this course is an independent research project performed under the supervision of a faculty member. The individual work will be preceded by a series of lectures and demonstrations on the use of the library and several essential laboratory techniques.
Credits: 03
Room and Schedule: BY ARRANGEMENT;
Satisfies Core Requirement: None
Prerequisites: With permission of the Instructor. With permission of the Department.
Corequisites: None
Cross-listed with: None
Frequency: Annually
Student Level: UNDERGRAD-MAJORS **Comments:** Course is intended for seniors. **Status:** OPEN

CHEM559206
Undergraduate Chemical Research II MC LAUGHLIN, LARRY
Spring 2021
The essential feature of this course is an independent research project performed under the supervision of a faculty member. The individual work will be preceded by a series of lectures and demonstrations on the use of the library and several essential laboratory techniques.
Credits: 03
Room and Schedule: BY ARRANGEMENT;
Satisfies Core Requirement: None
Prerequisites: With permission of the Instructor. With permission of the Department.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS **Comments:** Course is intended for seniors. **Status:** OPEN

CHEM559207
Undergraduate Chemical Research II WASA, MASAYUKI
Spring 2021
The essential feature of this course is an independent research project performed under the supervision of a faculty member. The individual work will be preceded by a series of lectures and demonstrations on the use of the library and several essential laboratory techniques.
Credits: 03
Room and Schedule: BY ARRANGEMENT;
Satisfies Core Requirement: None
Prerequisites: With permission of the Instructor. With permission of the Department.
Corequisites: None
Cross-listed with: None
Frequency: Annually
Student Level: UNDERGRAD-MAJORS **Comments:** Course is intended for seniors. **Status:** OPEN

CHEM559208
Undergraduate Chemical Research II MOHANTY, UDAYAN

Spring 2021
The essential feature of this course is an independent research project performed under the supervision of a faculty member. The individual work will be preceded by a series of lectures and demonstrations on the use of the library and several essential laboratory techniques.
Credits: 03
Room and Schedule: BY ARRANGEMENT;
Satisfies Core Requirement: None
Prerequisites: With permission of the Instructor. With permission of the Department.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS **Comments:** Course is intended for seniors. **Status:** OPEN

CHEM559209
Undergraduate Chemical Research II WAEGELE, MATTHIAS
Spring 2021
The essential feature of this course is an independent research project performed under the supervision of a faculty member. The individual work will be preceded by a series of lectures and demonstrations on the use of the library and several essential laboratory techniques.
Credits: 03
Room and Schedule: BY ARRANGEMENT;
Satisfies Core Requirement: None
Prerequisites: With permission of the Instructor. With permission of the Department.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS **Comments:** Course is intended for seniors. **Status:** OPEN

CHEM559210
Undergraduate Chemical Research II SNAPPER, MARC
Spring 2021
The essential feature of this course is an independent research project performed under the supervision of a faculty member. The individual work will be preceded by a series of lectures and demonstrations on the use of the library and several essential laboratory techniques.
Credits: 03
Room and Schedule: BY ARRANGEMENT;
Satisfies Core Requirement: None
Prerequisites: With permission of the Instructor. With permission of the Department.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS **Comments:** Course is intended for seniors. **Status:** OPEN

CHEM559211
Undergraduate Chemical Research II DAVIDOVITS, PAUL
Spring 2021
The essential feature of this course is an independent research project performed under the supervision of a faculty member. The individual work will be preceded by a series of lectures and demonstrations on the use of the library and several essential laboratory techniques.
Credits: 03
Room and Schedule: BY ARRANGEMENT;
Satisfies Core Requirement: None
Prerequisites: With permission of the Instructor. With permission of the Department.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually

CHEM661201
Scientific Communication in Chemistry II WEERAPANA, ERANTHIE
Spring 2021
A continuation of CHEM6611. This course seeks to best facilitate the transition of incoming graduate students to successful researchers in chemistry. Specifically, students in this course will practice and improve on various communication skills including scientific presentations, as well as writing articles and proposals. Ethics and social responsibilities of performing chemical research will also be discussed.

Classical Studies Courses: Summer 2020

CLAS106301
Intensive Reading in Latin KAKAVAS, MARIA
Summer 2020
The goal of this course is to build solid reading skills in the Latin language by providing an intensive and comprehensive introduction to the basics of Latin grammar and syntax. The course meets for twelve weeks and is divided into two sessions. The first session will begin to guide students through the fundamentals of the language using *Wheelock's Latin.* The second session will complete *Wheelock's Latin* and proceed to readings in the original from Caesar, Cicero, Catullus, and others.

CLAS118601
Greek Civilization HOFFMAN, GAIL L
Fall 2020
An introduction to the art and archaeology, cultural history, and literature of ancient Greece from the Late Bronze Age to the end of the Peloponnesian War (ca. 2000-400 BCE). Readings in the Iliad, Herodotus, and Thucydides, examine how the Trojan, Persian, and Peloponnesian Wars molded Greek civilization. While art and archaeology provide a counterpoint for the broader study of Greek culture.

CLAS220701
Greeks and Barbarians THATCHER, MARK R
Fall 2020
In "Greeks and Barbarians," we'll use a combination of written sources, archaeological evidence, and even visual art to investigate the fascinating history of relationships and conflicts between Greeks, Persians, Egyptians, Carthaginians, and more. We'll read a variety of literature in English, such as the histories of Herodotus and Xenophon, the tragedies of Aeschylus and Euripides, and more, to help us figure out what Greeks really thought about barbarians--and about themselves.

CLAS223001
Classical Mythology EISENFELD, HANNE E
Fall 2020
This course explores the mythology of ancient Greece, Rome, and the Near East within its cultural, political, historical, and religious contexts. You will meet (or renew your acquaintance with) mythical figures like Zeus, Gilgamesh, Medusa, and Helen as they appear in multiple literary genres and other artistic media. In order to analyze and interrogate these myths we will use ancient and modern frameworks for thinking about what mythology is and what it does.
What can a myth tell us about the civilization that created, adopted, or adapted it? What do our uses of Classical mythology--and our creations of our own myths--tell us about ourselves?

CLAS229501
Ancient Comedy POLT, CHRISTOPHER B
Fall 2020
This course explores comedy from ancient Greece and Rome. Reading plays by Aristophanes, Plautus, and Terence, we will examine what the ancients considered "comic," how comedy was performed, and what comedy contributed to contemporary society. Along the way we will consider how comedy promotes, questions, and lampoons ancient values and ideas about warfare, slavery, gender and sexuality, etc. All readings will be in English and there will be substantial performance opportunities.

CLAS331501
Homer:
EISENFELD, HANNE E
Fall 2020
Homer's Iliad is not only one of the world's great war poems, it is also the story of the quintessential epic hero, Achilles. We will read, in Greek, a selection of books (including 1,9, 16, 22, 24) that trace Achilles' trajectory through rage, grief, and empathy. We will discuss the questions raised by Achilles' relationships with his superiors, friends, family, and enemies: To whom is loyalty owed and are there limits to those obligations? What is the price of kleos and should one pay? Does war abrogate the laws that govern human conduct? We will also discuss some of the fundamental debates of Homeric scholarship including the history and composition of the texts, the effects of language and meter, and the place of epic in Greek literature.
Credits: 03
Room and Schedule: T TH 1 30*;ONLINE;SYNCHRONOUS;

CLAS333301
Apuleius
ESHLEMAN, KENDRA J
Fall 2020
Apuleius' "Metamorphoses" (aka the "Golden Ass") is the only ancient Latin novel to survive complete, an exploration of the dark underbelly of Roman imperial society, sex, violence, slavery, witchcraft, banditry, and unholy curiosity. In this course, we will read in Latin all of book three, and large sections of the novella that occupies the center of the work, the "Cupid" and "Psyche." In addition, we will read the entire novel in English.

CLAS337501
Vergil
POLT, CHRISTOPHER B
Fall 2020
Vergil's Aeneid, the premier work of Roman poetry, recounts the struggles of refugees from the Trojan War as they wander in search of a new home and in the process lay the foundations of Rome. We will read large selections of the epic in Latin and the whole in English, considering how Romans viewed themselves in their broader Mediterranean context, what archetypical values Vergil embodies in his characters, and how the poem speaks to the anxieties and interests of Vergil's contemporaries at the beginning of the Empire.

CLAS170101
Death in Ancient Greece: Achilles to Alexander the Great EISENFELD, HANNE E
Spring 2021
In ancient Greece, death played a starring role in epic poetry and on the tragic and comic stage, funerary monuments lined the roadways, and dead heroes and family members alike were believed to intervene in the affairs of the living. Beginning with the "funeral mask of Agamemnon" and ending with royal Macedonian tombs, this course examines how ancient Greek responses to death addressed the universal problem of mortality while simultaneously using death as a lens for thinking about contemporary problems. We will consider throughout how the ancient materials resonate differently--or not--for us today.

CLAS223601
Roman Law and Family ESHLEMAN, KENDRA J
Spring 2021
We will look at the makeup and dynamics of the Roman household through legal sources, which allow investigation of Roman legal arguments and approaches to issues such as marriage, dowry, divorce, disciplining children, adultery, procreation, adoption, and women's rights, and the role of the pater familias. We will also observe similarities and differences between Roman family law and modern American family law. By the end of the course you will have gained a better understanding not only of the Roman family but also of how societies--including our own-
-use law to order and regulate family relationships.

CLAS225001
Multiculturalism in the Roman Empire THATCHER, MARK R
Spring 2021
From its beginnings as a small city-state in central Italy, Rome built a vast multicultural empire stretching across the entire Mediterranean and much of Europe. We will travel through this empire, visiting such different peoples and provinces as the Germans and the Jews, Britain and Greece. How did those people remain loyal to their origins while also becoming Roman? How did the different cultures included within the empire transform who "the Romans" were and what it meant to be Roman? How did the emperors--those larger-than-life figures like Augustus and Nero--use the diversity of the empire to craft their public images as conquerors or as...Greek actors? We'll use a

combination of written sources, archaeological evidence, and even visual art to investigate these questions and to explore the ever-expanding melting pot of the Roman world.

CLAS225401
The Culture of Athenian Democracy HOFFMAN, GAIL L
Spring 2021
and the eventual collapse following the Peloponnesian War. Readings in translation include Thucydides, Plutarch, Aristotle, Xenophon, Plato, and the Greek playwrights (Aeschylus, Sophocles, Euripides, and Aristophanes). Emphasis will be on integrating historical, literary, and archaeological evidence to provide as complete a picture as possible of this dynamic period of ancient history.

CLAS228001
Beast Literature POLT, CHRISTOPHER B
Spring 2021
From Mother Goose's fairy tales to lolcats, we imagine animals often speaking as we do. But what are we saying when we use animals to talk with and about one another? And what does literature featuring articulate animals say about our attitudes towards humans, animals, and the lines we draw between them? This course explores "beast literature" in its various forms (fable, comedy, the novel, epic, debate poetry, etc.), examining its incarnations through ancient Greece and Rome, Medieval Europe, and the modern world.

CLAS337001
Roman Comedy
POLT, CHRISTOPHER B
Spring 2021
The Roman playwright Plautus inspired many of the greatest writers of Western comedy, including Shakespeare, Moliere, and Wilde. This term we will read in Latin one full comedy, aiming to acquire a greater knowledge of Latin grammar and vocabulary and to improve facility in reading Latin poetry. We will examine the genre more broadly by reading additional Roman comedies in English. We will also explore the cultural, material, and performance context of Roman theater.

CLAS338201
Herodotus I THATCHER, MARK R
Spring 2021
Father of History, Father of Lies, Herodotus marks the beginning of the Greco-Roman historiographic tradition. In this class, we will read portions of books 1 and [redacted] of the Histories in Greek, and sections of the rest of the work in English. Central issues will include the nature, methods, and principles of Herodotean historiography, his relationship to earlier poetic and prose traditions and to the intellectual and political climate of the fifth century BCE, and social, cultural, political issues raised by the work, and the historical events it chronicles--especially, but hardly limited to, the Persian Wars.

COMM106001
Anti-Social Media HARTNETT, KRISTIN A
Fall 2020
Do you ever wonder what toll social media might be taking on your mental health? Do you long to 'break up' with your phone and live in the moment? This one-credit (pass-fail) seminar examines student anxieties about technology habits and experiments with practices of mindfulness. The course orients you to think and act more purposefully as a 'whole person'--in keeping with the Jesuit ideals of attentiveness and character formation--as opposed to one who is screen-dependent. Short readings, fun viewings, meditative journal entries, and small-class discussions will focus on the social, psychological, and emotional consequences of digital experiences (including friendships, learning, privacy, dating, and so on). Students will also set one #goal per month, of their own choosing, to try to live differently with their tech habits--self- examining how that change feels and what insights emerge.

COMM190201
Digital Storytelling REYNOLDS, PAUL A
Fall 2020
Storytelling is an essential part of every community, organization, and business. However, the channels through which stories are told have evolved. With the advent of the internet, digital media now combines tradition with technology. Narratives can be told in new, multidimensional ways with video, audio, blogs, text, images, and graphics. The purpose of this course is to help you understand why communication professionals and, moreover, civilizations throughout human history create and value stories. You will also learn how to employ a variety of digital technologies to create compelling content. This will be achieved through examining the underlying concepts and technical processes involved in telling stories for delivery on the desktop, the mobile device, or tablet.

COMM218401
Sports, Media, Culture SERAZIO, MICHAEL J
Fall 2020
Sports have long played a vital yet complex role in culture, and this course examines that intersection of sports, the mass media, and society. We will appraise and debate the ways in which sports are functional or problematic in their impact on and relationship to players, fans, journalists, co-cultural groups, and nations. Students will read both scholarly and journalistic reflections, view popular and documentary film, and analyze fan experiences, mediated presentations, and critical social issues. In short, we will go beyond the box score to understand the importance--and deconstruct the hype--that accompanies modern sports.

COMM220301
Image as Communication LIVON-GROSMAN, ERNESTO
Fall 2020
The goal of this course is to study how images are formed while exploring the ways in which they are being used to communicate. Following the critical tradition that treats images as a static representation all the way to recent studies that focus on writing with images in the era of interactive media, we will read critical texts while exploring concrete examples taken from books, political posters, films, and social media. What is the relation between text and image?
What are the politics of image making? How do images change through different national and cultural settings? And how does the materiality of images define the way we make sense of them? From Walter Benjamin, John Berger, Malcolm Turvey to Noigandres and Laura Mulvey to Harun Farocki we will try to answer some of these questions while looking at concrete examples. We will watch and analyze multimedia productions, read texts, and discuss visual representations from a variety of visual and textual sources. Class and readings in English, audiovisual materials in English and/or with English subtitles.

COMM221101
Spirits, Race, and Culture VATS, ANJALI S
Fall 2020
In the early 2000s, the resurgence of Prohibition Era cocktail culture led to renewed interest in hard liquor. As speakeasy style cocktail bars popped up all over the country, the demand for spirits rose. This course examines the racial implications of America's drinking cultures, specifically the complex relationships between race, colonialism, capitalism, and liquor consumption. Using examples such as the construction of cocktail bars, the production of rum, the development of tiki culture, and the disenfranchisement of sugar cane farmers, we will think about the identity implications of drinking.

COMM221201
Fascist Rhetoric and Representation EROL, ALI E
Fall 2020
This course will interrogate the rhetoric and aesthetics of fascism as a system of governmentality and as a mentality, both of which are characterized by a desire for dictatorial control, the forcible suppression of opposing positions and perspectives, and a preoccupation with rigidly defined hierarchies of power and privilege. We will survey the origins of fascism in the 20th century Europe, as embodied in political leaders such as Mussolini, Hitler, and Stalin, with particular focus on the ways in fascist ideology was disseminated and absorbed through the production and consumption of popular culture. We will then turn to contemporary manifestations of neo-fascism, including the recent rise of ethno-nationalist groups in America

Growing Up Gendered: Contemporary Media Representations CUKLANZ, LISA M
Fall 2020
This course explores how conventional and unconventional views of feminine and masculine behaviors for children, adolescents and adults have been circulated in current popular culture through television, film, and advertising over the past two decades. Starting with an examination of children's media, the course will examine how different theorists and popular media have created and analyzed patterns of representation related to gender, identity, and cultural expectations. Throughout the course we will explore how the categories of gender and sexuality intersect with other dimensions of individual identity such as race, class, and religion. The course will examine a range of commonly gendered themes in popular culture, including sports culture, girlhood, eating disorders, consumerism, romance/bromance, and gendered violence.

Digital Media Field Production HOWLEY, RICHARD J
Fall 2020
With the ubiquitous nature of video streaming on desktops, mobile phones, and tablets, the influence of video storytelling has never been greater or more pervasive--and the demand for skilled digital storytellers to fill those increasingly ubiquitous screens is stronger than ever. This course offers professional guidance and hands-on experience to develop the skills, techniques, and disciplines necessary for the creation of digital media produced in the field. Students will write and produce their own video programs, becoming familiar with all aspects of production and post production, including producing, performing, directing, single-camera shooting, sound recording, and location lighting, as well as editing, digital effects, and graphics. In the process, students will develop a discerning eye for what makes an effective, professional, aesthetically pleasing video production, while they build a portfolio that can used during job or graduate program interviews.

Studio Television Production REYNOLDS, PAUL A
Fall 2020
This course is designed to introduce students to the theories, tools, and techniques of television production. The focus of this class is on developing the production skills necessary for creating effective television communication. To pursue this goal, students will combine the information from the course's texts with practical experience in the form of exercises and the creation of their own television programs. While producing and directing their programs, students, working in crews, will learn to operate studio television equipment and develop an understanding of how messages are communicated using "live" or "live-on-tape" production methods.

COMM222401
The Ideal of the Open Mind SANDEL, ADAM
Fall 2020
In an age of polarized politics, it is immensely difficult to keep an open mind in public debate. Convinced that our side is right and the other wrong, we readily retreat to our respective corners, rally our allies, and prepare to outvote or shout down our opponents. But insofar as we remain committed to democratic deliberation, we must try to understand our fellow citizens and make the attempt to persuade them. To bring our fellow citizens around to our way of seeing things, we have to first understand where they're coming from, which means keeping an open mind. In this course, we will address the meaning of the open mind as it bears upon political rhetoric and communication, moral debate, and the study of culture. Questions we will address include: is political rhetoric invariably a form of manipulation and deceit, or is it a way of persuading people by appealing to them from within their own perspectives? Can tradition be a source for reform? To what extent have the most radical reforms in American history drawn upon tradition versus left tradition behind? To address these questions, we will examine and assess the ideal of the open mind as it has emerged in the Western philosophical tradition from Plato and Aristotle to the present.

COMM336201
Film Theory and Criticism PASTEL, RENEE L
Fall 2020
This course is structured around the question of how visual media convey and influence the world in which they are created. By surveying some of the major questions raised by theorists from the beginnings of film as a medium to the present, students will gain critical lenses through which to historically and theoretically engage visual media. We will cover topics including: film aesthetics; Marxist, psychoanalytic, feminist, critical race, and queer theoretical approaches to film criticism; television studies; and new media theories. Students will learn how to analyze film on a formal level, taking into account how form creates meaning, and to think historically and theoretically about how film as art and commerce has contributed to shaping "smaller screen" media forms and understandings.

Critical News Studies SEARS, ANNE
Fall 2020
What is news? We will examine the deceptively simple question, paying attention to historical shifts in news organizations, journalistic practice and process, technological forms and sociocultural patterns. We will dissect visual and textual features of news, consider how events become newsworthy, analyze journalistic work routines, identify framing devices, public agendas, editorial power and audience relationships. Topics include climate change, immigration, mass violence and representation. Studying how news works and model of how it can be made differently gives us a guide for navigating news in our personal and professional lives.

COMM445201
News Media/Democracy SERAZIO, MICHAEL J
Fall 2020
The press plays an essential role in America and the world. This course aims to equip students to become critical news consumers with both a skilled understanding of how journalism works and political literacy about the big issues of our time. Through classic scholarly reflections as well as contemporary punditry examples, we will tackle the news media critically across three dimensions: learning about its indispensable function in mediating politics and democracy throughout history and today; studying and practicing the craft of opining writing and social advocacy; and evaluating and critiquing the performance of the press across these fronts.

Fall 2020
From film to television to mobile apps, this course examines children's media as an economic, cultural, and political entity and explores the relationships among young people and the contemporary media environment. Students will analyze various scholarly approaches and major debates in the study of children and media while also learning the larger historical contexts of those debates. This course offers a critical/cultural approach that examines the ways in which media industries, institutions, technologies, and texts intersect to produce particular media practices and considers how such practices relate to the production of cultural norms or social power.

COMM105001
Translating Theory to Practice INGRAM, BRETT D
Spring 2021
As a Communication student at Boston College you have been, and will continue to be, provided with numerous opportunities to learn about communication at both theoretical and practical levels in multiple areas within our discipline (e.g., media, rhetoric, culture, gender, health, interpersonal, family). The objective of this course is to assist in you in discerning how your education in the field of communication will prepare you to ask and eventually answer questions about your life, vocation, and role in the lives of others. Each week, a Communication department faculty member or guest speaker from the professional world will address a topic relevant to students on the precipice of entering the workforce, including (but not limited to): how to discuss academic research in language that resonates with employers in fields such as public advocacy, broadcasting, advertising, public relations, and consulting; whether/how to pursue graduate study; and how to present yourself in job applications and interviews.

COMM106001
Anti-Social Media SERAZIO, MICHAEL J
Spring 2021
Do you ever wonder what toll social media might be taking on your mental health? Do you long to 'break up' with your phone and live in the moment? This

one-credit (pass-fail) seminar examines student anxieties about technology habits and experiments with practices of mindfulness. The course orients you to think and act more purposefully as a 'whole person'--in keeping with the Jesuit ideals of attentiveness and character formation--as opposed to one who is screen-dependent. Short readings, fun viewings, meditative journal entries, and small-class discussions will focus on the social, psychological, and emotional consequences of digital experiences (including friendships, learning, privacy, dating, and so on). Students will also set one #goal per month, of their own choosing, to try to live differently with their tech habits--self- examining how that change feels and what insights emerge.

COMM106201
Spiritual, but Not Religious, Meaning Making in Media and Culture PETERSON, KRISTIN M
Spring 2021
When asked to identify their religion, younger generations of Americans increasingly identify as "non" or "unaffiliated." At the same time, young people appear to be pursuing deeper meaning through practices like hiking pilgrimages, joining exercise communities like SoulCycle and CrossFit, reading Harry Potter books as sacred texts, meditating to mindfulness apps, following the latest wellness fad promoted by celebrity gurus, sharing inspirational astrology quotes on Instagram, and participating in digital detox retreats. This one credit course will use digital media and cultural spaces as the main sites to explore the various ways young Americans still remain religious in their pursuit of spirit significance and intimate connections with others.
Students will read contemporary reflections, both academic and popular, on these emerging practices while they will also engage with these media spaces in their daily lives in order to reflect on the shifting ways that "religious nones" seek meaning and connections in their daily lives.

COMM170301
The Rhetoric of Social Inequality in America WELLS, CELESTE C
Spring 2021
This course looks at the role that rhetoric (i.e., communication and social interaction) plays in creating, maintaining, and forwarding social inequality in America. The course draws upon critical, scholarly work covering inequality of class, race, gender, and sexuality to analyze artifacts in the media (e.g., commercials, television, film, music). Students will consider the ways that rhetoric regarding inequality, meritocracy, capitalism, and the American Dream has been embedded in their communicative experience and impacted their notion of individual and group responsibility as it relates to inequality in order to become more thoughtful about how they perceive and engage the world.

COMM190201
Digital Storytelling REYNOLDS, PAUL A
Spring 2021
Storytelling is an essential part of every community, organization, and business. However, the channels through which stories are told have evolved. With the advent of the internet, digital media now combines tradition with technology. Narratives can be told in new, multidimensional ways with video, audio, blogs, text, images, and graphics. The purpose of this course is to help you understand why communication professionals and, moreover, civilizations throughout human history create and value stories. You will also learn how to employ a variety of digital technologies to create compelling content. This will be achieved through examining the underlying concepts and technical processes involved in telling stories for delivery on the desktop, the mobile device, or tablet.

COMM218001
Masculinity, Sexuality, and Difference INGRAM, BRETT D
Spring 2021
This course will examine constructions of masculinity and sexuality in Western society from a critical cultural perspective. We will consider the ways in which cultural narratives about "acceptable" masculine behaviors and attitudes catalyze social conflicts, reinforce established power hierarchies, and organize the modes of being available to people of different gender identities and sexual orientations. We will also evaluate the liberating potential of emergent discourses and practices that seek to cultivate greater acceptance of diversity, and promote social healing. There will be a concentrated focus on popular cultural forms (especially television, film, music, sports, and social media) that are particularly influential to contemporary men and boys.

Gender, Identity, and Sexuality EROL, ALI E
Spring 2021
This course aims to provide an introduction and foundation to the field of gender and sexuality studies. The course will explore the relationship between sex, gender, sexuality, and identity, while also looking at the intersections of race, class, ethnicity, culture, and other positionalities. The course will review the history of gender and sexuality studies, the social construction of identities, the power and privilege of certain identities, the impact of media and popular culture on our understanding of identity, as well as the social movements and future of the LGBTQ+ populations and other identities

COMM218401
Sports, Media, Culture KIM, KYOUNG-YIM
Spring 2021
Sports have long played a vital yet complex role in culture, and this course examines that intersection of sports, the mass media, and society. We will appraise and debate the ways in which sports are functional or problematic in their impact on and relationship to players, fans, journalists, co-cultural groups, and nations. Students will read both scholarly and journalistic reflections, view popular and documentary film, and analyze fan experiences, mediated presentations, and critical social issues. In short, we will go beyond

the box score to understand the importance--and deconstruct the hype--that accompanies modern sports.

COMM221201
Fascist Rhetoric and Representation EROL, ALI E
Spring 2021
This course will interrogate the rhetoric and aesthetics of fascism as a system of governmentality and as a mentality, both of which are characterized by a desire for dictatorial control, the forcible suppression of opposing positions and perspectives, and a preoccupation with rigidly defined hierarchies of power and privilege. We will survey the origins of fascism in the 20th century Europe, as embodied in political leaders such as Mussolini, Hitler, and Stalin, with particular focus on the ways in fascist ideology was disseminated and absorbed through the production and consumption of popular culture. We will then turn to contemporary manifestations of neo-fascism, including the recent rise of ethno-nationalist groups in America

Studio Television Production HOWLEY, RICHARD J
Spring 2021
This course is designed to introduce students to the theories, tools, and techniques of television production. The focus of this class is on developing the production skills necessary for creating effective television communication. To pursue this goal, students will combine the information from the course's texts with practical experience in the form of exercises and the creation of their own television programs. While producing and directing their programs, students, working in crews, will learn to operate studio television equipment and develop an understanding of how messages are communicated using "live" or "live-on-tape" production methods.

Spring 2021
This course takes both a theoretical and practical approach to the art of political communication. Taught by an instructor with extensive field experience, the class surveys major historical trends in campaign advertising, policy messaging, and media relations. It then considers the modern world of political communication, offering an up-to-the-minute assessment of major trends in the field. Students have the opportunity to develop their own skills and portfolios by creating original political advertisements, social media campaigns, policy speeches, and more. The course features a number of notable guest speakers, including active politicians, candidates, and campaign managers.

COMM224001
Memory and Media PASTEL, RENEE L
Spring 2021
This course focuses on the relationship between memory and moving images. How can film, television, and online video capture and reproduce memory? What role can moving images play in shaping memory, both on an individual and collective level? What claims does the medium make about accurately presenting the past? Through close analysis of film, television, and digital media, we will practice making textually-grounded arguments about specific works while thinking about the broader implications for understanding media and memory. Drawing on material from a variety of time periods and genres, we will use moving images to explore how remembering (and forgetting) shapes a narrative, both on and off the screen.

COMM224301
Mobilizing for Mobile Media Storytelling World REYNOLDS, PAUL A
Spring 2021
With the advent of the iPhone in 2007, and Android mobile devices shortly thereafter, came the smartphone media revolution. Once the domain of high cost production studios and controlled distribution through a handful of television networks, digital storytelling is now in the hands of the average citizen. Today, nearly three billion smartphones offer extraordinary access to digital media creation and post production tools, as well as instant content distribution across increasingly faster, global networks. With this kind of once unimaginable access to media creation and distribution comes an urgency to understand this tsunami of digitally crafted and often manipulated communications. In this course, we will examine the various applications and impact of this new world of networked, media-rich, mobile devices, while getting hands-on experience actually crafting digital stories with little more than smartphones for video acquisition. While the cost of smartphone production can be virtually free, to create effective short form digital videos still requires some fundamental skills. To that end, students will learn how to plan, direct, shoot, and edit their own smartphone productions from how-to videos to short commercials, as well as advocacy spots, and political issues and candidate videos.

COMM224401
Criticism as Communication MARTIN, ANDREW
Spring 2021
Critics often get a bad rap these days. Pilloried for nitpicking instead of creating, denounced as "haters" and "spoilers," the critic's important, generative role in contributing to and shaping art and culture is too often overlooked. But criticism (which, of course, includes at least as much appreciation and "passionate re-description" as fault-finding) is essential to a robust artistic culture. In this class, we will read, watch, listen to, and look at works of art across many disciplines and genres (including television, film, music, visual art, and more) and engage with the work of the critics who responded to them. We'll use their examples to produce media criticism, geared for popular, non-academic audiences, of our own, across a variety of formats: writing (in different forms, for different venues), audio (radio segments and podcasting), visual, and more. The purpose of the class is to help us develop well-reasoned and articulated opinions about media, art, and literature, which, as we'll see over the course of the semester, can be, at their best, works of art in their own right. The course will also give students the skills and context to pursue careers as writers and editors at magazines, newspapers, and websites, as well as in other fields that require critical writing and thinking. More broadly, by developing these skills, students will be better equipped to understand, situate, and contribute to the shifting cultural landscape around them.

Mass Communication Ethics PETERSON, KRISTIN M
Spring 2021
This course gives students a greater awareness of the ethical dimension of mass communication. It helps them learn to spot, evaluate, and deal with moral conflicts in our media environment, in the media industry, and between the industry and the media consuming public. It uses norms like truth, social justice, and human dignity to reveal the moral consequence of decisions and performance by practitioners in the news, entertainment, and advertising industries.

Global Cultures and Creative Industries SIENKIEWICZ, MATTHEW S
Spring 2021
This course studies global film, television, publishing and fine art as both opportunities for creative expression and a business ventures forged in the international marketplace.
Considering culture both as a complex meaning-making activity and as a commodity of economic exchange, the class offers a unique, multi-perspectival approach to the phenomenon of globalization. Case studies will include Bollywood film, Israeli television dramas, Russian foreign broadcasting, The Harry Potter franchise, and many others.

Governing the Internet: Comparative Perspectives MACCLURE BRINTRUP, LUCAS
Spring 2021
This course examines the regulation of dominant social media platforms like Facebook, Instagram, and Twitter in the U.S., Europe, and Latin America. Topics covered include (1) concepts and history of social media platforms and their regulation, (2) content moderation and harassment, (3) fake news and other forms of disinformation, (4) privacy and use of personal data, and (5) monopoly power and antitrust laws. Students will reflect on how social media regulation can both help and hinder democratic freedoms.

Communicating Nonverbal Messages DUGGAN, ASHLEY P
Spring 2021
This course will explore different aspects of nonverbal communication (body language, facial expression, physical appearance, etc.) and the many ways in which they impact our lives. Class activities and discussions will be applicable directly to relationships with friends, family, and romantic partners. By the time you complete this course you will have acquired a resource-base to understand why and how nonverbal signals are used to communicate, to understand the role of theory related to nonverbal communication, and to improve your ability to apply these principles to your day-to-day interpersonal relationships and work settings.

Social Media
JANG, SEUNG M
Spring 2021
This course is designed to develop an understanding of social media in the digital era. Students will critically interpret social media practices through various themes, theories, and concepts such as networked communities, self-expression, big data, privacy, filter bubbles, algorithms, activism, co-op platforms, and trolling. They will also learn about the history of the foremost social media platforms and the political economic forces behind social media, such as corporate ownership, government regulation, surveillance, and marketing. Students will learn to think critically about the interconnections between social media, culture, economics, politics, and the pursuit of social justice.

COMM228301
Asian Americans in Sport and Society KIM, KYOUNG-YIM
Spring 2021
In the mid-twentieth century, sport was a bastion of white supremacy, and it embodied such U.S national bodily ideals as white, heterosexual, Christian, muscular, and male. Histories of racial exclusion, racist violence, gendered policing, and sexual regulations positioned African-American men as outside the normative abilities of white men. In this respect, sport was a microcosm of the racial nation, with the language of citizenship and racial resistance coded within black-white discourse; however, this dichotomy failed to account for the long histories of Asian Americans in the United States. Asian-American sporting cultures trouble the current racial synchronicity between sport and nation while illuminating multiple performances of "belonging." This course highlights the diversity of Asian-American communities and aims to decipher how the ordinary practices of sporting cultures can offer extraordinary knowledge about U.S. society.

Critical Theory
INGRAM, BRETT D
Spring 2021
This course provides a survey of the major strands of contemporary critical theory, a field of inquiry foundationally rooted in the insights of psychoanalysis and Marxism, and dedicated to intervening in authoritarian and oppressive systems of social control. There will be a particular emphasis on questions of discipline and resistance: how do powerful institutions contain unruly energies, and by what means might liberatory impulses find meaningful expression? Our investigation will incorporate feminism, race, queer studies, and affect theory. We will read works by theorists such as Sigmund Freud, Karl Marx, Herbert Marcuse, Louis Althusser, Michel Foucault, Judith Butler, and others.

COMM444301
Seeing God and Hearing Ghosts: Spirituality in US Media PETERSON, KRISTIN M
Spring 2021
This writing intensive course will explore the intimate connections between the development of media technologies and the emergence of religious movements in the U.S. Emphasizing the unique relationship of religion and media in American public life, this course will focus on how the disestablishment of religion creates a competitive marketplace in which religions engage with new media technologies to make meaning, maintain community connections, and reach new members. Students will examine how the development of new media technologies presents both opportunities and challenges to various religious groups in the U.S. Cases to be discussed in the class include: how access to mass printing technologies enables publications and sacred texts from emerging religious groups like the Church of Jesus Christ of Latter-Day Saints, the Nation of Islam, and the Jehovah's Witnesses; how radio waves and photography influenced the popularity of spiritualism after the Civil War; how cable networks provided the opportunity for Evangelical Christians to ascend to the center of American public life; or how social media create space for young Muslim Americans to express their faith in contrast to mainstream media stereotypes.

COMM447301
Health/Illness in Relationships
DUGGAN, ASHLEY P
Spring 2021
This class integrates communication theories and applications in the contexts of healthcare conversations and decisions, and with organizational and social systems. We consider conversations with health providers, family members, and close friends navigating illness. We address the complexities of communication within broader healthcare structures and the distribution of resources to promote health and address illness. We address disparities in access and communication about quality healthcare such that advances in science, technology, and medicine are unequally distributed. This course considers disparities in substantive ways that require us to consider how relationships are tied to resources, to values, and to larger economic motives. We address communication processes as we unpack each of the complexities in health and illness in relationships.

Satisfies Core Requirement: None
Prerequisites: With permission of the Instructor. And completion of the five introductory required COMM courses.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS **Comments:** This course may be repeated. **Status:** CLOSED

COMM492101
Advanced Independent Research DEPT
Spring 2021
This course is for seniors only.
Credits: 06
Room and Schedule: BY ARRANGEMENT; **Satisfies Core Requirement:** None **Prerequisites:** With permission of the Department. **Corequisites:** None
Cross-listed with: None
Frequency: Annually
Student Level: UNDERGRAD-MAJORS
Comments: None
Status: OPEN

COMM494101
Advanced Topics PETERSON, KRISTIN M
Spring 2021
This course is an advanced seminar restricted to second-semester senior Women's and Gender Studies minors. Enrollment is by permission only.
Credits: 03

Room and Schedule: None **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: None
Status: CANCELLED

COMM550001
Debate Practicum KATSULAS, JOHN P
Spring 2021
Advanced discussion of argumentation theory and debate practice with an emphasis on contemporary intercollegiate debate.
Credits: 01
Room and Schedule: ST MARY'S HALL S360,W 7-9 20;
Satisfies Core Requirement: None
Prerequisites: With permission of the Instructor. Participation on the intercollegiate debate team and permission of the instructor.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: This course carries one credit. Only one such credit will be counted toward the 120 required for graduation.
Status: OPEN

COMM558901
Senior Internship Seminar
CASWELL MCCARRON, CHRISTIN
Spring 2021
This course gives senior communication majors an opportunity to pursue a 15-20 hour per week internship in a specific field of Communication. Practical experience will be supplemented by discussions of relevant theoretical constructs. Periodic discussion group seminars will enhance a student's immersion in the industry. Adherence to professional protocol is expected. A field research paper is required as well as supervisor evaluations. This course counts as a 3-credit Communication elective.
Credits: 03
Room and Schedule: ST MARY'S HALL 460S,M W 7 30* AM;
Satisfies Core Requirement: None
Prerequisites: Senior standing, six completed BC communication courses (including core requirements), and permission of the instructor.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: This course may not be repeated. Satisfies one of three elective courses required within the Communication major
Status: OPEN

COMM558902
Senior Internship Seminar CASWELL MCCARRON, CHRISTIN
Spring 2021
This course gives senior communication majors an opportunity to pursue a 15-20 hour per week internship in a specific field of Communication. Practical experience will be supplemented by discussions of relevant theoretical constructs. Periodic discussion group seminars will enhance a student's immersion in the industry. Adherence to professional protocol is expected. A field research paper is required as well as supervisor evaluations. This course counts as a 3-credit Communication elective.
Credits: 03
Room and Schedule: ST MARY'S HALL 460S,TH 7-9 20 AM;
Satisfies Core Requirement: None
Prerequisites: Senior standing, six completed BC communication courses (including core requirements), and permission of the instructor.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: This course may not be repeated. Satisfies one of three elective courses required within the Communication major
Status: OPEN

Computer Science Courses: Summer 2020

CSCI110101
Computer Science I MARQUES SAMARY, MAIRA R
Summer 2020
This course is an introduction to the art and science of computer programming and to some of the fundamental concepts of computer science. Students will write programs in the Python programming language. Good program design methodology will be stressed throughout. There will also be a study of some of the basic notions of computer science, including computer systems organization, files and some algorithms of fundamental importance.
Credits: 03
Room and Schedule: ONLINE COURSE;;ASYNCHRONOUS;MAY 13 - JUN 26;
Satisfies Core Requirement: Mathematics
Prerequisites: None **Corequisites:** None **Cross-listed with:** None **Frequency:** Annually **Student Level:** CORE
Comments: Satisfies Core requirement for Mathematics for CSCI1101 and CSCI1103.
Status: CLOSED

CSCI110102
Computer Science I MARQUES SAMARY, MAIRA R
Summer 2020
This course is an introduction to the art and science of computer programming and to some of the fundamental concepts of computer science. Students will write programs in the Python programming language. Good program design methodology will be stressed throughout. There will also be a study of some of the basic notions of computer science, including computer systems organization, files and some algorithms of fundamental importance.
Credits: 03
Room and Schedule: ONLINE COURSE;;ASYNCHRONOUS;JUN 29 - AUG 14;
Satisfies Core Requirement: Mathematics
Prerequisites: None

CSCI110201
Computer Science II MARQUES SAMARY, MAIRA R
Fall 2020
In this course the student will write programs that employ more sophisticated and efficient means of representing and manipulating information. Part of the course is devoted to a continued study of programming. The principal emphasis, however, is on the study of the fundamental data structures of computer science (lists, stacks, queues, trees, etc.). Both their abstract properties and their implementations in computer programs and the study of the fundamental algorithms for manipulating these structures. Students will use Java for programming.

CSCI110301
Computer Science I Honors MULLER, ROBERT
Fall 2020
This is the honors introductory computer science course. The course is organized around three themes: (1) computation, as a subject of study, (2) coding, as a skill, and (3) computer science, as an introduction to the field. The first half of the course explores computation from a simple mathematical perspective. From this point of view, computing can be understood as a natural extension of basic algebra. Midway through, the course turns to a machine-oriented view, considering storage and processor architecture, mutation and mutation-based repetition idioms. The course explores a number of fundamental algorithms with applications in various disciplines. Good program design methodology is stressed throughout. The course is taught using the OCaml programming language. (OCaml is closely related to the JavaScript and Swift programming languages.) Students will be well prepared for the follow-up course CSCI 1102 Computer Science II. Students who are unsure about the fit should consult with Professor Muller.
Credits: 03
Room and Schedule: M W F 11;ONLINE;SYNCHRONOUS;
Satisfies Core Requirement: Mathematics
Prerequisites: There are no prerequisites. The class consists of a lecture and a weekly discussion group. Students registering for a given lecture time are required to register for one of the corresponding discussion groups.
Corequisites: None **Cross-listed with:** None **Frequency:** Biennially
Student Level: UNDERGRAD-MAJORS
Comments: None
Status: OPEN

CSCI210301
Functional Programming MULLER, ROBERT
Fall 2020
Functional programming is an important programming model that should be in every serious software developer's toolkit. The main goal of this course is to learn the functional programming paradigm. In the process, you'll develop a deeper understanding of computation and of software. The basic principles of functional programming underly the core of almost all high- level programming languages. Functional programs are naturally modular and robust, they're relatively easy to read, they're easy to manage and reason about. FP is often fun and often leads to elegant solutions. In this course we'll learn FP through the use of the OCaml dialect of the ML programming language. We'll study applications in several domains, including some fundamental algorithms and data structures, graphical animations and acoustics. We'll learn about polymorphic type inference, programming with sum types and pattern matching, and we'll study the use of imperative features within the FP paradigm. OCaml has a relatively simple evaluation model that facilitates reasoning about the correctness of programs. In our studies, we'll reason not only about the functional correctness of code, but also the space, time, and other resources used in a computation.
Credits: 03
Room and Schedule: M W F 11;ONLINE;SYNCHRONOUS;
Satisfies Core Requirement: None
Prerequisites: None **Corequisites:** None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: Note: CSCI2103 will run in parallel with CSCI1103 Computer Science 1 Honors but will require additional work. CSCI2103 is a good option for CS BA majors or CS Minors seeking a 2000-level CSCI elective.
Status: OPEN

CSCI224301
Logic and Computation MCTAGUE, CARL S
Fall 2020
A course in the mathematical foundations of Computer Science, illustrated throughout with applications such as sets and functions, propositional and predicate logic, induction and recursion, basic number theory, and mathematical models of computation such as formal languages, finite state machines, and Turing machines.
Credits: 03
Room and Schedule: M W F 11;ONLINE;SYNCHRONOUS;

CSCI224401
Randomness and Computation ALVAREZ, SERGIO
Fall 2020
This course presents the mathematical and computational tools needed to solve problems that involve randomness. For example, an understanding of randomness allows us to efficiently generate the very large prime numbers

needed for information security, and to understand the long-term behavior of random sequences used to rank web search results. Multidimensional random variables provide useful models for data mining, computer vision, social networks, and machine learning. Topics include combinatorics and counting, random experiments and probability, computational modeling of randomness, random variables and distributions, Bayes rule, collective behavior of random phenomena, vectors and matrices, and Markov chains. Each topic is illustrated with applications of its use.
Credits: 03
Room and Schedule: FULTON HALL 415,M W F 1;

CSCI226701
Technology and Culture GRIFFITH, WILLIAM
Fall 2020
This interdisciplinary course will first investigate the social, political, psychological, ethical, and spiritual aspects of the Western cultural development with ■ special emphasis on scientific and technological metaphors and narratives. We will then focus on the contemporary world, examining the impact of our various technological creations on cultural directions, democratic process, the world of work, quality of life, and especially on the emergent meanings for the terms "citizen" and "ethics" in contemporary society. Students will explore technologies in four broad and interrelated domains: (1) computer, media, communications, and information technologies, (2) biotechnology, (3) globalization, and (4) environmental issues.
Credits: 03
Room and Schedule: M 4 30-6 50;ONLINE;SYNCHRONOUS;
Satisfies Core Requirement: None
Prerequisites: None
Corequisites: None
Cross-listed with: ISYS2267,PHIL6670,SOCY6670

Student Level: UNDERGRAD-MAJORS
Comments: Satisfies Computer Science Requirement. Satisfies CSOM Computer Science Concentration Requirement and CSOM Information Systems Concentration Requirement. **Status:** CLOSED

CSCI227101
Computer Systems BISWAS, ANJUM
Fall 2020
The goal of this course is to help you become a better programmer by teaching you the basic concepts underlying all computer systems. We want you to learn what really happens when your programs run, so that when things go wrong (as they always do) you will have the intellectual tools to solve the problem. In most of computer science, we're pushed to make abstractions and stay within their frameworks. But abstractions often ignore effects that can become critical. CSCI2271 introduce greater detail about system behavior and operation. This greater detail is needed for optimizing program performance, for working within the finite memory and word size constraints of computers, and for systems-level programming.
Programming will be completed in the language C with comparisons to Java.
Credits: 03
Room and Schedule: T TH 10 30*;ONLINE;SYNCHRONOUS;

CSCI227201
Computer Organization and Lab BISWAS, ANJUM
Fall 2020
This course studies the internal organization of computers and the processing of machine instructions. Students will obtain a high-level understanding of how to design a general-purpose computer, starting with simple logic gates. Topics include computer representation of numbers, combinational circuit design (decoders, multiplexers), sequential circuit design and analysis, memory design (registers and main memory), and simple processors including data paths, instruction formats, and control units. CSCI 2272 includes laboratory-based computer hardware activities in which the students design and build digital circuits related to the topics of the course.
Credits: 04

CSCI227202
Computer Organization and Lab BISWAS, ANJUM
Fall 2020
This course studies the internal organization of computers and the processing of machine instructions. Students will obtain a high-level understanding of how to design a general-purpose computer, starting with simple logic gates. Topics include computer representation of numbers, combinational circuit design (decoders, multiplexers), sequential circuit design and analysis, memory design (registers and main memory), and simple processors including data paths, instruction formats, and control units. CSCI 2272 includes laboratory-based computer hardware activities in which the students design and build digital circuits related to the topics of the course.
Credits: 04
Room and Schedule: None **Satisfies Core Requirement:** None **Prerequisites:** CSCI1101.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually

CSCI331101
Visualization KIM, NAM WOOK
Fall 2020
Data can capture a snapshot of the world and allow us to understand ourselves and our communities better. With ever-increasing amounts of data, the ability to understand and communicate data is becoming essential for everyone. Visualization leverages our visual perception to provide a powerful yet accessible way to make sense of large and complex data. It has been widely adopted across disciplines, from science and engineering to business and journalism, to combat the overabundance of information in our society. In this course, students will learn to acquire foundational knowledge about how to design effective visualizations for analysis and presentation based on theories and principles from graphic design, perceptual psychology, and cognitive science. Students will also learn practical skills about how to rapidly explore and communicate data using Tableau and build interactive visualization products (e.g., articles, tools, and systems) using web-based frameworks including D3.js and Vega-Lite.

CSCI334501
Machine Learning ALVAREZ, SERGIO
Fall 2020
This course provides an introduction to computational mechanisms that improve their performance based on experience. Machine learning can be used in engineered systems for a wide variety of tasks in personalized information filtering, health care, security, games, computer vision, and human-computer interaction, and can provide computational models of information processing in biological and other complex systems. Supervised and unsupervised learning will be discussed, including sample applications, as well as specific learning paradigms such as decision trees, instance-based learning, neural networks and deep learning, Bayesian approaches, meta-learning, and clustering. General concepts to be described include feature space representations, inductive bias, overfitting, and fundamental tradeoffs.
Credits: 03
Room and Schedule: FULTON HALL 511,M W F 10;

CSCI335901
Distributed Systems TSENG, LEWIS
Fall 2020
Students will learn the major paradigms of distributed computing including client-server and peer-to-peer models. Topics studied in these models include communication, synchronization, performance, fault-tolerance and security. Students will learn how to analyze the correctness of distributed protocols and will be required to build distributed applications.

CSCI336301
Computer Networks SIGNORILE, ROBERT P
Fall 2020
Introduction to computer networks and the services built on top of them. Topics include packet- switched and multi-access networks, routing and flow control, congestion control and quality-of- service, resource sharing, and Internet protocols (IP, TCP, BGP). Principles of relevant state-of- the art network standards are also discussed. Coursework involves a significant amount of Java/C programming.

CSCI338401
Computability and Computational Complexity STRAUBING, HOWARD
Fall 2020
This is a course in the theoretical foundations of computer science, centered around the theme of fundamental limits on computation. Topics include: Turing Machines, universal computation, undecidability of the halting problem, solvable and unsolvable algorithmic problems, recursive functions, Goedel's Incompleteness Theorem, time- and space-bounded computations, Cook's Theorem, NP-complete problems, problems solvable in polynomial space, randomized computation, application to cryptography, practical approaches to computationally intractable problems (such as SAT solvers), quantum computing, and Shor's Theorem.
Credits: 03
Room and Schedule: T TH 1 30*;ONLINE;SYNCHRONOUS;
Satisfies Core Requirement: None
Prerequisites: CSCI1101 Computer Science 1, or equivalent, and CSCI2243 Logic and Computation, or MATH2216 Introduction to Abstract Mathematics.

CSCI339001
Topics in Computer Science: Large-Scale Data Processing TASSAROTTI, JOSEPH D
Fall 2020
In many modern applications such as social networks analysis, web data mining, computational biology, and scientific computing, processing the whole data in the main memory can be infeasible due to the order of the data sets. This course will cover a few paradigms for handling massive data sets, including the streaming model, massively parallel computation models such as MapReduce and Spark, and vertex-centric models such as Pregel. You will learn a few fundamental algorithms in these models and their analysis. You are also expected to implement some of them through hands-on programming exercises.
Credits: 03
Room and Schedule: GASSON HALL 310,M W 3*;HYBRID;
Satisfies Core Requirement: None
Prerequisites: CSCI2244 AND CSCI2243. Prerequisite: (1) Being able to competently program in any mainstream high-level language (e.g., C, C++, Ruby, Java, Scala, Python, Perl). (2) Familiarity with basic probability theory (CSCI2244 Randomness and Computation is required) (3) Familiarity with reading and writing rigorous proofs (CSCI2243 Logic and Computation is required). (4) Familiarity with algorithmic analysis (CSCI3383 Algorithms is recommended but not required).

CSCI339801
Topics in Natural Language Processing: Speech Signal Processing PRUD'HOMMEAUX, EMILY T
Fall 2020
This course introduces students to speech signal processing with a focus on real-world applications including automatic speech recognition and speech synthesis, as well as tasks such as emotional speech detection and speaker identification. Students will learn the fundamentals of signal processing for speech and explore the algorithms that allow computers to process and generate speech. This course provides both theoretical foundations and hands-on laboratory practice.

CSCI224401
Randomness and Computation None
Spring 2021
This course presents the mathematical and computational tools needed to solve problems that involve randomness. For example, an understanding of randomness allows us to efficiently generate the very large prime numbers needed for information security, and to understand the long-term behavior of random sequences used to rank web search results. Multidimensional random variables provide useful models for data mining, computer vision, social networks, and machine learning. Topics include combinatorics and counting, random experiments and probability, computational modeling of randomness, random variables and distributions, Bayes rule, collective behavior of random phenomena, vectors and matrices, and Markov chains. Each topic is illustrated with applications of its use.

CSCI225401
Web Application Development KIM, NAM WOOK
Spring 2021
The web connects our society, providing enormous opportunities for changing and improving how we live every day from sharing information to interacting with others. We have witnessed the power of the web through a variety of web-based applications, including social media apps like Instagram and Twitter, productivity apps like Google Docs and Slack, as well as transportation apps like Uber and Lyft. These apps are now deeply immersed in our everyday lives and drastically changed how we communicate, work, and move in recent years. In this course, students will learn how to develop responsive and interactive web applications. We begin by learning basics including HTML, CSS, JavaScript, as well as advanced client-side frameworks such as Material-UI and React.js. We will also briefly touch on server-side issues including a web server (Node.js), data storages (Web Storage, MongoDB, and Firebase), and asynchronous communication between a client and a server. The course will culminate with a final project where students take a human-centered design approach to address the need of people by building a sophisticated web application.

CSCI226701
Technology and Culture GRIFFITH, WILLIAM
Spring 2021
This interdisciplinary course will first investigate the social, political, psychological, ethical, and spiritual aspects of the Western cultural development with a special emphasis on scientific and technological metaphors and narratives. We will then focus on the contemporary world, examining the impact of our various technological creations on cultural directions, democratic process, the world of work, quality of life, and especially on the emergent meanings for the terms "citizen" and "ethics" in contemporary society. Students will explore technologies in four broad and interrelated domains: (1) computer, media, communications, and information technologies, (2) biotechnology, (3) globalization, and (4) environmental issues.

CSCI227101
Computer Systems AVIRAM, AMITTAI F
Spring 2021
The goal of this course is to help you become a better programmer by teaching you the basic concepts underlying all computer systems. We want you to learn what really happens when your programs run, so that when things go wrong (as they always do) you will have the intellectual tools to solve the problem. In most of computer science, we're pushed to make abstractions and stay within their frameworks. But abstractions often ignore effects that can become critical. CSCI2271 introduce greater detail about system behavior and operation. This greater detail is needed for optimizing program performance, for working within the finite memory and word size constraints of computers, and for systems-level programming.
Programming will be completed in the language C with comparisons to Java.
Credits: 03
Room and Schedule: FULTON HALL 250,M W F 11;HYBRID;
Satisfies Core Requirement: None
Prerequisites: CSCI1102. **Corequisites:** None **Cross-listed with:** None **Frequency:** Annually

CSCI227201
Computer Organization and Lab UBAL TENA, RAFAEL
Spring 2021
This course studies the internal organization of computers and the processing of machine instructions. Students will obtain a high-level understanding of how to design a general-purpose computer, starting with simple logic gates. Topics include computer representation of numbers, combinational circuit design (decoders, multiplexers), sequential circuit design and analysis, memory design (registers and main memory), and simple processors including data paths, instruction formats, and control units. CSCI 2272 includes laboratory-based computer hardware activities in which the students design and build digital circuits related to the topics of the course.

CSCI229101
An Introduction to Data Science ALVAREZ, SERGIO
Spring 2021
This course provides an introduction to concepts and techniques of computational data modeling and inference that can inform rational decision-making based on data. Topics include data preprocessing, exploratory data analysis and visualization, elements of probability and statistical inference, and predictive and descriptive modeling, with an introduction to machine learning concepts and approaches as time allows. Programming in Python will be required.
Prospective students should also be comfortable with mathematical notation and reasoning at the college calculus level.
Credits: 03
Room and Schedule: FULTON HALL 415,T TH 9*;
Satisfies Core Requirement: None
Prerequisites: CSCI1101. , or equivalent introduction to CS with programming, and one of MATH 1101 / 1103/ 1105 or an equivalent calculus course.

CSCI335601
Software Engineering MARQUES SAMARY, MAIRA R
Spring 2021
This course covers the basic life cycle of software development: requirements, design, implementation, testing, and production release. Students will learn the theory related to software engineering, but they will also learn hands-on how to create their own software. The main evaluation of the course is a team project that will simulate a small real project. The project will be done using the framework Django (Python), the CSS Framework Bootstrap, among other technologies. The project will be worth 50% of the grade, as well as 2 midterms, an exam, and a peer assessment (how your team members evaluate the work you did).

CSCI336201
Operating Systems UBAL TENA, RAFAEL
Spring 2021
This course covers the fundamentals of operating systems (OS) design both from a theoretical and a practical perspective. The course is organized in two parts, each involving a separate course project. The first part deals with the system call interface between applications and the OS, the multi-process abstraction of a computing system, and task scheduling algorithms. The associated project involves the implementation of a custom Unix command-line interpreter (shell). The second part of the course covers memory management, multi-threading libraries, and file systems. A real implementation of these features is studied on a miniature, open-source operating system called xv6. The associated project involves an extension of xv6 to support custom features, such as new scheduling policies, kernel-level threads, or file system recovery.

CSCI336601
Principles of Programming Languages TASSAROTTI, JOSEPH D
Spring 2021
Starting with a simple language of expressions, the course develops a sequence of progressively more expressive programming languages keeping in mind the conflicting constraints between the expressiveness of the language and the requirement that it be reliably and efficiently implemented. The course focuses on these essential concepts and the run-time behavior of programs. Type systems play an essential role. By understanding the concepts the student will be able to evaluate the advantages and disadvantages of a language for a given application.
Credits: 03

CSCI336801
Compilers GOVEREAU, PAUL
Spring 2021
Compilers are programs that implement high-level programming languages by translating programs in such languages into machine code or some other easy to process representation. This course deals with the principles and techniques used in the design of compilers. Topics include parsing, static analysis, translation, memory management, and code optimization. This course includes a significant programming project.

CSCI338101
Cryptography STRAUBING, HOWARD
Spring 2021
Can Alice ensure that the message she sends to Bob can be read only by Bob, even if the message is intercepted by an eavesdropper? Can Bob ensure that the message he receives really came from Alice? How can a server verify a client's password without storing sensitive password information? This course studies both the theoretical foundations and implementation of algorithms for private and public key cryptography, digital signatures, cryptographic hash-codes, and authentication schemes. We will consider real world protocols and practices (e.g., SSL and public key certificates) as well as more speculative protocols and methods (electronic elections, quantum cryptography).
Credits: 03
Room and Schedule: M W F 11;ONLINE;SYNCHRONOUS;

CSCI339001
Topics in Computer Science: Large-Scale Data Processing SU, HSIN HAO
Spring 2021
In many modern applications such as social networks analysis, web data mining, computational biology, and scientific computing, processing the whole data in the main memory can be infeasible due to the order of the data sets. This course will cover a few paradigms for handling massive data sets, including the streaming model, massively parallel computation models such as MapReduce and Spark, and vertex-centric models such as Pregel. You will learn a few fundamental algorithms in these models and their analysis. You are also expected to implement some of them through hands-on programming exercises.
Credits: 03
Room and Schedule: DEVLIN HALL 026,T TH 4 30*;HYBRID;
Satisfies Core Requirement: None
Prerequisites: CSCI2244 AND CSCI2243. Prerequisite: (1) Being able to competently program in any mainstream high-level language (e.g., C, C++, Ruby, Java, Scala, Python, Perl). (2) Familiarity with basic probability theory (CSCI2244 Randomness and Computation is required) (3) Familiarity with reading and writing rigorous proofs (CSCI2243 Logic and Computation is required). (4) Familiarity with algorithmic analysis (CSCI3383 Algorithms is recommended but not required).

Earth and Environmental Sciences Courses: Summer 2020

EESC114001
Our Mobile Earth O'BRIEN, SUZANNE R
Summer 2020
This course will provide you with an introduction to the structure of Earth and the dynamic processes that continuously shape and remodel its surface. During class, we will discuss the formation and evolution of the oceans and continents within the framework of the modern theory of plate tectonics. The locations, causes and effects of earthquakes and volcanoes are presented. The dynamics within Earth which drive the tectonic plates are outlined.

EESC116301
Environmental Issues and Resources GALLI, KENNETH G
Summer 2020

Hybrid Core Course includes three themes: (1) Intro to Environmental Geology, (2) How to write well and how to write field trip reports, (3) How to use Google Earth to understand Earth Materials and Processes. Learn about the major processes at work inside and on the surface of the earth. Learn to be a careful observer and to write succinct field trip reports, through two field trips and the writing of a field trip report. Each class is designed to examine the facts, historical background, and through in-class exercises, homework and field trips, provide experience in analyzing and solving real world problems associated with environmental issues, resources and sustainability. Demonstrations, videos, readings and several field trips underscore important concepts and applications and the importance of careful observation. Online Google Earth exercises, done remotely, will introduce the power of this geographic application to understand geology.

EESC122201
Conservation Ecology in Ecuador PISANI GAREAU, TARA
Summer 2020
This is an active learning course on tropical ecology and the conservation of tropical ecosystems which are the most biodiverse on Earth. Ecuador is an ideal country to study these topics. Within a small geographical region (109,483 sq mi) Ecuador has pristine tropical rain forests, tropical dry forests, cloud forests, high elevation grasslands, and coastal mangroves. Additionally, the Galapagos Archipelago off the coast of Ecuador is home to over 4,000 species, 40% of them endemic to the region--this was Charles Darwin's "laboratory of evolution." Ecuador is also a model for conservation with twelve national parks, ten national wildlife refuges, nine ecological reserves, four biological reserves, and one geo-botanical reserve. In this course, students will gain firsthand experience observing species and ecological processes and collecting data within pristine ecosystems. The course will explore and use three main physiographic regions of Ecuador--the central Andean highlands, the eastern alluvial plains of the Amazon, and the Galapagos Islands--as its laboratory.

Earth and Environmental Sciences Courses: Fall 2020

EESC113201
Exploring the Earth KRUCKENBERG, SETH C
Fall 2020
The Earth is a dynamic planet that our species is clearly changing. A great challenge of the twenty-first century is to maintain the Earth's ability to support its growing human population. This course discusses the origin and materials of the Earth and the processes by which it has evolved. It is a first course for Geological Sciences majors and also provides a background for departmental majors and minors. EESC1132 is appropriate as a natural science core course for students interested in the Earth Sciences. The laboratory consists of in-class exercises, analysis of rocks, and a weekend field trip.
Credits: 04

EESC115001
Astronomy KUCHAR, THOMAS A
Fall 2020
Astronomical observations and theories date back to the beginning of recorded history. The development of astronomy is closely tied to the growth of physics, mathematics, philosophy, and theology. Emphasis is on large-scale concepts and on how we know what we know about the stars, our galaxy, and the universe. The course covers these discoveries and ideas from the earliest days of astronomy to many of the recent, exciting advances.

EESC115701
Oceanography PALEVSKY, HILARY I
Fall 2020
This course is an investigation of the world's ocean as an integrated system driven by geological, chemical, physical, and biological processes. Topics include origin and evolution of the ocean basins, nature of the sea bottom, characteristics of ocean water, causes and effects of ocean currents and circulation, marine ecology and biological productivity in the ocean. An understanding of the ocean's role in the health and evolution of the planet is stressed, with special emphasis on coastal areas. Two and a half hours of lecture and one two-hour laboratory each week.

EESC116801
Environmental Geosciences: Earth Processes and Risks BEHN, MARK D
Fall 2020
This course will explore the dynamic processes operating on and within the earth and how those processes can impact humans. We will explore the nature of natural disasters, including river and coastal flooding, volcanic eruptions, earthquakes, landslides, severe storms, climate changes, and bombardment by rare extraterrestrial objects. Emphasis will be placed on understanding the current science used to predict the occurrences of these disasters, how accurate those predictions are, and the associated mitigation practices.

Satisfies Core Requirement: Natural Science
Prerequisites: None **Corequisites:** None **Cross-listed with:** None **Frequency:** Annually **Student Level:** CORE **Comments:** This course may be taken independently of EESC1167. **Status:** CANCELLED

EESC117001
Rivers and the Environment SNYDER, NOAH P
Fall 2020
Scientific understanding of rivers is vital to address many of today's environmental challenges. Rivers transport and distribute water, sediment, nutrients, and contaminants throughout the landscape. They provide habitat and migration pathways for countless aquatic species. Rivers supply fresh water, power generation, and recreational opportunities to much of the world's human populations. We will learn about the geological, hydrological, and biological processes that are important to rivers and watersheds, and how knowledge of these processes aids our ability to manage, protect, and restore these systems.

EESC118001
The Living Earth I GALLI, KENNETH G
Fall 2020
This core course provides a broad and modern presentation of the major topics and principles of Earth Science. The lectures will cover all the fundamental subjects of geology, with emphasis on earth materials such as minerals, rocks and internal and external Earth processes, with a brief overview of important aspects of Earth history. The labs will involve hands-on work studying minerals, igneous rocks, sedimentary rocks, metamorphic rocks, viscosity, weathering and running water, formation of ripples and sand dunes, plate tectonics, fossils, and earthquakes, in addition to a local field geology trip during lab time. Additional topics may be covered if time allows.

EESC170201
Living on the Water: Coasts, Development, and Sea Level Change from Venice to Boston KINEKE, GAIL C
Fall 2020
Why do humans build cities on the water? How do humans impact the coast in intentional and inadvertent ways? The cities of Venice and Boston provide case studies for probing these enduring questions. We will explore the fundamental earth processes that define characteristics of coastlines around the world and the forces that bring about change. The human impacts of coastal development will be examined using a historical (last 1500 years) and a more modern (last 400 years) perspective. We will consider current projects and proposals to accommodate sea level and make predictions about future change.

EESC171701
Making the Modern World: Design, Ethics, and Engineering TONN, JENNA A; KRONES, JONATHAN S
Fall 2020
Together we will consider how engineers and other stakeholders navigate risks related to industrial and environmental disasters; balance financial, technological, and regulatory pressures associated with complex socio-technical problems; and negotiate technical and political liabilities surrounding artificial intelligence, surveillance, and climate adaptation. Students will collaborate on group design projects based on human-centered engineering. Engineering systems present pressing technical, ethical, and moral problems that we must grapple with as engaged global citizens. In this class students will explore the social, cultural, and institutional history of engineering; learn foundational skills in quantitative analysis of real- world engineering designs; and understand the political, environmental, economic, and ethical tradeoffs associated with building the modern world.

EESC220101
Environmental Systems: The Human Footprint BECKER, RICHARD

Fall 2020
Humans have become an increasingly significant force on Earth system, including the atmosphere, biosphere, and hydrosphere. This course explores the influence of humans on natural systems and how environmental solutions and consequences link to social, political, economic, health, and justice issues. Specifically, we will discuss topics related to population growth, energy, agriculture, urbanization, and environmental justice. This course is part of the Environmental Systems introductory sequence (EESC2201-EESC2208) for Environmental Geoscience majors.
Credits: 02
Room and Schedule: FULTON HALL 415,M W F 11;OCT 19-DEC 10;
Satisfies Core Requirement: None

EESC226401
Stratigraphy and Sedimentation STARR, PAUL
Fall 2020
Sedimentary rocks cover most of the surface of the earth and are valuable repositories for energy and information about the history of the earth. The goal of this course is to teach students how to "read" the history recorded in these rocks. This course will cover the basics of sedimentary rock description recognition and correlation over long distances in the field. We will also learn about the processes that produce sediment; transportation of sediment in streams, rivers, and bodies of standing water; and the formation of carbonate limestones. A 3-hour lab is required.
Credits: 04
Room and Schedule: DEVLIN HALL 324,T TH 1 30*;
Satisfies Core Requirement: None
Prerequisites: EESC1132. **Corequisites:** EESC2265. **Cross-listed with:** None **Frequency:** Biennially

EESC331001
Agroecology: The Science of Sustainable Agriculture PISANI GAREAU, TARA
Fall 2020
Conventional agriculture, while responsible for enormous increases in yield, has undermined the natural resources that support agricultural yield and ecosystem services. Yet there is a pressing need to maintain yield in the face of climate change. How can we meet the food needs of a growing human population without clearing more forests, polluting rivers and the atmosphere, overdrawing from aquifers, and threatening the existence of wild species? In this course we will learn how the principles of ecology can be applied to the design, management, and analysis of agroecosystems and agricultural landscapes with the goal of creating a sustainable food system.
Credits: 03
Room and Schedule: FULTON HALL 415,M W F 10;
Satisfies Core Requirement: None
Prerequisites: BIOL2010. OR EESC2201 and EESC2202. OR with permission of the instructor.

EESC440001
Geomorphology
BECKER, RICHARD
Fall 2020
Geomorphology is the study of landforms, landscapes, and the processes that have shaped them. It is the science of scenery. Not why some landscapes, such as the Grand Canyon or Glacier National Park are deemed "stunning," but rather how landscapes like these formed. It is both a basic science, driven by curiosity about how the landscapes in which we live and play came to be, and an applied science, with implications for mitigating natural hazards and adverse environmental change. The course will feature ■ field trip to local destinations.
Credits: 03
Room and Schedule: DEVLIN HALL 201,M W F 1;HYBRID;
Satisfies Core Requirement: None

EESC514001
Isotope Geochemistry and Geochronology BAXTER, ETHAN
Fall 2020
This course will introduce the various isotopic methods that are used in the Earth Sciences. Topics will include: (1) radiogenic isotopes in geochronology and petrogenesis, including U-Th- Pb, K-Ar, Rb-Sr ,and Sm-Nd, (2) light stable isotopes in geology, biogeochemistry, and paleothermometry, including C, H, O, N, and S, and (3) non-traditional stable isotopes in biogeochemistry, oceanography, and cosmochemistry including Fe, Mo, Cu, Ni, and Ca. We will emphasize the geochemical behavior, analytical methods, and specific applications of these isotope systems in geology.

Marine Biogeochemistry PALEVSKY, HILARY I
Fall 2020
In this course, we will use marine biogeochemical tracers as a tool to understand the ocean as ■ system and to investigate the physical, chemical, biological, and geological processes that control the sources, distributions, and transformations of these tracers. We will describe the flow of essential elements (especially carbon, nitrogen, oxygen, and iron) through the open ocean, following their path from the air-sea interface to primary production in the surface ocean to organic matter export and remineralization in the water column and seafloor sediments.
Students will develop skills in quantitative analysis of biogeochemical data through problem solving exercises and will apply concepts covered in class to interpretation of primary literature.

EESC556301
Advanced Paleoceanography and Paleoclimatology WANG, XINGCHEN
Fall 2020
This course will discuss major climate events through the course of Earth's history, including Snowball Earth; warm Cretaceous; Paleocene-Eocene Thermal Maximum; Pleistocene ice ages, and ongoing climate change in the Anthropocene. Topics will include evaluation of data and evidence behind these climate events; underlying governing mechanisms in the context of radiative balance, greenhouse gases, ocean circulation and atmosphere-ocean interactions; and modeling studies of these climate events. Formats will include lectures, student presentations and discussion of classic papers, a term paper, and final exam.

EESC558201
Senior Environmental Geoscience Research Seminar I BEHN, MARK D
Fall 2020
In this two-semester course sequence, students will be introduced to the process of conducting original scientific research. This includes exploring fundamentals of a natural system from reading the scientific literature, defining a problem, designing and executing an experiment, analysis, data interpretation, and presentation of results in written and oral formats. Students will work individually or in groups within a broader research project. Topics and field areas will vary from year to year depending on existing projects and expertise of the instructor. The EESC5582-5583 sequence fulfills the senior research experience requirement for Environmental Geoscience majors.

EESC640001
Geomorphology BECKER, RICHARD
Fall 2020
Geomorphology is the study of landforms, landscapes, and the processes that have shaped them. It is the science of scenery. Not why some landscapes, such as the Grand Canyon or Glacier National Park are deemed "stunning," but rather how landscapes like these formed. It is both a basic science, driven by curiosity about how the landscapes in which we live and play came to be, and an applied science, with implications for mitigating natural hazards and adverse environmental change. The course will feature a field trip to local destinations.
Credits: 03
Room and Schedule: DEVLIN HALL 201,M W F 1;HYBRID;
Satisfies Core Requirement: None
Prerequisites: EESC1125. or EESC1132 or EESC1168 or EESC1170 or EESC1180.

Earth and Environmental Sciences Courses: Spring 2021

EESC112501
Exploring Earth History BECKER, RICHARD
Spring 2021
"The earth is not finished, but is now being and will forever be remade." C.R. Van Hise (1898) The objective of this course is to describe the history of the earth and the development of life on Earth during the last 4.6 billion years, especially within North America. Major biological and physical events will be revealed by interpretation of the rock record. The use of animations and demonstrations will enhance your understanding of some major topics.

EESC114601
Origin and Evolution of Life on Earth STROTHER, PAUL K
Spring 2021
This course explores current theories about the origins of life, beginning with the original hypothesis of the Russian biochemist A.I. Oparin. Darwin's theory of evolution is emphasized, but many different components of the natural sciences touch upon this topic. The course lectures include the study of the oldest fossils, life in extreme habitats, cellular biology, prebiotic molecules, and the search for life on other planets.

EESC117401
Climate Change and Society SHAKUN, JEREMY D
Spring 2021
Global climate change may be one of the biggest issues facing humanity in the twenty-first century. We investigate the scientific basis for global warming forecasts from what is well known to what is deeply uncertain based on theory, models, and the geologic record of earth's climate history. We discuss the political, economic, and social dimensions surrounding the global warming debate, and explore the current and potential impacts of climate change on developed and developing societies. Connections to recent media will be emphasized to give students an up-to-date view on the state of our national conversation on climate change.

EESC117701
Cosmos
KUCHAR, THOMAS A
Spring 2021
There are more than a dozen interplanetary probes from numerous countries that are currently collecting data from several planetary bodies in the Solar System. These exploration missions are expanding knowledge of our Solar System, which is mostly built on only about half a century of space exploration. We will discuss these space missions and their scientific goals and results, which are increasingly oriented to answer questions on planetary evolution and the possibility of extraterrestrial biospheres. Throughout this course, the fundamentals of how science works will be emphasized. If weather permits, there might also be outdoor lectures for star-gazing opportunities.

EESC118701
Geoscience and Public Policy KAFKA, ALAN L
Spring 2021
In this course, we will explore case studies that demonstrate the role of the earth sciences in addressing problems of public policy. For each case study, students will be introduced to the underlying scientific concepts relevant to the problem being addressed. After this scientific foundation is developed, we will discuss how it needs to be considered as part of the process of making policy decisions. The course will also introduce students to how scientists and public policy makers apply the concepts of probability and statistics in the decision making process.

EESC150701
Powering America: The Past and Future of Energy, Technology, and the Environment EBEL, JOHN E; VALENCIUS, CONEVERY B
Spring 2021
This course explores U.S. energy. From the perspectives of history, culture, technology, engineering, and foreign policy, we ask how we have created and distributed energy in the past, how energy systems function in the present, and how they may evolve. We investigate energy production, distribution, and use--coal, oil, nuclear power, hydropower, wind, and solar power-- along with cables, pipelines, and transmission systems. Through hands-on exercises and field trips, students learn how past technological and economic choices shaped current U.S. energy systems, how energy systems affect the environment, and how sustainable energy systems will be in the future.

EESC170101
Building a Habitable Planet: The Origins and Evolution of the Earth: Geoscience Perspectives
BAXTER, ETHAN
Spring 2021
What is the age and origin of our Earth? How and when did Earth become a habitable planet? What is the origin of life? How has life and our Earth itself co-evolved through time? Includes the origins and evolutions of the core, the continents, the oceans, the atmosphere, climate, life, adaptive radiation and mass extinction, and the environmental consequences of human activity. Introduction to the scientific method and the tools of geology, geochemistry, and geophysics used to unlock the history of the Earth from its beginnings 4.57 billion years ago up to the present day.

EESC220101
Environmental Systems: The Human Footprint KAFKA, ALAN L
Spring 2021
Humans have become an increasingly significant force on Earth system, including the atmosphere, biosphere, and hydrosphere. This course explores the influence of humans on natural systems and how environmental solutions and consequences link to social, political, economic, health, and justice issues. Specifically, we will discuss topics related to population growth, energy, agriculture, urbanization, and environmental justice. This course is part of the Environmental Systems introductory sequence (EESC2201-EESC2208) for Environmental Geoscience majors.

EESC220601
Environmental Systems: Oceans KINEKE, GAIL C
Spring 2021
The oceans cover 70% of the earth's surface and are home to much of its life. The oceans are critical to the earth's biogeochemical cycling of energy and mass. Ocean currents play a key role in climate through redistribution and exchange of heat with the atmosphere and storage of CO2. Coastal areas, the narrow interface between land and ocean, represent some of the most productive, populated, and vulnerable regions on earth. The course provides an introduction to the ocean's role in earth processes and explores topics and challenges facing a changing planet through case studies and critical and analytical thinking.

EESC220801
Environmental Systems: Quantitative Methods BEHN, MARK D
Spring 2021
This course focuses on some mathematical topics that are commonly used in analyses of environmental systems. The primary emphasis in the course will be on statistical methods, especially understanding statistical sampling and the determination of the mean, standard deviation, and confidence intervals of a population. Some commonly used probability distributions including the normal and Poisson distributions will be discussed. Other topics such as line fitting, non-linear models, and feedback systems will be introduced. The course is part of the Environmental Systems introductory sequence (EESC2201-EESC2208) for Environmental Geoscience majors.

EESC222001
Earth Materials BECKER, RICHARD
Spring 2021
Designed to acquaint majors and minors in the Department or in the Environmental Sciences minor with the basic materials present in the Earth and on the Earth's surface. The common rock-forming silicate minerals are discussed first. Then igneous, sedimentary, and metamorphic processes are investigated to develop the classifications of these groups of rocks.
Credits: 04
Room and Schedule: DEVLIN HALL 010,M W F 10;HYBRID;
Satisfies Core Requirement: None
Prerequisites: EESC1132. Or at least two from EESC2201-EESC2208.
Corequisites: EESC2221. **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: None

EESC332001
Introduction to Geochemistry WANG, XINGCHEN
Spring 2021
This course will apply the principles of chemistry to investigate the chemical compositions of the Earth system, including the atmosphere, hydrosphere, biosphere, and lithosphere. Topics will include the origin of elements in the solar system; distribution of elements in the core, mantle, and crust; cycling of carbon, nitrogen, phosphorus, and other elements in the Earth's surface environments; radiometric dating techniques; and stable isotope geochemistry.
Credits: 03
Room and Schedule: DEVLIN HALL 215,T TH 1 30*;
Satisfies Core Requirement: None
Prerequisites: CHEM1110 AND CHEM1109. Or permission from the instructor.
Corequisites: None
Cross-listed with: None
Frequency: Annually
Student Level: UNDERGRAD & GRAD **Comments:** Formerly course number EESC2230 **Status:** OPEN

EESC333501
Topics in Geobiology STROTHER, PAUL K
Spring 2021
Geobiology broadly concerns the dynamic interface between biology and geology at the systems level. This year, topics will focus on Paleobotany and Palynology as we explore the evolution of photosynthesis and its historical importance to our planetary ecosystem through the study of fossil plants. Starting with the beginnings of photosynthesis and the origin of land plants, Paleobotany covers the evolutionary history of plants on earth, including the origins of forests, coal, the rise of the flowering plants, and the use of fossil plants as indicators of past climate.
Palynology, the study of spores and pollen, is used to document past vegetation and climate change at a wide range of timescales.
Credits: 03
Room and Schedule: DEVLIN HALL 307,T TH 3*;
Satisfies Core Requirement: None
Prerequisites: Two years of college work or permission of the instructor.
Corequisites: None **Cross-listed with:** None **Frequency:** Biennially
Student Level: UNDERGRAD ELECT
Comments: None

EESC338001
Environmental Oceanography KINEKE, GAIL C
Spring 2021
In this course, fundamental physical, chemical, geological, and biological processes occurring in ocean environments are examined in the context of how they impact humans and how humans have impacted the ocean. Emphasis is placed on understanding the challenges involved with the development of environments and resources through actual case studies and problem solving. Topics include coastal oceanography and shore processes, water chemistry, biogeochemical cycles and circulation, and air/sea interactions as related to pollution and climate change.
Credits: 03
Room and Schedule: DEVLIN HALL 201,T TH 9*;HYBRID;
Satisfies Core Requirement: None
Prerequisites: EESC1132. **Corequisites:** None **Cross-listed with:** None **Frequency:** Biennially
Student Level: UNDERGRAD ELECT

Status: CLOSED

EESC338501
Structural Geology KRUCKENBERG, SETH C
Spring 2021
The goal of this course is the development of skills in the structural analysis of rock bodies as seen in outcrops, or small areas, to gain an understanding of the geometries, sequencing, and kinematics of deformational features. Structures such as folds, faults, foliations, lineations, and shear zones will be considered at various scales, as visible in the field, or in thin section. We will also discuss some inter- and intra- granular deformation mechanisms. The 3-hour laboratory consists of in-class problems and some field-based problems.
Credits: 04

Room and Schedule: T TH 10 30*;ONLINE;SYNCHRONOUS;
Satisfies Core Requirement: None

EESC446401
Environmental Data Exploration and Analysis PALEVSKY, HILARY I
Spring 2021
Earth and environmental science increasingly depends on scientific programming to explore and analyze large datasets from in situ and autonomous observations, satellite remote sensing, and numerical model output. In this course, students will learn to use MATLAB to visualize earth system data across broad spatial and temporal scales in maps and time-series plots and apply statistical tools to analyze trends and variability in their datasets. Students will also learn to critically assess datasets and to select and justify appropriate data sources and analytical methods to address scientific questions about earth system processes. Students will practice these skills in a series of data analysis assignments focused on regional and global climate data and will apply them in a team-based final research project.
Credits: 03
Room and Schedule: W 5 30-8;ONLIINE;SYNCHRONOUS;

EESC523001
Stable Isotope Biogeochemistry WANG, XINGCHEN
Spring 2021
This course will examine the use of stable isotopes in biogeochemistry and environmental sciences. Topics will include terminology and basic principles of stable isotope geochemistry; instruments and technique; data processing in isotope ratio mass spectrometry; isotope effects in metabolisms and biosynthesis; and applications of stable isotopes in the cycling of carbon, nitrogen, sulfur, oxygen and other elements. Formats will include lectures, numerical modeling assignments; a few hands-on lab sessions; student presentations; and a final paper or research proposal.
Credits: 03
Room and Schedule: DEVLIN HALL 307,F 1 30-4;
Satisfies Core Requirement: None
Prerequisites: EESC3320. and one semester of Calculus, or with permission of the instructor.

EESC554301
Tectonics KRUCKENBERG, SETH C
Spring 2021
Plate Tectonics, the idea that the surface of the Earth moves and reshapes itself through time, has revolutionized geology. While a great deal has been learned about the movements and evolution of the Earth's lithospheric plates through time, the full implications of this theory remain an area of active research and debate. Modern studies increasingly document important feedbacks between patterns of climate, deposition, metamorphism, magmatism, seismicity and deformation that can be understood in the context of the past and present motions of the Earth's plates. This course will focus on understanding the linkages between these dynamic processes through time.

EALC415101
Readings in Chinese Literature and Philosophy CHIANG, SING-CHEN L
Fall 2020
By way of readings in Chinese literary and philosophical canons, this course introduces students to the basic diction and grammar of classical Chinese. Classical Chinese is the Latin of East Asian written traditions, the gateway to the cultural and historical legacy of East Asia, and the foundation of modern literary Chinese. We will read and translate selected passages from Chinese classics, including the *Analects* of Confucius, Mencius, the *Daodejing*, and *Zhuangzi*. Class discussion will center on major philosophical concepts and their historical contexts.

Economics Courses: Summer 2020

ECON110101
Principles of Economics BRIANTI, MARCO
Summer 2020
This course is an analysis of prices, output, and income distribution through the interaction of households and business firms in a modern Western economy. It also includes an analysis of national income and employment, economic fluctuations, monetary and fiscal policy, inflation, growth, and international aspects of macroeconomic policy. The appropriate role of government intervention is examined, and basic analytical tools are applied to current economic problems.
Open to freshmen, sophomores, and juniors. Course is open to seniors by department permission.
Credits: 03
Room and Schedule: ONLINE COURSE;;ASYNCHRONOUS;MAY 13 - JUN 26;
Satisfies Core Requirement: Social Science
Prerequisites: None
Corequisites: Students must register for a section of ECON1102, ECON1103 or ECON1104 associated with their ECON1101 instructor.
Cross-listed with: None **Frequency:** Annually **Student Level:** CORE **Comments:** None **Status:** OPEN

ECON333801
Law and Economics COPLAND, ANDREW G
Summer 2020
In this course, we utilize microeconomic analysis to evaluate the performance of legal institutions with particular attention to the issue of economic efficiency. We will focus on questions in the common law fields of property, torts, and contracts (and in the theory and practice of criminal law if time permits).
Credits: 03

Satisfies Core Requirement: None
Prerequisites: ECON2201.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD ELECT
Comments: None
Status: CLOSED

ECON336101
Monetary Theory and Policy KAZEMI, HOSSEIN S
Summer 2020
This course is an analysis of how the operation and behavior of financial markets are influenced by monetary policy, the actions taken by the Federal Reserve to promote full employment, price stability, and moderate long-term interest rates. Emphasis is placed on studying the interaction between financial intermediaries (e.g., commercial banks, investment banks, mutual funds, hedge funds, etc.) and a nation's central bank. Students are introduced to the modern theories of the demand for and supply of money, as well as their implications for economic activity, the cost of living, employment, and the conduct of monetary policy. Particular emphasis is given to recent Fed policy, including Quantitative Easing and Quantitative Tightening and the impact of these policies on asset prices and long-term interest rates. Furthermore, through an extensive use of Bloomberg in this class students learn how to analyze the impact of these and other Fed policies on the U.S. economy and financial markets to provide a window into how modern practitioners in the discipline follow and respond to changes in U.S. monetary policy.
Prerequisites: macro theory and econometrics.
Credits: 03
Room and Schedule: ONLINE COURSE;;ASYNCHRONOUS;JUN 29 - AUG 14;
Satisfies Core Requirement: None
Prerequisites: ECON2202 AND ECON2228. Not open to students who have completed ECON3324; cannot be taken concurrently with ECON3324. .
Corequisites: None **Cross-listed with:** None **Frequency:** Annually

ECON336501
Public Finance KAZAROSIAN, MARK V
Summer 2020
This is a course in the microeconomics of the public sector. We will discuss the rationale for the government's role in a market economy, major expenditure programs, and the theory and structure of the tax system. The focus will be on the federal (as opposed to state and local) government's expenditure and tax programs, with special attention given to topics of current concern.
Credits: 03
Room and Schedule: ONLINE COURSE;;ASYNCHRONOUS;MAY 13 - JUN 26;
Satisfies Core Requirement: None
Prerequisites: ECON2201 AND ECON2228. May be taken concurrently.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD ELECT
Comments: None
Status: CLOSED

ECON339501
International Monetary Economics MAGNANI, M.
Summer 2020
The course presents a basic economic analysis of open economy macroeconomics, with a focus on the theory of optimum currency area. These notions are then used to provide a historical and critical analysis of the construction and evolution of the European Monetary Union (EMU) after World War II. In this context, the effects on the Eurozone of the subprime crisis and of the crisis of sovereign debt are examined in depth.

ECON150101
Beyond Price: Markets, Cultures, Values ERBIL, CAN; SESHADRI, KALPANA R
Fall 2020
This course is about wealth and values--the condition of our "knowing the price of everything and the value of nothing." Given the glamour and power

surrounding money and the super-rich, we examine issues concerning the economy, values, and the dominance of the market over our environment and personal lives. We look at markets, incentives, ecology and ethics through a combination of literature and economics. We also take up specific case studies that will enable us to better understand the relation between business decisions or market interests and their impact on the ordinary lives of working men, women, and children.

Life, Money and Health: The Economics of Healthcare REGAN, TRACY L
Fall 2020
Is health care a human right? Should firms profit from a person's poor health? Is the private sector more efficient than the public sector in providing care? This class will answer these questions using basic tools of economic analysis like costs vs. benefits, efficiency vs. equity, and private vs. public goods. The supply and demand framework can be used to understand vaccine shortages, the obesity epidemic, and monopoly pricing in pharmaceuticals. Adverse selection and moral hazard can help us understand the ongoing debate regarding the ACA. Other current events like CTE, concierge medicine, and the opioid epidemic will be discussed.

ECON200001
The State of Affordable Housing in the States LEBLANC, DANIEL R
Fall 2020
How does housing affect the lives of Americans? Where you live determines your access to schools, quality of healthcare, fresh food, clean air, parks and recreation, affordable credit, and even how long you are likely to live. This course explores concepts of housing policy and planning at the national, state, and local levels. It examines programs and policies used to subsidize housing for millions of Americans and help them gain access to a decent place to live. Topics will be considered from multiple perspectives including housing finance, design, community planning, inequality, operations management, and sustainability. We will explore the historical and economic context of U.S. housing and discuss the barriers that low-income families face that affects their access to decent housing. The course will be divided into three sections: history, policies, and today's issues. Students will explore some of the most recently developed programs and how they fit into effective community revitalization. These programs will be evaluated in class discussions and group presentations.

ECON220601
Real Estate and Urban Action MCCULLAGH, NEIL P
Fall 2020
Real Estate and Urban Action is a class in which students explore the interdisciplinary fields that are engaged in neighborhood revitalization. The course uses the transformation of the failed Columbia Point housing project (Dorchester, MA) into Harbor Point, a successful mixed income neighborhood, as a core teaching case study, highlighting how successful redevelopment addresses the social and economic needs of community residents. Classes include guest lectures from developers, public planning officials, and supportive services experts on the social, cultural, and political factors critical to transforming distressed neighborhoods into safe and economically viable neighborhoods. It is a practical course, in which students gain experience through field trips and interactions with real estate and supportive services professionals, culminating in a team neighborhood transformation proposal.

ECON221101
Math for Economic Analysis WATSON, BRUCE D
Fall 2020
Assuming only high school algebra, the course develops all of the main mathematical tools used in modern economics. Students will learn the skills necessary to do well in subsequent economics courses, such as Micro Theory (ECON2201) and Macro Theory (ECON2202), as well as advanced electives, such as Game Theory in Economics (ECON3308) and Financial Economics (ECON3379). Those who have completed Multivariate Calculus (MATH2202) should not take this course. Beginning with applications of standard algebra to economics, the course looks at partial and general equilibrium and comparative statics. Topics subsequently explored include introductory linear algebra (matrices and vectors), and applications of univariate (single- variable) calculus to economics. Multivariate calculus is covered next, with applications to consumer theory and the theory of the firm. Finally, unconstrained and constrained optimization is covered, including techniques such as the Lagrange multiplier and Jacobian matrices. Applications and examples are drawn from practical problems in economics and business. Throughout the course, an emphasis is placed on combining intuition with rigor--the math is used to provide a more rigorous analysis of the intuitive understanding students acquired in their principles of economics courses.

ECON221201
Geographic Information Systems for Planning and Decision-Making COHEN, WILL W
Fall 2020
Large quantities of information are available to describe our social and physical environment with high detail, but making sense of this data requires specialized skill sets. Geographic Information Systems (GIS) is a general approach to analysis and is a powerful set of tools for understanding complex problems or for making a compelling argument about issues grounded in the physical or social environment. It is widely used in the public and private sectors. This course will introduce students to the use of GIS and representation as a means of looking at and representing spatial data. Students will learn how to perform the three broad steps of spatial analysis: (1) collecting and organizing data, (2) analyzing this data for appropriate patterns, and
(3) using software to represent data on maps to support decision making.

Industrialization and Democratization in Korea HWANG, INGU
Fall 2020
This introductory course surveys the political and economic transformation of South Korea from decolonization through the high growth era to today's global neo-liberal age. It traces how a
war-ravaged country became a prosperous and industrialized nation. In exploring this transformation, it also examines the relationship between Korea's industrialization and its democratization: How did U.S. Cold War modernization impact the Korean state's economic strategy and it's political development? Why and how did Korean society campaign for social and political justice during the economic high growth era? The course also considers the reconfiguration of South Korea's political economy since the 1990s.

ECON330601
Economics of Education SANKARAN, CHANDINI
Fall 2020
This course combines economic theory, econometric literature, and institutional literature to examine current issues in U.S. education. Topics include: The basic theory of investments in education (human capital theory); disentangling the return to education from the return to innate ability; the role of education in individual mobility and national economic growth; the association between education and individual earnings and reasons why that relationship has changed over time; the role of early childhood education; the main approaches to K-12 school reform (money, choice, educational standards, and teacher selection/training); higher education and higher education policy. We will also discuss teacher assessment methods, computers in education, and the effectiveness of different teaching methods. Prerequisites: micro theory and econometrics.

ECON330801
Game Theory in Economics SONMEZ, TAYFUN O
Fall 2020
This course is an introduction to game theory. Game theory consists of a coherent set of concepts and analytical tools to examine interactive or strategic situations between people, that is, situations where the wellbeing of one actor depends not only what s/he does but also on what others do. Hence in deciding how best to act, each person needs to consider how others are likely to act as well. Game theory has become a widely used tool of analysis in a wide range of disciplines, including economics, business, political science, law, and international relations.

ECON331701
Economies of Inequality SANZENBACHER, GEOFFREY T
Fall 2020
The course will provide both a theoretical and empirical analysis of economic inequality. This will include analysis and discussion of recent trends in inequality and an examination of the economic causes and consequences of inequality. Specific attention will be paid to the difference between inequality of economic outcomes (e.g., employment status, earnings, and occupation) and inequality of economic opportunity. The course will also touch on economic policy, including discussions of programs designed to combat inequality of outcomes, like welfare and food stamps, as well as those designed to combat inequality of opportunity, like Head Start. Prerequisites: micro theory and econometrics.

Money and Financial Markets KAZEMI, HOSSEIN S
Fall 2020
This course covers topics such as the significance and multiple functions of money in the economy, the behavior of interest rates, the banking system, financial markets, and the management of financial institutions. This course further covers the Federal Reserve System and the conduct of monetary policy, different asset classes, the foreign exchange market, and the international financial system. There is a heavy emphasis on use of market data and the analysis of economic releases--earnings reports, government policy statements, etc.--to provide a comprehensive introduction to the subject. Moreover, through an extensive use of Bloomberg in this class students learn how to access and analyze data and economic releases to provide a window into how modern practitioners in the discipline analyze financial markets. Prerequisites: macro theory and econometrics
Credits: 03
Room and Schedule: T TH 1 30*;ONLINE;SYNCHRONOUS;

ECON332501
Contest Theory DEPT
Fall 2020
Many economic, political, and social environments can be described as contests in which competing agents have the opportunity to expend scarce resources--such as effort, money, time, or troops--in order to affect the probabilities of winning prizes. Examples range from the competition for patents and promotions within firms, to the process of litigation or lobbying politicians, to elections, sports competitions, and global conflicts. Such environments have been analyzed using Tullock contests, all-pay auctions, and rank-order tournaments. The course will cover both theoretical models and experimental papers testing predictions from the models.

Advertising and Media Markets: Advanced Research Methods MORTIMER, JULIE H
Fall 2020
This course develops advanced research methods to study the advertising and media markets. The goal of the course is to provide hands-on experience with advanced research methods, including the ability to analyze and critique previous research and to identify important research questions. The course is designed primarily for junior economics majors who are interested in writing a senior thesis, or for junior and senior economics majors anticipating quantitative work in economics or marketing after graduation. Methods that are taught include theoretical tools from industrial organization, such as game theoretic models of imperfect competition, pricing, and entry, as well as statistical and empirical methods of analysis using data on advertising and media programming choices. Questions addressed in the course include the following: What is the impact of advertising on product markets? How do advertisers compete for air time, both across and within industries?

Monetary Theory and Policy KAZEMI, HOSSEIN S
Fall 2020
This course is an analysis of how the operation and behavior of financial markets are influenced by monetary policy, the actions taken by the Federal Reserve to promote full employment, price stability, and moderate long-term interest rates. Emphasis is placed on studying the interaction between financial intermediaries (e.g., commercial banks, investment banks, mutual funds, hedge funds, etc.) and a nation's central bank. Students are introduced to the modern theories of the demand for and supply of money, as well as their implications for economic activity, the cost of living, employment, and the conduct of monetary policy. Particular emphasis is given to recent Fed policy, including Quantitative Easing and Quantitative Tightening and the impact of these policies on asset prices and long-term interest rates. Furthermore, through an extensive use of Bloomberg in this class students learn how to analyze the impact of these and other Fed policies on the U.S. economy and financial markets to provide a window into how modern practitioners in the discipline follow and respond to changes in U.S. monetary policy.
Prerequisites: macro theory and econometrics.

Introduction to Computational Investing LAW, TZUO H
Fall 2020
Fall 2020***THIS COURSE IS OFFERED ONLINE***In this course, students develop skills to automate an investment strategy. The first third of the course covers programming skills (Python), market structure, and portfolio evaluation. The second third covers optimization and commonly used strategies. In the final third, we cross-evaluate student projects and discuss theory behind applications. Students work on a group project after the first third of the course. By the end of the course, successful students are able to write and evaluate fully functional programs on an online trading platform. This is not a course that promotes quantitative investing. It is an immersion to acquire the universally useful skills required to automate investments. The lab session is mandatory. Course offered in the fall only. Sophomores and juniors are highly encouraged to take this course. If the course is full, simply show up in class and the instructor will sort things out. There are no formal requirements.

ECON338901
Machine Learning for Economics ARLASHIN, ANATOLY S
Fall 2020
One of the defining features of the world around us today is the ever-increasing amount of data that describe our daily lives. This "big data" phenomenon, as it became known, has led to developing of new methods, called "machine learning," that allow high-dimensional statistical analysis in ways that were either impossible or infeasible for classical statistical methods, such as regression analysis. The goal of this course is to provide students with an introduction to machine learning in a framework way that makes it applicable to causal economic analysis.
While we will cover the necessary theoretical foundations, the emphasis will be placed on application and learning how and when to use these new methods, and what are their pros and cons compared to classical methods of statistical analysis.

ECON339001
Applied Health Economics RICHARDSON, SAMUEL S
Fall 2020
A perennial health policy debate concerns the proper role of government in the allocation of health care. The first fundamental theorem of welfare economics states that (under certain assumptions) markets result in efficient allocations, so one might expect most economists favor minimal government involvement in allocating health care. We will begin by studying economic theories about why health care markets may be inefficient, along with the empirical evidence regarding those theories. As the course progresses, our emphasis will shift: in groups, students will use publicly-available data to write and present a research paper investigating a policy- relevant health economics question. Prerequisites: micro theory and econometrics.

ECON772001
Math for Economists IRELAND, PETER N
Fall 2020
"Economics studies the efficient allocation of scarce resources." It follows almost immediately from this definition that while verbal and graphical analyses are often helpful too, economists derive their sharpest and most powerful results by setting up and solving constrained (because resources are "scarce") optimization (because allocations should be "efficient") problems. Hence, this course introduces first-year graduate students to variety of techniques for doing just that: setting up and solving constrained optimization problems. Specific methods covered include those based on the Kuhn-Tucker and envelope theorems, the maximum principle, and dynamic programming. Note that since this is a "math for economists course", its emphasis is not so much on stating and proving theorems but on developing an intuitive understanding of how and why each method works and determining when one particular approach may be easier or more convenient than all others to apply to a specific problem.

Macroeconomic Theory I SCHIANTARELLI, FABIO
Fall 2020
The course covers the standard models of exogenous and endogenous growth, mostly in a deterministic setting: The Solow-Swan model without and with human capital, the Ramsey growth model with infinitely lived optimizing agents, overlapping generation models without and with altruism, fiscal policy, models with human capital, basic AK models of endogenous growth, two sector models of endogenous growth, product variety models and Schumpeterian growth models. We will also review some crucial empirical papers on applied growth, starting from those on the fundamental causes of growth. In the last part of the course we cover the Ramsey model in discrete time with a stochastic technology shock and the choice of investment with adjustment costs and consumption in a stochastic setting.

ECON882101
Time Series Econometrics XIAO, ZHIJIE
Fall 2020
This course covers major advances in time series analysis. In addition to univariate and multivariate models for stationary time series, it addresses the issues of unit roots and cointegration. The Kalman Filter and time series models of heteroskedasticity are also discussed. The course stresses the application of technical tools to economic issues, including testing money-income causality, stock market efficiency, the life-cycle model, and the sources of business cycle fluctuations.

ECON885301
Industrial Organization I MORTIMER, JULIE H
Fall 2020
In this course, we study imperfect competition among firms, emphasizing empirical work. We learn how to implement empirical methods commonly used in Industrial Organization (IO), and how to read, and ultimately write, papers in empirical IO. Topics covered include demand estimation, entry, auctions, bundling, vertical control and contractual arrangements, retailing and inventories, U.S. merger policy, health markets, and others as time allows. Each topic is organized around recent empirical work. Throughout, we consider the importance of identification in empirical studies.

ECON887201
International Finance VALCHEV, ROSEN Z
Fall 2020
The course provides an introduction to international finance, spanning from the classic puzzles to current research. It is designed for Ph.D. students in their second year or later, and provides an overview of theory and empirical tools for conducting research in this field. We study two overarching themes: First, exchange rate dynamics and second, international risk sharing and financial integration.

ECON887901
Game Theory and Applications EKMEKCI, MEHMET
Fall 2020
In this elective advanced Graduate Class, we will cover many topics and problems that fall under the category game theory with more emphasis on dynamic games and repeated games.
Although we will study some topics of dynamic games with complete information, there will be a disproportionate weight on problems with asymmetric information, and problems in which there are elements related to learning. More specifically, we will study Repeated Games, Reputation Games, Bargaining, Experimentation and Information Aggregation. Students should have a strong background in Mathematical tools used in economics, and should have taken an advance undergraduate course in Game Theory, and/or first year Graduate Micro sequence.

ECON170301
The American Divide: The Economics of Inequality SANZENBACHER, GEOFFREY T
Spring 2021
Concern over inequality in the U.S. has shown itself in movements like Occupy Wall Street, the Fight for ■ Fifteen Dollar Minimum Wage, and Black Lives Matter. These courses will examine the meaning, causes and consequences of inequality from the perspectives of Philosophy and Economics. Providing a broad picture of the current state of the U.S. economy, and analyzing the role of economic policy in determining opportunities and outcomes, the course will prepare students to develop their own views about how past economic choices shaped current economic realities , and how we might create a more equitable future.

ECON220401
Macroeconomic Theory: Honors Level MURPHY, ROBERT G
Spring 2021
A more intensive treatment of the same material presented in ECON2202 covering the theory and practice of macroeconomics. Open to anyone who has done well in Principles of Economics. The course focuses on the underlying determinants of economic growth, unemployment, and inflation by developing and analyzing a variety of models. A central feature of the course includes understanding the ability and limitations of macroeconomic policy for stabilizing the business cycle and promoting long-term growth. Multivariate Calculus MATH2202 recommended.
Credits: 03
Room and Schedule: T TH 9*;ONLINE;SYNCHRONOUS;
Satisfies Core Requirement: None

ECON220601
Real Estate and Urban Action MCCULLAGH, NEIL P
Spring 2021
Real Estate and Urban Action is a class in which students explore the interdisciplinary fields that are engaged in neighborhood revitalization. The course uses the transformation of the failed Columbia Point housing project (Dorchester, MA) into Harbor Point, a successful mixed income neighborhood, as a core teaching case study, highlighting how successful redevelopment addresses the social and economic needs of community residents. Classes include guest lectures from developers, public planning officials, and supportive services experts on the social, cultural, and political factors critical to transforming distressed neighborhoods into safe and economically viable neighborhoods. It is a practical course, in which students gain experience through field trips and interactions with real estate and supportive services professionals, culminating in a team neighborhood transformation proposal.
Credits: 03
Room and Schedule: FULTON HALL 511,W 4 30-6 50;
Satisfies Core Requirement: None
Prerequisites: None
Corequisites: None
Cross-listed with: BSLW2206

ECON221101
Math for Economic Analysis WATSON, BRUCE D
Spring 2021
Assuming only high school algebra, the course develops all of the main mathematical tools used in modern economics. Students will learn the skills necessary to do well in subsequent economics courses, such as Micro Theory (ECON2201) and Macro Theory (ECON2202), as well as advanced electives, such as Game Theory in Economics (ECON3308) and Financial Economics (ECON3379). Those who have completed Multivariate Calculus (MATH2202) should not take this course. Beginning with applications of standard algebra to economics, the course looks at partial and general equilibrium and comparative statics. Topics subsequently explored include introductory linear algebra (matrices and vectors), and applications of univariate (single- variable) calculus to economics. Multivariate calculus is covered next, with applications to consumer theory and the theory of the firm. Finally, unconstrained and constrained optimization is covered, including techniques such as the Lagrange multiplier and Jacobian matrices. Applications and examples are drawn from practical problems in economics and business. Throughout the course, an emphasis is placed on combining intuition with rigor--the math is used to provide a more rigorous analysis of the intuitive understanding students acquired in their principles of economics courses.

ECON221201
Geographic Information Systems for Planning and Decision-Making COHEN, WILL W
Spring 2021
Large quantities of information are available to describe our social and physical environment with high detail, but making sense of this data requires specialized skill sets. Geographic Information Systems (GIS) is a general approach to analysis and is a powerful set of tools for understanding complex problems or for making a compelling argument about issues grounded in the physical or social environment. It is widely used in the public and private sectors. This course will introduce students to the use of GIS and representation as a means of looking at and representing spatial data. Students will learn how to perform the three broad steps of spatial analysis: (1) collecting and organizing data, (2) analyzing this data for appropriate patterns, and
(3) using software to represent data on maps to support decision making.

ECON221301
Economics of Health Policy RICHARDSON, SAMUEL S
Spring 2021
This course builds on fundamental concepts from Principles to apply economic reasoning to health policy issues. We will develop some tools for thinking critically about health economics data, and then delve into the history and institutional details of health policy in the United States. The rest of the course is devoted to the economics behind a variety of health policy questions: how could policymakers use cost-effectiveness analysis when deciding whether to adopt new health care technology? How can the economics of externalities inform policies around vaccination? Why do we give patents to pharmaceutical companies when we know that monopolies create deadweight loss? Why do economists oppose the tax deduction for employer-sponsored health insurance plans? How did Obamacare's individual health insurance mandate affect insurance markets, and what should we expect now that the mandate has been repealed? How can information asymmetries result in low-quality health care? Why does the United States spend so much more than other countries on health care, and what do we gain from that additional spending?

Economic and Business Forecasting MC GOWAN, RICHARD
Spring 2021
The theory and practice of applied time series analysis will be explored. First the different segments (trend, seasonality, cyclical, and irregular) of a time series will be analyzed by examining the Autocorrelation functions (ACF) and Partial Autocorrelation functions (PACF). The specifics model to model the various types of time series include linear regression, panel regression, seasonal decomposition, exponential smoothing, ARIMA modeling as well as combining models. This course is offered as an online hybrid course. In addition to the online lectures presented on the Canvas LMS, there are three required on-campus class meetings on Saturday morning September 15, Saturday morning October 6, and Saturday morning December 1. The midterm exam will also be held on campus on Monday evening October 15. Please see the course syllabus for additional details.

Spring 2021
This course considers what we know about developing countries, and applies economic theory to help us understand the constraints of poverty. We will describe the economies of less developed countries and the lives of the poor, focusing on changes in poverty, inequality, demography, and health. We will consider theories and evidence for why some countries are rich and others poor. We will examine how land, labor, and credit markets function in poor countries and communities, and the consequences for health, education, and child labor. We will consider migration and its consequences and will discuss aid and international institutions.
Credits: 03
Room and Schedule: DEVLIN HALL 008,T TH 1 30*;
Satisfies Core Requirement: Cultural Diversity
Prerequisites: ECON1151 AND ECON1132 AND ECON1131 AND ECON1101.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: Not open to students who have completed ECON3374 or ECON3375. Fulfills cultural diversity core requirement.

ECON330301
Economics of the Family FOERSTER, HANNO
Spring 2021
This course uses economic tools to study decision-making and allocation of resources within families and explore their impact on the economy as a whole. The impact of gender roles and differences will be examined historically in the U.S. and across developed economies. Student participation will be an integral part of the course. During class, students will be required to evaluate data and relate it to the theoretical models covered.

Market Design YENMEZ, MEHMET B
Spring 2021
This is an advanced course on market design. The course aims to provide students with theoretical concepts of matching and allocation problems. The focus of the course is both introducing students to market-design theory as well as exploring real-life applications such as on-campus housing, school choice, kidney exchange, search engine auctions, and spectrum auctions. Some knowledge of statistics, especially order statistics, and calculus is required for the theoretical part. Students will be required to write a final paper and do an in-class presentation.

ECON330801
Game Theory in Economics SHARUNOVA, VERA
Spring 2021
This course is an introduction to game theory. Game theory consists of a coherent set of concepts and analytical tools to examine interactive or strategic situations between people, that is, situations where the wellbeing of one actor depends not only what s/he does but also on what others do. Hence in deciding how best to act, each person needs to consider how others are likely to act as well. Game theory has become a widely used tool of analysis in a wide range of disciplines, including economics, business, political science, law, and international relations.

ECON331201
Evolutionary Economics COX, DONALD
Spring 2021
This course uses evolutionary biology to better understand the psychology of preferences, a central concept in economics. Why are people risk averse? Impatient? What explains novelty seeking, habits, addictions? What makes parents provide for children? We will use evolutionary thinking to explore these and a host of other diverse topics: violence, adolescent risk taking, sexual behavior, mating preferences, marriage and divorce, rearing and investing in children, extended families, trade and specialization, cooperation and conflict, cults and gangs, religion, and interactions between genetic and cultural forces. This course has an intensive research and writing requirement and enrollment is limited. You should be comfortable using Stata.
Prerequisites: Micro theory and econometrics.
Credits: 03

ECON332401
Money and Financial Markets KAZEMI, HOSSEIN S
Spring 2021
This course covers topics such as the significance and multiple functions of money in the economy, the behavior of interest rates, the banking system, financial markets, and the management of financial institutions. This course further covers the Federal Reserve System and the conduct of monetary policy, different asset classes, the foreign exchange market, and the international financial system. There is a heavy emphasis on use of market data and the analysis of economic releases--earnings reports, government policy statements, etc.--to provide a comprehensive introduction to the subject. Moreover, through an extensive use of Bloomberg in this class students learn how to access and analyze data and economic releases to provide a window into how modern practitioners in the discipline analyze financial markets.
Prerequisites: macro theory and econometrics
Credits: 03
Room and Schedule: T TH 1 30*;ONLINE;SYNCHRONOUS;

ECON332501
Contest Theory SIMEONOV, DIMITAR A
Spring 2021
Many economic, political, and social environments can be described as contests in which competing agents have the opportunity to expend scarce resources--such as effort, money, time, or troops--in order to affect the probabilities of winning prizes. Examples range from the competition for patents and promotions within firms, to the process of litigation or lobbying politicians, to elections, sports competitions, and global conflicts. Such environments have been analyzed using Tullock contests, all-pay auctions, and rank-order tournaments. The course will cover both theoretical models and experimental papers testing predictions from the models.

ECON332601
Experimental Economics COFFMAN, LUCAS
Spring 2021
This course is for anyone who wants to be able to answer questions using experiments. This course is an introduction to experimental methods, particularly those developed by economists. We will discuss in detail all of the steps of an experiment, from design, measurement and randomization, to cost and power analyses. This is strictly a methods course; the experiments we discuss are chosen to give a broad understanding of experimental methods, not a foundation of famous experimental results. Nonetheless, we will cover experiments in a variety of interesting fields: behavioral economics, economics of developing countries, discrimination, labor economics, cognitive and social psychology, and more. There are two main value-addeds from this course. First, you will be equipped to design and run an experiment to answer important questions. Second, in understanding what the optimal experimental design should look like, you will be armed with better lenses through which to view naturally existing data.

ECON336101
Monetary Theory and Policy KAZEMI, HOSSEIN S
Spring 2021
This course is an analysis of how the operation and behavior of financial markets are influenced by monetary policy, the actions taken by the Federal Reserve to promote full employment, price stability, and moderate long-term interest rates. Emphasis is placed on studying the interaction between financial intermediaries (e.g., commercial banks, investment banks, mutual funds, hedge funds, etc.) and a nation's central bank. Students are introduced to the modern theories of the demand for and supply of money, as well as their implications for economic activity, the cost of living, employment, and the conduct of monetary policy. Particular emphasis is given to recent Fed policy, including Quantitative Easing and Quantitative Tightening and the impact of these policies on asset prices and long-term interest rates. Furthermore, through an extensive use of Bloomberg in this class students learn how to analyze the impact of these and other Fed policies on the U.S. economy and financial markets to provide a window into how modern practitioners in the discipline follow and respond to changes in U.S. monetary policy.
Prerequisites: macro theory and econometrics.

From Stone Tools to Robots: Economic Growth and Development GUERRON, PABLO A
Spring 2021
In this class the student will learn about the drivers of economic growth. The class will cover the economic impact of major technological breakthroughs on humanity. These innovations include the invention of fire, agriculture, the printing press, electricity, the telephone, airplanes, and robotics. A significant part of the class will be devoted to discuss the Fourth Industrial Revolution, which is currently taking place. Within this framework, students will learn about research and development with emphasis on the development of vaccines and the job disruption created by artificial intelligence and automation.

ECON337601
International Economic Relations ANDERSON, JAMES
Spring 2021
This course introduces the study of economic relations among countries. It combines material contained in ECON3371 and ECON3372, and substitutes for both those courses. Primarily designed for international studies majors, it is also appropriate for economics and other social science majors, with the proviso that the comprehensive coverage of the course implies that the workload is heavy and expectations for students are high. Topics include the determinants of trade in goods, services, and capital; the economic policies that nations use to influence such trade; the theory and practice of international macroeconomics; and problems of coordinating macroeconomic policies among countries. The course features the usefulness (and limitations) of game theory for explaining international economic interactions.

ECON338901
Machine Learning for Economics ARLASHIN, ANATOLY S
Spring 2021
One of the defining features of the world around us today is the ever-increasing amount of data that describe our daily lives. This "big data" phenomenon, as it became known, has led to developing of new methods, called "machine learning," that allow high-dimensional statistical analysis in ways that were either impossible or infeasible for classical statistical methods, such as regression analysis. The goal of this course is to provide students with an introduction to machine learning in a framework way that makes it applicable to causal economic analysis.
While we will cover the necessary theoretical foundations, the emphasis will be placed on application and learning how and when to use these new methods, and what are their pros and cons compared to classical methods of statistical analysis.

Economics of Energy and the Environment SWEENEY, RICHARD L
Spring 2021
This course provides an overview of recent research in energy and environmental economics, with an emphasis on connecting policy questions of interest to available data and econometric methods. In the context of specific markets, we will first review the theoretical justifications for government intervention. We will then turn to the empirical evidence to see what recent economic scholarship has to say about a variety of energy policy questions, including: Should we ban fracking? Do oil pipelines reduce property values? What is the best way to promote renewable energy? Should we be more energy efficient? Students will be required to read and discuss academic articles each week, as well as write an empirical term paper.

ECON777201
Econometric Methods LEWBEL, ARTHUR
Spring 2021
This course provides an understanding of the econometric theory that underlies common econometric models. The focus is on regression models and their many extensions. Topics include finite and asymptotic properties of estimators, consistency and limiting distributions, specification issues, heteroskedasticity, autocorrelation, endogeneity and simultaneity, and nonlinear model estimators including maximum likelihood and the generalized method of moments.
Credits: 04
Room and Schedule: M W 10-11 50;ONLINE;SYNCHRONOUS;
Satisfies Core Requirement: None **Prerequisites:** ECON7770. Or equivalent. **Corequisites:** None

ECON881901
Mechanism Design
YENMEZ, MEHMET B; UNVER, M UTKU
Spring 2021
This course is going to cover some fundamental topics in mechanism and market design as well as some advanced ones. We will start with Bayesian mechanism design and dominant strategy mechanisms. Other topics include dynamic mechanism design, robust mechanism design, and axiomatic mechanism design. We will also consider non-transferable utility settings.
Credits: 03
Room and Schedule: T TH 10 30*;ONLINE;SYNCHRONOUS;

ECON882301
Applied Econometrics BAUM, CHRISTOPHER F
Spring 2021
This course presents a number of econometric estimation techniques relevant for applied research in economics and finance and addresses the computational issues related to their implementation. Topics will be drawn from instrumental variables (IV-GMM) estimation and diagnostics; panel data estimators, including dynamic panel data techniques; reduced-form and structural vector autoregressions; ARFIMA (long memory) models; general

linear models; limited dependent variable techniques; structural equation modeling; propensity score matching; state- space and dynamic factor models; simulation and bootstrapping.

ECON885501
Empirical Methods in Applied Micro MURRY, CHARLES T; SWEENEY, RICHARD L
Spring 2021
This is a Ph.D. level course in applied econometrics and computational economics, targeted at students conducting applied research (as opposed to econometricians). Topics include nonparametric regression, model selection, penalized regression, treatment effects, selection, discrete choice, dynamic discrete choice, root-finding, optimization, and partial identification. We will discuss these topics in the context of popular papers across many fields of applied microeconomics.
Credits: 03

ECON885601
Experimental Economics COFFMAN, LUCAS
Spring 2021
This class is an introduction to experimental methods in economics. We will cover all the steps of an experiment from design, measurement, and randomization to practical considerations like cost and power analyses. This is mainly a methods course; the experiments we discuss are chosen to give a broad understanding of experimental methods (e.g., lab, field, and online studies, experiments in developing countries, interventions in organizations, and so on). The course is not intended to provide a foundation of famous experimental results overall or for any one topic. The take-away of the course is to develop the ability to design a confound-free experiment regardless of question or context.
Credits: 03
Room and Schedule: O'NEILL LIBRARY 253,F 1-3 30;
Satisfies Core Requirement: None

ECON886001
Advanced Macro: Computation, Estimation, and Applications CHAHROUR, RYAN; ULBRICHT, ROBERT
Spring 2021
This course consists of two parts. The first part introduces tools for solving and estimating linearized, full-information, dynamic stochastic general equilibrium (DSGE) models. Students will develop tools in matlab to solve and estimate medium-scale DSGE models. Part two of the course explores alternatives to the linearized, full-information, rational expectations paradigm. Students will write a final paper incorporating at least one of these alternatives.
Credits: 03
Room and Schedule: F 9-11 30;ONLINE;SYNCHRONOUS;
Satisfies Core Requirement: None

ECON887301
Empirical Methods in Macroeconomics and Finance GUERRON, PABLO A
Spring 2021
We will study econometric models and methods that are useful to conduct substantive empirical research in macroeconomics and finance. We consider the estimation and evaluation of dynamic stochastic general equilibrium models, analysis of linear and nonlinear vector autoregressive models, time series models with regime switches and time-varying coefficients, as well as dynamic factor models. For the most part, we will focus on Bayesian methods of inference, with detailed discussions of suitable Markov-Chain- Monte-Carlo methods.
Credits: 03
Room and Schedule: GASSON HALL 201,M W 1 30*;
Satisfies Core Requirement: None
Prerequisites: Graduate level econometrics, time-series.

ECON887401
International Macroeconomics NOSAL, JAROMIR B
Spring 2021
This course will focus on the construction of models for understanding the international business cycle and analysis of macroeconomic policy in open economies. The first part will focus on the transmission of macroeconomic shocks across countries, from the international real business cycle literature to models with nominal rigidity and financial imperfections. The second part will cover the recent literature on macroeconomic policy in open economies. The third portion of the course will return to model building and shock transmission and focus on the recent literature at the intersection between international trade and macroeconomic theory.
Credits: 03
Room and Schedule: GASSON HALL 201,M W 10 30*;
Satisfies Core Requirement: None **Prerequisites:** ECON8861 recommended. **Corequisites:** None

English Courses: Summer 2020

ENGL101001
First Year Writing Seminar REZNICK, SCOTT
Summer 2020
Designed as a workshop in which each student develops a portfolio of personal and academic writing, the seminar follows a semester-long process. Students write and rewrite essays continuously, discuss their works-in-progress in class, and receive feedback during individual and small group conferences with the instructor. Students read a wide range of texts, including various forms of non-fiction prose. In addition to regular conferences, the class meets two hours per week to discuss the writing process, the relationship between reading and writing, conventional and innovative ways of doing research, and evolving drafts of class members.
Credits: 03
Room and Schedule: ONLINE COURSE;;ASYNCHRONOUS;MAY 13 - JUN 26;

ENGL108001
Literature Core REZNICK, SCOTT
Summer 2020
In Literature Core, students explore the principal motives which prompt people to read literature: to assemble and assess the shape and values of one's own culture, to discover alternative ways of looking at the world, to gain insight into issues of permanent human importance as well as issues of contemporary urgency, and to enjoy the linguistic and formal satisfactions of literary art. Literature Core will strive to develop the student's capacity to read and write with clarity and engagement, to allow for that dialogue between the past and present we call history, and to provide an introduction to literary genres.

ENGL222101
Introduction to Creative Writing ROBERTS, SUSAN A
Summer 2020
An introductory course in which students will write both poetry and short fiction and read published examples of each. We will experiment with the formal possibilities of the two genres and look at what links and separates them. The course is workshop-based, with an emphasis on steady production and revision. Through exercises and/or open and directed writing assignments, students will produce a portfolio of short fiction and poetry.

ENGL331401
Writing Out of Place MATSON, SUZANNE M
Summer 2020
This writing workshop will take place in Bali. It will focus heavily on questions of location and dislocation. Writing can be seen as a complex negotiation between what we know and what we imagine, what we see and what we project or interpret. Such negotiation is greatly intensified for the person "out of place"--a condition that one, as a traveler, chooses to inhabit.

ENGL340101
Science Fiction
KAPLAN-MAXFIELD, THOMAS
Summer 2020
This is a course on the genre of literature known as "Science Fiction," "SF," or "sci-fi." Since this is a genre course, we will spend a bit of time discussing the definition of sci-fi, how there are many definitions that are not agreed upon, and what that tells us about the type of literature. We'll set the genre within the historical context of Enlightenment Rationalism and Romanticism's response to it, early nineteenth century Industrialism and the rise of machines. Class will consist of a bit of lecture followed mainly by discussions of the stories and books, within the terms set out above. We will read stories from Wells and Verne and novels from Asimov to Butler to see what sci-fi tells us about ourselves and where we are going. Three papers required plus a midterm and final.

ENGL108001
Literature Core SHAW, CHANDLER M
Fall 2020
In Literature Core, students explore the principal motives which prompt people to read literature: to assemble and assess the shape and values of one's own culture, to discover alternative ways of looking at the world, to gain insight into issues of permanent human importance as well as issues of contemporary urgency, and to enjoy the linguistic and formal satisfactions of literary art. Literature Core will strive to develop the student's capacity to read and write with clarity and engagement, to allow for that dialogue between the past and present we call history, and to provide an introduction to literary genres.

ENGL109301
An Introduction to Modern Irish I NUGENT, JOSEPH G
Fall 2020

In small classes and at a gentle pace, this course offers beginners an enjoyable introduction to the modern Irish language. No prior knowledge of Irish/Gaelic is required. ENGL1093 presents a superb opportunity to learn a new language, explore Irish/Celtic culture, and investigate the linguistic politics of Ireland. In addition to satisfying the Irish Studies minor requirement, this English Department course satisfies the modern language requirement of the Morrissey College of Arts and Sciences (by completing Intermediate Modern Irish).

ENGL111001
First Year Writing Seminar: From Slavery to Mass Incarceration DEROSA, MARLA C
Fall 2020
This section of the First-Year Writing Seminar is centered around a book called Just Mercy by Bryan Stevenson. The book focuses on Stevenson's work with the criminal justice system and the organization he founded called the Equal Justice Initiative. The book raises questions about power, race, equality, justice, and the common good within the U.S. legal system for which there are no easy answers. Students will identify one of these issues/questions from the book and delve more deeply into that question. Students will start with an oral history/interview of a person who can shed light on their question from a personal or professional perspective. They will then review the academic research literature on the question and research what the media says about the issue. Finally, students will write and present (to a non-academic audience) an informed argument of their own about how to address issues of power and inequality.
Credits: 03
Room and Schedule: T TH 10 30*;ADVISING SECTION;ONLINE;SYNCHRONOUS;
Satisfies Core Requirement: Cultural Diversity, Writing

ENGL150301
Beyond Price: Markets, Cultures, Values ERBIL, CAN; SESHADRI, KALPANA R
Fall 2020
This course is about wealth and values--the condition of our "knowing the price of everything and the value of nothing." Given the glamour and power surrounding money and the super-rich, we examine issues concerning the economy, values, and the dominance of the market over our environment and personal lives. We look at markets, incentives, ecology and ethics through a combination of literature and economics. We also take up specific case studies that will enable us to better understand the relation between business decisions or market interests and their impact on the ordinary lives of working men, women, and children.

ENGL172301
Feeling Like Ourselves: How and Why Literature Moves Us SOFER, ANDREW
Fall 2020
Ever since Aristotle questioned why we enjoy tragedy, thinkers have puzzled over why literature moves us. Why do we care about King Oedipus or Jane Eyre? Why do we laugh, cry, or shiver with pleasurable fear at stories we know aren't real? How do writers manipulate our emotions? More broadly, what can literature teach us about emotion's role in our own lives? By the course's end, students will have a richer understanding of literature's role in shaping and reflecting our emotions, together with a set of useful reading strategies that can be applied beyond literary studies.

ENGL172501
Narrative and Myth in American Culture: The Case of Disney RUDNER, BONNIE
Fall 2020
Storytelling and narrative have been central elements of communication since humans began to live in social structures. For hundreds of years, folk tales were adapted in order to influence social beliefs, values, attitudes, and behaviors. This literature Core course will explore the history of folk tales and their movement around the world. After reading source material from Grimm, Perrault, Anderson, and others, we will focus on the ways tales have been altered by the Disney Corporation in order to assess the impact of the movies on audiences.

ENGL172701
When Life Happens: Disability and the Stories We Tell DUNSFORD, CLARE M
Fall 2020
In this literature core course students will read stories of disability written by those who are disabled and those who love them or are interested in understanding their lives. We will read memoir, fiction, and essays that explore a range of physical and developmental disabilities.
Questions of representation: who gets to tell the story, how disability has been represented historically at different times and in different cultures will be considered in terms of literary analysis and disability theory

ENGL209701
Intermediate Modern Irish I NUGENT, JOSEPH G
Fall 2020
This is a continuing course in modern Irish for those with a basic knowledge of the language. We'll emphasize the ability to read contemporary literature in various genres. Texts from a variety of authors and historical periods allow students to taste different writing styles: contemporary fiction, journalism, literary criticism, historical and cultural texts, while we enjoy Irish-language short films and videos.

ENGL213303
Studies in Narrative WALLACE, ELIZABETH
Fall 2020
This course introduces students to questions that they might bring to the study of narrative works--primarily novels, tales, and non-fictional narratives, though it may also include drama, film, and narrative poems. It aims to introduce the various critical frames through which we construct interpretations. As part of the process of reading, students will be introduced to common critical terms; narrative genres, conventions, and discourses; the construction of the character and the ways of representing consciousness; and the ordering of narrative time. The course will also expose the student to the implications of taking critical positions.

ENGL214101
American Literary History I POTTROFF, CHRISTY L
Fall 2020

American Literary History 1 follows the development of American literary history from the landing of the *Mayflower* to the tumultuous decade of the 1850s, moving from such early writers as Bradstreet, Rowlandson, and Taylor through such writers of the Revolution and Early Republic as Equiano, Franklin, and Rowson to such antebellum writers as Child, Thoreau, Hawthorne, Poe, Douglass, Whitman, and Melville. Course assignments include regular participation in class discussions, mid-semester and final examinations, and either one ten-page or two five-page essay(s). Students considering careers in secondary English education will be given the option of writing about approaches to teaching course texts.

ENGL214301
American Literary History III O'HAR, GEORGE
Fall 2020
This course provides an introductory overview of literature written in the United States from World War I to the early twenty-first century. We will look at the ways writers of this period have experimented idiosyncratically and in dialogue with one another as modernism turned postmodern, as canons collided and collapsed, as movies and music albums, as well as graphic literature displaced some of literature's more traditional forms. The course is largely conversational but structurally supported with student oral presentations. Required texts may include fiction by William Faulkner, Willa Cather, Toni Morrison, Maxine Hong Kingston, Sherman Alexie, and Junot Diaz, plus graphic literature by Art Spiegelman and Thi Bui. Requirements for the course include an oral presentation, two critical essays, two section exams, and a final exam.

ENGL216301
Triumphant Calamity: The Modern Condition BOWLES, DANIEL J
Fall 2020
In this seminar students are invited to explore the variety and complexity of modernism through German literature, film, and art. Our aim is to understand how such works gave voice to the triumphs and failings of humankind at a time of dislocation, upheaval, radical change, and seemingly limitless possibility. Readings include works by Nietzsche, Rilke, Kafka, Mann, Freud, and Keun and screenings include films by Lang, Murnau, Wiene, and Sagan.

ENGL217001
Introduction to British Literature and Culture I CRANE, MARY T
Fall 2020
A survey of British literature from *Beowulf* to the early eighteenth century. You will be introduced to major cultural themes and both canonical and lesser-known writers; learn the basic history of the English language; and explore topics like the court's influence on Renaissance literature and art, the new Renaissance focus on exploration and discovery, the development of drama before and after the English Revolution, the seventeenth-century emphasis on writing about the self, and the eighteenth-century rise of new modes of social life and communication. Works and authors will include *Beowulf,* Chaucer, Spenser, Shakespeare, Donne, Milton, Swift, and Pope.

ENGL220001
The Underground Press ARDS, ANGELA
Fall 2020
The underground press was a vast network of loosely affiliated newspapers that emerged in the 1950s and 60s when young people asked very hard questions about the meaning of power and the role of the press. The outsider outlets spread through hundreds of communities throughout the nation, ranging from big city weeklies like "The Village Voice" and the Berkeley "Barb" to specialized periodicals representing the Black press, as well as other ethnic newspapers, progressive weeklies, and various conservative perspectives. This course examines the factors that helped pave the way for this journalism of dissent and how this history affects alternative media today.

ENGL222001
Classical Mythology EISENFELD, HANNE E
Fall 2020
This course explores the mythology of ancient Greece, Rome, and the Near East within its cultural, political, historical, and religious contexts. You will meet (or renew your acquaintance with) mythical figures like Zeus, Gilgamesh, Medusa, and Helen as they appear in multiple literary genres and other artistic media. In order to analyze and interrogate these myths we will use ancient and modern frameworks for thinking about what mythology is and what it does.
What can a myth tell us about the civilization that created, adopted, or adapted it? What do our uses of Classical mythology--and our creations of our own myths--tell us about ourselves?

ENGL224101
Playwriting I CUMMINGS, SCOTT T
Fall 2020
This writing-intensive course offers a practical introduction to the art and craft of writing for performance. Students will engage in numerous writing exercises that highlight the special demands and opportunities of writing for the stage. Emphasis is placed on finding ways to contact and release the theatrical imagination and on mastering the basics of writing a solid dramatic scene. Exemplary plays by established playwrights will be studied as appropriate, but the overwhelming emphasis is on student writing.

ENGL227701
Introduction to American Studies HARRISON-KAHAN, LORI
Fall 2020
This course offers an introduction to the interdisciplinary study of American culture. It is not a survey of American cultural history; rather, we will concentrate on approaches, methods, and themes of interest as we assemble critical skills for making interpretive arguments about aspects of culture in their historical moment. The forms we analyze will include examples from literature, film, painting, music, theater, landscape, and architecture, among others. Members of the American Studies faculty will present guest lectures to highlight various aspects of the field.

ENGL229501
Ancient Comedy POLT, CHRISTOPHER B
Fall 2020
This course explores comedy from ancient Greece and Rome. Reading plays by Aristophanes, Plautus, and Terence, we will examine what the ancients considered "comic," how comedy was performed, and what comedy contributed to contemporary society. Along the way we will consider how comedy promotes, questions, and lampoons ancient values and ideas about warfare, slavery, gender and sexuality, etc. All readings will be in English and there will be substantial performance opportunities.

ENGL300101
Walking Infinite Jest BOUCHER, CHRISTOPHER G
Fall 2020
David Foster Wallace describes Enfield, Massachusetts--an important setting in his 1996 novel *Infinite Jest*--as "a kind of arm-shape extending north from Commonwealth Avenue and separating Brighton into Upper and Lower, its elbow nudging East Newton's ribs and its fist sunk into Allston?". Sound familiar? In this course, we'll conduct a Bostonian's reading of Wallace's opus. Students will be required to write weekly critical reading responses, and should be prepared for the course's non-traditional structure: weekly meetings will sometimes be canceled in lieu of weekend on-site meetings in Brighton and Boston.

ENGL318001
The Story of My Teeth: Avant-Garde Literature in the Twenty-First Century BOUCHER, CHRISTOPHER G
Fall 2020
We know what it meant for avant-garde writers of previous eras--James Joyce, Gertrude Stein, Georges Perec, and so many others--to "make it new." But what does that concept mean in the here and now? How are today's artists incorporating or reflecting contemporary culture in order to "break the mold"? This course will begin by introducing students to the tradition of the avant-garde before examining the work of modern-day harbingers like Lucy Ellmann, Nick Montfort, Enrique Vila-Matas, and Valeria Luiselli. By studying this work in context, students will acquire new lenses through which to read their own culture, especially with regards to the establishment or destabilizing of cultural norms.

ENGL332601
Blackness, Performance, and Freedom CURSEEN, ALLISON S
Fall 2020
From Henry Box Brown's cargo dramatics to Ellen Craft's incredible performance as a feeble white male traveling with his black servant to Brer Rabbit's feigned fear of the briar patch, artifice, and performance repeatedly serve as the necessary means, if not the conditions of possibility for, fugitive departure and black life. This course asks how masks, masquerades, con- acts, and acting enable resistance and escape. We will explore how the radical work of historical black performances continue in contemporary black performances like Danny Glover's Childish Gambino; Beyonce's Sasha Fierce; Ru Paul's Drag Race; and the increasingly popular interest in black speculative and afro futurism (i.e., Random Acts of Flyness and Get Out).

ENGL335601
Incendiary Poetics ROBERTS, SUSAN A
Fall 2020
American poetry has come to establish a multitude of voices and styles since Walt Whitman challenged the formal structures of the genre with his long lines, confessional voice, and provocative subjects. In this course we'll examine a variety of "incendiary" poets: Whitman, Langston Hughes, Allen Ginsberg, Claudia Rankine, and Susan Howe specifically, with forays into the work of poets writing alongside these poets (the Harlem Renaissance, Beats, and Language Poets in particular) and shorter readings by emerging writers like Patricia Lockwood and Ilya Kaminsky. We'll be looking at what makes these poets' work controversial, to the point of being banned--Ginsberg's "Howl" was actually put on trial--and asking what poetry's role has been and might continue to be as an agent of change in the articulation of self as a lyric impulse, in form, and in social conscience.

ENGL337701
Medieval Arthurian Literature STANTON, ROBERT G
Fall 2020
Myth, legend, and history conspired to make the most popular and enduring set of characters in medieval literature: King Arthur, Guinevere, Machiavellian sorcerer Merlin, lustful Uther, Sirs Gawain, Lancelot, Perceval, and the other Knights of the Round Table. We will dig at the Celtic roots of the Arthurian tales, revel in the golden age of French romance, take a detour to medieval Iceland, and examine the transformative influence the tradition had on the mainstream of English literature. All texts will be read in Modern English translation except the Middle English ones, but no previous Middle English knowledge is required.

ENGL400201
Narrative Journalism in Peace and War WILSON, CHRISTOPHER P
Fall 2020
This course will engage with modern and contemporary examples of so-called "long form" journalistic narratives (essays, books, and perhaps an example of graphic journalism) that, by applying literary techniques to nonfiction, tell us a story about contemporary social life.
Discussing matters of literary form and technique as well as journalistic norms, we will cover nonfiction texts that address both social conditions on the home front (inequality, Wall Street adventurism, street crime, race relations, police culture) and international conflicts (including war and terrorism), generally (but not always) involving the U.S. Writers covered will include figures such as Michael Lewis, Joan Didion, George Packer, William Finnegan, Suki Kim, Isabel Wilkerson, Geraldine Brooks, Mike Davis, Alex Kotlowitz, John Hersey, Anne Fadiman and others. This is a CRITICAL course.

ENGL403101
Sexuality, History, and Faith in Nineteenth Century Prose NAJARIAN, JAMES
Fall 2020
In this course, we will examine how dilemmas about faith, doubt, sexuality, and gender intertwine in the course of the nineteenth century. We will read diaries, letters, sermons, essays, poetry, short fiction and memoir, including works by Mary Wollstonecraft, Percy Shelley, John Keats, Anne Lister, Thomas Arnold, Sidney Smith, Matthew Arnold, George Eliot, Annie Besant, Francis Power Cobbe, Margaret Oliphant, and others.

ENGL403201
Imagining New England RICE, JOCELYN L
Fall 2020
This course will examine the idea of New England in American culture. Through the exploration of literature, film, and the built environment, we will consider the qualities that define the region and how these characteristics have changed over time. The course will be organized thematically around issues such as landscape, architecture, race, education, and icons. Readings and films may include works by Mary Rowlandson, Nathaniel Hawthorne, Dorothy West, and Greta Gerwig. Students will develop strategies for close reading and complete an archival research project.

ENGL403401
Rape Culture in the Eighteenth-Century Novel SULLIVAN, SABINA M
Fall 2020
Questions of consent, sexuality, and selfhood animate the eighteenth-century English novel. This course will endeavor to trace how rape culture shapes narrative, from seventeenth-century captivity narratives through "the rise of the novel." What is rape culture, and what did it look like during the eighteenth century? How does the eighteenth century speak to our contemporary cultural moment? Authors may include but are not limited to Daniel Defoe, Samuel Richardson, Leonora Sansay, Mary Rowlandson, Charlotte Lennox, Hannah Webster Foster, and Mary Prince. Students will also read literary and cultural criticism.

ENGL410001
Fortunes, Failures, and Frauds: Business Stories HUNT, AERON P
Fall 2020
In our economic, political, and personal lives, business stories exercise an extraordinary influence. This course examines the ways narratives shape commercial life, within ourselves and our communities. Spanning genres and national traditions from the nineteenth century to the present, the course addresses questions of ethics, value, and identity in novels, plays, films, and nonfiction prose. We read texts that focus on recent periods of commercial exuberance and economic crisis, technological innovation and identity-based tension. And we explore how literary arts and film have responded to the powerful ideologies and practices of modern capitalism in both collaborative and critical ways.

ENGL434001
Milton
HASKIN, DAYTON W
Fall 2020
Readings in early poetry will lead up to reading Milton's epic in its entirety. Some attention will be afforded to Milton's political writing as well. After reading *Paradise Lost,* we'll look into the experience of one of its most earnest readers, the unnamed creature at the center of Mary Shelley's *Frankenstein.* There will be ample opportunities to read aloud in small groups outside our ordinary class-meetings.

ENGL439501
Literary Theory LEHMAN, ROBERT S
Fall 2020
In this course, we will examine theoretical works that pose and attempt to answer the question: What is literature? What, in other words, does or does not make literature different from non- literary writings or from ordinary communicative acts? Though our primary focus will be on trends in twentieth-century literary theory--e.g., new criticism, formalism, structuralism, and deconstruction--we will also examine earlier attempts to determine the nature and the possibilities of literature. Authors may include Friedrich Schlegel, Cleanth Brooks, Boris Eikhenbaum, Maurice Blanchot, Paul de Man, Helene Cixous, Barbara Johnson, and Jonathan Culler.

ENGL443201
Advanced Creative Nonfiction: Writing Food, Identity, and Culture ANDERSON, LYNNE C
Fall 2020
In this workshop, we'll examine the intersections between food, culture, and identity as we write about our own experiences. We'll explore the local food landscape, drawing on the city of Boston with its ever-evolving culinary traditions that have been shaped by people from around the world. Assignments will include personal essays and profiles of cooks and the places and foods connected to them. Several field trips to a local farmer's market, artisan bakery, and cheese cellar will be offered. We will sample a variety of locally produced foods and evoke the sensory experience of eating through writing. Previous workshop experience is helpful.

ENGL443401
Advanced Creative Non-Fiction: Writing Mental Health ROBERTS, SUSAN A
Fall 2020
"Much madness is divinest sense--/to a discerning eye--" so begins one of Emily Dickinson's most famous poems. How do writers treat mental health and illness as a subject? What are the issues and questions that arise when contemplating such a large and complex area? In this workshop students will write their own essays in a variety of non-fiction styles (reportage, opinion, profile, narrative, memoir) to address issues of mental health such as mental illness, addiction, neurology and neuropsychology, behavior, and medical history. We'll read short works from a wide selection of writers across disciplines that may include: TaNehisi Coates, Oliver Sacks, Elizabeth Wurtzel, William Styron, Mary Karr, Sigmund Freud, Carl Jung, Alice Miller, Leslie Jamison, and poems of Theodore Roethke, Sylvia Plath, and Ted Hughes, documentary, and photographic work of artists like Dior Vargas. The first half of each class will be dedicated to discussing the readings and writing exercises and prompts; the second will be a workshop discussion of student essays-in-progress. You will be required to complete two shorter essays (7-10 pages) and one long essay (15-20) with a heavy emphasis on revision and research throughout. Experimentation is both encouraged and expected.

ENGL449901
How to Begin Thinking: Aftermaths of Twentieth-Century Literature, Philosophy, History NEWMARK, KEVIN
Fall 2020
"Thinking," the French philosopher Emmanuel Levinas once suggested, "probably begins through traumatisms." This course will study a series of disruptive and transformative events that have indelibly marked the twentieth century. What is the task of thinking for a European tradition displaced internally by the Holocaust and externally by the end of colonial expansions into other continents? Authors will include Levinas, Derrida, Nancy, Saussure, Barthes, Duras (in English translation from French); Borges and Dorfman (in English and English translation from Spanish); Calvino (in English translation from Italian); and Descartes (in English translation from Latin). A German component (in English translation) will consider Husserl and Heidegger as a counterpoint to the European tradition of Romance languages, literatures, and cultures.

ENGL452401
Irish Victorian Fiction MURPHY, JAMES H
Fall 2020
Now a subject of great scholarly interest, Irish Victorian fiction was long neglected because the following writers of the Irish Literary Revival, such as Yeats, sought to bolster their own importance. Twentieth-century, postcolonial critics wanted to see nineteenth-century Ireland as a fractured a society incapable of fiction. In this class students will read novels that raise issues relevant to Irish Victorian fiction: the possession of land and relations between landlords and tenants; the dynamics of rural society; Gothic and allegory in writing; realism in fiction; social satire and urban fiction; women novelists and the New-Woman Novel.

ENGL457701
Writing Workshop: Poetry MATSON, SUZANNE M
Fall 2020
The course will provide an introduction to poetry writing as a discipline and craft by encouraging students to practice writing in a variety of modes. Students' own poems, from both open and directed writing assignments, will become the main text for this workshop, in addition to some models provided by the instructor for discussion of prosody and technique. The workshop critiques will focus on strategies for revising early drafts, and a chapbook of finished poems will be due from each student at the end of the semester. No application process.

ENGL457901
Writing Workshop: Fiction NI DHUIBHNE, EILIS
Fall 2020
This course provides encouragement, practice, and criticism for students seriously interested in writing short fiction. The workshop format demands self-motivation and universal participation. Since students' stories are texts for class discussion, a generous willingness to respond to others' writing and to expose one's own work to such reactions is an essential prerequisite.
Individual conferences with the instructor supplement the workshop discussions. Students are expected to produce a steady stream of new and revised fiction throughout the semester.
Narrative preferences from the traditional to the experimental are welcome.

ENGL463701
Capstone: Vision Quest: A Multicultural Approach MILLER, DOROTHY
Fall 2020
This course will use the Vision Quest, a Native American ritual for finding oneself, as a metaphor for students' four years at Boston College. Relating their own lives to the lives of the characters in the books, who have all gone on some variation of a quest, students will explore the ways their education and experiences at college have influenced their ideas of community, work, spirituality, and relationships, and have prepared them to face the great mystery of life ahead.
The main texts include *The Grass Dancer, The Life of Pi,* Song of Solomon, *The Bonesetter's*
Daughter, and *The House on Mango Street.* Films include *Thunderheart, The Hunting Ground,* and *The Whale Rider.* Personal reflection papers and class participation are a main component of this course.

ENGL501201
Seminar: Talking Things in the Eighteenth Century WALLACE, ELIZABETH
Fall 2020
Because the eighteenth century saw the birth of shopping, it is an especially rich time in which to explore how people understood and reckoned with the many things that flooded their lives-- and how they defined their own humanness in the process. How did their things help them to understand themselves as people? Under chattel slavery, how did some people become things? Are animals things? Readings include classic texts like Gulliver's Travels and The Rape of the Lock, and minor genres like the It Narrative, the fable, and the riddle. This seminar also offers expertise in New Materialist theories.

ENGL501801
Seminar: Graphic Texts as Literature PUENTE, LORENZO A
Fall 2020
This course is a seminar in the graphic novel. It will give students the critical skills to read, understand--and enjoy--the graphic narrative: the dynamic interrelationship between images and text to convey meaning. This class will study graphic literature's connections to modernist and postmodernist art and literature, as well as bring in comics-specific criticism and theory. Ultimately, the course will interrogate the term "graphic novel" and its cultural significance. The course is particularly interested in exploring the ways this genre narrates the central themes of the American experience: politics, sexuality, class, violence, cultural and ethnic diversity. Primary texts include works by artists such as Lynda Barry, Art Spiegelman, Alison Bechdel, Gene Luen Yang, and Thi Bui, among others.

ENGL551001
Contemporary American Women Writers TANNER, LAURA E
Fall 2020
Focusing on literature written by American women from 1980 to the present, this course will explore issues of space, family dynamics, immigration, power, race, violence, grief, and embodiment, as well as gender. We will ask questions such as: How do these writers define space, and use literature to claim a space of their own? What is the relationship between gender and race or ethnicity, in a given text and in contemporary American culture? How do women writers represent the intangible dynamics of emotional connection and loss? How does fiction represent changing experiences of embodiment, including pregnancy, obesity, illness, and aging?

ENGL551301
American Studies Senior Seminar: Transnational American Studies KLEIN, CHRISTINA
Fall 2020
What happens when "foreign" people, texts, and ideas enter the United States? What happens when "American" people, texts, and ideas are consumed by others around the world? What happens when distinctions between "American" and "foreign" break down? This course explores diverse topics in American history and culture from a transnational perspective. Topics covered include: immigration, imperialism, wars, borders, cosmopolitanism, and cultural hybridity.
Culminates in a substantial research project.

ENGL600401
Environmental Humanities SONG, MIN
Fall 2020
Entanglements. Assemblages. Precarity. As discussions about the environment run into the fact that the boundaries between humans and nature are hopelessly muddled, scholars and writers are in the process of developing a field of study that's been called "environmental humanities." Those working in this emerging field are coming up with original ways of thinking about our relationship to the world around us. This course seeks to make sense of the concepts they are developing and apply them to the interpretation of literary texts and to our understanding of everyday experiences. The readings for this course are a mix of scholarly writings, journalism, and novels.

ENGL601701
Chaucer and Gower WEISKOTT, ERIC B
Fall 2020
In fourteenth-century London, Geoffrey Chaucer and John Gower were "frenemies." Chaucer was the upwardly mobile bureaucrat, ready to poke fun at everyone; Gower was the well-heeled and straitlaced lawyer. Their bodies of poetry, spanning four decades and three languages, influence and respond to one another. We will read the two poets side by side, with attention to topics of mutual relevance such as multilingualism, politics, literary form, source study, and social status. This seminar has minimal overlap with the syllabus of ENGL3393: Chaucer. No prior knowledge of Middle English required. Gower's French and Latin texts read in translation.
Credits: 03
Room and Schedule: STOKES HALL 131N,T 2-4 25; **Satisfies Core Requirement:** None **Prerequisites:** None

ENGL602501
Atlanta and the Black Atlantic CURSEEN, ALLISON S
Fall 2020
Though conceived before the COVID-19 crisis, this course proceeds with a belief that in this pandemic, Black America, to quote W.E.B. DuBois, "has a message for the world." Focusing on DuBois' beloved Atlanta and black communities along the Atlantic coast, we will listen for the potentially instructive message black cultural texts offer. We will study both what these texts reveal about the history and politics undergirding the particularly racialized effects of the COVID crisis and what they might teach us about living amid fears of there being no "return back to normal." For to enter black study is to enter an ongoing study about possibilities: the possibility of living in the wake of the impossible-to-imagine rupture of every structure of normalcy; the possibility of living, suddenly without space or time, as other--as less but also more--than oneself; the possibility of living still and living, nonetheless, abundantly.

ENGL602701
Seminar: Historical Fiction MCALEAVEY, MAIA M
Fall 2020
What is at stake in reimagining history through fiction? In this course, we consider the development of historical fiction from the eighteenth century to the present. We will investigate important settings for historical novels, likely including: the Middle Ages as seen through Arthurian legend, the Jacobite uprisings in the Scottish Highlands, the French Revolution, and American slavery. Topics will include: the claims of realism and the powers of fantasy, the relationship of space to time, the rise of nationalism, and the power of fiction itself to shape history. Theories of genre, historicism, and historiography will guide our conversation.

ENGL602901
The Modern Novel OHI, KEVIN J
Fall 2020
What is distinctive about the novel genre in and after modernism? Beginning with Henry James, we will read a series of major novels, written in English between about 1900 and about 1960, seeking to describe what is significant about narrative voice, point of view, style, narrative structure, characterization, plot, and other aspects of their language. The novels' formal and linguistic innovations will lead us to consider their representations of politics (including race and gender), desire, psychology, and epistemology. Writers will include some of the following: James, Woolf, Joyce, Beckett,

Ford, O'Brien, Conrad, Faulkner, Barnes, Hurston, Nabokov, Baldwin, Ellison, and Gaddis.

Holocaust Literature: History, Memory, Legacy SHRAYER, MAXIM
Fall 2020
A brief overview of the history and legacy of the Shoah (Holocaust) followed by an examination of the variety of literary responses by witnesses and survivors, as well as by writers removed from the wartime horrors by distance, time, country, and language. Questions of ideology, metaphysics, ethics, aesthetics, memory, and cultural theory as formulated and debated in poetry, fiction, nonfiction, journalism, and discursive writings. The readings include works originally written in Russian, Yiddish, Polish, German, Italian, French, and English by Ilya Selvinsky, Vasily Grossman, Avrom Sutzkever, Tadeusz Borowski, Paul Celan, Primo Levi, Theodor Adorno, Elie Wiesel, Vladimir Nabokov, Hannah Arendt, Arthur Miller, W.G. Sebald and others. All the readings will be in English translation.

ENGL702301
Tragedy on the Early Modern Stage SOFER, ANDREW
Fall 2020
Combining lofty rhetoric, gender and sexual politics, philosophical inquiry, broad comedy, and spectacular violence, tragedy was the most vivid and popular theatrical genre in Shakespeare's England. It was also central to early modern poetics. Developing our own poetics of tragedy with the help of theorists from Aristotle to Eagleton, we will read representative tragedies by Kyd, Marlowe, Shakespeare, Middleton, Webster, and others, plus at least one comedy (Tom Stoppard's Rosencrantz and Guildenstern are Dead). We will also consider contemporary film adaptations by Julie Taymor and Alex Cox. The course contains graphic material.

English Language Training for Graduate Level Students: Focus on Speech and Presentation Skills
ANDERSON, LYNNE C
Fall 2020
Designed for graduate students whose first language is not English, this course will emphasize the speech and presentation skills required for success in graduate work. Students will hone their speaking and listening skills through group discussions, presentations, and targeted practice in pronunciation, stress, and intonation through the reading of poetry, tongue twisters, and shadow talking exercises. In addition, we will explore effective teaching practices for those who will take on responsibilities as instructors at BC. Students who enroll in the course are expected to attend all classes and complete short writing assignments weekly.

ENGL773201
Contemporary Irish Fiction
SMITH, JAMES M
Fall 2020
Mary Robinson, in her inaugural speech in 1990, hoped that her presidency of Ireland would "promote the telling of stories, stories of celebration through the arts and stories of conscience and of social justice." Concentrating on contemporary fiction, this course examines the confluence of "stories" representing Irish society since the late-1980s. We will consider the (re)- emergence in the 1990s of the novel as Ireland's dominant cultural form and question what that means in terms of cultural aesthetics. We will examine how the texts represent significant cultural shifts and attempt answers to ongoing cultural questions including: the relationship between tradition and innovation; national identity in an era of globalization; the uses of memory, history, and the past; representations of trauma and survival; economic boom, bust and austerity; the "family cell" and eroding shame; girlhood/toxic masculinity; and gender, sexuality, ethnicity and race in the "new Ireland." Authors include Roddy Doyle, Seamus Deane, Eilis Ni Dhuibhne (Burns Visiting Scholar, F'20), Colum McCann, Colm Toibin, Anne Enright, Emma Donoghue, Sebastian Barry, Kevin Barry, Eimear McBride, Donal Ryan, Sara Baume, Lisa McInerney, Mike McCormack, Anna Burns, Sally Rooney, and Claire Kilroy.

ENGL774901
Poetics RICHARDSON, ALAN
This course traces the development of poetics from the mid-twentieth century to recent attempts at revival. We'll read Aristotle's *Poetics* as a "pre-text," followed by key essays in Russian and Prague school poetics, responses by the Bakhtin group, and examples of the transition from Slavic to French structuralist poetics. We then review the poststructuralist critique of structuralist poetics before considering the return of poetics in cognitive poetics and the New Formalism. Although the readings could be described as "theory," most of them are concerned with questions of literary methodology, often illustrating their claims in relation to specific poetic texts.

ENGL775201
Live Contemporary Theorists RESTUCCIA, FRANCES
Fall 2020
An interdisciplinary field, Contemporary Theory enhances sophistication in interpreting just about anything: literature, films, all art, in fact, but also your self, relationships, the political world, the international world. Theory enables one to have a sense of what to look for in analyzing a text, rather than stumbling across whatever might strike your fancy. It is important to be conscious of what assumptions one is making about what is valuable when analyzing a text. Are you a feminist, psychoanalytic, deconstructionist, cultural, queer, post-colonial critic? Theory is pleasurably informative in drawing in the arts, history, theology, political thought, etc. You might be reading Kristeva, and suddenly you are engaging a painting of Saint John the Baptist's head on a platter; or you might be studying Agamben and finding yourself confronted with issues of biopolitics or the relation of people to their animality. Theory leads to what is fascinating as you learn to read awry. (It can even serve as an anti-depressant.) An excellent stepping stone to graduate study or further graduate study, this course exposes students to major figures of a second wave of contemporary theory--theorists who are alive today. It will provide an introduction and a substantial experience. We will focus on Badiou, Nancy, Ranciere, Agamben, Kristeva, Zizek, and possibly Sloterdijk, Butler, Copjec, Moten, Spillers, Bhabha, Zupancic. Formerly titled: Contemporary Literary and Cultural Theory.

ENGL888701
Introduction to Advanced Research NAJARIAN, JAMES
This course will acquaint you with the resources to carry out the central tasks of literary scholarship. Bibliography (studying the production, dissemination, collection, location, and identification of literary artifacts and versions) forms the dynamic basis for scholarship and criticism of all kinds, just as critical sensibility guides our choice of what to look for. You will be guided through the reference works and databases in the Boston College library and elsewhere, discuss the goals, purposes, and future of the field of literary studies, explore the phenomenon of digital humanities, and produce an original project based on archival sources.

ENGL900701
Ph.D. Seminar: Global Crossroads MITSEIN, REBEKAH K
Fall 2020
In this class, we will examine how British writers engaged questions of globalism and transnationalism during an era when the cultural understanding of both Britain and the world were changing. The reading list includes works by Aphra Behn, Daniel Defoe, Samuel Johnson, Lady Mary Wortley Montagu, Dean Mohamet, and Ignatius Sancho. The secondary material for this class comes from a variety of critical perspectives, including postcolonial and global theory, ecocriticism, geocriticism, and posthumanism/new materialism. We will discuss the different theoretical and political stakes these approaches bring to how we conceptualize the global as literary scholars and cultural critics.

ENGL107903
Literature Core for English Language Learners PUENTE, LORENZO A
Spring 2021
Designed as a seminar for English Language Learners, students explore the principal motives which prompt people to read literature: to assemble and assess the shape and values of one's own culture, to discover alternative ways of looking at the world, to gain insight into issues of permanent human importance as well as contemporary urgency, and to enjoy the linguistic and formal satisfactions of literary art. Literature Core strives to develop the student's capacity to read and write with clarity and engagement and to provide an introduction to literary genres.
Linguistic support for students from diverse language backgrounds is provided throughout the semester. Department Permission Required--from the English Department.
Credits: 03
Room and Schedule: M W F 9;ONLINE;SYNCHRONOUS; **Satisfies Core Requirement:** Literature **Prerequisites:** None

Spring 2021
Designed as a seminar for English Language Learners, students explore the principal motives which prompt people to read literature: to assemble and assess the shape and values of one's own culture, to discover alternative ways of looking at the world, to gain insight into issues of permanent human importance as well as contemporary urgency, and to enjoy the linguistic and formal satisfactions of literary art. Literature Core strives to develop the student's capacity to read and write with clarity and engagement and to provide an introduction to literary genres.
Linguistic support for students from diverse language backgrounds is provided throughout the semester. Department Permission Required--from the English Department.
Credits: 03
Room and Schedule: M W F 8;ONLINE;SYNCHRONOUS; **Satisfies Core Requirement:** Literature **Prerequisites:** None

ENGL109401
An Introduction to Modern Irish II NUGENT, JOSEPH G
Spring 2021
Following on from ENGL1093, this course offers a continuing introduction to the Irish language for American students. We will continue along our examination of Irish culture and literature through the Irish language. You can look forward to reading contemporary texts, poetry, and drama, and to enlarging your understanding of the cultural heritage out of which the language emerged. Completion of this and Continuing Modern Irish I and II will fulfill the Morrissey College of Arts and Sciences language proficiency requirement.

ENGL111001
First Year Writing Seminar: From Slavery to Mass Incarceration DEROSA, MARLA C
Spring 2021
This section of the First-Year Writing Seminar is centered around a book called Just Mercy by Bryan Stevenson. The book focuses on Stevenson's work with the criminal justice system and the organization he founded called the Equal Justice Initiative. The book raises questions about power, race, equality, justice, and the common good within the U.S. legal system for which there are no easy answers. Students will identify one of these issues/questions from the book and delve more deeply into that question. Students will start with an oral history/interview of a person who can shed light on their question from a personal or professional perspective. They will then review the academic research literature on the question and research what the media says about the issue. Finally, students will write and present (to a non-academic audience) an informed argument of their own about how to address issues of power and inequality.
Credits: 03
Room and Schedule: T TH 1 30*;ONLINE;SYNCHRONOUS; **Satisfies Core Requirement:** Cultural Diversity, Writing **Prerequisites:** None

ENGL118001
Lit Core: Narratives of Slavery, Incarceration, and Freedom DEROSA, MARLA C
Spring 2021
This section of Literature Core will focus on narratives that speak to questions of slavery, incarceration, and freedom--both literal and metaphorical. The current pandemic along with the mass demonstrations against systemic racial injustices will provide a particular backdrop and context from which to consider these questions and issues. The course will start with historical and political writings about slavery from the 1800s and the social contexts in which these writings were produced and consumed. We will them move on to historical and contemporary fiction and film that informs and challenges our historical understanding of slavery and the relationship between slavery and our current system of incarceration. Course texts may include Homegoing (Yaa Gaysi), The Narrative of the Life of Frederick Douglass, David Walker's Appeal, Beloved (Toni Morrison), Kindred (Octavia Butler), The Nickel Boys (Colson Whitehead), and Just Mercy (Bryan Stevenson).

ENGL118201
Literature Core: Just Literature: Reading for Good ROBERTS, SUSAN A
Spring 2021
We know that literature can transport us. But so too can literature transform us. Dislocate us. And provide challenges and shifts in thinking. In this course, which meets the goals of the Literature Core at Boston College, as well as the core requirement in Difference, Justice and the Common Good, students will encounter injustice within literary works. In reading treatments of injustice across time and literary genres, students will encounter powerful depictions of structural inequalities and ultimately will imagine and name alternate pathways toward a more just world. Literature in this course will bring readers close to the pain of injustice and inequality; research, writing and discussions of context will prompt greater understanding as well as a vision of transformative compassion and greater equality. We will read short stories, essays, speeches and poems, and authors including Allison Bechdel, Octavia Butler, Art Spiegelman, Bryan Stevenson. Reading selections will influence the style and content of the student work. Student experience and student questions regarding justice, injustice and ethics will provide a skeleton for the coursework.
Credits: 03

ENGL212501
Introduction to Feminisms MURPHY, ANNALYSSA G
Spring 2021
This introductory course offers both an overview and a foundation for understanding the various movements that make up what has come to be called the feminist movement in the U.S. Because systems of privilege and disadvantage shape women's and men's identities and social positions in multiple and unique ways, Introduction to Feminisms analyzes gender from an interdisciplinary approach and applies numerous academic disciplinary methods to the study of gender, including history, literature, psychology, and sociology, and explores women's and men's experiences within various cultural contexts, including socioeconomic class, race and ethnicity, religion and spirituality, nations of citizenship, origin, and generation.

ENGL213302
Studies in Narrative SONG, MIN
Spring 2021
This course introduces students to questions that they might bring to the study of narrative works--primarily novels, tales, and non-fictional narratives, though it may also include drama, film, and narrative poems. It aims to introduce the various critical frames through which we construct interpretations. As part of the process of reading, students will be introduced to common critical terms; narrative genres, conventions, and discourses; the construction of the character and the ways of representing consciousness; and the ordering of narrative time. The course will also expose the student to the implications of taking critical positions.

ENGL214201
American Literary History II PUENTE, LORENZO A
Spring 2021

The decades following the Civil War were a time of fundamental change in U.S. society: the demise of the slave system and the rise of segregation; the emergence of industrialism, corporate culture, imperial adventurism, and successive waves of immigration; new roles for women; new patterns in cities and in regional byways; and new ideas imagined for reordering and reinventing democratic society all transformed the contours of daily life. This course examines how a diverse range of U.S. writers sought to capture and address these developments with new literary forms and practices, including the realist and naturalist novels to utopian literature and various forms of social commentary. Stretching, roughly, from 1865 to 1914, course readings will likely include works by Herman Melville, Mark Twain, W. E. B. Du Bois, Booker T. Washington, Rebecca Harding Davis, William Dean Howells, Charlotte Perkins Gilman, and Henry James.

ENGL215401
Introduction to Adolescent Fiction RUDNER, BONNIE
Spring 2021
First of all, what is a young adult? And second of all, what is a hero? We will be delving into both of these issues, as well as the relationship between them. We will be looking at heroes who function in real worlds and some who function in fantasy worlds. We will attempt to assess the impact of heroes in contemporary life, especially in relation to the young adults who need them. And are there any more heroes for our young adults? In what ways do female heroes differ from male heroes?

ENGL217101
Introduction to British Literature and Culture II WALLACE, ELIZABETH
Spring 2021
This lecture course explores great British writers from 1700 to the present. This period includes (among much else) the great essayists and satirists of the eighteenth century, the Romantic poets and Victorian novelists of the nineteenth, the modernists of the twentieth, and the world writing that follows the break-up of the British empire. We consider these works in light of the cultural context in which they were written.

ENGL220201
Beast Literature POLT, CHRISTOPHER B
Spring 2021
From Mother Goose's fairy tales to lolcats, we imagine animals often speaking as we do. But what are we saying when we use animals to talk with and about one another? And what does literature featuring articulate animals say about our attitudes towards humans, animals, and the lines we draw between them? This course explores "beast literature" in its various forms (fable, comedy, the novel, epic, debate poetry, etc.), examining its incarnations through ancient Greece and Rome, Medieval Europe, and the modern world.

ENGL221202
Introduction to Medical Humanities BOESKY, AMY
Spring 2021
This course will use contemporary literature as a springboard to consider the psychological, social, ethical, and experiential dimensions of sickness and health. In addition to exploring questions of illness and the body, we will address topics including disability, aging, pregnancy, pain, medical space, illness and culture, and care giving. Through the analysis of novels, poems, short stories and non-fiction, we will consider the way that bodily experiences, material conditions, and cultural constructions of normalcy shape our understanding of identity in sickness and in health.

ENGL222501
War Stories WILT, JUDITH
Spring 2021
War has been a subject of stories across the centuries. This one-credit seminar will focus on nineteenth- through twenty-first-century accounts of war in novels, stories, nonfiction, poems, and films. We will analyze how texts create war stories that are celebratory or cynical, and sometimes both at once, with a focus on issues such as heroism, psychology and trauma, violence, sacrifice, and national belonging. Students will write five short reflection papers (approximately 2 pages each) and a take home final exam with an essay format.

ENGL227701
Introduction to American Studies HARRISON-KAHAN, LORI
Spring 2021
This course offers an introduction to the interdisciplinary study of American culture. It is not a survey of American cultural history; rather, we will concentrate on approaches, methods, and themes of interest as we assemble critical skills for making interpretive arguments about aspects of culture in their historical moment. The forms we analyze will include examples from literature, film, painting, music, theater, landscape, and architecture, among others. Members of the American Studies faculty will present guest lectures to highlight various aspects of the field.

ENGL301801
Graphic Texts as Literature PUENTE, LORENZO A
Spring 2021
This course is an introduction to the graphic novel. It will give students the critical skills to read, understand--and enjoy--the graphic narrative: the dynamic interrelationship between images and text to convey meaning. This class will study graphic literature's connections to modernist and postmodernist art and literature, as well as bring in comics-specific criticism and theory.
Ultimately, the course will interrogate the term "graphic novel" and its cultural significance. The course is particularly interested in exploring the ways this genre narrates the central themes of the American experience: politics, sexuality, class, violence, cultural and ethnic diversity. Primary texts include works by artists such as Lynda Barry, Art Spiegelman, Alison Bechdel, Gene Luen Yang, and Thi Bui, among others.

ENGL330401
King Arthur in German Literature RESLER, MICHAEL
Spring 2021
A study centering on the most popular and enduring of all medieval legendary figures. We will examine the early texts from which the Arthurian mythology took root and contributed to the eventual spread into Germany of the tales of King Arthur and the Knights of the Round Table. We will then focus on a close reading of four or five of the most significant Arthurian romances within the German tradition. In addition, we will systematically trace the relationship between this highly idealized world of literary knighthood and real-life contemporary historical and social events of the twelfth and thirteenth centuries.
Credits: 03
Room and Schedule: M W F 12;ONLINE;SYNCHRONOUS;
Satisfies Core Requirement: Literature

ENGL332801
Blackness and the Senses: Nonsense, Common Sense, and the Sensible in the Black Tradition
CURSEEN, ALLISON S
Spring 2021
Epitomized in the common interrogative, "you feel?", the Black cultural tradition calls for embodied and relational ways of knowing. From Harriet Jacobs's sonic epistemologies in the garret and Du Bois's conception of double-conscious looking to Curtis Mayfield and Kendrick Lamar's meditations on darkness as the condition for beauty, growth, and "poetic justice," this course examines how black cultural production both enacts and calls for embodied and ecologically aware modes of perceiving--modes of perception that trouble, by troublingly perceiving underneath and beyond, the narrow parameters of looking, reading, and knowing that authorize U.S. constructions of freedom, progress, and personhood.

ENGL336401
Nineteenth-Century British Fiction MCALEAVEY, MAIA M
Spring 2021

This course examines five major works in the development of the British novel: Jane Austen's *Pride and Prejudice* (1813), Elizabeth Gaskell's *North and South* (1855), Charles Dickens's *Bleak House* (1852), George Eliot's *Middlemarch* (1872), and Thomas Hardy's *The Return of the Native* (1874). These classic (but long) novels will be considered in their cultural and historical contexts, with particular focus on gender roles, poverty, social justice, and the rise of the city. We will consider the aesthetic development of realism and experimental modes of narration, linking these artistic concepts, as our authors did, to questions of morality and community.
Credits: 03
Room and Schedule: None **Satisfies Core Requirement:** None **Prerequisites:** None **Corequisites:** None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS **Comments:** Fulfills pre-1900 requirement **Status:** CANCELLED

ENGL338001
True Stories: Nineteenth-Century American Novels and the News POTTROFF, CHRISTY L
Spring 2021
This course considers three landmark nineteenth-century American novels--The Coquette (1797), Moby-Dick (1851), and Clotel (1853)--and their relationship to the true stories that drive their plots. Each novel was inspired by a ripped-from-the-headlines event: The Coquette is based on the scandalous life and death of Elizabeth Whitman; Moby-Dick was inspired by the sinking of the whaleship Essex, the most notorious maritime disaster of the nineteenth century; and Clotel articulates the relationship between Thomas Jefferson and Sally Hemmings, a woman he enslaved. Before reading the novels, we will first explore primary documents--court transcripts, police reports, diaries, and letters--surrounding the historical events. Then, we will read a wide range of contemporary multimedia responses to the events, including newspaper articles, pamphlets, songs, poetry, and short fiction. With a thorough understanding of the event's historical context, we will then read the novel. By situating these novels and historical events within their media landscapes, we will explore the central question of literary studies: what can novels do that other written forms cannot?

Women in Hollywood
KLEIN, CHRISTINA; NORWOOD, KELSEY E
Spring 2021
This course explores the history of women in Hollywood by studying both the cinematic representation of women and the role of women as actors, writers, and directors. Topics to be covered include, among others: female directors from the silent era to the present; women in the films of Alfred Hitchcock; the women's picture as a genre; feminist film theory and practice; the intersections of gender and race; and queerness. In addition to the regular course meeting times, the course also meets Wednesdays from 7-9pm for film screenings.

ENGL370301
Performing Identity on Page and Stage MITSEIN, REBEKAH K
Spring 2021
Who do we think we are? Are we who we're born to be, or who we perform, or some combination of the two? How does literature help us work through these questions by enabling us to think beyond ourselves? In this course, we will situate a range of philosophies about identity and the self into literary and historical contexts. We will consider the intersections among race, ethnicity, gender and sexuality, and status or class presented in our texts. We will also critically examine modern cultural forms that people use to negotiate and understand their identities, including genealogy websites, ethnicity DNA tests, and personality tests like the Enneagram and the Meyers Briggs scale. The reading list includes work by Aphra Behn, Daniel Defoe, Olaudah Equiano, Mary Shelley, Jane Austen, George Bernard Shaw, and Jeanette Winterson.

ENGL380101
Close Encounters (of the Literary Kind) TANNER, LAURA E
Spring 2021
How does literature invite us into the intimate and sometimes messy emotional dynamics of human relationships? This class will explore the depiction of family dynamics, friendships and romantic bonds in American novels of the last century, including As I Lay Dying, White Noise and The History of Love. We will consider how intimate relationships are shaped by consumerism, disaster, grief, violence, poverty, race, aging, and romantic ideals. In-class presentations will focus on film and television portrayals of complex relationships. Final projects will analyze a literary or visual narrative and reimagine its portrayal of intimacy in a short literary or video scene. This class is open to majors and non-majors alike, especially those fascinated by the way that stories probe the depths of human character and shape our assumptions about how we relate to one another.

ENGL400301
Shakespeare and Performance SOFER, ANDREW
Spring 2021
Although Shakespeare became "Literature," people originally encountered Shakespeare's plays as popular entertainment rather than as literary texts. In this course, we will examine Shakespeare through the lens of performance, looking at how several of his key plays were produced in their own time and how they have been subsequently reimagined on stage and screen. As part of this re-examination, we will rehearse and perform scenes in small groups, as well as invent our own Shakespeare adaptations and attend a local production (if available). No previous performance experience or familiarity with Shakespeare is required, but enthusiasm is welcome.

ENGL400401
Boom, Bust, Austerity
SMITH, JAMES M
Spring 2021
Ireland, in recent decades, has experienced the highs and lows of globalization and monetary crisis. The Celtic Tiger economy was the "fastest growing ... in Europe" from 1995-2005. Three years later, the country entered recession, ultimately requiring an 85 billion Euro "bailout" from the EU and IMF. Before long, international news outlets lauded Ireland as "the poster-child for implementing austerity programs." Is this the typical trajectory for a postcolonial nation still carving out its economic position in the new Europe and beyond? This course focuses on recent Irish writers who engage these boom and bust years. It considers how literature represents a period of unprecedented economic, social and cultural transformation? It evaluates the creative and/or imaginative arts' contribution to helping a society survive economic austerity? It examines representations of unemployment, emigration, bankruptcy, depression, as well as resiliency, entrepreneurial spirit, and community rebuilding.

ENGL401201
The Novel in English OHI, KEVIN J
Spring 2021
A survey of major novels in English from 1719 to 2000 focusing on detailed textual readings: of narrative modes, voice, and focalization; style; the creation of characters and manipulation of sympathy; the structuring of plot. Developing our receptivity, in different registers and in different scales of attention, to the many, sometimes contradictory, effects of these texts, we will also ask questions about the genre over time: about its coherence as a tradition; how it represents (or doesn't) interiority, desire, and embodied experience; how it understands (and perhaps shapes) domesticity, the public sphere, and various forms of affiliation and self- definition.
Room and Schedule: T TH 4 30*;ONLINE;SYNCHRONOUS;

ENGL410101
The Gothic Novel RICHARDSON, ALAN
Spring 2021
The late eighteenth and early nineteenth centuries saw remarkable developments in the novel form, beginning with the explosive emergence of the Gothic, which helped inspire or transform the historical novel, women's domestic fiction, the psychological novel, and the political novel. Best known for the Gothic and its influence on Jane Austen and Walter Scott, the period also produced many strange and brilliant works in the shadow of Gothic. Concentrating on works by Walpole, Lewis, Godwin, Wollstonecraft, Hogg, Edgeworth, Scott, Austen, Shelley, and Emily Bronte, we will consider the novel from historical, ideological, feminist, psychological, and formal and stylistic perspectives.

ENGL420101
Science Writing SUTTON, SARAH C
Spring 2021
From driverless cars to gene therapy to cryptocurrency, the latest scientific and technological breakthroughs promise to transform life as we know it. When science moves from the laboratory, to corporate boardrooms, to news headlines, and into our daily lives, writing is involved in every step along the way. In this course, we will read works created by and about scientists, and explore how science circulates through society via social media and blog posts, traditional media, and government policy making. We'll also examine how companies communicate with the public via press releases, the media, and advertisements. In written and oral assignments, students will practice the skills essential for success in writing about science-- researching and reporting, interviewing scientists, pitching new ideas, understanding audience expectations, and clearly communicating essential knowledge. Students will have multiple opportunities to conceive, draft, revise, and complete writing projects tailored to diverse audiences. This course aims to help students understand and explore science writing as a career--including opportunities in media, research labs, university news offices, museums, science and technology focused companies, and many other venues.

ENGL440801
The New Woman in British and Irish Victorian Fiction MURPHY, JAMES H
Spring 2021
The late nineteenth century saw the flowering of the "New Woman" movement in fiction. It coincided to a degree with First-Wave feminism and the struggle for women's suffrage. It had literary debts to contemporary writers such as the Norwegian playwright Henrik Ibsen but also to women writers over the previous century from Maria Edgeworth to George Eliot. This course explores those roots while also attending to the work of some of the seminal New-Woman novelists themselves who came from Irish as well as British backgrounds. They include Olive Schreiner, Sarah Grand, Iota, Mona Caird, and George Egerton.

ENGL441202
Writing Workshop: Creative Nonfiction NADLER, STUART
Spring 2021
Over the past few decades, the best nonfiction being written has expanded to include not only such traditional forms as argument and exposition but also the mixed modes of creative nonfiction. As an intermediate-level course, we will build on the work of the First Year Writing Seminar and hone the skills needed in advanced writing electives. Students in this course choose their own topics and explore the range of possibilities now available to the nonfiction writer.

ENGL443501
The World Novel in English SESHADRI, KALPANA R
Spring 2021
This course opens a wealth of contemporary literature from the non-Western world mainly Africa, the Middle East, and South Asia that have expanded readers' imaginations and enriched the English language in a variety of genres. We shall read fiction and non-fiction alongside cultural theory to deepen our understanding of the political, economic, and environmental issues that arise in these lands and the ways in which they impact the daily lives of people as delineated by some of the world's most acclaimed authors. Readings may include works by Adhaf Souief (Egypt), Hisham Matar (Libya), Leila Aboulela (Sudan), Xiaolu Guo (China), Amitav Ghosh (India), Romesh Gunesekera (Sri Lanka), Mohsin Hamid (Pakistan), Samrat Upadhyay (Nepal), and others.

ENGL447801
Poe and the Gothic LEWIS, PAUL
Spring 2021
Working with Poe as a central figure, this course examines the development of English and American Gothic fiction from *The Castle of Otranto* to "The Yellow Wallpaper" and beyond. In addition to Poe, we will read work by some of the following writers: Horace Walpole, Matthew Lewis, Jane Austen, C. B. Brown, Washington Irving, Nathaniel Hawthorne, Charlotte Gilman, H.P. Lovecraft, and Stephen King.

ENGL453601
Joyce's Ulysses NUGENT, JOSEPH G
Spring 2021
One single semester. One demanding class. One hugely important book. This course will lead you on an extended exploration of Joyce's *Ulysses*. Joyce is intermittently baffling; he's always fascinating; he's frequently hilarious. He's never less than challenging. No prior knowledge of Joyce's works is required, just a willingness to tackle the challenges offered by this wonderful, astonishing, intricate text. *The demand that I make of my reader*, he wrote, *is that he should devote his whole life to reading my works*. I think a semester will do. Mainly for the daring.

ENGL457701
Writing Workshop: Poetry ANDERSON, JOHN M
Spring 2021
The course will provide an introduction to poetry writing as a discipline and craft by encouraging students to practice writing in a variety of modes. Students' own poems, from both open and directed writing assignments, will become the main text for this workshop, in addition to some models provided by the instructor for discussion of prosody and technique. The workshop critiques will focus on strategies for revising early drafts, and a chapbook of finished poems will be due from each student at the end of the semester. No application process.

ENGL457902
Writing Workshop: Fiction BOUCHER, CHRISTOPHER
Spring 2021
This course provides encouragement, practice, and criticism for students seriously interested in writing short fiction. The workshop format demands self-motivation and universal participation. Since students' stories are texts for class discussion, a generous willingness to respond to others' writing and to expose one's own work to such reactions is an essential prerequisite.
Individual conferences with the instructor supplement the workshop discussions. Students are expected to produce a steady stream of new and revised fiction throughout the semester.
Narrative preferences from the traditional to the experimental are welcome.

ENGL458101
Uncanny Fiction BERNE, SUZANNE R
Spring 2021
How does an idea develop into a story? What makes a character come alive? Why is setting important? These are a few of the questions this course will explore by considering fiction that contains an uncanny or mysterious element. That uncanny element might be something seemingly supernatural; it might be a psychological state, a surreal event, or simply a weird detail that throws an "ordinary" day off-kilter. We will be focusing on character, framing, action, plot, and narrative perspective, among other aspects of fiction, by examining stories by professional writers and in workshop discussions of student writing.

ENGL491501
Advanced Fiction Writing Workshop MATSON, SUZANNE M
Spring 2021
This course provides encouragement, practice, and criticism for students who have demonstrated accomplishment in writing fiction. The workshop format demands self-motivation and universal participation. Since students' stories are texts for class discussion, a generous willingness to respond to other's writing and to expose one's own work to such reactions is an essential prerequisite. Individual conferences with the instructor supplement workshop discussions. Students are expected to produce a steady stream of new and revised fiction throughout the semester. Narrative preferences from the traditional to the experimental are welcome. Students should submit up to [redacted] double-spaced pages of writing (your submission may be part of [redacted] larger piece; if so, indicate this on the manuscript), along with a note explaining your interest in the course and a list of previous creative writing or journalism workshops, with instructors, school (if you are [redacted] graduate student), and grades. Ideally, the writing sample will be fiction, but if your strongest writing is in nonfiction, poetry, or drama, that is also acceptable, although prose is encouraged. Include your e-mail address and class year/program. Materials should be submitted via e-mail to Suzanne

Matson at suzanne.matson@bc.edu by no later than November 6 at 5 p.m. Students will be notified by e-mail prior to preregistration as to whether or not they have been admitted to the course.

ENGL491701
Advanced Poetry Workshop ADAIR, ALLISON C
Spring 2021
This is a workshop for those who already have some experience writing poetry, and who wish to work intensively on matters of craft and revision. Students will produce roughly two poems a week, responding to each other's drafts in workshop discussion. Though the bulk of class discussion will be about student writing, some class time will be devoted to a discussion of useful models and what they can teach us about strategy and craft. Short in-class exercises will be given weekly as prompts to begin the writing process. In ongoing consultation with the instructor about which poets might interest them most, students will devise their own reading list of contemporary poets and keep a response journal. In at least two half-hour conferences over the semester, each student will be given individual feedback on a packet of revisions. The final project will be a chapbook of at least twelve revised poems produced over the semester, culled from around 25 drafts produced in and out of class.

ENGL500101
Seminar: Reading Like a Victorian MCALEAVEY, MAIA M
Spring 2021
In this course, we will read "like Victorians" by reading Victorian novels and stories in their original formats: Charlotte Bronte's *Jane Eyre* (published in three volumes), Wilkie Collins's *The Woman in White* (published in thrilling weekly segments), Charles Dickens's *Our Mutual Friend* (published in monthly installments), and Conan Doyle's Sherlock Holmes stories (published in a magazine). We will analyze their accompanying illustrations, articles, and advertisements. Along the way, we will imagine the effects of reading by candlelight, in a pub, or aloud with children, and consider the impact publication format might have had on the form of these classic texts.

ENGL501001
Seminar: How Literature Became Something You Can Study in College HASKIN, DAYTON W
Spring 2021
The literature we study was not written for students. Shakespeare's plays were scripts for popular entertainment. When, how, and why did English literature become an academic subject? With what results? We'll read plays by Shakespeare and Marlowe, erotic and religious poetry by Donne, and the first two books of Milton's Paradise Lost. We'll examine unique archival materials that reveal how the first college students who had the opportunity actually studied this literature. Each person will undertake a research project, and together we'll tease out some implications for reading literature in the future.
Credits: 03
Room and Schedule: TH 2-4 25;ONLINE;SYNCHRONOUS;
Satisfies Core Requirement: None

Student Level: UNDERGRAD ELECT
Comments: Satisfies pre-1700 requirement for English. Also fulfills the Seminar requirement for English majors.
Status: OPEN

ENGL501101
Seminar: American Literature and Culture in the 1790s None
Spring 2021
The first decade (1790-1800) during which literature was written in the United States was a time of widespread debates about politics and social life. In the early publishing centers of Boston, New York, and Philadelphia, poems, stories, and essays reflected the dynamism of a culture in transition, as did the first American gothic and sentimental novels. In addition to reading work by Judith Sargent Murray, Hannah Webster Foster, Susanna Rowson, Royall Tyler, and Charles Brockden Brown, we will search for interestingly related but utterly forgotten contemporaneous texts in early U.S. magazines.

ENGL502401
Seminar: Renaissance Horror CROW, ANDREA
Spring 2021
The horror genre is going through a "renaissance" today; this course looks back to the renaissance era of the sixteenth- and seventeenth-century to examine the cultural contexts out of which many of our most enduring horror tropes emerged. We'll study records of witchcraft trials, catalogues of demons, and popular accounts of haunting crimes alongside plays and poetry centered on both supernatural and all-too-human evil, exploring what fears and desires these narratives consolidate and what social functions the circulation of tales of horror performs.
Credits: 03
Room and Schedule: T 11 30-1 55;ONLINE;SYNCHRONOUS;
Satisfies Core Requirement: None
Prerequisites: None **Corequisites:** None **Cross-listed with:** None **Frequency:** Periodically
Student Level: UNDERGRAD & GRAD
Comments: Fulfills the pre-1700 requirement for undergrads. Also fulfills the Seminar Requirement for English majors.

ENGL551701
Capstone: Love and Indoctrination: A Foundation for the Rest of Your Life KAPLAN-MAXFIELD, THOMAS
Spring 2021
In our world of political spin and fake news, the surveillance state and social media, the pressure to separate what's real and valuable from what's fake and mere propaganda (another way of saying "lies") is paramount, and critical for figuring out how to live, practically, spiritually, intellectually, and psychologically.
In George Orwell's *1984,* the affair of Winston Smith and Julia threatens the entire structure of Big Brother. Why? What is it about love that threatens large systems based on indoctrination? In this course we will explore and develop working definitions of both *love* and *indoctrination* in order to differentiate them.

ENGL557501
Advanced Creative Non-Fiction (CNF): Writing About Place GRAVER, ELIZABETH
Spring 2021
Through the reading and writing of creative nonfiction essays, we will explore, depict, and interrogate various places in the natural and built world. Students will write and revise three sustained essays over the course of the semester: the first about home or another place with strong personal associations; the second about how our experience of place, space, and borders has been impacted by our current moment in the pandemic, and the third--a reported piece of journalism--about a community, natural site, or subculture in the Boston area (or elsewhere if you are studying remotely this term). Readings may include work by E.B. White, Wendell Berry, David Sedaris, Bridgett M. Davis, Annie Dillard, Carlo Rotella, Joan Didion, Jamaica Kincaid, and Pico Iyer.
Credits: 03
Room and Schedule: T 2-4 25;ONLINE;SYNCHRONOUS;
Satisfies Core Requirement: None
Prerequisites: None **Corequisites:** None **Cross-listed with:** None **Frequency:** Periodically
Student Level: UNDERGRAD-MAJORS
Comments: Students should have taken a previous creative writing or journalism workshop or have commensurate experience writing on their own or for campus publications. Reach out to Professor Graver (graver@bc.edu) with questions.
Status: OPEN

ENGL602601
Scandalous Victorians
HUNT, AERON P
Spring 2021
This course examines the literature and culture of Victorian Britain through the lens of scandal, analyzing the representation of different types of scandal in a variety of literary genres as well as representative historical episodes. We will ask why some kinds of transgressions become scandalous and will explore what kinds of responses are evoked and foreclosed by the rhetoric of scandal. Particular attention will be paid to gender, sexuality, class and social mobility, and national and imperial identity, as well as to the dynamics of scandal and the processes of social change.
Credits: 03
Room and Schedule: W 4 30-6 50;ONLINE;SYNCHRONOUS;
Satisfies Core Requirement: None

Comments: Grad/undergraduate course. Fulfills Seminar requirement for undergrad English majors. Fulfills the pre-1900 requirement for English majors.
Status: CLOSED

ENGL602801
Medieval Women's Voices STANTON, ROBERT G
Spring 2021
In this course we will read selections from the large and wide-ranging body of medieval women's literature, including biography, autobiography, hagiography, romance, fable, love poetry, visionary literature, utopian literature, political theory, and personal letters. Much of the class will focus on mysticism, which not only accounts for a lot of female-authored texts, but often articulates relationships between female experience, female identity, and the divine. We will supplement the primary texts with feminist and gender theory, grapple with the problem of what constitutes "women's writing" and the possibility of female voices in male-authored texts.

ENGL702001
Experimental Writing ROTELLA, CARLO
Spring 2021
Research and the field knowledge doesn't always have to lead to writing the usual scholarly papers and articles. In this workshop-style graduate seminar, we try out alternative forms presented by journalism, the essay, and other traditions: magazine feature, op-ed, interview, explainer piece, reported essay, memoir, obituary, digital forms, and more. Our objective is to expand our writerly repertoires and audiences. We write and workshop every week, and analyze examples of the genres we study. We also have class visits from colleagues who offer their own perspective on the rich variety of forms available to the experimentally ambitious scholarly writer.

ENGL702201
Kafka, Beckett, Coetzee LEHMAN, ROBERT S
Spring 2021
This course will be dedicated to a reading of the works of three of the century's strangest writers: Franz Kafka (1883-1924), Samuel Beckett (1906-1989), and J.M. Coetzee (b.1940). Although our principal focus will be on their novels, we'll also consider their work in a variety of other genres--parables (Kafka), film and theater (Beckett), and philosophy (Coetzee). We'll take up the question of how these writers responded to a rapidly modernizing world--a world characterized by war, revolution, new technologies, and a globalizing economy--as well as how they came to understand literature's past, present, and future. Finally, we'll consider theoretical and philosophical responses to their work from Blanchot, Cavell, Deleuze, Diamond, Lear, Pippin, and others.

ENGL770101
English Language Training for Graduate Level Students: Focus on Writing ANDERSON, LYNNE C
Spring 2021
Designed for graduate students whose first language is not English, this course provides writing practice in a range of academic modes including reflection, summary, analysis, and critique.
Students will write and rewrite throughout the semester, discuss works in progress, and receive feedback during group conferences with the instructor. Several sessions will be devoted to email, reference letters, and proposal writing. Early in the semester, students will explore the composition process from brainstorming, drafting, revision, and editing. Grammar support for students from linguistically diverse backgrounds is provided throughout the semester. Students who enroll in the course are expected to attend all classes and complete short writing assignments weekly.

ENGL882501
Composition Theory and the Teaching of Writing MATHIEU, PAULA
Spring 2021
This course is designed to (1) prepare graduate students to teach introductory, college-level writing courses; (2) introduce students to central issues, problems, and theories in composition studies; and (3) encourage students to examine the interanimating relationship between critical theory, practical writing experience, and the teaching of Composition/Rhetoric. Though the emphasis is on central, nuts-and-bolts tasks in the teaching of writing (e.g., designing assignments; responding to student essays; selecting texts for discussion; etc.), this is not a prescriptive "how to" course; students are asked to consider pedagogical issues and choices in composition studies from a variety of personal and theoretical perspectives.

ENGL885501
British Literature and Postcolonial Theory SESHADRI, KALPANA R
Spring 2021
Historians such as Bernard Cohn have taught us that analyses of British Literature and Culture will be incomplete if we do not assume England and its colonies as a single unit of analysis.
However, the translation of this historical wisdom to literary analysis demands not only an understanding of colonial policy but also a re-invention of our reading practices. We shall review the premises of postcolonial studies and its various approaches to canonical British literature by asking how Britain and colonial activities from the eighteenth to the twentieth centuries affected representations of the domestic space.

Environmental Studies Courses: Summer 2020

ENVS332101
Building Sustainable Communities DELSESTO, MATTHEW J; CERMAK, MICHAEL
Summer 2020
This course will investigate contemporary urban environments through the eyes of urban farmers and community innovators who are building more equitable communities and sustainable relationships with the land. Fieldwork, class discussions, environmental media, and workshops with community partners will facilitate our engagement with sustainability narratives and practices. Course themes include the urban planning and racial politics, challenges and opportunities of deindustrialization, the environmental justice movement, youth education, organizational development, and community-based urban transformation.

Environmental Studies Courses: Fall 2020

ENVS107701
Environmental Migration: Climate Change BIJANI, YASMIN
Fall 2020
How will longstanding and deeply embedded conceptions of "us" versus "them" in terms of national identity need to change in light of climate-change-induced migration in the future? What are the environmental origins of refugee migrations? The paired courses will familiarize students with the ways that climate disruptions have affected migrations, as well as governmental and nongovernmental institutions' responses to this environmentally driven movement. Students will learn to recognize the environmental push and pull factors for migration, understand and analyze existing legal definitions of "refugees," and consider the need for new strategies to address climate-change-induced migration globally.

ENVS110001
Environmental Studies Introductory Seminar JORGENSON, ANDREW K
Fall 2020
Environmental studies connects the scientific, political, and cultural aspects of the world's environmental challenges. This twelve-week, one-credit seminar is an orientation and introduction to interdisciplinary scholarship for the cohort of new sophomore Environmental Studies majors each fall. The course will include reading and discussions of classic texts in environmental studies, planning of individual pathways through the major (including selection of thematic or disciplinary concentrations), and several writing assignments. Collaborative and cross-disciplinary work is emphasized throughout. The course ends at Thanksgiving.

ENVS250101
The State of Affordable Housing in the States LEBLANC, DANIEL R
Fall 2020
How does housing affect the lives of Americans? Where you live determines your access to schools, quality of healthcare, fresh food, clean air, parks and recreation, affordable credit, and even how long you are likely to live. This course explores concepts of housing policy and planning at the national, state, and local levels. It examines programs and policies used to subsidize housing for millions of Americans and help them gain access to a decent place to live. Topics will be considered from multiple perspectives including housing finance, design, community planning, inequality, operations management, and sustainability. We will explore the historical and economic context of U.S. housing and discuss the barriers that low-income families face that affects their access to decent housing. The course will be divided into three sections: history, policies, and today's issues. Students will explore some of the most recently developed programs and how they fit into effective community revitalization. These programs will be evaluated in class discussions and group presentations.

Environmental Dispute Resolution BIJANI, YASMIN
Fall 2020
This course examines the application of conflict prevention and dispute resolution (EDR) processes to address a wide range of environmental, natural resource, and public policy conflicts. The course draws on case studies of environmental conflicts, policy readings, and negotiation simulations that will provide students with a substantive knowledge of environmental conflicts and help them develop the dispute resolution tools necessary to resolve similar conflicts. Case studies will highlight environmental conflicts from around the world over natural resources and land use. Negotiation topics include distributive bargaining, mutual gains negotiation, multi-party negotiation, mediation, and consensus building.

Environment and Public Health KUMAR, PRAVEEN
Fall 2020
This course will provide an introduction to the field of environmental public health. We will cover the basic tools of environmental health science, including toxicology, epidemiology, and risk assessment; the use of health data in the development of environmental policies; and the disproportionate burden of EH problems on vulnerable communities in the U.S. and around the world. Major topics will include air and water pollution, global sanitation and waste, urban design and health, and the use and regulation of chemicals. The course will have a strong emphasis on environmental justice and on the global health impacts of our environmental footprints.

ENVS335601
Seminar in Environmental Law
FOWLEY, JEFFRY T
Fall 2020
Topics to be covered include: (1) the Clean Water Act and the Boston Harbor cleanup; (2) the RCRA hazardous waste regulations; (3) contaminated (brownfield) site cleanups; and (4) the Flint water crisis, so as to understand how environmental protection still can fail and how more still needs to be done. This course will emphasize the practical aspects of environmental law and policy and will include several written exercises. This course will be useful both for pre-law students and also for any student with a serious interest in environmental policy. This course is open to seniors, juniors and sophomores.
Credits: 03
Room and Schedule: DEVLIN HALL 227,T TH 3*; **Satisfies Core Requirement:** None **Prerequisites:** None

Research Methods in Environmental Studies KELLY, JENNIFER R
Fall 2020
The course is designed to prepare majors and minors in Environmental Studies to pursue a senior thesis or seminar research project. The course helps students develop a research question from their interest and curiosity in an environmental topic. Students are introduced to qualitative, quantitative, and spatial methods that are used in environmental studies research. Students then design a study to answer their specific research question.

ENVS336501
Human-Wildlife Conflicts and Co-existence KELLY, JENNIFER R
Fall 2020
This course introduces students to a wide spectrum of wild animal issues through an interactive and interdisciplinary lens. The course captures the diversity of both negative and positive interactions between humans and wildlife in rural and urban contexts. To highlight these different encounters, we will look at a range of ecosystems around the world including those in New England and Costa Rica. The course covers: the ecological, social, and economic significance of species; the social and economic impacts of species in our backyards; how species are adapting to smaller spaces; and the increase in human-wildlife interactions. This course ensures that students gain more than a basic understanding of the topics discussed by working with an organization that focuses on wild animals, by encouraging students to reflect on the wild animals they encounter in their own communities, and in bringing their personal experiences to discussion forums. The discussions, service learning, case studies, and examples allow for a deeply rich and applied understanding of the course themes. Human-Wildlife Conflicts and Co-existence provides an academic experience that is engaging, interdisciplinary, applied, personal, and inclusive, not just in terms of its accessibility and variety, but in terms of the multi-species perspectives it uncovers.

ENVS400601
Place-making in a Post-carbon World: Architecture and Landscape for a Sustainable Future
BURNS, JENNIFER L
Fall 2020
Since the rise of steam power in the nineteenth century, the American way of life has been premised upon ever-increasing consumption of fossil fuels in all

aspects of our economy, from agriculture and manufacturing, trade and transportation, to communications and computing. In this course, we focus on a single aspect of this carbon-reliant economy, one that centrally and intimately shapes our patterns of life, our energy use, and our expectations of comfort. Focusing on architecture and landscape design, we review the dominant patterns of building and dwelling from before and during the Industrial Revolution in the U.S. We then examine a substantial series of alternative, sustainable strategies for constructing our shelters and their surrounding landscapes.

ENVS: Senior Research Seminar I KELLY, JENNIFER R
Fall 2020
This year-long seminar is for seniors who are majors in the Environmental Studies Program. To assist with the transition from college to the next stage of a student's career, the seminar focuses on the further development of applied multidisciplinary research, accessible writing, project coordination, and public speaking skills. Students spend the first semester engaging with scholarly materials and developing proposals for a research project. During the second semester, students complete their research projects, potentially collaborating with a campus or community organization to address an environmental problem.

Environmental Studies Courses: Spring 2021

ENVS107501
Understanding and Protecting Our Oceans in the Wake of Climate Change
OLINS, HEATHER C; BIJANI, YASMIN
Spring 2021
The ocean, which covers more than 70 percent of the Earth's surface, is vital to human societies. Yet, we have better maps of Mars than our own sea floor. This course introduces students to what we know and don't know about marine biodiversity and ecosystem services. It then describes the effects of climate change on the ocean--including rising temperatures, acidification, and sea level rise--and the resulting impact on life within and outside of the ocean. We end discussing the importance of effective governance and explore innovative ways in which people are working to repair and protect the ocean.

ENVS244501
The Vegetative Soul: The Hidden Life of Plants VANDEWALL, HOLLY R
Spring 2021
By weight, more than 80% percent of the living things on the earth are plants, and without them the earth's animals, including humans, would perish within weeks. But philosophy has spent a vanishingly small part of its efforts in considering this form of life, generally relegating plants to the status of minimally alive, but essentially uninteresting. As Michael Pollan notes, "plants are so unlike people that it's very difficult for us to appreciate fully their complexity and sophistication. Yet plants have been evolving much, much longer than we have, have been inventing new strategies for survival and perfecting their designs for so long that to say that one of us is the more 'advanced' really depends on how you define that term, and what 'advances' you value'." This class will consider how humans have historically regarded the plant kingdom, what we can learn from the challenging imaginary exercise of attempting to understand how they live, and how we might reconsider the world if we came to regard the plant kingdom not as passive subjects of human actions, but as powerful and vital actors in their own right.

ENVS356201
Environmental Sociology I KELLY, JENNIFER R
Spring 2021
This is a reading and discussion seminar that provides an overview of theoretical and empirical work in environmental sociology. After a brief introduction to the origins of the field, the seminar will cover topics that are representative of what is current in the area, especially bodies of theory and research that are national, international, and global in scope and research that is structural in orientation, with a key focus on how large-scale social institutions and organizational forms impact the environment, and also how they shape the ways in which individuals and smaller groups interact with the natural environment. Attention is also given to how environmental sociology makes fundamental contributions to interdisciplinary research in environmental studies and sustainability science.

ENVS494201
ENVS: Senior Research Seminar II KELLY, JENNIFER R
Spring 2021
This year-long seminar is for seniors who are majors in the Environmental Studies Program. To assist with the transition from college to the next stage of a student's career, the seminar focuses on the further development of applied multidisciplinary research, accessible writing, project coordination, and public speaking skills. Students spend the first semester engaging with scholarly materials and developing proposals for a research project. During the second semester, students complete their research projects, potentially collaborating with a campus or community organization to address an environmental problem.
Credits: 02
Room and Schedule: W 4 30-6 20;ONLINE;SYNCHRONOUS;
Satisfies Core Requirement: None

Prerequisites: None **Corequisites:** None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: For ENVS majors and seniors only. This is the second-half of a year-long course.

ENVS494301
Environmental Seminar PISANI GAREAU, TARA
Spring 2021
This seminar is for seniors who are minors in the Environmental Studies Program. With the goal to serve as a bridge between the college experience and the next stage of one's career, students fine-tune their critical writing, research, project coordination, facilitation, and public speaking skills. We investigate, actively discuss, and write about contemporary environmental issues and solutions with the aid of weekly reading assignments and the knowledge and experiences each student brings to class. Students also engage in a semester-long research project, collaborating with a campus or community mentor organization to address a specific environmental problem.

Film Courses: Summer 2020

FILM224401
Biography and Autobiography MICHALCZYK, JOHN; MICHALCZYK, SUSAN A
Summer 2020
The course will be structured around the genres of biography and autobiography and the ways in which the written genre is transformed and reinterpreted through film. Through analysis and close reading of texts, students will have opportunities to reflect upon the effectiveness of understanding personal narratives and connecting the individual experience to a larger cultural/historical context. As society moves to a more visual approach for understanding the challenges in life, studying adaptation from the written word to the visual expression can be useful in increasing awareness of the human condition and learning about the self. In addition to assigned readings and films, students will be provided with an extensive filmography of adaptions as resources for their research papers. The course will cover a selection of classic and contemporary works of literature/film, with a focus on analysis of the genre of autobiography and biography through modern interpretations.

FILM223001
Introduction to Video Art HOELTERMANN, JANNE
Fall 2020
Introduction to Video Art is an Art course examining video as a medium for artistic expression and conceptual inquiry. How can we use video to ask questions about ourselves, our viewers, or our world? Responding to instruction about video, sound, and editing techniques, students produce multiple assignment based video art pieces and a self-designed final project. Class sessions are comprised of screenings, discussions, technical demonstrations, and group critiques of students' projects. Screenings and readings cover a variety of topics, including: past and present video art, experimental/expanded cinema, performance art, art in the age of digital culture, and philosophical and sociological topics. Readings, screenings, and discussions are designed to provide a conceptual basis for students' video art projects, while critiques and writing assignments provide a forum for dialogue

FILM228201
Political Fiction Film MICHALCZYK, JOHN
Fall 2020
Political fiction film has often served as a dramatic means to deliver an ideological message. Its roots go back to Griffth's Civil War epic *Birth of a Nation* (1915). During World War II with such popular films as *Casablanca,* Hollywood directors offered patriotic messages to an American audience with its recent history of isolationism. More recently, Costa-Gavras' *Z* (1969) combined thriller elements with a non-conventional political perspective. Through readings, screenings, and discussion of these and other works, we are able to analyze the dual components of drama and politics in a chronological manner.

FILM330101
Screenwriter ROLINCIK, KYLIE M
Fall 2020
This course will explore the role of the screenwriter in the film making process, from original idea to the finished screenplay and film. Students will also learn how the screenwriter adapts source material such as plays, novels, and real life events. Along the way, students will learn about each of the elements of screenwriting including: structure, character, dialogue, theme, genre and breaking rules. Both individually and as a classroom project, students will read screenplays and analyze the resulting films to gain a better understanding of how those elements work in combination and contribute to the finished product.

FILM330301
Advanced Screenwriting CONROY, MARY K
Fall 2020
This course is for students interested in writing for film, applying the knowledge gained in FILM3301 toward their efforts at writing their own screenplays. In the early part of the class, students will select an idea for a film and transform that idea into a story suitable for the screen. From there, in a round-table setting, students will complete a series of exercises to help them focus their stories, eventually moving on to writing a finished first act (28-30 pages) by the semester's end.

FILM331401
Cinema of the Greater Middle East BERGER, PAMELA
Fall 2020
Cinema shapes the way we view a culture, but in order for a film to reveal that culture, we must view the film with an understanding of the context in which it was created. In this course we will look at several films from the Greater Middle East and study their artistic aspects as well as the cultures within which they were shot. We will also explore the various points of view of the filmmakers and look into how the scripts and the shooting styles serve to accomplish their goals.

FILM338901
American Directors Series CHOPRA, GAUTAM
Fall 2020
This series will concentrate on several directors who have chosen to work on the East Coast rather than in the Hollywood mainstream, such as Martin Scorsese, Spike Lee, Sidney Lumet, Elia Kazan and Woody Allen. Many have roots in New York and use the City not only as a setting for their narratives but as a metaphor for the human condition they explore. This school of Urban Realism has enriched American film with a gritty documentary strain that stands in strong contrast to the polished Hollywood style.

The Eye of Latin America Film LIVON-GROSMAN, ERNESTO
Fall 2020
This course focuses on recent Latin American cinema in order to explore the aesthetic and critical trends of its most recent films. How are those films shaped by always changing political circumstances? And what do they tell us about Latin America's present political realities? We will see films and read texts by Lisandro Alonso, Gonzalo Aguilar, Albertina Carri, Carlos Reygadas, Fernando Solanas, and Robert Stam among others. This class requires that in addition to critical readings students watch movies outside class time. Films in Spanish, French, and English with English subtitles.

FILM170101
Coming of Age: Crisis and Calm Revealed through Film MICHALCZYK, SUSAN A
Spring 2021
Coming of age, whether in moments of conflict or peace, remains a central theme in both classic and contemporary films. Film adaptation offers opportunities to study issues confronted from early to late adolescence that affect our adult lives. Viewing moments of crisis and calm through the medium of film has aesthetic value and promotes increased visual and cultural literacy. The films serve as foundational texts, as students engage in understanding the complexities of adapting a singular account of adolescence from printed word to the screen so as to reveal the relevance for our own lives.

FILM222001
Holocaust and the Arts MICHALCZYK, JOHN

Spring 2021
To express the inexpressible tragedy of the Holocaust from 1933 to 1945 remains a challenge. The Arts nonetheless attempt to get at the intrinsic experience of this twentieth-century genocide through poetry, film, music and literature. These symbolic, realist and at times surrealist expressions help us in a human way to understand the historical and personal events of the Holocaust.

FILM223001
Introduction to Video Art HOELTERMANN, JANNE
Spring 2021
Introduction to Video Art is an Art course examining video as a medium for artistic expression and conceptual inquiry. How can we use video to ask questions about ourselves, our viewers, or our world? Responding to instruction about video, sound, and editing techniques, students produce multiple assignment based video art pieces and a self-designed final project. Class sessions are comprised of screenings, discussions, technical demonstrations, and group critiques of students' projects. Screenings and readings cover a variety of topics, including: past and present video art, experimental/expanded cinema, performance art, art in the age of digital culture, and philosophical and sociological topics. Readings, screenings, and discussions are designed to provide a conceptual basis for students' video art projects, while critiques and writing assignments provide a forum for dialogue

FILM330401
From Script to Screen ROLINCIK, KYLIE M
Spring 2021
Screenwriting is a visual medium, so the best ideas often come from pictures in the writer's mind. This course focuses on the props, sets, locations, actions, cinematography, editing, and other visual elements that translate words on a page into worlds of light. By looking at scripts and films, we'll analyze the process of reading words as images.

FILM331501
Film Noir
LONG, CARTER E
Spring 2021
We will explore the history of the enigmatic Hollywood style from its origins in German Expressionism and Hard Boiled Fiction through its classic era, and finally into its rebirth as revisionist neo-noir in the 1970s. The course will examine how American social and political history factored into noir's sudden appearances, and study theoretical concepts of genre, space, gender, and self-perception. Directors include Wilder, Tourneur, Aldrich, Altman, Polanski, and Lynch.

FILM333101
Independent American Film ROLINCIK, KYLIE M

Spring 2021
How might contemporary independent cinema be seen as both an alternative and a response to mainstream Hollywood fare? How has the acquisition of indie studios, such as Miramax and New Line Cinema, transformed the industry? Has the affordability of technology and accessibility of audiences truly created a democratization of film? This course emphasizes critical examination of contemporary American Independent film from the 1980s films of John Cassavetes, Steven Soderbergh, Spike Lee through the 1990s and 2000s with features from Kevin Smith, Allison Anders, Richard Linklater, Quentin Tarantino; shorts from Wes Anderson and Jane Campion; and current festival hits.

French Courses: Summer 2020

FREN106501
Intensive Reading in French BOLD, STEPHEN
Summer 2020
The course objectives are (1) to develop the ability to read French readily and accurately through the study of grammatical structures and vocabulary; (2) to develop techniques for the reading of French-language material; and (3) to provide practice in the translation of French texts in general and of texts related to the students' major fields of study and research. This course may be taken for a grade, for pass/fail, or audited (as a registered auditor). Students desiring a pass/fail grade must file this grading preference with the Graduate School of Arts and Sciences.

Wordplay: From the Stage to the Page BREINES, JOSEPH
Fall 2020
This course is open to any students interested in expanding their linguistic and cultural horizons while developing their literary skills through writing in French. Guided compositions will help students to gain precision and sophistication in their written French and in their writing in general. Selected poems and plays explore a chosen theme and allow students to learn the basics of literary analysis in each genre. Grammar review is tied to the readings. This course will prepare students for 400-level courses in literature and culture.

Narrative and Identity: The Story You Tell Yourself NEWMARK, KEVIN
Fall 2020
This course is designed to help students with a good background in French to progress to the next level. Students in this course will continue to solidify their mastery of French grammar through structural exercises tied to readings, discussion, and written analysis of selected short stories, novels, and narrative film. The stories have been chosen and presented to allow students to progress substantially both in their basic reading skills in French and in their awareness of critical aspects of storytelling such as narrative voice, point of view, and plot structure.
Credits: 03
Room and Schedule: T TH 1 30*;ONLINE;SYNCHRONOUS;
Satisfies Core Requirement: None
Prerequisites: French CCR II (FREN2210). Students with just four years of high school French or CCR I (FREN2209) may enroll with instructor's permission.

FREN331001
War/Twentieth-Century France BREINES, JOSEPH
Fall 2020
Our focus this semester will be on the artistic, intellectual, political, and social life of France during the period of the Second World War. We will be reading poetry and short stories published during the Occupation, recent magazine articles on the clandestine press, an anti-war play from the immediate pre-war period, essays published just after the Liberation, and very short selections on the history of the period. We will see a number of recent French films whose stories draw on the dynamics and psychology of resistance and collaboration. We will hear recollections of the Liberation of Paris, interviews with men who joined the Charlemagne division of the German "SS," and songs from the period. While the main focus will be on the Second World War, we will begin the course with two texts (a short story and a poem) written just after the Franco-Prussian War (1870-71).
Credits: 03
Room and Schedule: M W F 12;ONLINE;SYNCHRONOUS;

FREN339301
Life at the Limit: Narratives of Transformation KEARNEY, ANNE D
Fall 2020
This course is conducted in English. This course will consider texts that follow the path of a person making a journey from alienation, loss, or hardship through a turning point. We will read stories of people who, caught in a major life crisis, still manage to keep a deep connection with themselves and the world, people who ultimately survive to share their experience with others in writing. Students will read correspondence between Theo and Vincent Van Gogh, a short story by Fyodor Dostoevsky, excerpts from Les Miserables, a memoir by Primo Levi, and various texts by Albert Camus and several other authors. Satisfies Core Requirement for: Literature
Credits: 03
Room and Schedule: CAMPION HALL 231,M W F 1; **Satisfies Core Requirement:** Literature **Prerequisites:** None
Corequisites: None **Cross-listed with:** None **Frequency:** Periodically
Student Level: UNDERGRAD ELECT **Comments:** This course is conducted in English. **Status:** OPEN

FREN440401
How to Begin Thinking: Aftermaths of Twentieth-Century Literature, Philosophy, History NEWMARK, KEVIN
Fall 2020
"Thinking," the French philosopher Emmanuel Levinas once suggested, "probably begins through traumatisms." This course will study a series of disruptive and transformative events that have indelibly marked the twentieth century. What is the task of thinking for a European tradition displaced internally by the Holocaust and externally by the end of colonial expansions into other continents? Authors will include Levinas, Derrida, Nancy, Saussure, Barthes, Duras (in English translation from French); Borges and Dorfman (in English and English translation from Spanish); Calvino (in English translation from Italian); and Descartes (in English translation from Latin). A German component (in English translation) will consider Husserl and Heidegger as a counterpoint to the European tradition of Romance languages, literatures, and cultures.

FREN445401
Contemporary Francophone Women Writers JEAN-CHARLES, REGINE M
Fall 2020
This course explores the specificity of francophone women's writing in a contemporary context, examining narratives from a wide variety of geographic locations including the Caribbean, North Africa and Sub-Saharan Africa. The question of genealogy is central to this course as we attempt to delineate a matrilineal francophone literary tradition. As such we will also consider these narratives in relation to feminist theory, history, socio-cultural politics, culture and ethnicity.
Some of the themes we will study include silence and voice, the female body, mother-daughter relationships, migration and immigration, and canon formation.

FREN330601
Narrative and Identity: The Story You Tell Yourself BREINES, JOSEPH
Spring 2021
This course is designed to help students with a good background in French to progress to the next level. Students in this course will continue to solidify their mastery of French grammar through structural exercises tied to readings, discussion, and written analysis of selected short stories, novels, and narrative film. The stories have been chosen and presented to allow students to progress substantially both in their basic reading skills in French and in their awareness of critical aspects of storytelling such as narrative voice, point of view, and plot structure.
Credits: 03
Room and Schedule: M W F 12;ONLINE;SYNCHRONOUS;
Satisfies Core Requirement: None
Prerequisites: French CCR II (FREN2210). Students with just four years of high school French or CCR I (FREN2209) may enroll with instructor's permission.
Corequisites: None
Cross-listed with: None

FREN330901
Artists and their Writings KEARNEY, ANNE D
Spring 2021
In this course, students will study French culture through some key artists of the turn of the nineteenth century. The course will explore the rapport between their visual work, their writings (or writings about them) and their lives. The artists studied will be Van Gogh, Gauguin, Matisse, Picasso, Rodin, Camille Claudel, Cezanne. We will look at the evolution of their work in conjunction with their biographies, reading extracts from their letters or pronouncements on art and life.

Conversational Approach to Contemporary France LANDRIN, OPHELIE
Spring 2021
This course is designed to familiarize students with the political and social features of contemporary France while helping them to develop oral communication skills in French. Using authentic documents (television, videos, films, songs, newspapers, and magazines), we will discuss current events and socio-political issues. Students will develop their vocabulary, increase their knowledge of idiomatic expressions, and further their command of spoken French by engaging in structured dialogues based upon real-life situations.

FREN440601
Versailles: A Cinematic Look at French Culture of the Grand Siecle BOLD, STEPHEN
Spring 2021
This course will focus on the cultural moment when modern France was born: the age of Louis XIV and his palace at Versailles. We will study the grandeur and the conflict that define this summit of French history through a variety of documents, including a number of recent films that reconstruct the period, and contemporary masterpieces of painting, architecture and music. We will also read a variety of literary, historical, and eyewitness texts that portray the age as it was or wanted to be.

FREN444201
Naturalism: Zola, Flaubert, Maupassant BREINES, JOSEPH
Spring 2021
This course will offer a study of novels by Emile Zola (L'Assommoir, L'oeuvre), Gustave Flaubert (Madame Bovary) and Guy de Maupassant (Pierre et Jean). With Zola's novels, we will be looking at Parisian working class life during the Second Empire and the artistic milieu of the Impressionist painters. We will also be reading selections from Zola's theoretical writing (Le Roman experimental, Les Romanciers Naturalistes) and will consider various possible relationships between naturalist theory and the naturalist novel.

FREN446401
Existentialism from A to Z NEWMARK, KEVIN
Spring 2021
This course will examine some of the fundamental literary, philosophical, and historical components of French Existentialism. It will examine the way that the major writers of this movement in twentieth-century thought developed their ideas against the backdrop of Surrealism in literature, existential phenomenology in philosophy, and the historical upheavals of World War II. Of primary concern will be the manner in which the themes, concepts, and experiences of Meaninglessness, Engagement, Occupation, Resistance, and Liberation are confronted and rearticulated in the texts considered. Authors will include Sartre, Camus, Malraux, de Beauvoir, Duras, Ponge, and Blanchot.
Credits: 03
Room and Schedule: T TH 1 30*;ONLINE;SYNCHRONOUS;

FREN448301
Twentieth-century French Theater BREINES, JOSEPH
Spring 2021
This course will study a number of plays written in French during the twentieth century. Authors will include Cocteau, Anouilh, Giraudoux, Sartre, Beckett and Genet. As many of the plays are remakes of Greek tragedies and legends (the Oedipus Cycle, the Trojan War, for instance) we will be posing questions such as: How does one explain the flurry of remakes at this time in France? How are classical notions of causality (Fate, Destiny) transposed in the modern versions? In what ways do the modern plays self-consciously express their status as remakes? Theoretical writings on theater will also be considered.
Credits: 03
Room and Schedule: M 3-5 20;ONLINE;SYNCHRONOUS;
Satisfies Core Requirement: None

FREN775001
Reading Jacques Derrida NEWMARK, KEVIN
Spring 2021
This course will examine some of the fundamental ways that the work of Jacques Derrida has contributed to altering the context in which the humanities can be understood and studied within the modern university. It will take examples from Derrida's repeated interventions in such disciplines as literature, philosophy, theology, and history. By situating Derrida's work at the margins where accepted demarcations between the disciplines begin to blur, the course will suggest new possibilities for conducting interdisciplinary work in the future.

German Studies Courses: Summer 2020

GERM100601
Intensive German for Beginners SONDERMANN, RUTH; MANGOUBI, URSULA
Summer 2020
This course is designed to provide you with a solid background in the four language learning skills: speaking, understanding, reading, and writing. This is an intensive two semester language course--taught within six weeks. At the end of the class you will be able to ask questions and be able to respond to those questions, you can conduct simple everyday conversations and talk about yourself, your family, and daily routines. Additional topics we will cover are travels in German-speaking countries, everyday life, customs and holidays, Germany's past, and so on. We will be focusing on creating a stimulating learning environment, and the (e)book will be supplemented with audio, videos, and printed material as well as other up-to-date material from the instructor. Developing speaking skills is an integral part of your learning process, and your class participation is not only encouraged but also required. This is not a lecture class. Through partner exercises and role-play we will create opportunities for you to practice your acquired skills. Homework assignments from the MYGERMANLAB will also enhance your skills to understand German. No prior knowledge of the German language required. (If you have very little knowledge of German--if you took German in high school several years ago--this course may be right for you. If in doubt, please contact the instructor before enrolling in the course).

GERM200501
Germany in Europe today SONDERMANN, RUTH
Spring 2021
This course is intended to introduce students to today's Germany in Europe. The European Union and the four freedoms of the EU--free movement of people, goods, services, and capital-- will be the chief topic of this course. Other topics will include the new influx of migrants and other demographic changes, the education system, and the opportunities that education offers. Because Germans are very concerned about the effects of environmental change, the course will also address the idea of sustainability, the sharing and caring society, and Fair Trade. This course is a language course offered to students from all majors who are contemplating a semester abroad, an internship, or even working in Germany. We will be listening to podcasts and the news and will read authentic material. You should therefore be quite confident in your German language skills, be able to discuss and present your opinion and write short essays. If you are uncertain about your level, please do not hesitate to contact the instructor.
Credits: 03
Room and Schedule: LYONS HALL 207,T TH 9*;
Satisfies Core Requirement: None
Prerequisites: GERM1051. Or equivalent. New course as of Fall 2019. This new course # and course description replaces GERM3320.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD ELECT
Comments: Conducted in German. Counts toward German major, German minor, and German Studies minor. Satisfies Foreign Language Proficiency core requirement.
Status: OPEN

GERM201001
Curiosities of the German Language BOWLES, DANIEL J
Spring 2021
This course offers a text-based examination of some of the more striking morphological quirks and peculiarities of the German language. We will study such phenomena as: Denglisch and other foreign influences, remarkable etymologies, the history of du, ihr and Sie, animal sounds and onomatopoeia, the language of marketing, longGermancompoundnouns, dirty words, peculiar place names and related geographical idiosyncrasies, tongue twisters, wordplays, contranyms, the vocabulary of the Wende, acronyms and abbreviations, proverbial sayings, German in the social-media age, German-language political correctness, syntactic anomalies in older literary German, Worter (and Unworter) des Jahres, Mark Twain and the German language, and morphological and lexical variants across the German-speaking world. Reading assignments are drawn from philological scholarship, German literary texts, and the contemporary media landscape. The course is designed as an interactive seminar requiring dynamic student participation.
Credits: 03
Room and Schedule: LYONS HALL 207,M W F 10;
Satisfies Core Requirement: None
Prerequisites: GERM1051. Or equivalent. New upper-level topics course as of Spring 2021. .
Corequisites: None **Cross-listed with:** None **Frequency:** Triennially
Student Level: UNDERGRAD ELECT
Comments: Conducted in German. Counts toward German major and German Studies minor. Satisfies Foreign Language Proficiency Core requirement.
Status: OPEN

GERM216001
Modern Jewish Thought BLOCK, NICHOLAS
Spring 2021
This course investigates the impact of modernity on Jewish thought and religion. Highlights include readings Spinoza, Moses Mendelssohn, Martin Buber, and Rachel Adler. First, the rise of the modern state led Jews to confront a crucial question: how can they belong to both the Jewish people and to their countries? Second, modernity emphasizes individual autonomy: we decide as individuals what is good for us. How can this emphasis co-exist with religious law and tradition? Third, modernity involves a strong belief in the authority of reason and progress. In this light, is religion rational or a matter of psychological experience? We will turn to three broader historical phenomena that represent a crisis of modernity: the rise of Zionism, the Holocaust, feminism. These phenomena continue to radically transform Jews and Judaism in our post-modern age. Key terms to be traced through the semester are "community" and "Law" as Jews defined themselves and were defined along religious, racial, and national lines.

Status: OPEN

GERM224001
King Arthur in German Literature RESLER, MICHAEL
Spring 2021
A study centering on the most popular and enduring of all medieval legendary figures. We will examine the early texts from which the Arthurian mythology took root and contributed to the eventual spread into Germany of the tales of King Arthur and the Knights of the Round Table. We will then focus on a close reading of four or five of the most significant Arthurian romances within the German tradition. In addition, we will systematically trace the relationship between this highly idealized world of literary knighthood and real-life contemporary historical and social events of the twelfth and thirteenth centuries.
Credits: 03
Room and Schedule: M W F 12;ONLINE;SYNCHRONOUS;
Satisfies Core Requirement: Literature
Prerequisites: None
Corequisites: None
Cross-listed with: ENGL3304 **Frequency:** Biennially **Student Level:** CORE
Comments: Conducted in English with all texts in English translation. Counts toward German major, German minor, and German Studies minor. **Status:** OPEN

GERM224201
Germany Divided and Reunited BOWLES, DANIEL J
Spring 2021
This course provides a multi-dimensional look at post-war Germany, East and West. Politics, social and economic structure (East versus West), music, art, literature, philosophy (Critical Theory), the crisis and reform of the West German university system, the young generation, and Americanization will be discussed. Other topics include radicalism/extremism/protest movements (including terrorism), coping with the past (National Socialism), the Revolution of November 1989, and the legal ramifications and unsolved problems deriving from reunification.

Hispanic Studies Courses: Summer 2020

SPAN101501
Elementary Spanish I FALCONI, SILVANA
Summer 2020
This introductory course is designed for students with no prior Spanish experience as well as those who have had some high school Spanish. Elementary Spanish I provides a strong foundation in speaking, listening comprehension, reading, and writing as well as exploring the products, practices, and perspectives that are unique to Hispanic cultures. This course follows a communicative approach, which springs from the idea that languages are best learned when real-world information becomes the focus of student activities. Students interact in Spanish with the instructor and with classmates. By the end of this course, students should be able to successfully handle in Spanish a significant number of basic communicative tasks.
Credits: 03
Room and Schedule: ONLINE COURSE;;ASYNCHRONOUS;MAY 13 - JUN 26;
Satisfies Core Requirement: None
Prerequisites: This course is for beginners. Students with prior Spanish experience are admitted only after taking the placement test.

SPAN101601
Elementary Spanish II FALCONI, SILVANA
Summer 2020
Elementary Spanish II is the second course in the first-year Elementary Spanish I and II sequence. It continues to provide a strong foundation in speaking, listening comprehension, reading, and writing as well as exploring the products, practices, and perspectives that are unique to Hispanic cultures. This course follows a communicative approach, which springs from the idea that languages are best learned when student activities involve critical thinking about real-world information. Students interact in Spanish with the instructor and with classmates. By the end of this course, students should be able to successfully handle in Spanish a significant number of communicative and writing tasks in different time frames.

Intermediate Spanish I RUIZ BLANCO, ANGEL
Summer 2020
Intermediate Spanish I is the first course in the second-year sequence. It continues to develop and strengthen students' proficiency in the Spanish language as well as to increase their cultural understanding. Emphasis remains on the four skills and on critical thinking. Throughout the course, students develop fluency and accuracy, and focus on communication. They expand their vocabulary and enhance their understanding of essential Spanish grammar concepts. Short literary texts, cultural readings, and audiovisual materials provide opportunities to learn to appreciate cultural differences and impart authentic insight into the Hispanic world.

SPAN111601
Intermediate Spanish II CUENCA, DANIEL
Summer 2020
Intermediate Spanish II is the second course in the second-year sequence with a continued emphasis on the four skills and on critical thinking. This course focuses on vocabulary building, the examination of some of the finer grammar points, and moving students towards a more complex level of comprehension and expression. Students work with short literary texts, cultural readings, and audiovisual materials. After successful completion of this course, the foreign language requirement will be fulfilled for schools that require a fourth-semester proficiency.

This introductory course is designed for students with no prior Spanish experience as well as those who have had some high school Spanish. Elementary Spanish I provides a strong foundation in speaking, listening comprehension, reading, and writing as well as exploring the products, practices, and perspectives that are unique to Hispanic cultures. This course follows a communicative approach, which springs from the idea that languages are best learned when real-world information becomes the focus of student activities. Students interact in Spanish with the instructor and with classmates. By the end of this course, students should be able to successfully handle in Spanish a significant number of basic communicative tasks.

SPAN338701
Multicultural Spain NANDIN, TERESA
Fall 2020
This course focuses on the non-Western cultural influences on Spanish culture throughout history, starting with the presence of the Arabs in the Spanish territory from 718 to 1492 and the coexistence of Jewish, Muslims, and Christians during that time period. The rich multicultural nature of Spain at present times also has benefitted from the role of recent massive immigration waves to the country, and the course will address the important consequences of this phenomenon. Special attention to improving Spanish proficiency through oral and written exercises. Taught by the Resident Director of BC in Barcelona, Teresa Nandin. Conducted in Spanish. Online only.

SPAN666201
Violence in Hispanic Culture RHODES, ELIZABETH
Fall 2020
This course does not pose Hispanic culture as a model of violence, rather offers historic reasons to explain why and how certain universal forms of inter-personal violence manifest in great Hispanic art at particular moments in time. Based on an anthropological approach to violent systems of human behavior, the class analyzes a wide variety of texts that represent honor killing, mimetic desire, domestic violence, sexual violence, scapegoating, and "aesthetic" violence such as terror-producing works. Discussion-based class meetings with heavy emphasis on vocabulary building. This course fulfills the pre-1800 Peninsular requirement for majors

SPAN669101
Monsters, Specters, and the Supernatural in Nineteenth-Century Spain TANG, WAN S
Fall 2020
This course examines evolving representations of the monstrous, the spectral, and the supernatural in the literature and visual arts of nineteenth-century Spain. Drawing on historical and contemporary theories of the Gothic, the fantastic, and the spectral, we will examine how nineteenth-century Spanish society explored social issues through supernatural representation. Class discussion will focus on such topics as the treatment of race, class, and gender in the assigned texts, and the role of Othering in the creation of a modern national identity.

SPAN991901
Monsters, Specters, and the Supernatural in Nineteenth-Century Spain TANG, WAN S
Fall 2020
This course examines evolving representations of the monstrous, the spectral, and the supernatural in the literature and visual arts of nineteenth-century Spain. Drawing on historical and contemporary theories of the Gothic, the fantastic, and the spectral, we will examine how nineteenth-century Spanish society explored social issues through supernatural representation. Class discussion will focus on such topics as the treatment of race, class, and gender in the assigned texts, and the role of Othering in the creation of a modern national identity.
Credits: 03

Hispanic Studies Courses: Spring 2021

SPAN101501
Elementary Spanish I RAMOS ORTA, YULIANA M
Spring 2021
This introductory course is designed for students with no prior Spanish experience as well as those who have had some high school Spanish. Elementary Spanish I provides a strong foundation in speaking, listening comprehension, reading, and writing as well as exploring the products, practices, and perspectives that are unique to Hispanic cultures. This course follows a communicative approach, which springs from the idea that languages are best learned when real-world information becomes the focus of student activities. Students interact in Spanish with the instructor and with classmates. By the end of this course, students should be able to successfully handle in Spanish a significant number of basic communicative tasks.
Credits: 03
Room and Schedule: CAMPION 200,M W F 11;
Satisfies Core Requirement: None
Prerequisites: This course is for beginners. Students with prior Spanish experience are admitted only after taking the placement test.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually

SPAN338701
Multicultural Spain NANDIN, TERESA
Spring 2021
This course focuses on the non-Western cultural influences on Spanish culture throughout history, starting with the presence of the Arabs in the Spanish territory from 718 to 1492 and the coexistence of Jewish, Muslims, and Christians during that time period. The rich multicultural nature of Spain at present times also has benefitted from the role of recent massive immigration waves to the country, and the course will address the important consequences of this phenomenon. Special attention to improving Spanish proficiency through oral and written exercises. Taught by the Resident Director of BC in Barcelona, Teresa Nandin. Conducted in Spanish. Online only.

The Colonial Imagination: History and Identity in Spanish America BECKJORD, SARAH
Spring 2021
This course provides an overview of texts written from the colonial period to the nineteenth century and their connections to contemporary works. We will focus on the representation of historical actors (conquerors, captives, others) as well as geographical spaces (city, jungle, pampa) as imaginary regions where history and identity are forged. Readings will be drawn from a variety of genres (historiography, novel, short story, essay, poetry) and will include selections by authors such as Bernal Daz, Cabeza de Vaca, El Inca Garcilaso, Rodriguez Freile, Sarmiento, Palma, Gorriti, Paz, Borges, and Garro.

SPAN662201
Crossing Borders: Narratives of U.S./Mexico Relations and the Underground Economy SHAMES, DAVID A
Spring 2021
This course invites students to traverse disciplinary and genre boundaries as they think critically about the conventional narratives that frame our understanding of the complex geopolitical and historical arrangements of the U.S./Mexico border. By adopting a transnational perspective, students will examine different ways of narrating--and contesting--issues of territory, resources, and ways of life along this division between two nation states. We will consider border paradigms from the frontier to the "Drug War" as historical, ideological, and cultural modes of managing overlapping crises of political sovereignty and economic inequality by redefining when, where, and for whom borders are constructed.
Credits: 03

SPAN663601
Borderlines: Films of Immigration and Exile RHODES, ELIZABETH
Spring 2021
An advanced undergraduate seminar in film analysis following a trajectory of films that represent the drama of immigration into first-world countries (Spain, the United States). The course covers the historic, economic, and cultural motivations attributed to migrants in these works and the ways in which directors marshal specific cinematographic techniques to achieve the political and artistic objectives of each film. Emphasis is on the Mexico/U.S. border and the Strait of Gibraltar, one of the deadliest points of immigration in the world. The course begins with El alambrista (Robert Young, 1977) and finishes with Retorno a Hansala (Chus Gutierrez, 2007).

SPAN664301
Historiography, Memory, and Autobiography in Colonial Latin American Texts BECKJORD, SARAH
Spring 2021
The European encounter with the New World brought about violent conflict and posed intellectual and material challenges perhaps unprecedented in Western civilization. In this course we will undertake a close study of the fascinating and extraordinarily rich works at the origins of the Latin American literary tradition, exploring literary themes such as discovery and shipwreck, possession and loss, and the ways in which authors use them to inscribe themselves as narrators. We will review the range of medieval and renaissance discursive practices at play in the texts and the ways that authors employ and subvert them, as well as critical debates and approaches of our times.

SPAN669201
The Gender Games, from El Cid to Almodovar RHODES, ELIZABETH
Spring 2021
This course, whose title takes a cue from *The Hunger Games,* analyzes how culture "encourages" individuals to conform to a particular set of gender expectations at a given moment in history. Considering how texts of various genres and media represent what means to be "a man," "a woman," or someone who identifies with both or neither, we will analyze how various art forms respond to established gender norms to support or subvert them, from the Middle Ages through contemporary Spain. Experience with gender analysis helpful but not necessary.
Credits: 03
Room and Schedule: None
Satisfies Core Requirement: None
Prerequisites: SPAN3395 Contextos and one other 6000 level course.
Corequisites: None **Cross-listed with:** None **Frequency:** Periodically
Student Level: UNDERGRAD & GRAD
Comments: Conducted in Spanish. Fulfills pre-1800 Peninsular requirement for major.
Status: CANCELLED

SPAN993101
Don Quijote RHODES, ELIZABETH
Spring 2021
Everybody wants to have read Don Quijote in its entirely and in the original but few people actually do it. We will do it. This seminar studies Cervantes's masterpiece as the foundational script of Hispanic narrative, focusing on the creative legacy that Cervantes provided subsequent visual and narrative arts. Paintings and films are included. Students are encouraged to have read Don Quijote before the seminar if possible.

SPAN994301
Historiography, Memory, and Autobiography in Colonial Latin American Texts BECKJORD, SARAH
Spring 2021
The European encounter with the New World brought about violent conflict and posed intellectual and material challenges perhaps unprecedented in Western civilization. In this course we will undertake a close study of the fascinating and extraordinarily rich works at the origins of the Latin American literary tradition, exploring literary themes such as discovery and shipwreck, possession and loss, and the ways in which authors use them to inscribe themselves as narrators. We will review the range of medieval and renaissance discursive practices at play in the texts and the ways that authors employ and subvert them, as well as critical debates and approaches of our times.

HIST111701
Atlantic Worlds I, 1500-1800 BAILEY, MICHAEL T
Summer 2020
In this course, students examine the significance of developing global relationships, interdependencies, and tensions within and between societies in the Atlantic World between 1500 and 1800. The focus is on responses to religious, economic, and political changes in an increasingly diverse and "dis-integrated" world order of Western Europe, West Africa, and the Americas. As the "known worlds" of the Atlantic expanded, resisted, and attempted to accommodate changes brought about through religion, rights, and revolution over this 300 year period, our tasks are to examine what happened, why they may have happened, and how these changes were significant then and now.

HIST781301
Graduate Colloquium: The Civil War Era in History and Memory DELAHANTY, IAN G
Summer 2020
This course investigates the causes, course, and consequences of the American Civil War. Major topics include the expansion of African American slavery and growth of antislavery sentiment; the political crisis of the 1850s; soldiers' and civilians' experiences in the war; emancipation; and the debate over African Americans' political and social status during Reconstruction. Special attention is given to how public monuments, Hollywood, and historical museums have influenced Americans' memory of the Civil War era.

HIST781501
Topics in World History PENDAS, DEVIN O
Summer 2020
In recent years, history has taken what many are calling a "global turn." This involves both looking at old topics in new ways and investigating new topics that were previously neglected. This course will examine some key themes in recent global history, including economic, political, and cultural transformations. We will ask about the birth of the modern world and the relationship among various regions in the age of empire, discovery, colonialism, and globalization.

HIST100501
Asia in the World I ZHANG, LING
Fall 2020
This Core course surveys the Asian origins of the modern world, from the rise of the Eurasian empire under the Mongols in the thirteenth century to the global colonial context of the Industrial Revolution in the eighteenth century. We will challenge common geographical (mis)conceptions (e.g., "East" versus "West") in historical narratives/uncover their origins and how they have changed. While emphasizing the global conjunctions in history, this approach highlights Asian experiences of the historical forces that integrated yet also divided the world in changing ways: trade routes, migrations, religions, empires, wars, ideologies, and the constraints of a shared ecological environment.
Credits: 03

HIST105501
Globalization I PEYCHEV, STEFAN P
Fall 2020
The course explores the world-wide connections that are diminishing the significance of traditional geographical, cultural, and political boundaries. Global connections have increased rapidly in the past half-century, but global convergence has been a powerful force during the eight centuries covered by this survey. The year-long course examines three kinds of globalization: commercial, cultural, and political. While recognizing the Western world's expansiveness as a key force for globalization, the course gives extensive attention to how people from other continents have also been major agents in initiating, promoting, and resisting globalizing forces.

HIST107601
Environmental Migration: Asylum Seekers ZUNIGA NIETO, CARLOS GERAR
Fall 2020
How will long-standing and deeply embedded conceptions of "us" versus "them" in terms of national identity need to change in light of climate-change-induced migration in the future? What are the environmental origins of refugee migrations? The paired courses will familiarize students with the ways that climate disruptions have affected migrations, as well as governmental and nongovernmental institutions' responses to this environmentally driven movement. Students will learn to recognize the environmental push and pull factors for migration, understand and analyze existing legal definitions of "refugees," and consider the need for new strategies to address climate-change-induced migration globally.

HIST109401
Modern History II DELVAUX, MATTHEW C
Fall 2020
This course covers several centuries of time (1800 and after) and traces the political, social, economic, and cultural changes that created the modern world. Depending on the expertise of the instructor, different parts of the world may serve as focal points for examining the complex historical processes behind modern-day transnational relationships, values, and ideas. As part of the Core Curriculum, this course seeks to broaden students' intellectual horizons by exposing them to new places, periods, and perspectives.

HIST111301
The African Diaspora and the World I LAL, PRIYA
Fall 2020
This course is the first of a two-course sequence that explores the African diaspora and its relationship to the world. By African diaspora, we are referring to both the continent and the communities of people of African descent that have formed in the Americas, in Europe, and in Asia as the result of forced and voluntary migrations over the last five hundred years. The course seeks to foster a fuller understanding of the African diaspora's role in the development of the modern world and the experiences of African-descended peoples from a global perspective.

HIST150501
Planet in Peril: The History and Future of Human Impacts on the Planet
SCHOR, JULIET; PARTHASARATHI, PRASANNAN
Fall 2020
The twenty-first century opened with crises of climate, bio-diversity, and eco-system functioning. In this class we address ecological overshoot from the perspectives of sociology and history, emphasizing the role of inequality, the state, inequality, and power. The course combines contemporary analyses with a long historical record of human impact, considering both the familiar and the novel in the realm of ecological challenges. We devote substantial attention not only to causes but to solutions. Topics to be covered include: the Columbian exchange, forests, agriculture, water, climate change, toxics, and population. Solutions include state policy, social movements, individual action, and social innovation.

HIST161701
Making the Modern World: Design, Ethics, and Engineering TONN, JENNA A; KRONES, JONATHAN S
Fall 2020
Together we will consider how engineers and other stakeholders navigate risks related to industrial and environmental disasters; balance financial, technological, and regulatory pressures associated with complex socio-technical problems; and negotiate technical and political liabilities surrounding artificial intelligence, surveillance, and climate adaptation. Students will collaborate on group design projects based on human-centered engineering. Engineering systems present pressing technical, ethical, and moral problems that we must grapple with as engaged global citizens. In this class students will explore the social, cultural, and institutional history of engineering; learn foundational skills in quantitative analysis of real- world engineering designs; and understand the political, environmental, economic, and ethical tradeoffs associated with building the modern world.

HIST171601
Geographies of Imperialism: History of Colonization SHLALA, ELIZABETH H
Fall 2020
The age of empires is past--or is it? In this course, we examine the enduring ideas of empires and their challengers through the present day, using the lenses of history and theology (Christianity and Islam). Beginning with the traditional geographies of maps, we explore how empires colonized not only territories with physical borders, but also bodies and minds, using race, gender, sexuality, ethnicity, education, laws and institutions. Using the British and French empires in the Middle East and North Africa as case studies, we will identify and question how to overcome the boundaries still imposed on people today.

HIST177101
The Value of Freedom: Imperial History SHLALA, ELIZABETH H
Fall 2020
Who is free? What does it mean to be free? In what ways do individuals and societies show that they value freedom? In these paired courses, we will approach these enduring questions from the perspectives of Political Science, Economics, and History. During the colonial and post- colonial eras, ideas about political and economic freedom closely aligned with the development of liberal democracy and capitalism. Our courses will evaluate the contradictions of liberal ideas and structures within their greater historical context through case studies across the globe. In this way, students may begin to understand what it means to be free for themselves today.

HIST182201
Core Topics: Europe from the Outside In MATUS, ZACHARY A
Fall 2020
The story of how Europe emerged as a cultural-political entity is inextricably intertwined with the groups of people it feared, persecuted, and ridiculed. In this course, we will examine the history of Europe from the perspective of Jews, women, Muslims, heretics, the poor and disabled before moving to peoples encountered during European exploration. In so doing we will investigate the deep roots of contemporary hate and prejudice and ask uncomfortable questions about the basis of Western society. Students will learn to work with primary source documents and to question dominant narratives about Western civilization.

HIST183201
Resisting and Rebelling I SELLERS-GARCIA, SYLVIA M
Fall 2020
Spain ruled a vast expanse of the Americas for nearly three hundred years before movements for independence overthrew imperial governance and established national governments. But these long centuries of apparent domination belie the true nature of colonial reality: revolts and rebellions erupted with regularity; resistance in its many forms was nearly continuous. This course considers Spanish America (with some reference to Portuguese America and the Caribbean) from roughly 1500 to 1800 with an eye on this

reality. What forms of daily resistance did colonial subjects employ? What factors caused resistance to explode, becoming open revolt?

HIST184101
Core Topics: When Worlds Collide: From Contact to the Constitution LYERLY, CYNTHIA L
Fall 2020
This course will examine North American history from the perspective of the collision and exchange of cultures and peoples. From the Mississippian Indian civilization at Cahokia to the Illinois, Iroquois, Algonkian, and other Native American peoples, we will see how Indians resisted, adapted, and interacted with French, English, Spanish, and Dutch Europeans. African peoples were another key part of this cultural collision, as hundreds of thousands were brought to North America in the slave trade. The course ends with the consolidation of white European power in the creation of the United States. Major themes in the course are race, power, and religion.

HIST184201
Core Topics: The Atlantic World and Environmental Change, 1450-1800 O'NEILL, KEVIN
Fall 2020
This course will explore the dynamic relationship between human activity and the natural world of the Atlantic (climate, topography, plants, animals, and microorganisms) 1450-1800. Topics will include the consequences of the Columbian Exchange, the creation of plantation societies, energy usage, technological change, and the emerging global economic system. Several core themes will be followed--including climate change, energy regimes, and food security. We will also consider the relationship between environmental change and more traditional historical topics such as the Reformation, the Enlightenment, and the Age of Revolution.

HIST205101
Modern China MO, YAJUN
Fall 2020
This course will trace the history of China from roughly the year 1800 to the present, including the collapse of the imperial system, the rise of nationalism and new political ideologies, the forging of Chinese identity through war and revolution, and the gradual consolidation of the nation-state. The focus will be on the daily life of ordinary people, and their relationship to the family, the village/city, the environment, and the State; their connections with local, regional, and global economic and cultural networks; and their ethnic identity, religious practice, and gender relations.

HIST215501
Podcasting the Ottomans SAJDI, DANA
Fall 2020
The Ottoman Empire (1299-1922) connected West Asia, North Africa, and parts of Europe, and was of the largest and longest lasting empires in world history. This course deals with aspects of the social and cultural history of, and the latest trends in scholarship on, the Ottomans by using the Ottoman History Podcast as a launching point each week. Each podcast features an interview with a scholar accompanied by a suggested reading list. Students will listen to a selected podcast and do the assigned reading and will keep a "scholarly diary," which will be submitted in lieu of exams.

HIST220201
Greeks and Barbarians THATCHER, MARK R
Fall 2020
In "Greeks and Barbarians," we'll use a combination of written sources, archaeological evidence, and even visual art to investigate the fascinating history of relationships and conflicts between Greeks, Persians, Egyptians, Carthaginians, and more. We'll read a variety of literature in English, such as the histories of Herodotus and Xenophon, the tragedies of Aeschylus and Euripides, and more, to help us figure out what Greeks really thought about barbarians--and about themselves.

Roman History ESHLEMAN, KENDRA J
Fall 2020
A study of the social, political and cultural history of ancient Rome from its foundation by Romulus to the rise of Constantine and late antiquity. The course will focus on the development of Roman social and political institutions, the Roman conquest of the Mediterranean, the evolution of Roman identity, and the rise and spread of Christianity. Emphasis will be on the study of the ancient sources: literary, historiographic, archaeological and epigraphic.

HIST229701
Russia under the Tsars EATON, NICOLE M
Fall 2020
In 1721, Peter the Great declared that Russia would be an Empire. That empire survived for almost two hundred years. This course will survey central issues in imperial Russian history, focusing on how the rulers of the Romanov dynasty solidified their rule and incorporated peoples of diverse cultures. Although Peter's dream collapsed in 1917, the key question to be asked in this course is: given all the forces threatening to tear the Russian Empire apart for so long, how was it that it survived--and even expanded--for so long?

HIST240101
U.S. History I RICHARDSON, HEATHER C Fall 2020
A survey of the political, social, economic, and intellectual developments that have shaped and influenced the growth of the United States from a colonial appendage to a world power. The course seeks to provide a firm chronological foundation for the study of the American past but seeks to go beyond narrative and to provide analytical insights into the institutions, society, economy, and ideas upon which American civilization is founded.

Consideration will be given to continuity, change, and conflict in American society.

HIST240601
This Land is Your Land: U. S. Environmental History VALENCIUS, CONEVERY B
Fall 2020
How have different environments, places, and resources shaped American history? We will survey main themes and events in the environmental history of the United States. We move from colonial-era differences in land use through contemporary environmental debates. We ask how American communities have used, defined, and fought over places and natural resources, from bison herds to nuclear stockpiles. We investigate intriguing aspects of our local Massachusetts environment: the Emerald Necklace of parks, the brass hoof prints of Harvard Square, even our nearby reservoir. No background in history is necessary to thrive in this class. Students in the sciences are welcome.

HIST241201
The Pacific Northwest MURPHY, THOMAS
Fall 2020
This course explores a region defined as today including the American states of Oregon, Washington, Idaho, and Alaska, plus the Canadian province and territory of British Columbia and the Yukon. Themes include Indigenous culture: Euro-American colonization; tensions between natural resource extraction and environmental preservation; labor and immigration; race relations; the emergence of United States and Canada as the region's two nation-states; the relationship of this region with its federal governments and national economies. There will be particular attention to the role of arrivals from New England in tying the Northwest to the East Coast of North America.

Leeches to Lasers: Medicine and Health in the United States VALENCIUS, CONEVERY B
Fall 2020
This course surveys key moments in the history of American medicine, from pre-contact indigenous medical systems through debates over Obamacare. We study the rise of institutional and professional structures in response to health needs and disease. We also examine cultural responses to epidemics, illness, and changing norms of well-being in American history. Our work and discussions will help participants read and evaluate diverse sources, construct solid arguments, and write effectively. Students intending to enter the health professions and science majors are welcome

HIST245501
American Fascisms GALLAGHER, CHARLES R
Fall 2020
Our goal is to understand the nature and role of the political right, right-wing extremism, and fascism in the U.S. from its European importation to the present. Beginning in the late nineteenth century, the course will address right-wing ideology in religion, politics, and culture both in Europe and the U.S. Topics will be connected to the theoretical underpinnings of European Fascism, its adaptation to the American landscape, and its persistence in modern discourse. The course will begin with a discussion of allegations of Trumpian fascism in the U.S. press in 2016.

HIST247501
America's War in Vietnam JACOBS, SETH S
Fall 2020
This course will examine America's thirty-year military involvement in Southeast Asia, one of the most controversial episodes in U.S. history. Students will read a wide variety of primary and secondary sources, from recently declassified state and Defense Department documents to poetry and

short stories. Course readings are selected from various points on the left-right political spectrum, with both "hawks" and "doves" receiving their day in court. Lectures will include the origins of the Cold War; the Eisenhower, Kennedy, Johnson, and Nixon presidencies; antiwar activism and other Vietnam era movements; and American soldiers' experience during and after service in Vietnam.

HIST248101
African-American History I MILLER, KAREN
Fall 2020
This two-semester survey examines the history and culture of African-Americans from the pre- colonial period to the present. The first semester treats the period before the middle passage, the evolution of slave and free society, the development of Black institutions, and the emergence of protest movements through the Civil War's end. During the second semester, the emphases are placed on issues of freedom and equality from Reconstruction, urban migration, and civil rights struggles through current consideration of race, class, and gender conflicts.

HIST248501
Foodways and Folkways in African American History MILLER, KAREN
Fall 2020
Food provides a lens through which to explore and compare the impact of this dispersal on a people as they moved, adapted long-held practices to new places, new times, and new concerns. This course focuses on several themes such as evolving food customs and traditions, how those traditions reflect the common bonds as well as the limitations of diaspora, the politics, economics, and health implications of food availability and scarcity, and the presence of food as a dynamic element in cultural production and representation in art, literature, film, and history. Students will examine and share their own familial food traditions and histories.

HIST249901
Partisan Politics: American Political Parties from 1754-2020 RICHARDSON, HEATHER C
Fall 2020
America's Founders believed political parties were divisive and hated them... until they formed their own. This course will follow the twists and turns of America's major political parties from Thomas Jefferson's Democratic Republicans, the Democrats, and the Whigs of the Early Republic, through today's Democrats and Republicans. We will look at how third parties, including the Know-Nothings, the Populists, and the Dixiecrats shifted public opinion. Political parties are the means by which political ideologies get transformed into policy. Examining how they shifted reveals how America has changed and stayed the same since the days when Jefferson, who organized America's first political party, said: "If I could not go to heaven but with a party, I would not go there at all."

HIST287101
Industrialization and Democratization in Korea HWANG, INGU
Fall 2020
This introductory course surveys the political and economic transformation of South Korea from decolonization through the high growth era to today's global neo-liberal age. It traces how a
war-ravaged country became a prosperous and industrialized nation. In exploring this transformation, it also examines the relationship between Korea's industrialization and its democratization: How did U.S. Cold War modernization impact the Korean state's economic strategy and it's political development? Why and how did Korean society campaign for social and political justice during the economic high growth era? The course also considers the reconfiguration of South Korea's political economy since the 1990s.

HIST287501
Development and Social Justice in Korea HWANG, INGU
Fall 2020
This course introduces students to the political and economic changes that South Korea experienced from the 1960s to the present and explores how these changes contributed to social unrest, to demands for greater democracy, and to other social justice issues. In doing so, it will address how South Korea's economic and political trajectory was informed by pressures at the international, national, and sub-national level and compare the South Korean case to that of other Asian nations.

HIST336401
Study and Writing of History: Space before Google Maps: Geography and Power PICONE, MARIA DE LOS ANGEL
Fall 2020
The omnipresence of Google Maps in our lives has homogenized the way we think about space, or at least the way we find places in space. This course will look at how past societies visualized space and, particularly, what geographical space can tell us about power structures. Through a number of case studies from around the world, we will explore how historians incorporate geographical space to historical analysis, the sources they use, and the methodological questions they raise. After examining case students from the last two centuries, students will produce a research paper on a topic of their choice.

HIST343701
Study and Writing: Murder, You Wrote: Sensational Homicides 19C LYERLY, CYNTHIA L
Fall 2020
Students in this course will write original research papers based on their analysis of the press coverage of a murder from the 1830s to the 1930s. Beginning in the 1830s, the penny press discovered that sensational cases of murder sold newspapers, which changed the way American readers approached these crimes. Sensational murder coverage reveals prevailing views about race, sex, sexuality, evil, violence, and much more. Students will choose a murder covered extensively in the press and will analyze some aspect of aspects of it in a way that contextualizes and historicizes it.

HIST400901
Tokyo 2020 SERAPHIM, FRANZISKA
Fall 2020
Tokyo 2020 takes this summer's Olympic Games as a starting point to interrogate intersections of historical processes at specific times and places comparatively and interdisciplinarily. The changing faces of nationalism and cosmopolitanism, sites of memory and urban renewal, iconographies of branding and identity, and especially of social displacement and environmental costs are all salient topics of the exploding literature on Tokyo 2020. Taking Tokyo 1940 (cancelled), Tokyo 1964, and Tokyo 2020 as the backbone of a historical inquiry, students co- design discussions and research projects that take up other Olympiads as points of comparisons and connections with the help of key terms in historical geography.

HIST404901
Farewell to Revolution: Post-Mao China through Film MO, YAJUN
Fall 2020
This seminar explores post-socialist China (1978-present) through its cinematic representation. Throughout the semester, we will view prominent films made in post-Mao era by art-house directors (such as Jia Zhangke) and blockbuster creators (such as Feng Xiaogang) and discuss how Chinese lived through and reflected back on the dramatic changes of the reform era. We will ask: How do contemporary Chinese remember the socialist revolution? What kind of future do they envision for themselves after China embraced global capitalism? How do varied filmmakers address the issues of gender and class inequality, family, ethnicity, modernity, and the nation through film?

HIST412201
Odysseys in the Western and Islamic Traditions SAJDI, DANA; ROSS, SARAH
Fall 2020
Bridging the traditional divide between "East" and "West," "Christendom" and "Islamdom" and viewing cultural production as rooted in the human experience, this course focuses upon similar literary and intellectual trajectories across Europe and the Middle East from antiquity to the late eighteenth century. We will examine a series of parallel texts that span the genres of epic, poetry, biography, autobiography and travel narrative. Students will be asked to read these texts in two ways: as an individual perspective (male or female) and as an odyssey--a literary repository of socio-cultural transformation and exchange.

HIST413301
Mid-East Nationalisms Compared: Arab-Turkish-Jewish BRAUDE, BENJAMIN
Fall 2020
Nationalisms in the Middle East developed in a distinctive way. In contrast to Europe, religion was more important than language. In contrast to Africa, they emerged prior to the rise of anti- colonialism. Although nationalisms in the Middle East have spawned conflicts within themselves and with each other, they have displayed remarkable similarities to each other. One consistent similarity is their fraught attempts to distinguish the so-called nation from the religious traditions out of which it emerged. This course will address these questions through comparing Arab, Jewish and Turkish nationalism in the nineteenth and twentieth centuries.

HIST422001
Romans and Barbarians FLEMING, ROBIN
Fall 2020
One of the chief objectives of this course is to understand Rome's metamorphosis in the West, after the empire's fall, and to come to grips with changing notions of Romanitas--"Romaness"-- from the second through the eighth centuries. The other objective is to understand the construction of power during this period: who had it, who lost it, how it was flaunted and used. We will discuss new sources of power invented in the period: relics, asceticism, military brotherhoods, elaborate burial, and ethnogenesis. The course will emphasize archaeological evidence as much as traditional textual evidence.

HIST422501
The Witch, the Church, and the Law REINBURG, VIRGINIA
Fall 2020
During the sixteenth and seventeenth centuries a convergence of political, social, and religious movements produced thousands of trials for crimes of witchcraft, sorcery, and superstition throughout Europe and in North America. This course explores these trials, particularly emphasizing their legal and ecclesiastical aspects. Related issues of popular belief in sorcery, magic, and diabolical activity will also be considered. Attention will be devoted to the question of why women were so frequently among the accused.

HIST423001
The Age of the Renaissance ROSS, SARAH
Fall 2020
During the late fourteenth century, Europe was attacked by the Four Horsemen of the apocalypse: Disease, War, Famine, and Death. In the face of widespread catastrophe, men and women began to seek stability and truth in new ways, within and beyond the confines of state and church. The sum of the many solutions they found is what we call the Renaissance (1350- 1650). This course introduces students to cultural and intellectual developments in Italy and Northern Europe, as well as European encounters with the New World.

HIST426701
Life and Death under Stalin EATON, NICOLE M
Fall 2020
Stalin's rule (1924-1953) marked the most transformational, dramatic, and violent period in Soviet History. The dramatic shifts in Soviet society led both to the long duration of the regime and to its ultimate collapse. The legacies of Stalin and "Stalinism" are still felt today in Russia and the other states of the former Soviet Union. This course is not so much about Stalin the man, as about the society that he helped create and the people who lived and died because of it.
Readings focus on ideology, violence, terror, empire, domesticity, resistance, true belief, and the Second World War.

HIST428901
A Hard Class with Difficult Books BOURG, JULIAN E
Fall 2020
If you made it from the course title to this description, then you are curious. And if you are an inquisitive person, then you should take this class: a history of ideas based on some of the most important and influential writings of all time, such as Henry David Thoreau's Civil Disobedience, Lewis Carroll's Alice's Adventures in Wonderland, Franz Kafka's The Trial, John Hersey's Hiroshima, and Frantz Fanon's Black Skin, White Masks. We will read serious books closely, discuss them deeply, and connect them to our lives. Are you up for the challenge? What else is college for?

HIST429401
Holocaust Literature: History, Memory, Legacy SHRAYER, MAXIM
Fall 2020
A brief overview of the history and legacy of the Shoah (Holocaust) followed by an examination of the variety of literary responses by witnesses and survivors, as well as by writers removed from the wartime horrors by distance, time, country, and language. Questions of ideology, metaphysics, ethics, aesthetics, memory, and cultural theory as formulated and debated in poetry, fiction, nonfiction, journalism, and discursive writings. The readings include works originally written in Russian, Yiddish, Polish, German, Italian, French, and English by Ilya Selvinsky, Vasily Grossman, Avrom Sutzkever, Tadeusz Borowski, Paul Celan, Primo Levi, Theodor Adorno, Elie Wiesel, Vladimir Nabokov, Hannah Arendt, Arthur Miller, W.G. Sebald and others. All the readings will be in English translation.

HIST430201
Borders and Frontiers in Modern Latin America PICONE, MARIA DE LOS ANGEL
Fall 2020
Did you know that Brazil's border with its neighbors is longer than the U.S.-Mexico and U.S.- Canada borders combined? But what do lines on a map mean? This course examines the historical making of frontiers in Latin America. From border negotiations to smuggling, we will trace how people imagined, experienced, and continue to transform border regions south of the Grande River.

HIST437301
Mexico between Fact and Fiction SELLERS-GARCIA, SYLVIA M
Fall 2020
Departing from Edmundo O'Gorman's notion of Latin America as an "invented" place, this course considers how the region has been imagined, distorted, and revised many times over hundreds of years. Focusing on a handful of moments or episodes from the colonial period to the twentieth century, we will read fiction, witness accounts, primary sources, and historical renderings. Our objective will not be to pin down the "facts," but to see what we can learn by examining diverse versions of the past alongside one another.

HIST441201
American Revolution, 1760-1805 STANWOOD, OWEN C
Fall 2020
The revolutionary crisis in British America started small--as an arcane debate over parliamentary taxation--but by the end of the eighteenth century had helped to create a new world order. It created a new nation, divided what had been a remarkably cohesive British Empire, and provided a salient example to other people fighting against arbitrary power in such diverse locales as France, Ireland, and St. Domingue. This class will examine the causes, course, and outcomes of the Revolution--not just in the future United States, but from Europe to the Caribbean and the North American interior.

HIST441701
Catholics and Slavery MURPHY, THOMAS
Fall 2020
This course concentrates on Roman Catholic practices of slaveholding in colonial and early republican America, with particular attention the Jesuit order's attempt to build and then support their Georgetown College through slave labor. Topics will include how Catholic pro- slavery thought was justified through reference to Scripture, philosophy, hierarchical authority, and lay benefaction. Of particular importance will the Church's assertion of its right to own slave property as a confirmation of its right to liberty of religious practice, as well as the Jesuits' preference for selling rather than freeing their slaves when they ended their pursuit of slaveholding in 1838.

HIST444101
A Nation of Immigrants? U.S. Immigration History to 1924 OH, ARISSA H
Fall 2020
In this course we will study the patterns, drivers, and consequences of migration to and within the United States from the colonial era to 1924. We will examine the rise of immigration and citizenship policies, and how westward expansion, imperial projects, and wars of conquest impacted who came, how they came, and how they lived in U.S. society. Using a broad array of sources, we will consider how these movements shaped--and were shaped by--ideas of race, class, gender, citizenship, and national identity.

HIST446801
Mass Incarceration in Historical Perspective ZUNIGA NIETO, CARLOS GERAR
Fall 2020
We live in an era when prisons have become a pressing social problem in the United States. As an important historical development, prisons around the world have grown over the past two hundred years as regimes of incarceration have developed and expanded in colonial, liberal, neo-liberal, and authoritarian state systems. Drawing on readings across time and space, the course will familiarize students with historical events and philosophical ideas that cause, shape, and sustain cultures of confinement. Students will develop an understanding of the current criminal justice reform policy challenges and potential solutions to confinement in global penal regimes.

HIST447601
Social Action in America JOHNSON, MARILYNN
Fall 2020
This service-learning course examines the history of social action in twentieth-century America. In an effort to understand how systems of power have shaped race, class, and gender relations, fostered inequality, and spurred activism, we will conduct case studies of several liberal and radical social movements including settlement houses, the labor movement, Alinsky-style community organizing, southern civil rights, and the War on Poverty. Students in the class must also participate in a local community service/action project for at least 3 hours per week, the functions and history of which will be the subject of classroom discussion, service reflection, and research.

HIST448701
Black Radical Thought and Politics in the African Diaspora 1900-1945
SUMMERS, MARTIN A
Fall 2020
Framed by the first Pan-African conference in London in 1900 and the fifth one in Manchester in 1945, this course explores the global struggle against white supremacy undertaken by people of African descent. We will examine how intellectuals, political activists, and artists in the African diaspora articulated a variety of radical ideologies to pursue a liberationist politics within the context of colonialism, Jim Crow, and anti-black racism in the Caribbean and Latin America.
Topics include: black nationalism; pan-Africanism; black artistic movements and cultural production such as the Harlem Renaissance, the Haitian Renaissance, Negritude, and jazz; and black internationalism.

HIST449501
U.S. Foreign Policy I JACOBS, SETH S
Fall 2020
This course is the first half of a two semester survey of the history of U.S. foreign relations from the Revolutionary War through the present day. Students will examine conflicting interpretations of America's role in the world and trace how that role has changed as the nation grew from thirteen isolated, parochial communities on the Atlantic coast to the greatest military and economic superpower in history. Important topics include the territorial expansion of the American empire, the development of - and debate over - constitutional powers, and the struggle for American markets in Asia and elsewhere.

HIST450801
The Vatican and International Politics from the French Revolution to the Collapse of Communism
RAFFERTY, OLIVER P
Fall 2020
The aim is to explore how the Vatican wielded such influence on modern history despite its territorial insignificance. We will look at issues such as: why the Vatican continued to be an important player on the international stage even after the abolition of the Papal States; did it resist modern progressive developments; why in the twentieth century did the Vatican seem to align itself with Fascism; did Pope Pius XII really keep silent in the face of the Holocaust during World War II; and what role did the Vatican play in fall of European Communism.

HIST455201
Race, Rights, and the Law ROGERS, ALAN
Fall 2020
This course is organized around a question recently raised by Supreme Court Justice Sonia Sotomayor: What role should the long dark history and the contemporary reality of racism in the United States play in the Court's decision making? Students will explore the checkered relationship between race, rights--both civil and criminal--and the law, beginning with slavery and culminating with the so-called Ferguson effect. Students will read, discuss and write about major Court decisions, look behind the law for evidence of cultural and political bias, and note how American politicians and jurists have "played the race card."

HIST480401
Divided Korea HWANG, INGU
Fall 2020
The Korean Peninsula has remained one of the most internationally contested areas since its division in 1945. Using a combined chronological and thematic approach, this upper-division course delves into the local, regional, and global factors that contributed to this division and its perpetuation. The course addresses the political, economic, social, and cultural impact of this division on Koreans and on the world.

HIST519201
Senior Colloquium: Environmental History ZHANG, LING
Fall 2020
Since the 1970s, the field of environmental history has evolved through several stages. At every stage, it encountered new theoretical challenges, adopted new methodologies, embraced new research possibilities, and thus allowed itself to expand toward broader horizons. This course leads students to experience various transformations of environmental history by reading several classic texts. We will begin with traditional historical critiques from the perspectives of political economy and political ecology, then move to interdisciplinary inquiries strongly informed by natural science, and end with the recent developments in multi-species ethnography, materiality studies, and post-humanist thinking from social science
Credits: 03

HIST527501
Senior Colloquium: 1916: The World at War RAFFERTY, OLIVER P
Fall 2020
Unlike other courses you may have taken, the aim here is to give students an experience of concentrated study on a single year of the First World War, 1916. Within that parameter there will be twelve topics which will include Gallipoli, the Somme, the Battle of Jutland, and the war on the Eastern Front. Each student will become an expert in two such topics. Students will read a general book on the war in 1916, prepare their two areas of expertise and read two large books on World War I which will provide the context for the concentration on 1916. This is an intense project and is not for the faint hearted. A lot of reading is required, but you will emerge as an expert on WWI in general and of the war in 1916 in particular.

HIST546601
Senior Colloquium: Race and Inequality in Modern America GLASS, MICHAEL
Fall 2020
This course examines the influence of race on American politics during the twentieth century. We will analyze how at several key moments, racial ideologies influenced the formation of laws, public policies, and political institutions. We will also trace how notions of race have changed over time, and we will compare the experiences of different racialized groups. Topics covered include immigration restriction, World War II, suburbanization, and mass incarceration. This comparative analysis will allow us reflect on how past decisions continue to influence contemporary realities.

HIST790101
Colloquium for Master's Degree Students MATUS, ZACHARY A
Fall 2020
This graduate colloquium is required for first and second year master's degree students in history. In it, we will explore the basics of a career as a professional historian, exploring the concepts of history, historiography and theory, and practicing how to conduct research, write a variety of historical pieces, teach, design courses, and create museum exhibits. We will also look at how to apply the skills used in graduate school to finding a future either in the academy or as an #altac.
Credits: 03
Room and Schedule: TH 3-5 25;ONLINE;SYNCHRONOUS;
Satisfies Core Requirement: None
Prerequisites: Required Course for History M.A. Students.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually

HIST821001
Graduate Seminar: Medieval History FLEMING, ROBIN
Fall 2020
Students in this seminar will write original research papers on some topic in medieval social, economic or political history. The topic will be one upon which the student and professor have agreed, and will be based primarily on original sources. Students will not only be required to write a paper, but to read and critique all papers written in the seminar. The final paper will be a polished and rewritten piece incorporating the critiques of the professor and other graduate students in the seminar.

History Courses: Spring 2021

HIST100601
Asia in the World II MO, YAJUN
Spring 2021
This course examines Asia in the shaping of the modern world, from competing definitions of empires circa 1800 to the rise of the notion of the twenty-first century as a "Pacific Century." It investigates the definition(s) of Asia as a world region, explores transnational interactions, and emphasizes Asians as historical actors via written, visual, and aural sources. Events are placed in the context of key historical paradigms, including varying definitions of modernity, the rise of the nation-state, the birth of mass politics, new mechanisms of war, the language of self- determination, changing views of gender, shifting types of media/consumption, etc.

HIST100901
The Power of Ideas/Ideas of Power II BOURG, JULIAN E
Spring 2021
This lecture course traces the global history of ideas during the modern era since 1800. Following the story of thinkers and artists will lead us to consider the many -isms that have shaped our world, from romanticism and modernism to liberalism, socialism, conservativism, and fascism. We will investigate the connection of intellectual history to modern forces such as revolutionary nationalism, capitalism, and colonialism, and we will discuss different historically specific notions of power with respect to selfhood, society, politics, economics, gender, race, religion, and science. Alternative perspectives, including not ruling the world, will be considered.
Credits: 03
Room and Schedule: ONLINE;ASYNCHRONOUS; **Satisfies Core Requirement:** History II **Prerequisites:** None **Corequisites:** None **Cross-listed with:** None **Frequency:** Periodically **Student Level:** CORE
